The Symbian OS Architecture Sourcebook Ben Morris,2007-04-30 The current Symbian Press list focuses very much on the small scale features of Symbian OS in a programming context. The Architecture Sourcebook is different. It's not a how-to book, it's a 'what and why' book. And because it names names as it unwinds the design decisions which have shaped the OS, it is also a 'who' book. It will show where the OS came from, how it has evolved to be what it is, and provide a simple model for understanding what it is, how it is put together, and how to interface to it and work with it. It will also show why design decision were made, and will bring those decisions to life in the words of Symbian's key architects and developers, giving an insider feel to the book as it weaves the inside story around the architectural presentation. The book will describe the OS architecture in terms of the Symbian system model. It will show how the model breaks down the system into parts, what role the parts play in the system, how the parts are architected, what motivates their design, and how the design has evolved through the different releases of the system. Key system concepts will be described; design patterns will be explored and related to those from other operating systems. The unique features of Symbian OS will be highlighted and their motivation and evolution traced and described. The book will include a substantial reference section itemising the OS and its toolkit at component level and providing a reference entry for each component.

Ion Beams in Nanoscience and Technology Ragnar Hellborg,Harry J. Whitlow,Yanwen Zhang,2009-11-09 Energetic ion beam irradiation is the basis of a wide plethora of powerful research- and fabrication-techniques for materials characterisation and processing on a nanometre scale. Materials with tailored optical, magnetic and electrical properties can be fabricated by synthesis of nanocrystals by ion implantation, focused ion beams can be used to machine away and deposit material on a scale of nanometres and the scattering of energetic ions is a unique and quantitative tool for process development in high speed electronics and 3-D nanostructures with extreme aspect ratios for tissue engineering and nano-fluidics lab-on-a-chip may be machined using proton beams. This book will benefit practitioners, researchers and graduate students working in the field of ion beams and application and more generally everyone concerned with the broad field of nanoscience and technology.

Shadows Michael I. Draper,1999 Describes fully for the first time the aviation aspects of the Nigerian Civil War, Biafra's motley mix of antiquated and modern aircraft was acquired through various dubious and clandestine channels. They faced the Nigerian Air Force. Largely Soviet-supplied and mercenary7-crewed MiG-17s. L-29 Delfins and Hyushin Il-28s. Despite being lan-locked for most of the war Biafra held out, its only link to the outside world being an air bridge to a converted bush airstrip deep in the Biafran heartland. The strip supported an amazing airlift of arms and food--the largest civilian relief airlift in history--which, for almost 18 months kept a nation alive. A special section traces the intgiguing web of British aircraft dealers trying to sell aircraft to the Biafran government--expressly against the wishes of Whitehall.--Dust cover

Africa Speaks, America Answers Robin D. G. Kelley,2012-03-13 In Bedford-Stuyvesant, Brooklyn, pianist Randy Weston and bassist Ahmed Abdul-Malik celebrated with song the revolutions spreading across Africa. In Ghana and South Africa, drummer Guy Warren and vocalist Sathima Bea Benjamin fused local musical forms with the dizzying innovations of modern jazz. These four were among hundreds of musicians in the 1950's and '60's who forged connections between jazz and Africa that definitively reshaped both their music and the world. Each artist identified in particular ways with Africa's struggle for liberation and made music dedicated to, or inspired by, demands for independence and self-determination. That music was the wild, boundary-breaking exultation of modern jazz. The result was an abundance of conversation, collaboration, and tension between African and African American musicians during the era of decolonization. This collective biography demonstrates how modern Africa reshaped jazz, how modern jazz helped form a new African identity, and how musical convergences and crossings altered politics and culture on both continents. In a crucial moment when freedom electrified the African diaspora, these black artists sought one another out to create new modes of expression. Documenting individuals and places, from Lagos to Chicago, from New York to Cape Town, Robin Kelley gives us a meditation on modernity: we see innovation not as an imposition from the West but rather as indigenous, multilingual, and messy, the result of innumerable exchanges across a breadth of cultures.

Greek Medical Papyri Nicola Reggiani,2019-09-23 The volume collects papers presented at the International Conference Greek Medical Papyri - Text, Context, Hypertext held at the University of Parma on November 2-4, 2016, as the final event of the ERC project DIGMEDTEXT, aimed primarily at creating an online textual database of the Greek papyri dealing with medicine. The contributions, authored by outstanding papyrologists and historians of the ancient medicine, deal with a variety of topics focused on the papyrological evidence of ancient medical texts and contexts. The first part, devoted to medical texts, contains some new reflections on important sources such as the Anonymus Londinensis and the Hippocratic corpus, as well as on specific themes like the pharmacological vocabulary, the official medical reports, the medical care in the Roman army. The second part collects papers about the doctors' context, providing highlights from broader viewpoints like the analysis of the writing supports, the study of the ostraka from the Eastern Desert, the evidence of inscriptions and philosophical texts. The third part is entirely focused on the DIGMEDTEXT project itself: the team members present some relevant key issues raised by the digitisation of the medical papyri.

Review of the Draft Fourth National Climate Assessment National Academies of Sciences, Engineering, and Medicine,Division of

Behavioral and Social Sciences and Education,Division on Earth and Life Studies,Board on Environmental Change and Society,Board on Atmospheric Sciences and Climate,Committee to Review the Draft Fourth National Climate Assessment,2018-06-18 Climate change poses many challenges that affect society and the natural world. With these challenges, however, come opportunities to respond. By taking steps to adapt to and mitigate climate change, the risks to society and the impacts of continued climate change can be lessened. The National Climate Assessment, coordinated by the U.S. Global Change Research Program, is a mandated report intended to inform response decisions. Required to be developed every four years, these reports provide the most comprehensive and up-to-date evaluation of climate change impacts available for the United States, making them a unique and important climate change document. The draft Fourth National Climate Assessment (NCA4) report reviewed here addresses a wide range of topics of high importance to the United States and society more broadly, extending from human health and community well-being, to the built environment, to businesses and economies, to ecosystems and natural resources. This report evaluates the draft NCA4 to determine if it meets the requirements of the federal mandate, whether it provides accurate information grounded in the scientific literature, and whether it effectively communicates climate science, impacts, and responses for general audiences including the public, decision makers, and other stakeholders.

Reindeer Nomads Meet the Market Florian Stammler,2005 Refuting essentialist notions of Nenets culture, the author explores the dialogue between reindeer nomads and the surrounding world and shows how global processes and concepts such as culture, property, and market are expressed in local practices. He demonstrates how reindeer nomads move freely between subsistence and commodity production; state-owned and private reindeer; animism, communism, and market relations; and territorial defence and cooperative knowledge of the land. This study makes an original and significant contribution to wider debates about nomadic pastoralism and to anthropological studies of trade, barter, property, and territoriality.--GoogleBooks

The Putin Paradox Richard Sakwa,2020-02-06 Vladimir Putin has emerged as one of the key leaders of the twenty-first century. However, he is also recognized as one of the most divisive. Abroad, his assertion of Russia's interests and critique of the western-dominated international system has brought him into conflict with Atlantic powers. Within Russia, he has balanced various factions within the elite intelligentsia alongside the wider support of Russian society. So what is the 'Putin paradox?' Richard Sakwa grapples with Putin's personal and political development on both the international political scene and within the domestic political landscape of Russia. This study historicizes the Putin paradox, through theoretical, historical and political analysis and in light of wider developments in Russian society. Richard Sakwa presents the Putin paradox as a unique regime type - balancing numerous contradictions - in order to adapt to its material environment while maintaining sufficient authority with which to shape it.
