SQL Tuning Dan Tow, 2003-11-19 A poorly performing database application not only costs users time, but also has an impact on other applications running on the same computer or the same network. SQL Tuning provides an essential next step for SQL developers and database administrators who want to extend their SQL tuning expertise and get the most from their database applications. There are two basic issues to focus on when tuning SQL: how to find and interpret the execution plan of an SQL statement and how to change SQL to get a specific alternate execution plan. SQL Tuning provides answers to these questions and addresses a third issue that's even more important: how to find the optimal execution plan for the query to use. Author Dan Tow outlines a timesaving method he's developed for finding the optimum execution plan--rapidly and systematically--regardless of the complexity of the SQL or the database platform being used. You'll learn how to understand and control SQL execution plans and how to diagram SQL queries to deduce the best execution plan for a query. Key chapters in the book include exercises to reinforce the concepts you've

learned. SQL Tuning concludes by addressing special concerns and unique solutions to unsolvable problems. Whether you are a programmer who develops SQL-based applications or a database administrator or other who troubleshoots poorly tuned applications, SQL Tuning will arm you with a reliable and deterministic method for tuning your SQL queries to gain optimal performance.

Twilight of the Idols Friedrich Nietzsche, 1997-06-01 *Twilight of the Idols* presents a vivid, compressed overview of many of Nietzsche's mature ideas, including his attack on Plato's Socrates and on the Platonic legacy in Western philosophy and culture. Polt provides a trustworthy rendering of Nietzsche's text in contemporary American English, complete with notes prepared by the translator and Tracy Strong. An authoritative Introduction by Strong makes this an outstanding edition. Select Bibliography and Index.

The Book of the Damned Charles Fort, 2020-09-28 Time travel, UFOs, mysterious planets,

stigmata, rock-throwing poltergeists, huge footprints, bizarre rains of fish and frogs-nearly a century after Charles Fort's *Book of the Damned* was originally published, the strange phenomenon presented in this book remains largely unexplained by modern science. Through painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day it remains the most popular. If you agree that truth is often stranger than fiction, then this book is for you--Taken from Good Reads website.

To the Lighthouse Virginia Woolf, 2023-06-27 Virginia Woolf's classic modernist novel, *To the*

Lighthouse, draws from her own life and experiences. Hailed as one of the greatest works of modernist fiction, Virginia Woolf's semi-autobiographical novel about the Ramsay family explores the themes of perspective, interpersonal relationships, and the complexity of human experience. Woolf's use of shifting points of view in the narrative highlights how each person sees and experiences events in their own way. As conflict and grief impact the Ramsays throughout their time on Scotland's Isle of Skye, the reader is pulled into Woolf's own life.

The Adventures of sherlock Holmes Arthur Conan Doyle,2020-03-09 The Adventures of Sherlock Holmes is a collection of twelve short stories by Arthur Conan Doyle, featuring his fictional detective Sherlock Holmes. It was first published on 14 October 1892; the individual stories had been serialised

in The Strand Magazine between July 1891 and June 1892. The stories are not in chronological order, and the only characters common to all twelve are Holmes and Dr. Watson. The stories are related in first-person narrative from Watson's point of view. In general the stories in The Adventures of Sherlock Holmes identify, and try to correct, social injustices. Holmes is portrayed as offering a new, fairer sense of justice. The stories were well received, and boosted the subscriptions figures of The Strand Magazine, prompting Doyle to be able to demand more money for his next set of stories. The first story, A Scandal in Bohemia, includes the character of Irene Adler, who, despite being featured only within this one story by Doyle, is a prominent character

Free Culture Lawrence Lessig, 2015-11-13 How big media uses technology and the law to lock down culture and control creativity. Free Culture is an entertaining and important look at the past and future of the cold war between the media industry and new technologies. - Marc Andreessen, cofounder of Netscape. Free Culture goes beyond illuminating the catastrophe to our culture of increasing regulation to show examples of how we can make a different future. These new-style heroes and examples are rooted in the traditions of the founding fathers in ways that seem obvious after reading this book. Recommended reading to those trying to unravel the shrill hype around 'intellectual property.' - Brewster Kahle, founder of the Internet Archive. Manifesto Ernesto Che Guevara, Friedrich Engels, Karl Marx, Rosa Luxemburg, 2015-04-10 "If you are curious and open to the life around you, if you are troubled as to why, how and by whom political

power is held and used, if you sense there must be good intellectual reasons for your unease, if your curiosity and openness drive you toward wishing to act with others, to ‘do something,’ you already have much in common with the writers of the three essays in this book.” – Adrienne Rich With a preface by Adrienne Rich, Manifesto presents the radical vision of four famous young rebels: Marx and Engels’ Communist Manifesto, Rosa Luxemburg’s Reform or Revolution and Che Guevara’s Socialism and Humanity.
