China's New United Front Work in Hong Kong Sonny Shiu-Hing Lo, Steven Chung-Fun Hung, Jeff Hai-Chi Loo, 2019-07-15 This book explores the dynamics of China's new united front work in Hong Kong. Mainland Chinese penetrative politics can be seen in the activities of local pro-Beijing political parties, clans and neighborhood associations, labor unions, women and media organizations, district federations, and some religious groups. However, united front work in the educational and youth sectors of civil society has encountered strong resistance because many Hong Kong people are post-materialistic and uphold their core values of human rights, the rule of law and transparency. China's new united front work in Hong Kong has been influenced by its domestic turn toward "hard" authoritarianism, making Beijing see Hong Kong's democratic activists and radicals as political enemies. Hong Kong's "one country, two systems" is drifting toward "one country, two mixed systems" with some degree of convergence. Yet, Taiwan and some foreign countries have seen China's united front work as politically destabilizing and penetrative. This book will be of use to scholars, journalists, and observers in other countries seeking to reckon with Chinese influence.

NATO in the Crucible Deborah L. Hanagan, 2019-09-01 When the North Atlantic Treaty Organization (NATO) became involved in security operations during the War in Afghanistan, it faced a range of complex challenges, including a highly motivated Afghan insurgency that changed over time and repeatedly defied assumptions. Conflicts within NATO also posed challenges. The alliance brought together a quarter of the world's nations, each with its own goals and interests, in an effort to stabilize an agrarian country that posed no immediate security threat. For more than a decade, through changes in leadership and strategy, the nations experienced bitter disagreements, resentments, and a conflict that escalated to a level of violence and uncertainty few had anticipated. In *NATO in the Crucible*, Deborah Lynn Hanagan analyzes these challenges and explains how the alliance maintained cohesion despite them. She examines why NATO succeeded in Afghanistan when history suggests most coalitions fracture under such intense pressure. In the end, she argues, member nations summoned the political will and organizational capacity to cooperate and endure. And they agreed, above all, that failure in Afghanistan would be catastrophic—both for NATO and for the world.

Strategic Challenges for Counterinsurgency and the Global War on Terrorism Williamson Murray,Army War College (U.S.). Strategic Studies Institute,2006 In March 2006, President George W. Bush signed a new National Security Strategy that he refers to as a wartime national security strategy. He also states in the introduction that to follow the path the United States has chosen, we must maintain and expand our national strength. One way to do this is to study and propose solutions to the complex challenges the United States faces in the 21st century. At the U.S. Army War College, the students have embraced this challenge and spend a year developing their intellectual strength in areas that extend well beyond the familiar operational and tactical realm to which they are accustomed. This collection of essays written by students enrolled in the U.S. Army War College Advanced Strategic Art Program (ASAP) reflects the development of their strategic thought applied to a wide range of contemporary issues. The ASAP is a unique program that offers selected students a rigorous course of instruction in theater strategy. Solidly based in theory, doctrine, and history, the program provides these students a wide range of experts both in and out of the military, staff rides, and exercises to develop them as superb theater strategists. ASAP graduates continue to make their mark throughout the military to include in the Office of the Secretary of Defense, the Joint Staff, and the Combatant Commands.--STINET web site.

Agriculture, Livestock Production and Aquaculture Arvind Kumar,Pavan Kumar,S. S. Singh,Bambang Hendro Trisasongko,Meenu Rani,2022-04-28 This two-volume set discusses recent approaches and technological innovations for sustainable agriculture in smallholder farming systems impacted by climate change. The systems covered include crop-based agricultural production, as well as aquaculture and livestock production as related systems using similar techniques to combat food security issues brought about by climate change and resource overuse. The chapters detail innovations involving crop diversification, soil resilience management, geoinformatics and land suitability monitoring for smart farming, information technology in livestock production, and nutrient resource management in fishery aquaculture. Researchers, practitioners and industries will be able to use this information to

implement socially and economically sustainable practices to achieve food security in impoverished areas vulnerable to climate change, while also learning about the rapid evolution in information technology that is applicable for and available to small holder farmers. Volume 1 focuses on current innovations in agricultural and livestock practices in response to climate change. It covers the technological challenges, approaches and mitigation strategies encountered by both scholars and practitioners working in livestock and agricultural production systems impacted by climate change.

But a series of horrific deaths in Sha'angh'sei have tied him indefinitely to this land, and justice must be served before he can set sail for the place where his heart truly dwells. A strange destiny awaits Moichi at the Circus of Souls—a treasure and a curse beyond all imagining—as he joins forces with Chiisai, the bewitching and beautiful Bujun warrior, on a perilous enterprise of rescue and vengeance that will carry them both to the ends of the world. For beyond all human boundaries, in the mysterious land of the opal moon, an unthinkable evil is on the rise—and a mad sorceress will not rest until she gains the awesome power to unleash nightmares on the earth. Review of the state of the world fishery resources: Inland fisheries Food and Agriculture Organization of the United Nations, 2018-11-05 The FAO Fishery and Aquaculture Circular C942 Revision 3 (C942 Rev. 3) updates and expands the scope of previous revisions of the circular. C942 Rev. 3 is an important baseline document, intended to assist in the global understanding of inland fisheries and inform dialogue on their current and future role. The third revision reviews the status and trends of inland fisheries catch at global, continental and subcontinental levels. It places inland capture fisheries in the context of overall global fish production, and calls attention to the importance of inland capture fisheries with respect to food security and nutrition and the Sustainable Development Goals. It quantifies global inland fisheries resources in terms of food production, nutrition, employment, economic contribution with respect to those countries/regions or subnational areas where they are important. A characterization approach to distinguish large-scale and small-scale fishing operations and their relative contributions is provided. The review provides estimated economic values of inland fisheries, as well as a valuation of potential replacement cost of these (in terms of dollars, other resources such as land and water, feeds). There is also an analysis of the extent and economic value of recreational inland fisheries. The contribution to employment and the gender differences related to this are quantified. The linkages between inland fisheries and biodiversity are also explored. C942 Rev. 3 discusses ways to measure and assess inland fisheries, in particular, how to establish more accurately inland fishery catches in the many situations where there are challenges to collection of catch statistics.

Dragons on the Sea of Night Eric Van Lustbader, 2014-08-19 In the continuation of the epic Sunset Warrior fantasy series, a man-god rises once more to confront a fearsome and unstoppable evil in a savage world where nothing is as it seems Once he was but a man named Ronin. Trained as a swordsman, endowed with breathtaking skill, he was not destined merely to live and then die in a doomed city beneath a frozen world. Many years have passed since he first ventured into the void. Now he possesses powers beyond all imagining—godlike abilities both marvelous and terrible. Now he is revered and feared as savior and avenger, the tamer of

monstrous beasts, the destroyer of the dark angel of Chaos—and dearly loved by his devoted bond-brother, Moichi Annai-Nin, and the beautiful, enigmatic, and lethal Chiisai. Now he is Dai-San, the Sunset Warrior. Gone are the days of fire, ice, and necromancy, and yet there are grave perils in this world of illusion—and enemies, once defeated, who seek a way back to this plane, driven by an insatiable need for vengeance. For Chaos must again have its day, and no power in the universe can prevent its terrible reemergence—not even the might of the Sunset Warrior. In the fifth novel of the Sunset Warrior Cycle—an ingenious blending of fantasy, technology, spirit, and swordplay—bestselling author Eric Van Lustbader brings back to life some of the most beloved characters in fantastic literature in a story of danger, loyalty, fate, and friendship. The legend of the Dai-San grows ever stronger as the action-packed epic tale continues.

Geographic Information Systems in Fisheries Management and Planning Gertjan de Graaf, 2003 Many fishery biologists and policy makers involved in inland fisheries management and planning are unaware of GIS technology and its potential for fisheries planning and management. The FAO Inland Water Resources and Aquaculture Service (FIRI) has been active for the last 19 years in promoting the use of GIS and remote sensing in fisheries and aquaculture. Promotional activities have been carried out through training, projects, field missions, and oral presentations and publications. However, a manual to use along with GIS software for the fisheries biologists in the field explaining GIS in a way that is understandable to non-GIS users had not been produced until now. This manual was written to overcome this knowledge-gap, it is a do-it-yourself manual giving a short introduction to GIS software and its applications in fishery science. The overall objective of this manual is to encourage fishery managers to use this tool (GIS) to foster the sustainable use of natural resources. There are five main sections in the manual: GIS concepts and functions and key tools provided by ArcView 3.x, Geographic coordinate system and map projections, Raster data and analysis, Regression analysis, and Application case studies. All sections are accompanied by exercises that have been designed to illustrate key applications of GIS in inland and marine fisheries management. Also, a custom-designed ArcView grid regression extension is included to show the integration of GIS with surplus production models.

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

The State of the World's Aquatic Genetic Resources for Food and Agriculture Food and Agriculture Organization of the United Nations, 2019-07-24 The conservation, sustainable use and development of aquatic genetic resources (AqGR) is critical to the future supply of fish. The State of the World's Aquatic Genetic Resources for Food and Agriculture is the first ever global assessment of these resources, with the scope of this first Report being limited to cultured AqGR and their wild relatives, within national

jurisdiction. The Report draws on 92 reports from FAO member countries and five specially commissioned thematic background studies. The reporting countries are responsible for 96 percent of global aquaculture production. The Report sets the context with a review of the state of world's aquaculture and fisheries and includes overviews of the uses and exchanges of AqGR, the drivers and trends impacting AqGR and the extent of ex situ and in situ conservation efforts. The Report also investigates the roles of stakeholders in AqGR and the levels of activity in research, education, training and extension, and reviews national policies and the levels of regional and international cooperation on AqGR. Finally, needs and challenges are assessed in the context of the findings from the data collected from the countries. The Report represents a snapshot of the present status of AqGR and forms a valuable technical reference document, particularly where it presents standardized key terminology and concepts.

Verified Synthesis of Zeolitic Materials H. Robson, 2001-06-26 Zeolite synthesis is an active field of research. As long as this continues, new phases will be discovered and new techniques for preparing existing phases will appear. This edition of Verified Synthesis of Zeolitic Materials contains all the recipes from the first edition plus 24 new recipes. Five new introductory articles have been included plus those from the first edition, some of which have been substantially revised. The XRD patterns have been recorded using different instrument settings from those in the first edition and are intended to conform to typical X-ray diffraction practice. In most cases, only the XRD pattern for the product as synthesised is printed here. The exceptions are those phases which show marked changes in the XRD pattern upon calcination.

Area Handbook for Albania William Giloane, Eston T. White, James M. Moore, Sarah Jane Elpern, Eugene K. Keefe, Stephen Peters, 2022-07-20 'The Area Handbook for Albania' seeks to present an overview of the various social, political, and economic aspects of the country as they appeared in 1970. The leaders of the Communist Party have gone to extremes to maintain an aura of secrecy about their nation and their efforts to govern it. Material on Albania is scanty and some that is available is not reliable but, using their own judgments on sources, the authors have striven for objectivity in this effort to depict Albanian society in 1970.
