Manual de Investigação Cibernética Alesandro Gonçalves Barreto, Beatriz Silveira Brasil, 2016-10-20 A atual Era do Conhecimento, caracterizada pelo intenso fluxo de informações, de alcance mundial e instantâneo, fez com que o mundo jurídico também buscasse se adequar à nova realidade social, surgindo uma série de normas e julgados que visam tutelar os direitos dos indivíduos e da sociedade no ciberespaço. Nesse sentido, a presente obra foi elaborada para auxiliar os operadores da área jurídica e da área das tecnologias da informação e comunicação a aprofundar seus conhecimentos, especificamente no que se refere à interseção entre o Direito e a Tecnologia, com foco na investigação de cibercrimes. Os autores, aliando conhecimentos teóricos, jurisprudência e vasta experiência profissional, conseguiram produzir um manual didático, tornando fácil a compreensão desse tema tão importante e pouquíssimo explorado pela doutrina nacional. • Investigação de cibercrimes – Planejamento, execução e suas controvérsias • Revenge porn – Metodologia de enfrentamento • Repositório procedimental – Modelos e exemplos

The Fingerprint U. S. Department Justice, 2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

Statistics Using Technology, Second Edition Kathryn Kozak, 2015-12-12 *Statistics With Technology, Second Edition*, is an introductory statistics textbook. It uses the TI-83/84 calculator and R, an open source statistical software, for all calculations. Other technology can also be used besides the TI-83/84 calculator and the software R, but these are the ones that are presented in the text. This book presents probability and statistics from a more conceptual approach, and focuses less on computation. Analysis and interpretation of data is more important than how to compute basic statistical values.

The Living Words-Volume 1 Jeff Benner, 2008 Reading a translation of any book is just not the same as reading it in its original language and is adequately stated in the phrase lost in the translation. Whenever a text is

translated from one language to another it loses some of its flavor and substance. The problem is compounded by the fact that a language is tied to the culture that uses that language. When the text is read by a culture different from the one it is written in, it loses its cultural context. A Biblical example of this can be found in the Hebrew word *tsur* which is translated as a rock - He only is my rock and my salvation, he is my defence; I shall not be greatly moved (Psalm 62:2, KJV). What is a rock and how does it apply to God? To us it may mean solid, heavy or hard but the cultural meaning of the word *tsur* is a high place in the rocks where one runs to for refuge and defense, a place of salvation. The Living Words is an in-depth study into the Ancient Hebrew vocabulary and culture of the Bible replacing the flavor and substance that has been removed from us.

The EU, US and China Tackling Climate Change Sophia Kalantzakos, 2017-07-14 The feeling of optimism that followed the COP 21 Paris Conference on Climate Change requires concrete action and steadfast commitment to a process that raises a number of crucial challenges: technological, political, social, and economic. As climate change worsens, new robust leadership is imperative. The EU, US and China Tackling Climate Change examines why a close collaboration between the EU and China may result in the necessary impetus to solidify a vision and a roadmap for our common future in the Anthropocene. Kalantzakos introduces a novel perspective and narrative on climate action leadership through an analysis of international relations. She argues that a close EU-China collaboration, which does not carry the baggage of an imbedded competition for supremacy, may best help the global community move towards a low carbon future and navigate the new challenges of the Anthropocene. Overall, Kalantzakos demonstrates how Europe and China, already strategic partners, can exercise global leadership in an area of crucial common interest through their web of relations, substantial development aid, and the use of soft power tools throughout the developing world. This book will be of great interest to students and scholars of environmental politics, international relations, climate change and energy law and policy.
