Feminist Rhetorical Practices Jacqueline Jones Royster,Gesa E Kirsch,2012-02-10 This book reviews major developments in feminist rhetorical studies in recent decades and explores the theoretical, methodological, and ethical impact of this work on rhetoric, composition, and literacy studies. The authors argue that there has been a dramatic shift in what is studied (diverse populations, settings, contexts, communities, etc.); how these communities are studied (methodologically, epistemologically); and how work in the field is evaluated (new criteria are required for new kinds of studies).

The Merger Control Review Ilene Knable Gotts,

Entrepreneurial Ecosystems Allan O'Connor,Erik Stam,Fiona Sussan,David B. Audretsch,2017-12-30 This book features latest research insights into the study of the entrepreneurial ecosystem. The focus is on understanding its influence on the development of socially and physically defined ‘places’, and how these factors are related with each other. The book argues that regardless of how the concept of a ‘place’ is defined, be it cities, regions, nations or otherwise, the impact of new technologies will influence much of our business, social, and economic landscapes. Evidently, there is an increasing pressure on ‘places’ to embrace new opportunities for strategic development and confront complacency. The solution may very well be in creating and sustaining entrepreneurial ecosystems where entrepreneurial action thrives and innovation drives the new economy.

geographic market. Rebooting AI Gary Marcus,Ernest Davis,2019-09-10 Two leaders in the field offer a compelling analysis of the current state of the art and reveal the steps we must take to achieve a truly robust artificial intelligence. Despite the hype surrounding AI, creating an intelligence that rivals or exceeds human levels is far more complicated than we have been led to believe. Professors Gary Marcus and Ernest Davis have spent their careers at the forefront of AI research and have witnessed some of the greatest milestones in the field, but they argue that a computer beating a human in Jeopardy! does not signal that we are on the doorstep of fully autonomous cars or superintelligent machines. The achievements in the field thus far have occurred in closed systems with fixed sets of rules, and these approaches are too narrow to achieve genuine intelligence. The real world, in contrast, is wildly complex and open-ended. How can we bridge this gap? What will the consequences be when we do? Taking inspiration from the human mind, Marcus and Davis explain what we need to advance AI to the next level, and suggest that if we are wise along the way, we won't need to worry about a future of machine overlords. If we focus on endowing machines with common sense and deep understanding, rather than simply focusing on statistical analysis and gathering ever larger collections of data, we will be able to create an AI we can trust—in our homes, our cars, and our doctors' offices. Rebooting AI provides a lucid, clear-eyed assessment of the current science and offers an inspiring vision of how a new generation of AI can make our lives better.

Rhetoric and the Digital Humanities Jim Ridolfo,William Hart-Davidson,2015-01-19 The digital humanities is a rapidly growing field that is transforming humanities research through digital tools and resources. Researchers can now quickly trace every one of Issac Newton's annotations, use social media to engage academic and public audiences in the interpretation of cultural texts, and visualize travel via ox cart in third-century Rome or camel caravan in ancient Egypt. Rhetorical scholars are leading the revolution by fully utilizing the digital toolbox, finding themselves at the nexus of digital innovation. Rhetoric and the Digital Humanities is a timely, multidisciplinary collection that is the first to bridge scholarship in rhetorical studies and the digital humanities. It offers much-needed guidance on how the theories and methodologies of rhetorical studies can enhance all work in digital humanities, and vice versa. Twenty-three essays over three sections delve into connections, research methodology, and future directions in this field. Jim Ridolfo and William Hart-Davidson have assembled a broad group of more than thirty accomplished scholars. Read together, these essays represent the cutting edge of research, offering guidance that will energize and inspire future collaborations.

Methods and Methodology in Composition Research Gesa Kirsch,Patricia A. Sullivan,1992 In original essays, fourteen nationally known scholars examine the practical, philosophical, and epistemological implications of a variety of research traditions. Included are discussions of historical, theoretical, and feminist scholarship; case-study and ethnographic research; text and conversation analysis; and cognitive, experimental, and descriptive research. Issues that cross methodological boundaries, such as the nature of collaborative research and writing, methodological pluralism, the classification and coding of research data, and the politics of composition research, are also examined. Contributors reflect on their own research practices, and so reflect the current state of composition research itself.

The Metainterface Christian Ulrik Andersen,Soren Bro Pold,2023-10-31 How the interface has moved from the PC into cultural platforms, as seen in a series of works of net art, software art and electronic literature. The computer interface is both omnipresent and invisible, at once embedded in everyday objects and characterized by hidden exchanges of information between objects. The interface has moved from office into culture, with devices, apps, the cloud, and data streams as new cultural platforms. In The Metainterface, Christian Ulrik Andersen and Søren Bro Pold examine the relationships between art and interfaces, tracing the interface's disruption of everyday cultural practices. They present a new interface paradigm of cloud services, smartphones, and data capture, and examine how particular art forms—including net art, software art, and electronic literature—seek to reflect and explore this paradigm. Andersen and Pold argue that despite attempts to make the interface disappear into smooth access and smart interaction, it gradually resurfaces; there is a metainterface

to the displaced interface. Art can help us see this; the interface can be an important outlet for aesthetic critique. Andersen and Pold describe the “semantic capitalism” of a metainterface industry that captures user behavior; the metainterface industry's disruption of everyday urban life, changing how the city is read, inhabited, and organized; the ways that the material displacement of the cloud affects the experience of the interface; and the potential of designing with an awareness of the language and grammar of interfaces.

A Circular Economy Handbook for Business and Supply Chains Catherine Weetman,2016-12-03 WINNER: Les Plumes des Achats 2018 - Committee Special Prize A Circular Economy Handbook for Business and Supply Chains is an easily digestible and comprehensive handbook that provides a clear guide to the circular economy, helping the reader create future-fit, sustainable strategies. Real examples across a range of market sectors help businesses, students and policymakers understand the theory and fast-developing practice of the circular economy. To help the reader generate ideas, A Circular Economy Handbook for Business and Supply Chains provides a holistic framework for the design and supply chain and supporting business models, and includes tools the reader can use to get started. Whilst growing global consumption presents fantastic business opportunities, our current linear systems (take some materials, make a product, use it and then throw it away) are not fit for purpose. The circular economy unlocks this problem by decoupling resources from consumption. Engaged businesses are re-thinking product design, material choices, business models and supply chains. A Circular Economy Handbook for Business and Supply Chains is a must-read for anyone who wants to apply the circular economy today. Online resources now available: PowerPoint slides of figures and tables from every chapter created by the author.
