*Guns, Democracy, and the Insurrectionist Idea* Joshua Horwitz, Casey Anderson, 2018-05-09 The NRA steadfastly maintains that the 30,000 gun-related deaths and 300,000 assaults with firearms in the United States every year are a small price to pay to guarantee freedom. As former NRA President Charlton Heston put it, freedom isn't free. And when gun enthusiasts talk about Constitutional liberties guaranteed by the Second Amendment, they are referring to freedom in a general sense, but they also have something more specific in mind---freedom from government oppression. They argue that the only way to keep federal authority in check is to arm individual citizens who can, if necessary, defend themselves from an aggressive government. In the past decade, this view of the proper relationship between government and individual rights and the insistence on a role for private violence in a democracy has been co-opted by the conservative movement. As a result, it has spread beyond extreme militia groups to influence state and national policy. In *Guns, Democracy, and the Insurrectionist Idea*, Josh Horwitz and Casey Anderson reveal that the proponents of this view base their argument on a deliberate misreading of history. The Insurrectionist myth has been forged by twisting the facts of the American Revolution and the founding of the United States, the denial of civil rights to African-Americans after the Civil War, and the rise of the Third Reich under Adolf Hitler. Here, Horwitz and Anderson set the record straight. Then, challenging the proposition that more guns equal more freedom, they expose Insurrectionism---not government oppression---as the true threat to freedom in the U.S. today. Joshua Horwitz received a law degree from George Washington University and is currently a visiting scholar at the Johns Hopkins Bloomberg School of Public Health. He is Executive Director of the Coalition to Stop Gun Violence and the Educational Fund to Stop Gun Violence. He has spent nearly two decades working on gun violence prevention issues. He lives in Arlington, Virginia. Casey Anderson holds a law degree from Georgetown University and is currently a lawyer in private practice in Washington, D.C. He has served in senior staff positions with the U.S. Congress, the Coalition to Stop Gun Violence, and Americans for Gun Safety. He lives in Arlington, Virginia.

**Locating Zika** Kevin Bardosh, 2019-12-06 The emergence of Zika virus in 2015 challenged conventional ideas of mosquito-borne diseases, tested the resilience of health systems and embedded itself within local sociocultural worlds, with major implications for environmental, sexual, reproductive and paediatric health. This book explores this complex viral epidemic and situates it within its broader social, epidemiological and historical context in Latin America and the Caribbean. The chapters include a diverse set of case studies from scholars and health practitioners working across the region, from Brazil, Venezuela, Ecuador, Mexico, Colombia, the United States and Haiti. The book explores how mosquito-borne disease epidemics (not only Zika but also chikungunya, dengue and malaria) intersect with social change and health governance. By doing so, the authors reflect on the ways in which situated knowledge and social science approaches can contribute to more effective health policy and practice for mosquito-borne disease threats in a changing world. **Internet of Things** Rajkumar Buyya, Amir Vahid Dastjerdi, 2016-05-11 Internet of Things: Principles and Paradigms captures the state-of-the-art research in Internet of Things, its applications, architectures, and technologies. The book identifies potential future directions and technologies that facilitate insight into numerous scientific, business, and consumer applications. The Internet of Things (IoT) paradigm promises to make any electronic devices part of the Internet environment. This new paradigm opens the doors to new innovations and interactions between people and things that will enhance the quality of life and utilization of scarce resources. To help realize the full potential of IoT, the book addresses its numerous challenges and develops the conceptual and technological solutions for tackling them. These challenges include the development of scalable architecture, moving from closed systems to open systems, designing interaction protocols, autonomic management, and the privacy and ethical issues around data sensing, storage, and processing. Addresses the main concepts and features of the IoT paradigm Describes different architectures for managing IoT platforms Provides insight on trust, security, and privacy in IoT environments Describes data management techniques applied to the IoT environment Examines the key enablers and solutions to enable practical IoT systems Looks at the key developments that support next generation IoT platforms Includes input from expert contributors from both academia and industry on building and deploying IoT platforms and applications

Information Systems Design and Intelligent Applications Vikrant Bhateja, Bao Le Nguyen, Nhu Gia Nguyen, Suresh Chandra Satapathy, Dac-Nhuong Le, 2018-03-01 The book is a collection of high-quality peer-reviewed research papers presented at International Conference on Information System Design and Intelligent Applications (INDIA 2017) held at Duy Tan University, Da Nang, Vietnam during 15-17 June 2017. The book covers a wide range of topics of computer science and information technology discipline ranging from image processing, database application, data mining, grid and cloud computing, bioinformatics and many others. The various intelligent tools like swarm intelligence, artificial intelligence, evolutionary algorithms, bio-inspired algorithms have been well applied in different domains for solving various challenging problems.

*The Dragon Takes Flight* Derek A. Levine, 2015-06-24 The Dragon Takes Flight: China's Aviation Policy, Achievements, and International Implications analyzes China's journey toward the development of its C-919 large passenger aircraft and how Boeing and Airbus can meet the challenges they may face from its success.

*The Kurds in Iraq* Kerim Yildiz, 2004 The Kurds in Iraq by Kerim Yildiz, explores the key issues facing the Kurds in Iraq in the aftermath of the US-led invasion and chaos of the occupation. It is the most clear and up-to-date account of the problems that all political groups face in rebuilding the country, as well as exploring Kurdish links and international relations in the broader sense. It should be required reading for policy-makers and anyone interested in the current position of the Kurds in Iraq. Yildiz explores the impact of war and occupation on Iraqi Kurdistan, and in particular the crucial role of the city of Kirkuk in the post-war settlement. He also looks at how UN rifts potentially affect the Kurds; relations between Iraqi Kurds and Turkey; relations with Iran; and US policy towards the Kurds.

**E-Learning in the Middle East and North Africa (MENA) Region** Alan S. Weber, Sihem Hamlaoui, 2018-02-27 In the last decade, due to factors of ICT infrastructural and broadband maturation, rising levels of educational attainment and computer literacy, and diversification strategies, e-learning has exploded in the Middle East and North Africa (MENA) region. However, significant barriers remain in the region's e-learning development: lack of research on outcomes and effectiveness, paucity of Arabic language learning objects, monopolies and high cost of telecommunications, cultural taboos, accreditation, censorship, and teacher training. This unique volume is the first comprehensive effort to describe the history, development, and current state of e-learning in each of the 20 MENA countries from Algeria to Yemen. Each entry is expertly written by a specialist who is acutely familiar with the state of e-learning in their respective country, and concludes with a bibliography of key reports, peer-reviewed books and articles, and web resources. E-Learning in the Middle East and North Africa (MENA) proves itself as a vital compendium for a wide readership that includes academics and students, transnational program directors, international education experts, MENA government departments, commercial vendors and investors, and ICT development and regulatory agencies involved in e-learning in the Middle East.

**Enhancing Access to and Sharing of Data Reconciling Risks and Benefits for Data Re-use across Societies** OECD, 2019-11-26 This report examines the opportunities of enhancing access to and sharing of data (EASD) in the context of the growing importance of artificial intelligence and the Internet of Things. It discusses how EASD can maximise the social and economic value of data re-use and how the related risks and challenges can be addressed. It highlights the trade-offs, complementarities and possible unintended consequences of policy action – and inaction. It also provides examples of EASD approaches and policy initiatives in OECD countries and partner economies.

**Transport Systems Telematics** Jerzy Mikulski,2010-10-06 The idea of telematics appeared more than a decade ago and it is possible to define it, in a general and simple way, as a communication system for collecting, processing and distributing information. The transport services market is definitely the most important area for telematic applications. Transport-telematics issues constitute a field of knowledge of transport that integrates information technology and telecommunications in applications for managing and controlling traffic in transport systems, stimulating technical and organizational activities that ensure improved effectiveness and safe operation of such systems. Integrated and cooperating telematic applications constitute intelligent transport systems. The basis of such systems is to efficiently collect and process information and to manage its flow within the system. This enables supplying information from almost all areas of transport activities in real time. Intelligent transport--supported by a number of integrated telecommunications, IT measurement and control engineering solutions, and by appropriate tools and software--comprises telematic applications. They have an extensive range of use in many areas of transport, allowing the integration of the means and types of transport, including its infrastructure, business organization and management processes. This monograph is a collection of selected papers presented at the jubilee transport telematics conference, TST 2010, and is the result of the work of many scientists associated with this area of knowledge and who had spent years with the conference.

**Hidden Challenges to Education Systems in Transition Economies** Sue E. Berryman,2000-01-01 This book provides diagnostic and strategic analysis of the challenges to educational systems in the transition economies of the Eastern and Central Europe and Central Asia. At the outset of the transition many of these countries educational systems had solved problems such as limited access, gender inequalities, and poor quality outputs that still plague other regions of the world. Many policy makers believed that education was not a problem sector in transition countries. This report presents originally unforeseen results which suggest that deep and broad problems are emerging in the sector and were threatening many countries' achievements in education. The region's education systems which once were a good fit with the planned economies and authoritarian political systems are proving to be a poor fit with market economies and more open political systems. Inequities in learning opportunities are increasing at a time when human capital is becoming ever more important in the region's recovery and development. The danger is that in some countries of the region these education problems, left unchecked, could threaten to create a vicious circle that will make poverty and social exclusion a powerful generational inheritance.

*Reforming Education Finance in Transition Countries* Juan Diego Alonso,Alonso Sánchez,2011 This book reviews the experience with one specific though widely introduced approach to funding general education, namely per capita financing (PCF), in six countries in the Europe and Central Asia (ECA) region in an effort to learn which outcomes were achieved and how. Six country case studies are the bulk of the book and were chosen as a project that the World Bank initiated back in 2007. The set of countries chosen (Armenia, Estonia, Georgia, Lithuania, Poland and the Russian Federation) was motivated by the fact that the World Bank was actively involved in supporting reforms in these countries and, in some cases, played a fundamental role in bringing these reforms to fruition. The hope is that, as a result, the likelihood of observing the outcomes of per capita financing is higher. An attempt was made at geographic variation across the ECA region as well. Chapter 1 provides a general introduction to the book. Chapters 2 through 7 discuss the country case studies. The case studies are presented in alphabetical order: Armenia (chapter 2), Estonia (chapter 3), Georgia (chapter 4), Lithuania (Chapter 5), Poland (Chapter 6), and Russia (chapter 7). All six chapters present a similar structure. First, an introduction is provided to motivate the discussion. Second, the historical background to the introduction of the PCF system is discussed. Third, the design of the PCF scheme is analyzed. Fourth, the peculiarities of the implementation of the scheme are described. Fifth, an assessment of a set of three main outcomes - efficiency, equity and transparency/accountability - is presented. A sixth and final section provides a summary of the lessons learned in each of the cases. Chapter 8 presents an in-depth overview of the case studies, within a common framework to compare these experiences.

*Excel for Windows 95* Cathy Kenny,1995 The Excel for Windows 95 Visual Quick Reference offers a visual approach to learning Excel for Windows' common features. Each topic is covered with a series of screen shots and callouts that walk the reader through each task. An excellent companion book to icon-based software such as Excel for Windows.

**Needs-based Resource Allocation in Education** Kenneth Norman Ross,Rosalind Levačić,1999 The book explores a range of conceptual, methodological and empirical issues concerned with the application of needs-based resource allocation in education via formula funding of schools. The first part presents the policy context for needs-based formula funding, the second examines technical matters related to the construction of funding formulae and the third part presents case studies in five countries (Australia, England and Wales, United States and New Zealand). The conclusion offers a 'checklist' for senior decision-makers in Ministries of Education that highlights the pre-conditions for undertaking a successful implementation of needs-based formula funding.

*Heart-life in Song* Frances Harrison Marr,1883

*Harnessing the Genie: Science and Technology Forecasting for the Air Force 1944-1986* ,1988 This monograph on the forecasting of long-range Air Force science began as an attempt to describe the five major scientific studies undertaken by the U.S. Army Air Force (USAAF)/U.S. Air Force (USAF) since the end of World War II. 'Toward New Horizons' was initiated to summarize the most advanced air power technologies of World War II and project them into the future. 'Woods Hole Summer Studies' organized hundreds of academic scientists to predict the short and long-term military uses of space. 'Project Forecast' had the mandate of revitalizing Air Force thinking by linking national policy issues of scientific vistas and new weapon systems. 'New Horizons II' endeavored to point the way toward technological improvements in a period of expected scarcity. 'Project Forecast II' sought to infuse the Air Force laboratories with new avenues of basic science research.
