**Advances in Financial Machine Learning** Marcos Lopez de Prado, 2018-01-23 Machine learning (ML) is changing virtually every aspect of our lives. Today ML algorithms accomplish tasks that until recently only expert humans could perform. As it relates to finance, this is the most exciting time to adopt a disruptive technology that will transform how everyone invests for generations. Readers will learn how to structure Big data in a way that is amenable to ML algorithms; how to conduct research with ML algorithms on that data; how to use supercomputing methods; how to backtest your discoveries while avoiding false positives. The book addresses real-life problems faced by practitioners on a daily basis, and explains scientifically sound solutions using math, supported by code and examples. Readers become active users who can test the proposed solutions in their particular setting. Written by a recognized expert and portfolio manager, this book will equip investment professionals with the groundbreaking tools needed to succeed in modern finance.

Images in Use Matteo Stocchetti, Karin Kukkonen, 2011-10-26 News coverage of EU negotiations, children's war memories or TV series glamourising political processes – images pervade both private and public discourse, and visual communication plays a key role in our social negotiation of values. Conceptualising images as “images in use”, this volume considers the agencies behind visual communication and its impact on society. Images in Use engages critically with traditional approaches to visual analysis, offers suggestions for alternative, socially situated analyses of images and demonstrates the explanatory force of thinking through “images in use” in a series of case studies. The conceptual contributions consider broader issues of critical theory, representation, as well as the mediatisation of politics. The case studies offer a survey of current visual communication including

news coverage, political cartoons, political rhetoric, memory culture, celebrity humanitarianism, reality TV, as well as the narratives of blockbuster cinema and comics. This volume proposes a new approach to visual communication, situating images in their social contexts and identifying the real, rhetorical and political impact of their use.

**Globalization and Health** Ronald Labonté, Ted

Schrecker, Corinne Packer, Vivien Runnels, 2009-05-07

Contemporary globalization has had tremendous impact on health equity across the globe. However, no volume has systematically analyzed the relationship between globalization and global trends in health outcomes. This book consolidates and updates the findings of a global research project undertaken by the Globalisation Knowledge Network (GKN) of the World Health Organization's Commission on Social Determinants of Health. Chapters examine such questions as: How has trade liberalisation affected the social determinants of health? How has globalization affected food security, nutrition and equitable access to water and sanitation? How well do present global governance structures take account of the health equity effects associated with the social determinants of health? This landmark volume will be a necessary addition for researchers and scholars studying the field of globalization, health and social policy, and public health across the social sciences.

overview of the impact of globalization on media practices. The authors explore the effects of global media coverage on human affairs and communication, as well as the cultural-political implications for the United States and around the world.

*Mirror of Morality* Julia K. Murray, 2007-01-31 *Mirror of Morality* takes an interdisciplinary look at an important form of pictorial art produced during two millennia of Chinese imperial rule. Ideas about individual morality and state ideology were based on the ancient teachings of Confucius with modifications by later interpreters and government institutions. Throughout the imperial period, members of the elite made, sponsored, and inscribed or used illustrations of themes taken from history, literature, and recent events to promote desired conduct among various social groups. This dimension of Chinese art history has never before been broadly covered or investigated in historical context. The first half of the study examines the nature of narrative illustration in China and traces the evolution of its functions, conventions, and rhetorical strategies from the second century BCE through the eleventh century. Under the stimulus of Buddhism, sophisticated techniques developed for representing stories in visual form. While tracing changes in the social functions and cultural positions of narrative illustration, the second half of the book argues that narrative illustration continued to play a vital role in elite visual culture.

*Creating Effective Presentations* Angela Peery, EdD, national consultant and author, 2011-02-16 *Creating Effective Presentations: Staff Development with Impact* presents a comprehensive approach to creating compelling, interactive staff development sessions. Defending Beef Nicolette Hahn Niman, 2021-07-20 “Nicolette Hahn Niman sets out to debunk just about everything you think

you know . . . She's not trying to change your mind; she's trying to save your world."—Los Angeles Times "Elegant, strongly argued."—The Atlantic (named a "Best Food Book") As the meat industry—from small-scale ranchers and butchers to sprawling slaughterhouse operators—responds to COVID-19, the climate threat, and the rise of plant-based meats, *Defending Beef* delivers a passionate argument for responsible meat production and consumption—in an updated and expanded new edition. For decades it has been nearly universal dogma among environmentalists that many forms of livestock—goats, sheep, and others, but especially cattle—are Public Enemy Number One. They erode soils, pollute air and water, damage riparian areas, and decimate wildlife populations. As recently as 2019, a widely circulated Green New Deal fact sheet even highlighted the problem of "farting cows." But is the matter really so clear-cut? Hardly. In *Defending Beef, Second Edition*, environmental lawyer turned rancher Nicolette Hahn Niman argues that cattle are not inherently bad for the earth. The impact of grazing can be either negative or positive, depending on how livestock are managed. In fact, with proper oversight, livestock can play an essential role in maintaining grassland ecosystems by performing the same functions as the natural herbivores that once roamed and grazed there. With more public discussions and media being paid to connections between health and diet, food and climate, and climate and farming—especially cattle farming, *Defending Beef* has never been more timely. And in this newly revised and updated edition, the author also addresses the explosion in popularity of "fake meat" (both highly processed "plant-based foods" and meat grown from cells in a lab, rather than on the hoof). *Defending Beef* is simultaneously a book about big issues and the personal journey of the author, who continues to fight for animal welfare and good science. Hahn Niman shows how dispersed, grass-based, smaller-scale farms can and should become the basis of American food production.

Machine Learning for Asset Managers Marcos M. López de Prado, 2020-04-22 Successful investment strategies are specific implementations of general theories. An investment strategy that lacks a theoretical justification is likely to be false. Hence, an asset manager should concentrate her efforts on developing a theory rather than on backtesting potential trading rules. The purpose of this Element is to introduce machine learning (ML) tools that can help asset managers discover economic and financial theories. ML is not a black box, and it does not necessarily overfit. ML tools complement rather than replace the classical statistical methods. Some of ML's strengths include (1) a focus on out-of-sample predictability over variance adjudication; (2) the use of computational methods to avoid relying on (potentially unrealistic) assumptions; (3) the ability to learn complex specifications, including nonlinear, hierarchical, and noncontinuous interaction effects in a high-dimensional space; and (4) the ability to disentangle the variable search from the specification search, robust to multicollinearity and other substitution effects.

*Why?* Charles Tilly, 2021-04-12 Mit einer Einführung von Thomas Hoebel und Stefan Malthaner Menschen geben von klein auf Begründungen an oder fordern von anderen Gründe ein, und dies tun sie ein Leben lang. Der namhafte Soziologe, Historiker und Politikwissenschaftler Charles Tilly untersucht die Art und Weise, wie Menschen Beziehungen zu anderen Menschen aus den von ihnen angegebenen Gründen aufbauen, verhandeln oder beenden. Unabhängig von dem, was sie sonst noch tun, wenn sie Gründe angeben, gestalten Menschen durch Begründungen ihr soziales Leben. Das Buch handelt nicht davon, ob angegebene Begründungen richtig oder falsch, gut oder schlecht, plausibel oder unglaubwürdig sind. Vielmehr konzentriert es sich auf den sozialen Prozess des Begründens. Jede Art von Begründung hat bestimmte Eigenschaften und variiert im Inhalt – je nachdem,

welche sozialen Beziehungen die Gebenden und die Nehmenden von Gründen miteinander verbinden. Insofern hat jede neben anderen Konsequenzen auch Auswirkungen auf ihr soziales Miteinander: Begründungen bestätigen eine bestehende Beziehung, sie bringen sie wieder in Ordnung, erheben Anspruch auf eine neue Beziehung oder bestreiten einen solchen Anspruch. Ebenso handeln Menschen, die Gründe geben oder nehmen, damit ihren Status zueinander aus, ob sie gleichrangig oder ungleich sind. In allen Fällen hängt jedoch die Akzeptanz von angegebenen Begründungen davon ab, ob sie zu den sozialen Beziehungen passen, die zwischen den Beteiligten vorherrschen. Tilly beschreibt forschend, gleichsam einführend, was geschieht, wenn Menschen in ihrem Umfeld Gründe angeben, Gründe präsentiert bekommen oder solche miteinander aushandeln. Angereichert mit Anekdoten über alltägliche soziale Erfahrungen bietet Tilly den Leserinnen und Lesern eine faszinierende Geschichte über die Bedeutung von Begründungen in ihrem Leben. In der Reihe Positionen erscheinen klassische und neue Texte, die sich damit auseinandersetzen, was wegweisende Sozialforschung methodisch und theoretisch ausmacht, und die aufzeigen, was sie leisten kann. Sozialforschung weiterdenken heißt, mit Positionen zu experimentieren, die inspirieren und irritieren, weil sie die theoretischen und methodischen Konventionen sozialwissenschaftlichen Forschens hinterfragen, überwinden oder neu arrangieren. Die ausgewählten Werke fordern allesamt heraus; sie geben Orientierung und enthalten überraschende Einsichten; sie machen Deutungsangebote und ermuntern zu Kritik. Ziel der Reihe des Hamburger Instituts für Sozialforschung ist es, methodisch und theoretisch kreativen Impulsen mehr Gewicht in wissenschaftlichen und öffentlichen Diskursen zu verleihen. Dazu versammelt Positionen sowohl Originaltexte als auch Übersetzungen.

Holy Terrors, Second Edition Bruce Lincoln, 2010-03-15 It is tempting to regard the perpetrators of the September 11th

terrorist attacks as evil incarnate. But their motives, as Bruce Lincoln's acclaimed *Holy Terrors* makes clear, were profoundly and intensely religious. Thus what we need after the events of 9/11, Lincoln argues, is greater clarity about what we take religion to be. *Holy Terrors* begins with a gripping dissection of the instruction manual given to each of the 9/11 hijackers. In their evocation of passages from the Quran, we learn how the terrorists justified acts of destruction and mass murder "in the name of God, the most merciful, the most compassionate." Lincoln then offers a provocative comparison of President Bush's October 7, 2001 speech announcing U.S. military action in Afghanistan alongside the videotaped speech released by Osama bin Laden just a few hours later. As Lincoln authoritatively demonstrates, a close analysis of the rhetoric used by leaders as different as George W. Bush and Osama bin Laden—as well as Mohamed Atta and even Jerry Falwell—betrays startling similarities. These commonalities have considerable implications for our understanding of religion and its interrelationships with politics and culture in a postcolonial world, implications that Lincoln draws out with skill and sensitivity. With a chapter new to this edition, "Theses on Religion and Violence," *Holy Terrors* remains one of the essential books on September 11 and a classic study on the character of religion. "Modernity has ended twice: in its Marxist form in 1989 Berlin, and in its liberal form on September 11, 2001. In order to understand such major historical changes we need both large-scale and focused analyses—a combination seldom to be found in one volume. But here Bruce Lincoln . . . has given us just such a mix of discrete and large-picture analysis."—Stephen Healey, *Christian Century* "From time to time there appears a work . . . that serves to focus the wide-ranging, often contentious discussion of religion's significance within broader cultural dynamics. Bruce Lincoln's *Holy Terrors* is one such text. . . . Anyone still struggling toward a more nuanced comprehension of 9/11 would do well to spend time with this book."—Theodore Pulcini, *Middle East Journal*

The 1947 Partition in The East Subhasri Ghosh,2021-12-28 This book explores the experiences of people affected by the Partition of British India and princely states in 1947 through first-person accounts, memoirs, archival material, literature, and cinema. It focuses on the displacement, violence and trauma of the people affected and interrogates the interrelationships between nationalism, temporality, religion, and citizenship. The authors examine the mass migrations triggered by the 1947 Partition, amidst nationalist posturing, religious violence, and debates on crucial issues of refugee rehabilitation and redistribution of land and resources. It focuses on the drawing of the borders and the ruptures in the socio-cultural bonds within regions and communities brought on by demographic changes, violence, and displacement. The volume reflects on the significant mark left by the event on the socio-political sensibilities of various communities, and the questions of identity and citizenship. It also studies the effects of Partition on the politics of Bangladesh and India's east and northeast states, specifically Bengal, Assam and Tripura. A significant addition to the existing corpus on Partition historiography, this book will be of interest to modern Indian history, partition studies, border studies, sociology, refugee and migration studies, cultural studies, literature, post-colonial studies and South Asian studies, particularly those concerned with Bengal, Northeast India and Bangladesh.

**Marschner's Mineral Nutrition of Higher Plants** Horst Marschner, 2011-08-25 Respected and known worldwide in the field for his research in plant nutrition, Dr. Horst Marschner authored two editions of Mineral Nutrition of Higher Plants. His research greatly advanced the understanding of plant nutrition ranging from rhizosphere processes to nutrient uptake and utilization by plants in the field. While visiting field experiments in West Africa in 1996, Dr. Marschner contracted malaria and passed away, and until now this legacy title went unrevised. Despite the passage of time, it remains the definitive reference on plant mineral nutrition. Since the last edition, great progress has been made in the understanding of various aspects of plant nutrition. In recent years, the perspective on the mode of action of nutrients in plant metabolism and yield formation has shifted. Much progress has been made in the molecular aspects of nutrient uptake and transport within plants as well as the responses of plants to nutrient deficiency or toxicity. These and many other developments are covered in this long-awaited new edition.--P. [4] of cover.
