The Fourth Industrial Revolution Klaus Schwab, 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Supply Chain Strategy and Financial Metrics Bram DeSmet, 2018-05-03 Supply Chain Strategy and Financial Metrics is a step-by-step guide to balancing the triangle of service, cost and cash which is the essence of supply chain management. Supply chains have become increasingly strategy-driven, and this Supply Chain Triangle approach puts the supply chain at the heart of the strategy discussion instead of seeing it as a result. Supply Chain Strategy and Financial Metrics fully reflects the 'inventory' or 'working capital' angle and examines the optimisation of the supply chain and Return on Capital Employed. Including case studies of Barco, Casio and a selection of food retail companies, this book covers building a strategy-driven KPI dashboard, target setting and financial benchmarking. Regular examples and diagrams illustrate how different types of strategies lead to different trade-offs in the Supply Chain Triangle. This ground-breaking text links supply chain, strategy and finance through financial metrics, therefore creating value for the shareholder. Online supporting resources include worksheets covering basic financial concepts such as cash flow and working capital, with example data sets and guidelines/exercises to make it interactive.

Inclusion Matters World Bank, 2013-11-26 Social inclusion is on the agenda of governments, policymakers, and nonstate actors around the world. Underpinning this concern is the realization that despite progress on poverty reduction, some people continue to feel left out. This report aims to unpack the concept of social inclusion and understand better how policies can be designed to further inclusion. First, the report offers a definition of social inclusion as the process of improving the terms for individuals and groups to take part in society. It unpacks different domains of society that excluded groups and individuals are at particular risk of being left out of -- markets, services, and spaces. Second, the report discusses the most important global mega-trends such as migration, climate change, and aging of societies, which will impact challenges and opportunities for inclusion. Finally, it argues that despite these challenges, change towards inclusion is possible and offers examples of inclusionary policies.

Diversity Blueprint Association of American Colleges and Universities, 1998 This guide uses the planning process at the University of Maryland, College Park, as an example of comprehensive campus-wide planning for institutional and programmatic diversity goals. Five planning principles are identified: (1) accountability, (2) inclusiveness, (3) shared responsibility, (4) evaluation, and (5) institutionalization. Chapters are organized thematically, highlighting diversity programs and institutional priorities that have been created at the University of Maryland based on the five planning principles as applied to the following five institutional planning priorities: (1)

leadership and systemic change; (2) recruitment, retention, and affirmative action; (3) curriculum transformation; (4) campus-community connections; and (5) faculty, staff, and student involvement. The structure of the manual mirrors that of DiversityWeb, a Web site that offers good practices and a planning format for institutions working together on diversity efforts. Inserts and sidebars throughout the guide provide practical tips and leadership statements of individuals at various institutions. Appended are brief descriptions of programs at other institutions and a list of the web sites referred to in the manual. (DB)

Advanced Manufacturing and Sustainable Logistics Wilhelm Dangelmaier, Alexander Blecken, Robin Delius, Stefan Klöpfer, 2010-04-12 In times of declining economic growth, companies have to control their costs more than ever to save resources needed in the future. Regardless of the economic size of the company, the processes of production and logistics play a decisive role in stabilizing procedures and avoiding waste. Both are important cost drivers in manufacturing companies and therefore they offer large potential savings. Pervasive networking in the last years has contributed to a hitherto unknown transparency of global markets. This harmonization opened up new possibilities of entering foreign markets for procurement and sales to the companies. The emerging global procurement strategy was understood as a chance to rethink the relocation of existing production facilities to profit from existing differences in price and performance as a resource-saving factor. Many companies tended towards a reduction of their vertical integration by outsourcing sections of their value chain. These contracted services of production result in higher transport volumes, increased complexity of supply processes and new requirements on logistic networks. This trend of outsourcing has not stopped, but is slowing down noticeably. Additionally, there is an increasing proportion of companies restoring business units that were outsourced before. Reasons for turning back decisions are often to be found in missed goals. It is not unusual that important cost factors were disregarded in the original basis of decision-making. In the meantime many companies have realized that it is easier to achieve stability of processes and therewith a control of costs by increasing their own contribution to production. Especially in times of under-utilized capacities like in the current crisis, insourcing can be a strategic option.

Understanding Media Industries Timothy Havens, Amanda D. Lotz, 2016 This text examines the influence of media industry organization and practices on society; at the same time, it offers students pursuing both scholarly and professional careers related to the media industries a comprehensive overview of how the industries work, why they work as they do, and what the broader theoretical and practical implications of the media industries are.

Wealth Creation in the World's Largest Mergers and Acquisitions B. Rajesh Kumar, 2018-11-29 This book highlights research-based case studies in order to analyze the wealth created in the world's largest mergers and acquisitions (M&A). This book encourages cross fertilization in theory building and applied research by examining the links between M&A and wealth creation. Each chapter covers a specific case and offers a focused clinical examination of the entire lifecycle of M&A for each mega deal, exploring all aspects of the process. The success of M&A are analyzed through two main research approaches: event studies and financial performance analyses. The event studies examine the abnormal returns to the shareholders in the period surrounding the merger announcement. The financial performance studies examine the reported financial results of acquirers before and after the acquisition to see whether financial performance has improved after merger. The relation between method of payment, premium paid and stock returns are examined. The chapters also discuss synergies of the deal-cost and revenue synergies. Mergers and acquisitions represent a major force in modern financial and economic environment. Whether in times of boom or bust, M&As have emerged as a compelling strategy for growth. The biggest companies of modern day have all taken form through a series of restructuring activities like multiple mergers. Acquisitions continue to remain as the quickest route companies take to operate in new markets and to add new capabilities and resources. The cases covered in this book highlights high profile M&As and focuses on the wealth creation for shareholders of acquirer and target firms as a financial assessment of the merger's success. The book should be useful for finance professionals, corporate planners, strategists, and managers.
