Good Economics for Hard Times Abhijit V. Banerjee, Esther Duflo, 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

"B" is for Burglar Sue Grafton, 2010-04-01 B is for Burglar, from Sue Grafton's #1 New York Times bestselling Kinsey Millhone Alphabet mystery series Beverly Danziger looked like an expensive, carefully wrapped package from a good but conservative shop. Only her compulsive chatter hinted at the nervousness beneath her cool surface. It was a nervousness out of all proportion to the problem she placed before Kinsey Millhone. There was an absent sister. A will to be settled--a matter of only a few thousand dollars. Mrs. Danziger did not look as if she needed a few thousand dollars. And she didn't seem like someone longing for a family reunion. Still, business was slow, and even a private investigator has bills to pay. Millhone took the job. It looked routine. Elaine Boldt's wrappings were a good deal flashier than her sister's, but they signaled the same thing: The lady had money. A rich widow in her early forties, she owned a condo in Boca Raton and another in Santa Teresa. According to the manager of the California building, she was last seen draped in her \$12,000 lynx coat heading for Boca Raton. According to the manager of the Florida building, she never got there. But someone else had and she was camping out illegally in Mrs. Boldt's apartment. The job was beginning to seem a bit less routine. It turned tricky when Beverly Danziger ordered Millhone to drop the case and it took on an ominous quality when Aubrey Danziger surfaced, making all kinds of wild accusations about his wife. But it only became sinister when Millhone learned that just days before Elaine Boldt went missing, her next-door neighbor and bridge partner had been murdered and the killer was still at large. A house destroyed by arson. A brutally murdered woman. A missing lynx coat. An apartment burgled of valueless papers, another ransacked in a melée of mindless destruction. And more murder. As Millhone digs deeper into the case, she finds herself in a nightmarish hall of mirrors in which reality is distorted by illusion and nothing--except danger--is quite what it seems. A Is for Alibi B Is for Burglar C Is for Corpse D Is for Deadbeat E Is for Evidence F Is for Fugitive G Is for Gumshoe H Is for Homicide I Is for Innocent J Is for Judgment K Is for Killer L is for Lawless M Is for Malice N Is for Noose O Is for Outlaw P Is for Peril Q Is for Quarry R Is for Ricochet S Is for Silence T Is for Trespass U Is for Undertow V Is for Vengeance W Is for Wasted X

*The Radiological Accident in the Reprocessing Plant at Toms* International Atomic Energy Agency, 1998 On 6 April 1993 a major radiological accident occurred at a plutonium extraction facility at a location then known as Toms-7, Russian Federation. The accident blew the concrete cover off the reaction vessel and led to widespread contamination of the site and the surrounding area up to a distance of 28 km. The report describes the events leading up to the accident and the radiological consequences. It provides a detailed description of the decontamination and recovery operations and gives an analysis of their effectiveness.

**Blockchain Chicken Farm** Xiaowei Wang, 2020-10-13 A New York Times Book Review Editors' Choice A brilliant and empathetic guide to the far corners of global capitalism. --Jenny Odell, author of *How to Do Nothing* From FSGO x Logic: stories about rural China, food, and tech that reveal new truths about the globalized world In *Blockchain Chicken Farm*, the technologist and writer Xiaowei Wang explores the political and social entanglements of technology in rural China. Their discoveries force them to challenge the standard idea that rural culture and people are backward, conservative, and intolerant. Instead, they find that rural China has not only adapted to rapid globalization but has actually innovated the technology we all use today. From pork farmers using AI to produce the perfect pig, to disruptive luxury counterfeits and the political intersections of e-commerce villages, Wang unravels the ties between globalization, technology, agriculture, and commerce in unprecedented fashion. Accompanied by humorous "Sinofuturist" recipes that frame meals as they transform under new technology, *Blockchain Chicken Farm* is an original and probing look into innovation, connectivity, and collaboration in the digitized rural world. FSG Originals x Logic dissects the way technology functions in everyday lives. The titans of Silicon Valley, for all their utopian imaginings, never really had our best interests at heart: recent threats to democracy, truth, privacy, and safety, as a result of tech's reckless pursuit of progress, have shown as much. We present an alternate story, one that delights in capturing technology in all its contradictions and innovation, across borders and socioeconomic divisions, from history through the future, beyond platitudes and PR hype, and past doom and gloom. Our collaboration features four brief but provocative forays into the tech industry's many worlds, and aspires to incite fresh conversations about technology focused on nuanced and accessible explorations of the emerging tools that reorganize and redefine life today.

**Oracle Tuning** Alexey B. Danchenkov, 2006-02-01 Oracle 10g has become the most complex database ever created and Oracle tuning has become increasingly complex. This book provides a complete step-by-step approach for holistic Oracle tuning and it is the accumulated knowledge from tuning thousands of Oracle databases. Incorporating the principles of artificial intelligence, Oracle10g has developed a sophisticated mechanism for capturing and tracking database performance over time periods. This new complexity has introduced dozens of new v\$ and DBA views, plus dozens of Automatic Workload Repository (AWR) tables. The AWR and its interaction with the Automatic Database Diagnostic Monitor (ADDM) is a revolution in database tuning. By understanding the internal workings of the AWR tables, the senior DBA can develop time-series tuning models to predict upcoming outages and dynamically change the instance to accommodate the impending resource changes. This is not a book for beginners. Targeted at the senior Oracle DBA, this book dives deep into the internals of the v\$ views, the AWR table structures and the new DBA history views. Packed with ready-to-run scripts, you can quickly monitor and identify the most challenging performance issues.

**Nanotechnology Research Directions: IWGN Workshop Report** R.S. Williams, P. Alivisatos, 2013-03-09 energy production, environmental management, transportation, communication, computation, and education. As the twenty-first century unfolds, nanotechnology's impact on the health, wealth, and security of the world's people is expected to be at least as significant as the combined influences in this century of antibiotics, the integrated circuit, and human-made polymers. Dr. Neal Lane, Advisor to the President for Science and Technology and former National Science Foundation (NSF) director, stated at a Congressional hearing in April 1998, If I were asked for an area of science and engineering that will most likely produce the breakthroughs of tomorrow, I would point to nanoscale science and engineering. Recognizing this potential, the White House Office of Science and Technology Policy (OSTP) and the Office of Management and Budget (OMB) have issued a joint memorandum to Federal agency

heads that identifies nanotechnology as a research priority area for Federal investment in fiscal year 2001. This report charts Nanotechnology Research Directions, as developed by the Interagency Working Group on Nano Science, Engineering, and Technology (IWGN) of the National Science and Technology Council (NSTC). The report incorporates the views of leading experts from government, academia, and the private sector. It reflects the consensus reached at an IWGN-sponsored workshop held on January 27-29, 1999, and detailed in contributions submitted thereafter by members of the U. S. science and engineering community. (See Appendix A for a list of contributors).

Modeling Languages in Mathematical Optimization Josef Kallrath, 2013-12-01 This volume presents a unique combination of modeling and solving real world optimization problems. It is the only book which treats systematically the major modeling languages and systems used to solve mathematical optimization problems, and it also provides a useful overview and orientation of today's modeling languages in mathematical optimization. It demonstrates the strengths and characteristic features of such languages and provides a bridge for researchers, practitioners and students into a new world: solving real optimization problems with the most advanced modeling systems.

Global Burden of Disease and Risk Factors Alan D. Lopez, 2006-04-02 Strategic health planning, the cornerstone of initiatives designed to achieve health improvement goals around the world, requires an understanding of the comparative burden of diseases and injuries, their corresponding risk factors and the likely effects of intervention options. The Global Burden of Disease framework, originally published in 1990, has been widely adopted as the preferred method for health accounting and has become the standard to guide the setting of health research priorities. This publication sets out an updated assessment of the situation, with an analysis of trends observed since 1990 and a chapter on the sensitivity of GBD estimates to various sources of uncertainty in methods and data.

*8th European Medical and Biological Engineering Conference* Tomaz Jarm, Aleksandra Cvetkoska, Samo Mahnič-Kalamiza, Damijan Miklavcic, 2020-11-29 This book aims at informing on new trends, challenges and solutions, in the multidisciplinary field of biomedical engineering. It covers traditional biomedical engineering topics, as well as innovative applications such as artificial intelligence in health care, tissue engineering, neurotechnology and wearable devices. Further topics include mobile health and electroporation-based technologies, as well as new treatments in medicine. Gathering the proceedings of the 8th European Medical and Biological Engineering Conference (EMBEC 2020), held on November 29 - December 3, 2020, in Portorož, Slovenia, this book bridges fundamental and clinically-oriented research, emphasizing the role of education, translational research and commercialization of new ideas in biomedical engineering. It aims at inspiring and fostering communication and collaboration between engineers, physicists, biologists, physicians and other professionals dealing with cutting-edge themes in and advanced technologies serving the broad field of biomedical engineering.

*DNA barcoding: a practical tool for fundamental and applied biodiversity research* Zoltan T Nagy, Thierry Backeljau, Marc De Meyer, Kurt Jordaens, 2013-12-30 DNA barcoding has become a well-accepted and popular tool for the identification of species and the detection of cryptic taxonomic diversity. As such, it has a tremendous potential for a wide variety of applications in taxonomy, agronomy, conservation biology, forensics etc. Therefore, several countries, institutions and organizations have launched DNA barcoding projects in the context of the international Consortium for the Barcode of Life (CBOL) initiative. Also Belgium has done so with the establishment of the FWO research community Belgian Network for DNA barcoding. In 2012, this network organized the Third European Conference for the Barcode of Life (ECBOL3) in Brussels.

During this event a call was made to publish a collection of papers under the thematic title "DNA barcoding: a practical tool for fundamental and applied biodiversity research". With the financial support of the EC project "ViBRANT" (Virtual Biodiversity Research and Access Network for Taxonomy), 21 papers were bundled to form this special "ZooKeys" issue with the aim to present various applications, advantages and limitations of DNA barcoding. Hence, it is the editors' hope that this issue provides a modest, but timely, contribution to the already vast literature on DNA barcoding.

**Nuclear War** Raymond G. Wilson, 2014 Nuclear War: Hiroshima, Nagasaki, and A Workable Moral Strategy for Achieving and Preserving World Peace Raymond G. Wilson The real truth of the matter is, as you and I know, that a financial element in the large centers has owned the government of the United States since the days of Andrew Jackson. □Franklin D. Roosevelt There is considerable reason to believe President Roosevelt's statement is quite true, thus the financial element in the large centers shares responsibility and blame for the tens, if not hundreds, of thousands of war deaths in the last two decades. The people of the world need protection from those responsible for provoking nations to war. In the United States this responsibility lies with all elements in the highest levels of government, the decision makers. It lies with those who tinker with political and economic machinations, most likely for the advantage of a financial element in the large centers. These are probably people young enough and sufficiently uninformed to have no conception of the atrocity of the nuclear confrontations and conflagrations to which they are quite possibly leading the world. This group of people may include most people serving in the U.S. Congress and from personal experience many in the U.S. Military. I have my doubts whether Presidents have seen all of the results of the world's first nuclear war; they are probably shielded from this. Photographs of the victims were confiscated and held confidential for more than 22 years after 1945. There were well more than 210,000 victims; not many photographs were made and survived. You can learn from this book a tiny fraction of the truth about what happens to people caught in nuclear war. (Although the truth from more than 210,000 will never be heard.) In a future war there would be hundreds of thousands, more likely hundreds of millions, of victims. The United States government has not revealed this kind of truth about its first nuclear war. As of early 2014 no sitting president has ever visited Hiroshima or Nagasaki. In Chapter 5 a solution is suggested to save us all from our nuclear madness. I hate war as only a soldier who has lived it can, only as one who has seen its brutality, its futility, its stupidity. --Dwight D. Eisenhower, ...we also possess the seeds of goodness and justice that humankind was given by nature and has fostered over the ages. We have the ability to cultivate self-control and consideration for others and to strive to live together in a humane and harmonious manner with others. The revival of such true humanity--not only between individuals, but also between nations--is an absolute necessity today, for the age has come when one nation's self-centered behavior could lead all humanity to annihilation. --Naomi Shohno, 1986 America can do whatever we set our mind to. —Barack Obama

**Physiology PreTest Self-Assessment and Review 14/E** Patricia Metting, 2013-11-13 The new edition of Physiology: PreTest simulates the USMLE Step 1 test-taking experience by including 100% v style questions and clinical images. A required course at medical schools, it is a core subject area that students need to fully understand. PreTest assesses students' medical knowledge of core basic science topics within a clinical context through multiple-choice clinical-vignette questions. This is helpful now that core basic sciences are taught in an integrated curriculum. To ensure that questions are representative of the style and level of difficulty of the exams, each PreTest book is reviewed by students who either recently passed their shelf/course exam and/or Step 1.

**PostgreSQL** Bruce Momjian, 2001 The open source PostgreSQL database is soaring in popularity, as thousands of database and web professionals discover its powerful features, transaction support, performance, and industrial-strength scalability. In this book, a founding member of the PostgreSQL development team introduces everything you need to know to succeed with PostgreSQL, from basic SQL commands through

database administration and optimization. PostgreSQL assumes no previous database expertise: it establishes a firm foundation of basic concepts and commands before turning to PostgreSQL's advanced, innovative capabilities. Bruce Momjian walks readers step-by-step from their first database queries through the complex queries needed to solve real-world problems. He presents proper query syntax, then explores the value and use of each key SQL commands in working applications. Learn to manipulate and update databases, customize queries, work with SQL aggregates, use joins, combine SELECTs with subqueries, work with triggers and transactions, import and export data, use PostgreSQL query tools, and more. Discover PostgreSQL techniques for server-side programming and multi-user control, and master PostgreSQL's interfaces to C, C++, ODBC, JDBC, Perl, and Tcl/Tk. You'll also find detailed coverage of PostgreSQL administration, including backups, troubleshooting, and access configuration.
