The New Arab Media Mahjoob Zweiri, Emma C. Murphy, 2012-04-27 The New Arab Media: Technology, Image and Perception provides a valuable introduction and analysis of some of the most important issues surrounding the new media revolution in the Middle East. In particular, the book examines the two Janus-like faces of the new media in the Middle-East: its role in reflecting developments within the region, as well as its function in projecting the Arab world outside the Middle East. Now available in paperback, the contributions address various aspects of new media developments, each one highlighting an aspect of the complexity of the relationship between new media developments and Middle Eastern cultures. The topics examined include: the impact of Al-Jazeera * implementation of the internet in the region * the use of the media for diplomacy and propaganda * image culture * the use of the internet by religious diasporas * information and communication technologies and the Arab Public Sphere * the influence of satellite television on Arab public opinion * the explosion of local radio stations in Jordan.

Sexually Transmitted Diseases Marylou Ambrose, Veronica Deisler, 2014-07-01 Nineteen million new STD infections occur each year. STDs have been around since there were humans, yet the history, causes, symptoms, treatment, and current topics surrounding these diseases are not always adequately addressed because of fear, embarrassment, and social stigma. This informative book discusses the causes and symptoms of the most common STDs, answers important questions, shows how real people deal with STDs, and much more.

Embryo Research in Pluralistic Europe D. Solter, D. Beylerveld, M.B. Friele, J. Holówka, H. Lilie, R. Lovell-Badge, C. Mandla, U. Martin, R. Pardo Avellaneda, 2013-03-09 Recent advances in techniques and understanding in the fields of genetics, embryology and reproductive biology have opened up new ways to treat a wide range of medical problems. They range from new options for infertility treatment and pre-implantation genetic diagnosis to stem-cell-based therapies for debilitating diseases. Since all these approaches involve the manipulation of human gametes, embryos or embryonic cells, and could also permit more contentious uses, they have stimulated a controversial debate as to what aims are desirable and to what extent experiments on human embryos are morally permissible, if permissible at all. The situation is further complicated by the fact that scientific projects are increasingly realized through international co-operation and that patients are increasingly ready to seek morally contentious medical treatment wherever it is available and thus to bypass national legislation. In view of this situation the Europäische Akademie assembled a temporary interdisciplinary project group in which scientists from universities and non-university research organizations in Europe working on the relevant subjects were brought together and charged with establishing a knowledge base and providing suggestions for long-term solutions that would be acceptable for society. Presented here are the results of this project, ranging from a discussion of the theoretical and practical possibilities in human-embryo experimentation and its alternatives in research on adult stem cells, a comparison of the situations and prospects of regulation of embryo research in Europe, a survey of European public attitudes, and a philosophical analysis of the arguments and argumentative strategies used in the debate.

Economic Lessons from China's Forty Years of Reform and Opening-up David Daokui Li, 2021-03-26 This book first shows that the past 40 years of China's economic reform and opening up represents the greatest magnitude of economic growth in history. Based on field trips, extensive and intensive interviews and literature surveys, this book argues that there are five general lessons for a rapid growing economy from China's economic reform and opening up, all in the area of the relationship between the government and the economy. First, the local governments need to be incentivized to help rapid entry and development of enterprises. Second, local governments need to be incentivized to help rapid land conversion from agricultural to non-agricultural. Third, financial deepening is vital; that is, inducing households to hold more and more financial assets in local currency. Financial deepening is essential to convert savings into investments. This requires financial stability, which is crucial. Fourth, the learning through opening up is the key to endogenous economic growth. The fundamental benefit of opening up is learning rather than enjoying comparative

advantage. The fifth and final lesson from China is that the central government must proactively manage the macroeconomy. The rationale is that enterprises compete with each other in games of industrial organization. In order to resolve this problem, proactive measures including market-oriented means, administrative orders and reform measures should be implemented. Overall, the main lesson from China's past 40 years of reform and opening up is that proper incentives and behavior of the government, local and central, are important for economic growth. China has been conducting reforms in this regard and as a result, the government more or less has been playing the role of a helping hand regarding economic growth, although China's economic system is far from perfect and many reforms are still needed.

Integrated Water Resources Management in Latin America Asit K. Biswas, Benedito P.F. Braga, Cecilia Tortajada, Marco Palermo, 2013-09-13 It is now widely accepted that the world is likely to face a major water crisis unless the present management practices are improved very significantly. Promoted extensively by donors and international institutions over the past 15 years, integrated water resources management (IWRM) has been assumed explicitly to be the solution for managing the limited water resources of the world. Hundreds of millions of dollars have now been spent in promoting IWRM in developing countries. However, no serious and objective analysis has ever been undertaken as to whether IWRM has made water management more efficient and equitable in any region of the world than otherwise may have been the case. This pioneering analysis indicates that IWRM has not only been unsuccessful in Latin America, but also is highly unlikely to succeed in the future. The reasons and constraints for this failure are outlined. This book previously appeared as a special issue of the International Journal of Water Resources Development.

Water Resources and Decision-Making Systems Cecilia Tortajada, Kevin Parris, 2016-03-23 Water data and information are essential to support efforts to understand, manage, allocate, utilize and protect water resources. The linkages between Water Information Systems and needs of decision makers are complex, but can be encapsulated in a Driving Force (Policy Needs) – Monitoring – Data Management – Reporting framework. The rapid development in water policy reforms in many sectors and growing emphasis on demand-side policy solutions to water resources management has created an information imbalance. This imbalance can be characterised in terms of an inverted pyramid with implementation of many water policy initiatives supported by little data and information, especially related to economic and financial elements, to help guide decision makers toward more effective and efficient water resources management strategies. Additionally, as stress and demands on water systems increase and water becomes a more valued resource, this tends to increase the value of water information both for water providers and users. Nevertheless, many countries are reporting that the capacity to collect water information is being undermined by a lack of resources, while expertise to collect, analyse and interpret water data for decision makers is being lost. Finally, the impact of climate change on hydrological regimes represents a key potential stress on water systems. This issue could be the catalyst for adapting policies to provide more efficient and effective use and management of water resources and advance institutional and governance reforms in the water sector. This book is based on a special issue of the International Journal of Water Resources Development.

The Commonwealth Brand, 2011 This book examines Commonwealth identity through the lens of its membership criteria, its recent enlargement and its constant reincarnation. In so doing it exposes various shortcomings in current thinking about international relations and the Commonwealth. Furthermore, it reveals how a number of turning points in the Commonwealth's history have shaped its membership rules and illustrates how the official Commonwealth still has the potential to expand and develop to best reflect an organisation that represents a third of the world's population.

Sustainability Felix Ekardt, 2019-07-29 This book proposes a holistic transdisciplinary approach to sustainability as a subject of social sciences. At the same time, this approach shows new ways, as perspectives of philosophy, political science, law, economics, sociology, cultural studies and others are here no longer regarded separately. Instead, integrated perspectives on the key issues are carved out: Perspectives on conditions of transformation to sustainability, on key instruments and the normative questions. This allows for a concise answer to urgent and controversial questions such as the following: Is the EU an environmental pioneer? Is it possible to achieve sustainability by purely technical means? If not: will that mean to end of the growth society? How to deal with the follow-up problems? How will societal change be successful? Are political power and capitalism the main barriers to sustainability? What is the role of emotions and conceptions of normality in the transformation process? To which degree are rebound and shifting effects the reason why sustainability politics fail? How much climate protection can be claimed ethically and legally e.g. on grounds of human rights? And what is freedom? Despite all rhetoric, the weak transition in energy, climate, agriculture and conservation serves as key example in this book. It is shown how the Paris Agreement is weak with regard to details and at the same time overrules the growth society by means of a radical 1,5-1,8 degrees temperature limit. It is shown how emissions trading must – and can – be reformed radically. It is shown why CSR, education, cooperation and happiness research are overrated. And we will see what an integrated politics on climate, biodiversity, nitrogen and soil might look like. This book deals with conditions of transformation, governance instruments, ethics and law of sustainability. The relevance of the humanities to sustainability has never before been demonstrated so vividly and broadly as here. And in every area it opens up some completely new perspectives. (Prof. Dr. Dr. h.c. mult. Ernst Ulrich von Weizsäcker, Club of Rome, Honorary President) Taking a transdisciplinary perspective, the book canvasses the entire spectrum of issues relevant to sustainability. A most valuable and timely contribution to the debate. (Prof. Dr. Klaus Bosselmann, University of Auckland, Author of “The Principle of Sustainability”) This book breathes life into the concept of sustainability. Felix Ekardt tears down the barriers between disciplines and builds a holistic fundament for sustainability; fit to guide long-term decision-making on the necessary transformation and societal change. (Prof. Dr. Christina Voigt, Oslo University, Dept. of Public and International Law)

Tap Roots Mark Knowles, 2002-06-03 Tracing the development of tap dancing from ancient India to the Broadway stage in 1903, when the word Tap was first used in publicity to describe this new American style of dance, this text separates the cultural, societal and historical events that influenced the development of Tap dancing. Section One covers primary influences such as Irish step dancing, English clog dancing and African dancing. Section Two covers theatrical influences (early theatrical developments, Daddy Rice, the Virginia Minstrels) and Section Three covers various other influences (Native American, German and Shaker). Also included are accounts of the people present at tap's inception and how various styles of dance were mixed to create a new art form.
