### **The Role of Images and the Veneration of Icons in the Oriental Orthodox Churches**

Christine Chaillot, 2018 The aim of this book is to demonstrate the presence in the very ancient Eastern Churches of religious images of all kinds (icons, paintings, illuminations), including the representation of Christ, together with the veneration (not the adoration) of icons/images. Presented here are not only the iconographic but also the liturgical and especially the Christological dimensions of the icon on the basis of texts used by these four traditions down the centuries. In contrast to the Byzantine Orthodox world which, after a controversy on this subject, officially established the veneration of icons from the time of the Second Council of Nicaea (787) and in 843, these Churches did not experience Iconoclasm. Christine Chaillot is Swiss and Orthodox (Patriarchate of Constantinople). She has published several books on the Orthodox Churches and the Oriental Orthodox Churches. (Series: Studies on Oriental Orthodox Church History / Studien zur Orientalischen Kirchengeschichte, Vol. 55) [Subject: Religious Studies, Christian Studies, History, Iconography]

**Encyclopedia of Stateless Nations** James B. Minahan, 2016-08-01 This book addresses the numerous national movements of ethnic groups around the world seeking independence, more self-rule, or autonomy—movements that have proliferated exponentially in the 21st century. In the last 15 years, globalization, religious radicalization, economic changes, endangered cultures and languages, cultural suppression, racial tensions, and many other factors have stimulated the emergence of autonomy and independence movements in every corner of the world—even in areas formerly considered immune to self-government demands such as South America. Researching the numerous ethnic groups seeking autonomy or independence worldwide previously required

referencing many specialized publications. This book makes this difficult-to-find information available in a single volume, presented in a simple format accessible to everyone, from high school readers to scholars in advanced studies programs. The book provides an extensive update to Greenwood's Encyclopedia of the Stateless Nations: Ethnic and National Groups around the World that was published more than a decade earlier. Each ethnic group receives an alphabetically organized entry containing information such as alternate names, population figures, flag or flags, geography, history, culture, and languages. All the information readers need to understand the motivating factors behind each movement and the current situation of each ethnic group is presented in a compact summary. Fact boxes at the beginning of each entry enable students to quickly access key information, and consistent entry structure makes for easy cross-cultural comparisons.

*Debates, Differences and Divisions* Michael Kryzanek, 2015-08-26 Debuting its first edition, this book is organized around the approach that American politics can best be understood by examining the issues that reflect the ideas, principles, concerns, fears, morals and hopes of the American people. *Debates, Differences and Divisions* looks at twenty-five hot button issues affecting American politics and policy today. The author argues that these issues are the heart and soul of the American political system, serving as the basis for the disagreements that drive our political system into action.

**Fido's Virginia: Virginia is for Dog Lovers** Ginger Warder, 2013-03-04 From the Blue Ridge Mountains to the beach, in this book travelers and their dogs will find hotels and inns that offer canine-inspired Southern hospitality as well as a wide array of things to do with your best canine pal. Virginia truly is for dog lovers. For over 40 years Virginia's tourism slogan has been "Virginia is for lovers," but both resident pooches and visiting Fidos know that it really should be "Virginia is for dog lovers"! Whether they're relaxing on the river, checking out the crabs on Chesapeake Bay, or hiking through the beautiful state and national parks, four-legged visitors are welcomed warmly. After all, Virginia is one of only a handful of states that has an official dog breed, the American Foxhound, a direct descendant of the hounds that George Washington bred to indulge his passion for foxhunting. Virginia's historic love affair with canines continues today, with more than 1,000 pet-friendly hotels, restaurants, attractions, and events that you and your best furry friend (BFF) can explore together. From the Blue Ridge Mountains to the beach, visitors traveling with their BFFs will find fine hotels and inns that offer canine-inspired Southern hospitality, verdant vineyards that beg for a long stroll, battlefields, beaches, and an array of dining and entertainment options that you can enjoy with your best friend. Virginia truly is for dog lovers!

Advances in Computers Marvin Zelkowitz, 2004-04-30 Advances in Computers covers new developments in computer technology. Most chapters present an overview of a current subfield within computers, with many citations, and often include new developments in the field by the authors of the individual chapters. Topics include hardware, software, theoretical underpinnings of computing, and novel applications of computers. This current volume emphasizes information security issues and includes topics like certifying computer professionals, non-invasive attacks

(cognitive hacking), computer files as legal evidence (computer forensics) and the use of processors on plastic (smartcards). The book series is a valuable addition to university courses that emphasize the topics under discussion in that particular volume as well as belonging on the bookshelf of industrial practitioners who need to implement many of the technologies that are described. In-depth surveys and tutorials on new computer technology Well-known authors and researchers in the field Extensive bibliographies with most chapters Five out of seven chapters focus on security issues Discussion of computer forensics, professional certification and smart cards A chapter on how DNA sequencing is accomplished is important in the growing bioinformatics field

*Paving Paradise* Craig Pittman, Matthew Waite, 2010-05-25 Florida possesses more wetlands than any other state except Alaska, yet since 1990 more than 84,000 acres have been lost to development

despite presidential pledges to protect them. How and why the state's wetlands are continuing to disappear is the subject of *Paving Paradise*. Journalists Craig Pittman and Matthew Waite spent nearly four years investigating the political expedience, corruption, and negligence on the part of federal and state agencies that led to a failure to enforce regulations on developers. They traveled throughout the state, interviewed hundreds of people, dug through thousands of documents, and analyzed satellite imagery to identify former wetlands that were now houses, stores, and parking lots. Exposing the unseen environmental consequences of rampant sprawl, Pittman and Waite explain how wetland protection creates the illusion of environmental protection while doing little to stem the tide of destruction.

**The Lives of Hawai'i's Dolphins and Whales** Robin W. Baird, 2016-11-30 Ocean currents, winds, and rainfall all work together to create a marine oasis around the Hawaiian Islands, providing a home for many species of dolphins and whales normally found in the deep oceans of the world. *The Lives of Hawai'i's Dolphins and Whales* opens a window into the world of these mysterious creatures with stories and observations from author Robin W. Baird's work over the last seventeen years. The book includes exceptional full-color photographs of each species, life history descriptions, conservation threats, and maps showing sighting locations and movements of tagged individuals among the islands and offshore. While the well-known resident spinner dolphins and visiting humpback whales are covered, the ten species of lesser-known open-ocean dolphins and whales that are resident to the marine slopes of the islands are highlighted as well. Among these are endangered

false killer whales, deep-diving Cuvier's and Blainville's beaked whales, abundant spotted dolphins, coastal bottlenose dolphins, cryptic dwarf sperm whales, family units of short-finned pilot whales, and social melon-headed whales. Baird also describes thirteen species of dolphins and whales that are found in offshore waters or are seasonal or occasional visitors to Hawaiian waters, including killer whales, the iconic sperm whale, and even blue whales and North Pacific right whales. More is known about the social organization and natural history of many of these marine mammals in Hawai'i than anywhere else in the world. For all of the species discussed, Baird presents data obtained from long-term photo-identification studies, with distinctive individuals tracked through time and space; for many of them, he includes findings from studies using genetics and satellite tagging. He also provides information on predators and prey, social organization, diving, and night-time behavior, along with suggestions on how to tell some of the more difficult to identify species apart. The book closes by focusing on conservation issues, both success stories and challenges, engaging readers to consider ways to protect Hawai'i's unique assemblage of resident dolphins and whales.

*Directory of Scholarly Journals in Turkey* Metin Kozak, Nazmi Kozak, 2017-03-07 Scholarly journals are the capillaries of the scientific world, ensuring the circulation of knowledge. Moreover, scholarly journals guide and indicate the scientific development in an academic field of study or in a country. Scholarly journals, which transfer and spread scientific information, are intended to properly fulfill their functions, preventing the transfer of imperfect or incorrect information to the science world. Significant issues are, therefore, inevitable in the characteristics of scientific studies in such disciplines and countries where the scholarly journals do not fulfill their functions properly. This study encompasses all scholarly journals published in Turkey in all fields of science and other disciplines. The reference questions in this study are grouped under three main categories: the contact and publication information, article evaluation, and publishing information. The number of journals in this present study totals 1,910.
