Black Gold Stranglehold Jerome R. Corsi, Craig R. Smith, 2021-05-14 It is estimated that Americans consume more than 25 percent of the world's oil but have control over less than 3 percent of its proven supply. This extremely unbalanced pattern of consumption makes it possible for foreign governments, corrupt political leaders, terrorist organizations, and oil conglomerates to place the citizens of the United States in a stranglehold of supply and demand. There is no greater proof of this than the direct relationship between skyrocketing gas prices and the exploding wealth of those who control the supply of oil. In *Black Gold Stranglehold*, Jerome R. Corsi and Craig R. Smith expose the fraudulent science that has been sold to the American people in order to enslave them: the belief that oil is a fossil fuel and a finite resource. On the contrary, this book presents authoritative research, currently known mostly in the scientific community, that oil is not a product of decaying dinosaurs and prehistoric forests. Rather, it is a natural product of the earth. The scientific evidence cited by Corsi and Smith suggests that oil is constantly being produced by the earth, far below the planet's surface, and that it is brought to attainable depths by the centrifugal forces of the earth's rotation. In great detail Corsi and Smith explore the international and domestic politics of oil production and consumption. This includes the wealth and power of major oil conglomerates, the manipulation of world economies by oil-producing states and rogue terrorist regimes, and the political agenda of radical environmentalists and conservationists who obstruct the use of oil reserves currently controlled by the U.S. government. The authors offer an understanding of the dangerous situation America faces because its currency is no longer tied to any precious and truly scarce metals such as gold, as it was until 1973. This situation could easily lead to the devastation of the U.S. economy if Middle Eastern countries are able to enact current plans to accept only the Euro or gold-backed currencies such as the Gold Dinar instead of the U.S. dollar as the standard currency for oil. *Black Gold Stranglehold* will dramatically change the debate about oil. The significance of its message is sure to cause thoughtful people to reconsider the current dependence of the U.S. economy on imported oil.

Choosing Honor Mary T. Ficalora, 2008 Here is the secret behind the power of the United States. In this book, readers discover the Absolutes that must be honored in order to realize Messianic consciousness. A consciousness that is required if we, the people of the United States, want to hold our authorities to the rule of law mandated by our Constitution. Mother Mary challenges you to discover your Messianic consciousness in order to realize God, your family and the United States as they are meant to be—as you want them to be. Mother Mary steps up to the platform where church and state meet and exposes her weaknesses and experiences in order to inspire you to step up with her. United We the People have the power to ensure liberty and prosperity; we have the power to create miracles.

The Oxford Handbook of Open Innovation Henry Chesbrough, Agnieszka Radziwon, Wim Vanhaverbeke, Joel West, 2024-04-25 This Handbook seeks to be the definitive reference for the large and growing field of Open Innovation. A comprehensive collection of short and authoritative chapters, the volume summarizes the most vital research published in Open Innovation. It is an essential reference for seasoned scholars, a welcome introduction for junior scholars, and a kick-start package for undergraduate and MBA students. Four editors, 75 reviewers, and 136 contributors collaboratively developed 57 chapter handbook chapters. These present the current state of the art featuring academic theory and managerial practice as well as the outlook for how open innovation should be further developed. The empirical, conceptual, and practical insights of the handbook highlight the importance of strengthening practice-inspired research and purposeful knowledge exchanges between individuals, organizations, and ecosystems.

Responsive School Practices to Support Lesbian, Gay, Bisexual, Transgender, and Questioning Students and Families Emily S. Fisher, Kelly S. Kennedy, 2012-07-26 The needs and rights of lesbian, gay, bisexual, transgender, and questioning (LGBTQ) students and families are often ignored, generally misunderstood, and only rarely given priority by the school system. This book provides a practical and useful guide for school-based mental health professionals to support students, families, teachers, and administrators in the development of a safe, inclusive school environment for all LGBTQ students and families. It begins with an overview of the unique issues and challenges faced by LGBTQ students and families, including a discussion of sexuality and gender identity development within the interconnected contexts of home, school, and community. Practical steps are given for creating an inclusive school environment; implementing prevention and intervention techniques to address discrimination, bullying, and violence; and organizing effective counseling programs for LGBTQ students. These school-based efforts are then extended to working with families and communities to reinforce steps taken in the school context. The downloadable resources include numerous handouts, sample letters, and other resources to assist the school-based mental health professional in implementing responsive and affirmative practices for LGBTQ students and families.

Terrorism and Torture Werner G. K. Stritzke, Stephan Lewandowsky, David Denemark, Joseph Clare, Frank Morgan, 2009-06-18 A thought-provoking volume examining the complex factors contributing to terrorism and torture, and the links between those two heinous behaviours.

Bin Laden's Plan David Malone, 2005 Since the 9/11 attack, Al Qaeda has chosen to not attack the vulnerable American homeland in order to cement the transfer of war guilt to the United States. This strategic decision was a product of the marriage between Osama bin Laden's terrorist group and an American neo-conservative group, The Project for the New American Century, both of whose leaders had been attempting, covertly and separately, to provoke a unilateral American invasion of Iraq since the end of the Cold War as a first step to world domination. In pursuit of this shared objective, Bin Laden christened the marriage with an October surprise that facilitated the closely contested millennial election of the hawkish American group's foremost representatives, the Bush Administration. After nine months of Bush's

presidency, Al Qaeda and an immaculately impregnated American administration gave birth to the march to war against Iraq when Bin Laden intentionally unleashed the Bush Administration's crusade in the Middle East on 9/11. The American occupation of Iraq would prove to be the greatest boon to Bin Laden's most vital war objective, the global recruitment coup of transferring guilt for the war to the United States. Al Qaeda supported President Bush's reelection in 2004 with another October surprise so that his administration would complete the global vilification of America that is intended to be the foundation of Bin Laden's messianic bid for world domination by nuclear terrorism.

The Wisdom of Plagues Donald G. McNeil,2024-01-09 Award-winning New York Times reporter Donald G. McNeil, Jr. reflects on twenty-five years of covering pandemics—how governments react to them, how the media covers them, how they are exploited, and what we can do to prepare for the next one. For millions of Americans, Donald McNeil was a comforting voice when the COVID-19 pandemic broke out. He was a regular reporter on The New York Times's popular podcast The Daily and told listeners early on to prepare for the worst. He'd covered public health for twenty-five years and quickly realized that an obscure virus in Wuhan, China, was destined to grow into a global pandemic rivaling the 1918 Spanish flu. Because of his clear advice, a generation of Times readers knew the risk was real but that they might be spared by taking the right precautions. Because of his prescient work, The New York Times won the 2021 Pulitzer Gold Medal for Public Service. The Wisdom of Plagues is his account of what he learned over a quarter-century of reporting in over sixty countries. Many science reporters understand the basics of diseases—how a virus works, for example, or what goes into making a vaccine. But very few understand the psychology of how small outbreaks turn into pandemics, why people refuse to believe they're at risk, or why they reject protective measures like quarantine or vaccines. The COVID-19 pandemic was the story McNeil had trained his whole life to cover. His expertise and breadth of sources let him make many accurate predictions in 2020 about the course that a deadly new virus would take and how different countries would respond. By the time McNeil wrote his last New York Times stories, he had not lost his compassion—but he had grown far more stone-hearted about how governments should react. He had witnessed enough disasters and read enough history to realize that while every epidemic is different, failure was the one constant. Small case-clusters ballooned into catastrophe because weak leaders became mired in denial. Citizens refused to make even minor sacrifices for the common good. They were encouraged in that by money-hungry entrepreneurs and power-hungry populists. Science was ignored, obvious truths were denied, and the innocent too often died. In The Wisdom of Plagues, McNeil offers tough, prescriptive advice on what we can do to improve global health and be better prepared for the inevitable next pandemic.

Enemies by Design Greg Felton,2005 An Arab proverb has it.... Whom the gods would destroy, they first drive mad. Empires do the same. Through the lens of a life of bin Laden, we follow the US-UK footprint on the Arab world -- fostering reactionary regimes to divide and conquer -- forging pretexts to invade Iraq, Afghanistan, Palestine -- and falling prey to a corrupt cult of violence and obscurantism called fascism. In war, the gods themselves go mad.... George W. Bush's war on terrorism is a folly committed in the name of a foreign state's self-interest. That state is Israel. How the U.S. became an instrument of Israeli foreign policy, and how this subordination is responsible for the official bigotry toward Arabs and Muslims, is the main theme of this book. Only from this perspective can the war on terrorism be fully understood.

A Guiding Light Dale Preston,2023-09-08 If you are a survivor of childhood abuse and have had substance abuse problems in the past, you can benefit tremendously from reading this book. Readers can gain invaluable insight in navigating problems associated with staying clean and sober and the recovery process. Dale raises questions regarding society's gender bias towards statutory rape and examines how this bias has affected him in his own life, as well as how current laws are impacted. His revelations regarding teen gang involvement pinpoint problems with single-parent parenting and how neglect, lack of supervision, and the need for better role models could be deciding factors in a teenager's life. He highlights the potential for significant enhancements to our foster care system by prioritizing the well-being of children transitioning out of foster care, rather than solely focusing on their time spent within the system. Dale acknowledges that while foster care did have a lasting effect on his life, he wishes they had a more supportive approach that went beyond simply reuniting him with his dysfunctional family. His drug and alcohol addiction can be traced back to childhood trauma. He looks at how survivors of abuse are statistically more likely to develop substance abuse problems as adults. He believes that without a complete self-acceptance of who we are, one tends to revert back to old patterns of addictive behavior, even after years of being clean and sober. Prepare yourself for astonishing revelations as you delve into the incredible life story of Dale Preston.

Comparative Law Yearbook of International Business 2010 Dennis Campbell,2010-11-01 This edition of the Comparative Law Yearbook of International Business provides a general examination of issues vital to the world's economic recovery. In the field of company law, practitioners examine changes in Russia's corporate law and the new Ukrainian law governing joint-stock companies. In the area of competition law, lawyers review Serbia and Bulgaria's new laws on the protection of competition and the private enforcement of Articles 101 and 102 in Europe's national courts. Dispute resolution occupies two chapters, one dealing with best practices for drafting arbitration clauses and the other set aside, recognition, and enforcement of private commercial arbitration awards. A further two chapters treat employment and labor matters relating to distribution and commercial representation, indemnity upon termination, and processing personal data in the employment context of Hungary. In the area of financial services, practitioners from five jurisdictions deal with fiduciary duty, the European Commission's proposed Directive on Alternative Investment Fund Managers, Swiss disclosure rules on significant shareholdings, restructuring and refinancing routes for mortgage-secured debt in Spain, and insurance laws and regulations in Nigeria. Foreign investment is examined by two authors, reporting on 2008 and 2009 developments in investment treaty disputes and foreign investment in Indonesia. Intellectual property issues are reviewed in chapters relating to the use of intellectual property as collateral in secured financing and intellectual property licensing in Canada. Finally, lawyers treat a variety of other issues, including the tax law of Liechtenstein, European Union-Israel trade in the automobile sector, insolvency risk and creditors' rights in Peru, the modernizing of trust law in Hong Kong and bridging cultural differences in international Transactions.

Bushopedia Bill Potts,2006-06 Bushopedia deals with the corruption and many depredations of the Bush administration, the Republican Party, Republicans in Congress, right wing organizations, hypocrisy, and on and on. It does so with wit, wry humor and the words of Bush himself (including quite a few of his famous Bushisms) and many others. Readers have found it to be useful, both as a reference and as a narrative that can be read straight through for entertainment and information.

Wayfinding NHS Estates,2005-05-23 This publication contains best practice guidance on assessing and improving wayfinding systems in hospitals and other healthcare environments, including signs and other information to help people get to and around the site. Other topics also discussed include: factors that influence how people find their way; inclusive design for wayfinding systems; the impact of a poor wayfinding system; developing the business case; and tools to help evaluate the adequacy of current systems and identify areas for improvement.

Learning from Bristol Great Britain. Department of Health,Bristol Royal Infirmary Inquiry,2001 The Inquiry was set up in 1998 To inquire into the management of the care of children receiving complex cardiac surgical services at the Bristol Royal Infirmary between 1984 and 1995 and relevant related issues; to make findings as to the adequacy of the services provided; to establish what action was taken both within and outside the hospital to deal with concerns raised about the surgery and to identify any failure to take appropriate action promptly; to reach conclusions from these events and to make recommendations which could help to secure high quality care across the NHS. The Inquiry finds a paediatric open-heart service with high aspirations (including at one stage the ambition to become a centre for heart transplantation) overreaching itself, given its limitations, and failing to keep up with the rapid developments elsewhere in paediatric cardiac surgical care (PCS) during the late 1980s and early 1990s. It reports a mortality rate up to double that elsewhere at certain times, with some 30-35 deaths more than would have been expected. Individual failings, poor teamwork and communication locally, coupled with general failings in the NHS, combined to create an unsafe environment for PCS in Bristol. The Inquiry makes some 200 recommendations, designed to advance the central notion of a patient-centred healthcare service committed to continuous improvement. The need for a change in the culture of the NHS is of prime concern.The recommendations cover: needs of very sick children; safety; competence of healthcare professionals; organisation within hospitals; standards of care; openness; monitoring of clinicians. The Inquiry recommends the development of national standards for all aspects of the care and treatment of children with congenital heart disease (CHD).
