Newton's Gravity Douglas W. MacDougal, 2012-12-16 “Newton’s Gravity” conveys the power of simple mathematics to tell the fundamental truth about nature. Many people, for example, know the tides are

caused by the pull of the Moon and to a lesser extent the Sun. But very few can explain exactly how and why that happens. Fewer still can calculate the actual pulls of the Moon and Sun on the oceans. This book shows in clear detail how to do this with simple tools. It uniquely crosses disciplines – history, astronomy, physics and mathematics – and takes pains to explain things frequently passed over or taken for granted in other books. Using a problem-based approach, “Newton’s Gravity” explores the surprisingly basic mathematics behind gravity, the most fundamental force that governs the movements of satellites, planets, and the stars. Author Douglas W. MacDougal uses actual problems from the history of astronomy, as well as original examples, to deepen understanding of how discoveries were made and what they mean. “Newton’s Gravity” concentrates strongly on the development of the science of orbital motion, beginning with Galileo, Kepler, and Newton, each of whom is prominently represented. Quotes and problems from Galileo’s Dialogs Concerning Two New Sciences and particularly Newton’s Principia help the reader get inside the mind of those thinkers and see the problems as they saw them, and experience their concise and typically eloquent writing. This book enables students and curious minds to explore the mysteries of celestial motion without having to know advanced mathematics. It will whet the reader’s curiosity to explore further and provide him or her the tools (mathematical or physical) to do so.

Wellbeing, Recovery and Mental Health Mike Slade,Lindsay Oades,Aaron Jarden,2017-02-01 This book brings together two bodies of knowledge - wellbeing and recovery. Wellbeing and 'positive' approaches are increasingly influencing many areas of society. Recovery in mental illness has a growing empirical

evidence base. For the first time, overlaps and cross-fertilisation opportunities between the two bodies of knowledge are identified. International experts present innovations taking place within the mental health system, which include wellbeing-informed new therapies, e-health approaches and peer-led recovery communities. State-of-the-art applications of wellbeing to the wider community are also described, across education, employment, parenting and city planning. This book will be of interest to anyone connected with the mental health system, especially people using and working in services, and clinical and administrators leaders, and those interested in using research from the mental health system in the wider community.

Blood Pressure Monitoring in Cardiovascular Medicine and Therapeutics William B. White, 2007-11-16
This is a newly updated second edition of Blood Pressure Monitoring in Cardiovascular Medicine and Therapeutics. William B. White, MD, and a panel of highly experienced clinicians critically review every aspect of out-of-office evaluation of blood pressure. The world-class opinion leaders writing here describe the significant advances in our understanding of the circadian pathophysiology of cardiovascular disorders.

Global Health Watch 3, 2011-10-01 In an increasingly globalised world with new cross-border threats to public health and widening disparities between populations, civil society actors are challenging the existing structures of global health policies. Like its critically acclaimed predecessors, this third volume of Global Health Watch covers a comprehensive range of topics, including access to medicines, mental health, water and sanitation, nutrition, and war and conflict. Unlike most documentations of global health, it also draws attention to the politics of global health and the policies and actions of key actors. Global Health Watch books

are the definite independent sources of data on global health, and this third volume offers unique and essential information for anyone working in the field.

Cycling Futures Jennifer Bonham, Marilyn Johnson, 2015-12-04 The focus of the first half of the book is largely on the current engagement with cycling, challenges faced by existing and would-be cyclists and the issues cycling might address. The second half of the book is concerned with strategies and processes of change. Contributors working from different ontological positions reflect on changing socio-spatial relations to enable the broadest possible participation in cycling.

Asian and Pacific Cities Ian Shirley, Carol Neill, 2013-03-12 The cities of Asia and the Pacific are at the epicentre of development in what is arguably, the most populous, culturally distinctive, and economically powerful region in the world. 16 major cities such as Tokyo, Shanghai, Manila, Jakarta, Bangkok, Singapore, Auckland, Kuala Lumpur and Santiago, located in countries as diverse as Mexico and Vietnam, Samoa and India, China and Australia, exemplify the changing patterns of development across this vast region of the world. By tracking economic and social trends the contributors to this collection reveal how a wide range of political and cultural factors have interacted over time to provide a powerful explanation for the shape and characteristics of 'the city' today. Based on a collaborative research programme and drawing on the work of local researchers, this book examines the realities of city development characterised by domestic migration, spatial and social fragmentation, squatter settlements and gated communities, economic experiments and the emergence of the 'Asian Tigers'. The collection as a whole records the way in which countries in this region have moved from underdevelopment to become global economic and political

powers. This book provides a fascinating journey through Asia and the Pacific by generating an insiders' view of each city and an insight into national development. As such it will be of great interest to students and scholars interested in: the Asian and Pacific region; in disciplines such as economics, politics, geography and sociology; and in policy domains such as urban planning and economic development.

The Theater of War Bryan Doerries, 2016-08-23 For years theater director Bryan Doerries has been producing ancient Greek tragedies for a wide range of at-risk people in society. His is the personal and deeply passionate story of a life devoted to reclaiming the timeless power of an ancient artistic tradition to comfort the afflicted. Doerries leads an innovative public health project—Theater of War—that produces ancient dramas for current and returned soldiers, people in recovery from alcohol and substance abuse, tornado and hurricane survivors, and more. Tracing a path that links the personal to the artistic to the social and back again, Doerries shows us how suffering and healing are part of a timeless process in which dialogue and empathy are inextricably linked. The originality and generosity of Doerries's work is startling, and *The Theater of War*—wholly unsentimental, but intensely felt and emotionally engaging—is a humane, knowledgeable, and accessible book that will both inspire and enlighten.

Advances in Sustainable Polymers Vimal Katiyar, Raghvendra Gupta, Tabli Ghosh, 2019-11-05 This book provides a systematic overview of the processing and applications of sustainable polymers. The volume covers recent advances in biomedical, food packaging, fuel cell, membrane, and other emerging applications. The book begins by addressing different sections of biomedical application including use of carbohydrate-based therapeutics, nanohybrids, nanohydrogels, bioresorbable polymers and their composites,

polymer-grafted nanobiomaterials for biomedical devices and implants, nanofibres, and others. The second part of this book discusses various processing and packaging materials for food packaging applications. The last section discusses other emerging applications, including using microbial fuel cells for waste water treatment, microfluidic fuel cells for low power applications, among others. This volume will be relevant to researchers working to improve the properties of bio-based materials for their advanced application and wide commercialization.

Ecosystem Services The National Academies Keck Futures Initiative, Interdisciplinary Research Team Summaries; Conference, Arnold and Mabel Beckman Center, Irvine, California, November 10-11, 2011, 2012-04-20
Natural environments provide enormously valuable, but largely unappreciated, services that aid humans and other earthlings. It is becoming clear that these life-support systems are faltering and failing worldwide due to human actions that disrupt nature's ability to do its beneficial work. Ecosystem

Services: Charting a Path to Sustainability documents the National Academies' Keck Futures Initiative Conference on Ecosystem Services. At this conference, participants were divided into 14 interdisciplinary research teams to explore diverse challenges at the interface of science, engineering, and medicine. The teams needed to address the challenge of communicating and working together from a diversity of expertise and perspectives as they attempted to solve a complicated, interdisciplinary problem in a relatively short time. Ecosystem Services: Charting a Path to Sustainability describes how ecosystem services scientists work to document the direct and indirect links between humanity's well-being and the many benefits provided by the natural systems we occupy. This report explains the specific topics the interdisciplinary research teams addressed at the conference, including the following: -how ecosystem services affect infectious and chronic diseases -how to identify what resources can be produced renewably or recovered by developing intense technologies that can be applied on a massive scale -how to develop social and technical capabilities to respond to abrupt changes in ecosystem services -how to design agricultural and aquacultural systems that provide food security while maintaining the full set of ecosystem services needed from landscapes and seascapes -how to design production systems for ecosystem services that improve human outcomes related to food and nutrition -how to develop appropriate methods to accurately value natural capital and ecosystem services -how to design a federal policy to maintain or improve natural capital and ecosystem services within the United States, including measuring and documenting the effectiveness of the policy -how to design a system for international trade that accounts for impacts on ecosystem services -how to develop a program that increases the American public's

appreciation of the basic principles of ecosystem services

Lilavai Kouhala,2021-01-05 The Prakrit romance Lailāvaāi, an early ninth-century poem attributed to Kouhala and set in modern-day coastal Andhra Pradesh, is the most celebrated work in the genre. Complexly narrated in the alternating voices of its heroines and heroes and featuring a cast of semi-divine and magical beings, it centers on three young women: Lailāvaāi, princess of Sinhala (today's Sri Lanka);

her cousin Mahanumai, princess of the mythical city Alaka; and Kuvalaavali, Mahanumai's adopted sister. Following a prophecy that Lailaavaai's husband will rule the earth, the princess happens upon a portrait of King Hala of Pratihthana and immediately falls in love. While journeying to meet him, she hears her cousins' tales of their lost loves, and then vows not to marry until they are reunited. To win Lailaavaai's hand, King Hala journeys to the underworld, faces monsters, and overcomes armies. Lailaavaai explores themes of karma and female desire, notably privileging women as storytellers. A new edition of the Prakrit text, presented in the Devanagari script, accompanies a new English prose translation--
