Moving from the Margins Adela de la Torre,2022-05-17 Immigration reform. Bilingual education. Affirmative action. Such issues trigger knee-jerk reactions from many people, and in California those reactions are likely to fall along strict ethnic lines. A white majority has long called the shots in voter initiatives, but with Mexican Americans becoming the majority population in southern California, their views on these matters can no longer be ignored. In *Moving from the Margins*, an outspoken member of the Mexican American community explores issues that have molded politics over the past decade in a state where division seems more common than unity. Addressing immigration, education, health care, and economic and political concerns, Adela de la Torre provides a distinctly Chicana perspective that often differs from that of mainstream readers and voters. Drawn from the author's syndicated column in the Los Angeles Times along with writings from other publications, *Moving from the Margins* includes incisive and often provocative commentaries that provide insights into the roots of ethnic tensions in the Golden State. The book also includes readers' reactions to the articles, creating a dialogue of ideas while confronting fears of what many Americans view as an alien culture. Whether addressing entitlements granted to noncitizens, the future of public schools, or access to health care, de la Torre challenges readers to move beyond their own frame of reference and consider new points of view. The issues she faces have shaped today's California—and they also lie at the heart of urban public policy in America for the twenty-first century.

Meaning from Madness Richard Skerritt,2006 A substantial fraction of the people around us suffer from personality disorders. To cope, they distort both their reality and ours. Their behavior can be baffling and puzzling, and worse, they often abuse those closest to them. The author presents a new and effective way for people to understand and recognize the three of these disorders that often lead to abusive behavior. Describing each using a single dynamic - an underlying motivation - rather than a list of behaviors is an easier way to grasp and deal with these disorders. He then describes the psychological defense mechanisms that stabilize the distorted world created by the disordered, and explains how substance abuse adds fuel to the fire of disordered behavior. he also offers the latest thinking on the prospects for improvement with treatment, and a realistic perspective on the likelihood that the disordered will choose this path.

Afghanistan Musa Khan Jalalzai,2019-10-01 Afghan civil society is deeply upset with disunity and detachment of Taliban groups - those who are tied to regional states agendas. This detachment has also left negative impacts on their fighting capabilities and public support. Regional states, the United States, NATO, Russia, China, Iran and Pakistan are active stakeholders who want peace on their own terms, while Taliban are not an independent entity to decide the future of Afghanistan, or outline long-term peace proposals. This has created a deep problem in finding a solution to the peace problem in Afghanistan. This book is a collection of various articles written by eminent researchers on the aspects of finding a solution to the peace prospects in troubled Afghanistan.

Iraqi Women Nadjie Sadig Al-Ali,2013-07-04 The war in Iraq has put the condition of Iraqi women firmly on the global agenda. For years, their lives have been framed by state oppression, economic sanctions and three wars. Now they must play a seminal role in reshaping their country's future for the twenty-first century. Nadjie Al-Ali challenges the myths and misconceptions which have dominated debates about Iraqi women, bringing a much needed gender perspective to bear on the central political issue of our time. Based on life stories and oral histories of Iraqi women, she traces the history of Iraq from post-colonial independence, to the emergence of a women's movement in the 1950s, Saddam Hussein's early policy of state feminism to the turn towards greater social conservatism triggered by war and sanctions. Yet, the book also shows that, far from being passive victims, Iraqi women have been, and continue to be, key social and political actors. Following the invasion, Al-Ali analyses the impact of occupation and Islamist movements on women's lives and argues that US-led calls for liberation has led to a greater backlash against Iraqi women.

Running a Food Hub: Volume Two, a Business Operations Guide James Matson,Jeremiah Thayer,Jessica Shaw,2015-09-17 This report is part of a multi-volume technical report series entitled, *Running a Food Hub*, with this guide serving as a companion piece to other United States Department of Agriculture (USDA) reports by providing in-depth guidance on starting and running a food hub enterprise. In order to compile the most current information on best management and operations practices, the authors used published information on food hubs, surveyed numerous operating food hubs, and pulled from their existing experience and knowledge of working directly with food hubs across the country as an agricultural business consulting firm. The report's main focus is on the operational issues faced by food hubs, including choosing an organizational structure, choosing a location, deciding on infrastructure and equipment, logistics and transportation, human resources, and risks. As such, the guide explores the different decision points associated with the organizational steps for starting and implementing a food hub. For some sections, sidebars provide "decision points," which food hub managers will need to address to make key operational decisions. This illustrated guide may assist the operational staff at small businesses or third-party organizations that may provide aggregation, marketing, and distribution services from local and regional producers to assist with wholesale, retail, and institution demand at government institutions, colleges/universities,restaurants, grocery store chains, etc. Undergraduate students pursuing

coursework for a bachelor of science degree in food science, or agricultural economics may be interested in this guide. Additionally, this reference work will be helpful to small businesses within the food trade discipline.

The information presented here will help to improve professional learning strategies, while also offering an in-depth understanding of teachers' needs, leaders' perceptions, and what complex teaching situations mean for teachers' professional learning and development. Further, Du Plessis shares the perceptions and lived experiences of teachers, parents, leaders and students as key stakeholders in quality teaching and learning environments. In brief, Du Plessis focuses on the impact that complex teaching situations have on teachers' unique needs, the support that is provided, and the influence of the out-of-field phenomenon on teachers' responses to continuing professional learning and development programs.

These issues have now gained major strategic dimension: Is Cyberspace changing the scene of international relations? How China does apprehend cybersecurity and cyberdefense?
