Skills for Green Jobs Olga Strietska-Ilina,Christine Hofmann,Mercedes Durán Haro,2011 The shift to a green economy is increasing the pace of change in labour markets and skill needs. This study of 21 countries, which represent 60 per cent of the world population, shows that economies moving towards greener production can seize the potential for job creation if they deal effectively with the coming structural change and transformation of existing jobs. The report examines the experiences of developed and developing countries in adjusting their training provision to meet new demand of a greener economy. It shows that while few new occupations emerge in the transition to greener work, massive change occurs in existing occupations. What is more, changes in skill profiles happen at all levels of qualifications and across all sectors, and require action to make the provision of education and training relevant to labour market needs. While the net employment effects of greening the economy are estimated to be positive, carbon-intensive industries are expected to lose jobs. Successful transitions from old to new, greener industries and occupations will require efficient retraining and skills upgrading. A key element of the transformation must be to target training initiatives to segments of the population typically at a disadvantage in the labour market. Skills development is critical to unlocking the employment potential of green growth, yet skills policies and environmental policies are still often dealt with in isolation from one another. To avoid future skill shortages, the report recommends that countries devise strategies based on well-informed policy decisions, social dialogue, and coordination among ministries and between employers and training providers.

IIMA - Economic Sutra Satish Y. Deodhar,2024-03-21 A general perception exists that ancient Indian literature on economic matters is fatalistic and an admixture of sacred and secular thoughts. Economic Sutra provides a comprehensive perspective on the elements of Indian economic thought leading up to and after the Arthashastra. Economic Sutra is a perception-correction initiative to distil the Indian mind in the realm of economic thoughts and behaviour as brought out by the ancient Indian authors. It highlights the broader spread of economic ideas both prior to and sometime after Kautilya, giving insights into the purpose, actions and vision of our forefathers.

Application of Phytotechnologies for Cleanup of Industrial, Agricultural and Wastewater Contamination Peter A. Kulakow,Valentina V. Pidlisnyuk,2009-11-03 As government and community leaders, private companies, citizens, and applied scientists search for low-cost methods to cleanup environmental pollution, phytotechnologies can contribute to the solution by utilizing natural processes to reduce environmental risk. Phytotechnologies use vegetation to manage environmental contaminants in soil, surface water, and groundwater based on site-specific design considerations that can save 50 to 75 percent of the capital and operating costs compared to conventional remediation and containment technologies. Successful phytotechnology applications are based on scientific knowledge of plant physiology, chemical contaminants, climate, and soil conditions. This book presents current research findings that address soil and water contamination with obsolete pesticides, radionuclides and other inorganic and organic contaminants. This book documents international sharing of information by scientists and stakeholders seeking to use the best available information: to disseminate existing knowledge on phytotechnologies and exchange experience of field-scale applications for cleanup of industrial, agricultural, and wastewater contamination, to assess existing knowledge and identify research needs and directions for future work especially in regard to environmental management in Central and Eastern Europe and Central Asia, and to promote collaboration between different countries in preparing applications for environmental remediation and restoration.

The Accidental Empire Gershom Gorenberg, 2007-03-06 The untold story, based on groundbreaking original research, of the actions and inactions that created the Israeli settlements in the occupied territories After Israeli troops defeated the armies of Egypt, Syria, and Jordan in June 1967, the Jewish state seemed to have reached the pinnacle of success. But far from being a happy ending, the Six-Day War proved to be the opening act of a complex political drama, in which the central issue became: Should Jews build settlements in the territories taken in that war? The Accidental Empire is Gershom Gorenberg's masterful and gripping account of the strange birth of the settler movement, which was the child of both Labor Party socialism and religious extremism. It is a dramatic story featuring the giants of Israeli history—Moshe Dayan, Golda Meir, Levi Eshkol, Yigal Allon—as well as more contemporary figures like Ariel Sharon, Yitzhak Rabin, and Shimon Peres. Gorenberg also shows how the Johnson, Nixon, and Ford administrations turned a blind eye to what was happening in the territories, and reveals their strategic reasons for doing so. Drawing on newly opened archives and extensive interviews, Gorenberg reconstructs what the top officials knew and when they knew it, while weaving in the dramatic first-person accounts of the settlers themselves. Fast-moving and penetrating, The Accidental Empire casts the entire enterprise in a new and controversial light, calling into question much of what we think we know about this issue that continues to haunt the Middle East.

Medications for Opioid Use Disorder Save Lives National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Committee on Medication-Assisted Treatment for Opioid Use Disorder, 2019-06-16 The opioid crisis in the United States has come about because of excessive use of these drugs for both legal and illicit purposes and unprecedented levels of consequent opioid use disorder (OUD). More than 2 million people in the United States are estimated to have OUD, which is caused by prolonged use of prescription opioids, heroin, or other illicit opioids. OUD is a life-threatening condition associated with a 20-fold greater risk of early death due to overdose, infectious diseases, trauma, and suicide. Mortality related to OUD continues to escalate as this public health crisis gathers momentum across the country, with opioid overdoses killing more than 47,000 people in 2017 in the United States. Efforts to date have made no real headway in stemming this crisis, in large part because tools that already exist—like evidence-based medications—are not being deployed to maximum impact. To support the dissemination of accurate patient-focused information about treatments for addiction, and to help provide scientific solutions to the current opioid crisis, this report studies the evidence base on medication assisted treatment (MAT) for OUD. It examines available evidence on the range of parameters and circumstances in which MAT can be effectively delivered and identifies additional research needed.
