Mute Magazine - Vol 2 #5, It's Not Easy Being Green, 2007-04 This issue features articles by Anthony Davies, Paul Helliwell, Howard Slater, and Peter Suchin, and a special section on climate change and capital with texts by Will Barnes, James Woudhuysen, Tim Forsyth and Zoe Young, Kate Rich, George Caffentzis, Anthony Iles, Chris Wright, and Samantha Alvarez.

The Lord's Radio Mark Ward Sr., 2017-07-19 Evangelical Christianity--the faith professed by one in four Americans--exerts an enormous influence in American society. Believed by some to have originated as a reaction to the social revolution of the 1960s, evangelicalism as a distinct subculture in fact dates to the advent of radio. The evangelical faithful flocked to the airwaves, developing a nationwide mass culture as listeners across denominational lines heard the same popular preachers and music. Evangelicals left behind the fundamentalism of the early 20th century as broadcast ministries laid the foundation for the culturally engaged New Christian Right of the late 20th century. This historical ethnography presents the era's major radio evangelists and songwriters in the own words, drawing on their writings and recordings, as well as songbooks, liner notes and song story anthologies of the period.

Youth Work Process, Product and Practice Jon Ord, 2016-06-17 Youth Work Process and Practice provides an overview of the central concerns in youth work today, exploring what youth work actually consists in and developing an authentic theoretical framework for practice. This accessible textbook places the role of the curriculum and idea of practice as a process at the centre of youth work. Exploring important aspects of practice – such as empowerment, participation and choice, group work, experiential learning and the importance of relationship building – Jon Ord explains how the idea of curriculum can be used to communicate, legitimate and develop youth worth practice, as well as help to articulate its value and importance. The book includes a detailed and up-to-date analysis of the policy climate, looks at the implications of its focus on measurability and outcomes and discusses the impact of devolution in the UK on youth work practice. It contrasts dominant contemporary perspectives of youth and youth culture and argues that, rather than competing, 'informal' and 'social' education are twin aspects of an educational practice which must emphasises both individual development and wider social change. Youth Work Process and Practice is an essential read for all students of youth and community work and will also be an important reference for practising youth workers.

Internet Research Annual Mia Consalvo, Nancy Baym, Jeremy Hunsinger, Klaus Bruhn Jensen, 2004 Internet Research Annual offers a selection of the best work presented at the first three conferences of the Association of Internet Researchers, and provides a useful overview of the cutting-edge in Internet studies. Established scholars and new researchers address issues such as communities on/off line, the Internet as a methodological tool and space for research, and the places, politics, and policies of the Internet, creating a volume that comprehensively covers the field of Internet research. Also included are a brief history of the organization, a list of previously published papers from the conferences, and works by several of the keynote speakers including Phil Agre, Barbara Warnick, Bill Dutton, Sheizaf Rafaeli, Susan Herring, Robin Mansell, and much more.

Popular Music Censorship in Africa Martin Cloonan, 2016-03-23 In Africa, tension between freedom of expression and censorship in many contexts remains as contentious, if not more so, than during the period of colonial rule which permeated the twentieth century. Over the last one hundred years popular musicians have not been free to sing about whatever they wish to, and in many countries they are still not free to do so. This volume brings together the latest research on censorship in colonial and post-colonial Africa, focusing on the attempts to censor musicians and the strategies of resistance devised by musicians in their struggles to be heard. For Africa, the twentieth century was characterized first and foremost by struggles for independence, as colonizer and colonized struggled for territorial control. Throughout this period culture was an important contested terrain in hegemonic and counter-hegemonic struggles and many musicians who aligned themselves with independence movements viewed music as an

important cultural weapon. Musical messages were often political, opposing the injustices of colonial rule. Colonial governments reacted to counter-hegemonic songs through repression, banning songs from distribution and/or broadcast, while often targeting the musicians with acts of intimidation in an attempt to silence them. In the post-independence era a disturbing trend has occurred, in which African governments have regularly continued to practise censorship of musicians. However, not all attempts to silence musicians have emanated from government, nor has all contested music been strictly political. Religious and moral rationale has also featured prominently in censorship struggles. Both Christian and Muslim fundamentalism has led to extreme attempts to silence musicians. In response, musicians have often sought ways of getting their music and message heard, despite censorship and harassment. The book includes a special section on case studies that highlight issues of nationality.

Instructional Design: Concepts, Methodologies, Tools and Applications Management Association, Information Resources, 2011-03-31 Successful educational programs are often the result of pragmatic design and development methodologies that take into account all aspects of the educational and instructional experience. Instructional Design: Concepts, Methodologies, Tools and Applications presents a complete overview of historical perspectives, new methods and applications, and models in instructional design research and development. This three-volume work covers all fundamental strategies and theories and encourages continued research in strengthening the consistent design and reliable results of educational programs and models.

Museums of Communism Stephen M. Norris, 2020-11-03 How did communities come to terms with the collapse of communism? In order to guide the wider narrative, many former communist countries constructed museums dedicated to chronicling their experiences. Museums of Communism explores the complicated intersection of history, commemoration, and victimization made evident in these museums constructed after 1991. While contributors from a diverse range of fields explore various museums and include nearly 90 photographs, a common denominator emerges: rather than focusing on artifacts and historical documents, these museums often privilege memories and stories. In doing so, the museums shift attention from experiences of guilt or collaboration to narratives of shared victimization under communist rule. As editor Stephen M. Norris demonstrates, these museums are often problematic at best and revisionist at worst. From occupation museums in the Baltic States to memorial museums in Ukraine, former secret police prisons in Romania, and nostalgic museums of everyday life in Russia, the sites considered offer new ways of understanding the challenges of separating memory and myth.

Energy Security Challenges for the 21st Century Gal Luft, Anne Korin, 2009-08-10 The impact of energy on global security and economy is clear and profound, and this is why in recent years energy security has become a source of concern to most countries. However, energy security means different things to different countries based on their geographic location, their endowment of resources their strategic and economic conditions. In this book, Gal Luft and Anne Korin with the help of twenty leading experts provide an overview of the world's energy system and its vulnerabilities that underlay growing concern over energy security. It hosts a debate about the feasibility of resource conflicts and covers issues such as the threat of terrorism to the global energy system, maritime security, the role of multinationals and non-state actors in energy security, the pathways to energy security through diversification of sources and the development of alternative energy sources. It delves into the various approaches selected producers, consumers and transit states have toward energy security and examines the domestic and foreign policy tradeoffs required to ensure safe and affordable energy supply. The explains the various pathways to energy security and the tradeoffs among them and demonstrates how all these factors can be integrated in a larger foreign and domestic policy framework. It also explores the future of nuclear power, the complex relations between energy security and environmental concerns and the role for decentralized energy as a way to enhance energy security.

The Biology of Exercise Michael J. Joyner, Julieen R. Zierath, John A. Hawley, 2017 Exercise training provokes widespread transformations in the

human body, requiring coordinated changes in muscle composition, blood flow, neuronal and hormonal signaling, and metabolism. These changes enhance physical performance, improve mental health, and delay the onset of aging and disease. Understanding the molecular basis of these changes is therefore important for optimizing athletic ability and for developing drugs that elicit therapeutic effects. Written and edited by experts in the field, this collection from Cold Spring Harbor Perspectives in Medicine examines the biological basis of exercise from the molecular to the systemic levels. Contributors discuss how transcriptional regulation, cytokine and hormonal signaling, glucose metabolism, epigenetic modifications, microRNA profiles, and mitochondrial and ribosomal functions are altered in response to exercise training, leading to improved skeletal muscle, hippocampal, and cardiovascular function. Cross talk among the pathways underlying tissue-specific and systemic responses to exercise is also considered. The authors also discuss how the understanding of such molecular mechanisms may lead to the development of drugs that mitigate aging and disease. This volume will therefore serve as a vital reference for all involved in the fields of sports science and medicine, as well as anyone seeking to understand the molecular mechanisms by which exercise promotes whole-body health.

Wapishana Ethnoecology Thomas Henfrey, 2018-05-25 This landmark monograph in ethnoecology is now available in print format for the first time. Based on long-term fieldwork in Guyana during 1998, 1999 and 2000, it examines relationships between the ecological knowledge of Wapishana hunters and equivalent areas of ecological science. It places this in the ethnographic context of Wapishana settlement, subsistence and symbolism, and the wider context of the political ecology of Guyana's economic liberalisation and the consequent exposure of the indigenous peoples of Guyana's Rupununi region to extractive industries and international conservation interests for the first time. The result is a robust argument, grounded in extensive data and analysis, for alternative trajectories in conservation and international development rooted in the skills, knowledge and interests of indigenous users and custodians of biodiversity.

Analyzing Digital Discourse Patricia Bou-Franch, Pilar Garcés-Conejos Blitvich, 2018-09-29 This innovative edited collection presents new insights into emerging debates around digital communication practices. It brings together research by leading international experts to examine methods and approaches, multimodality, face and identity, across five thematically organised sections. Its contributors revise current paradigms in view of past, present, and future research and analyse how users deploy the wealth of multimodal resources afforded by digital technologies to undertake tasks and to enact identity. In its concluding section it identifies the ideologies that underpin the construction of digital texts in the social world. This important contribution to digital discourse studies will have interdisciplinary appeal across the fields of linguistics, socio-linguistics, pragmatics, discourse analysis, gender studies, multimodality, media and communication studies.

The Handbook of Discourse Analysis Deborah Schiffrin, Deborah Tannen, Heidi E. Hamilton, 2008-04-15 The Handbook of Discourse Analysis makes significant contributions to current research and serves as a comprehensive and authoritative guide to the central issues in contemporary discourse analysis. Features comprehensive coverage of contemporary discourse analysis. Offers an overview of how different disciplines approach the analysis of discourse. Provides analysis of a wide range of data, including political speeches, everyday conversation, and literary texts. Includes a varied range of theoretical models, such as relevance theory and systemic-functional linguistics; and methodology, including interpretive, statistical, and formal methods. Features comprehensive coverage of contemporary discourse analysis.

Convention on Contracts for the International Sales of Goods (CISG) Joseph Lookofsky, 2020-10-20 Also sometimes referred to as the Vienna Sales Convention, the Convention on Contracts for the International Sale of Goods (CISG) regulates the rights of buyers and sellers in international sales. The Convention, which first entered into effect in 1988, is the first sales law treaty to win acceptance on a worldwide scale. The current list of more than 90

Contracting States accounts for more than three-fourths of all world trade. The importance of the CISG in the international arena is underlined by thousands of reported decisions where the CISG has been held to apply, thus evidencing the conduct of countless international traders who-by default or by express choice-regularly subject their sales contracts to the Convention regime. The CISG has also impacted on sales legislation at national and regional (e.g. EU) levels. With this monograph as their guide, lawyers and scholars who deal with international sales contracts and sales contract disputes will obtain an excellent overview of the Convention, as well as valuable information as to all its 101 Articles, compromising key topic areas such as the following: Determining when the CISG applies; Freedom of contract under Article 6; Interpretation of the Convention and of CISG contracts; Sales contract formation, validity, defences to enforcement; Obligations of the parties, including conforming delivery & notice of non-conformity; Liability and remedies for breach, including specific performance, damages, avoidance/termination; Liability exemptions; Reservations under Articles 92-96. The Third Edition of this IEL monograph takes account of the latest scholarly commentary as well as key CISG case law worldwide.

Sydney Anglicans and the Threat to World Anglicanism Muriel Porter, 2017-05-15 Sydney Anglicans, always ultra-conservative in terms of liturgy, theology and personal morality, have increasingly modelled themselves on sixteenth century English Puritanism. Over the past few decades, they have added radical congregationalism to the mix. They have altered church services, challenged church order, and relentlessly opposed all attempts to ordain women as priests, let alone bishops. Muriel Porter unpacks how Australia's largest and, until recently, richest diocese developed its ideological fervour, and explores the impact it is having both in Australia and the Anglican Communion.

Multifunctional Nanocomposites for Energy and Environmental Applications Zhanhu Guo, Yuan Chen, Na Luna Lu, 2018-01-02 Focusing on real applications of nanocomposites and nanotechnologies for sustainable development, this book shows how nanocomposites can help to solve energy and environmental problems, including a broad overview of energy-related applications and a unique selection of environmental topics. Clearly structured, the first part covers such energy-related applications as lithium ion batteries, solar cells, catalysis, thermoelectric waste heat harvesting and water splitting, while the second part provides unique perspectives on environmental fields, including nuclear waste management and carbon dioxide capture and storage. The result is a successful combination of fundamentals for newcomers to the field and the latest results for experienced scientists, engineers, and industry researchers.

The Politics of China's Accession to the World Trade Organization Hui Feng, 2006-01-16 Grounded on a series of first-hand interviews with Chinese government officials, this book examines China's accession to the World Trade Organization, providing an 'inside' look at Chinese WTO accession negotiations. Presenting a systematic political economy model in analyzing Beijing's decision-making mechanisms, the book argues that China's WTO policy making is a state-led, leadership driven, and top-down process. Feng explores how China's determined political elite partly bypassed and partly restructured a largely reluctant and resistant bureaucracy, under constant pressure from an increasingly globalized international system. By addressing China's accession to the WTO from a political analysis perspective, the book provides a theoretically informed and intriguing examination of China's foreign economic policy making regime. The book highlights contemporary debates relating to state and institutionalist theory and provides new and useful insights into a significant development of this century.

Eating Disorders and Cultures in Transition Mervat Nasser, Melanie Katzman, Richard Gordon, 2003-09-02 Eating disorders: do they mark cultural transition? Eating disorders that were once viewed as exclusive to specific class and ethnic boundaries in western culture are now spreading worldwide. This issue is fully discussed in this groundbreaking volume. Eating Disorders and Cultures in Transition is written by an international group of authors to address the recent emergence of eating disorders in various areas of the world including countries in South America, Asia, Africa and Eastern Europe. It offers an in-depth analysis of the existing socio-cultural model arguing for the need to extend both our theoretical understanding and

clinical work to account properly for this global phenomenon. Eating disorders are seen as reflecting sweeping changes in the social and political status of women in the majority of societies that are now undergoing rapid cultural transition. This multidisciplinary, multinational volume reflects wide-ranging, intellectually stimulating and frequently provocative viewpoints. It promises to be of great interest to medical and mental health professionals, public policy experts and all those watching for the processes of cultural transformation and their impact on mental health.

English for Academic Purposes Cheryl Groth,Irene L.
