**We Are the Luckiest** Laura McKowen, 2022-01-25 "We Are the Luckiest is a masterpiece. It's the truest, most generous, honest, and helpful sobriety memoir I've read. It's going to save lives." – Glennon Doyle, #1 New York Times bestselling author of Love Warrior: A Memoir What could possibly be "lucky" about addiction? Absolutely nothing, thought Laura McKowen when drinking brought her to her knees. As she puts it, she "kicked and screamed . . . wishing for something – anything – else" to be her issue. The people who got to drink normally, she thought, were so damn lucky. But in the midst of early sobriety, when no longer able to anesthetize her pain and anxiety, she realized that she was actually the lucky one. Lucky to feel her feelings, live honestly, really be with her daughter, change her legacy. She recognized that "those of us who answer the invitation to wake up, whatever our invitation, are really the luckiest of all." Here, in straight-talking chapters filled with personal stories, McKowen addresses issues such as facing facts, the question of AA, and other people's drinking. Without sugarcoating the struggles of sobriety, she relentlessly emphasizes the many blessings of an honest life, one without secrets and debilitating shame.

**Metabolomics Tools for Natural Product Discovery** Ute Roessner, Daniel Anthony Dias, 2016-08-23 Classical natural product chemistry is transitioning to modern day metabolomics as a result of the advent of comprehensive analytical platforms and sensitive analytical instrumentation. Therefore, it is worthwhile to summarize recent developments with current analytical platforms and highlight how metabolomics is being integrated into this classical field to dereplicate and profile natural product extracts. Metabolomics Tools for Natural Product Discoveries: Methods and Protocols aims to unite diverse and recently developed methodologies and protocols in order to identify bioactive secondary metabolites for the purpose of drug discovery. Some topics covered in this volume include applications for the extraction of selected natural products from less common sources such as bryophytes and hard corals, various biological assays, comprehensive applications and strategies for GC-MS, LC-MS, and NMR, as well as protocols and strategies for the structure elucidation of isolated natural products. Written in the successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible protocols, and notes on troubleshooting and avoiding known pitfalls. Authoritative and easily accessible Metabolomics Tools for Natural Product Discoveries: Methods and Protocols seeks to serve both professionals and research students with its well-honed methodologies for natural product isolation, biomarker discovery, dereplication, biological assays, and comprehensive metabolomic platforms available for high-throughput analyses.

**Transforming Research Methods in the Social Sciences** Angelo Flynn, Sherianne Kramer, 2019-03-01 Social science researchers in the global South, and in South Africa particularly, utilise research methods in innovative ways in order to respond to contexts characterised by diversity, racial and political tensions, socioeconomic disparities and gender inequalities. These methods often remain undocumented – a gap that this book starts to address. Written by experts from various methodological fields, Transforming Research Methods in the Social Sciences is a comprehensive collation of original essays and cutting-edge research that demonstrates the variety of novel techniques and research methods available to researchers responding to these context-bound issues. It is particularly relevant for study and research in the fields of applied psychology, sociology, ethnography, biography and anthropology. In addition to their unique combination of conceptual and application issues, the chapters also include discussions on ethical considerations relevant to the method in similar global South contexts. Transforming Research Methods in the Social Sciences has much to offer to researchers, professionals and others involved in social science research both locally and internationally.

**Robotics, AI, and Humanity** Joachim von Braun, Margaret S. Archer, Gregory M. Reichberg, Marcelo Sánchez Sorondo, 2022-01-16 This open access book examines recent advances in how artificial intelligence (AI) and robotics have elicited widespread debate over their benefits and drawbacks for humanity. The emergent technologies have for instance implications within medicine and health care, employment, transport, manufacturing, agriculture, and armed conflict. While there has been considerable attention devoted to robotics/AI applications in each of these domains, a fuller picture of their connections and the possible consequences for our shared humanity seems needed. This volume covers multidisciplinary research, examines current research frontiers in AI/robotics and likely impacts on societal well-being, human – robot relationships, as well as the opportunities and risks for sustainable development and peace. The attendant ethical and religious dimensions of these technologies are addressed and implications for regulatory policies on the use and future development of AI/robotics technologies are elaborated.

**Cybersecurity Framework Manufacturing Profile** National Institute of Standards,2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review. This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment. The Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives manufacturers:\* A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system\* An evaluation of their ability to operate the control environment at their acceptable risk level\* A standardized approach to preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. We publish compact, tightly-bound, full-size books (8 1/2 by 11 inches), with glossy covers. 4th Watch Books is a Service Disabled Veteran-Owned Small Business (SDVOSB), and is not affiliated with the National Institute of Standards and Technology. *Digital Preservation Metadata for Practitioners* Angela Dappert, Rebecca Squire Guenther, Sébastien Peyrard, 2016-12-19 This book begins with an introduction to fundamental issues related to digital preservation metadata before proceeding to in-depth coverage of issues concerning its practical use and implementation. It helps readers to understand which options need to be considered in specifying a digital preservation metadata profile to ensure it matches their individual content types, technical infrastructure, and organizational needs. Further, it provides practical guidance and examples, and raises important questions. It does not provide full-fledged implementation solutions, as such solutions can, by definition, only be specific to a given preservation context. As such, the book effectively bridges the gap between the formal specifications provided in a standard, such as the PREMIS Data Dictionary – a de-facto standard that defines the core metadata required by most preservation repositories – and specific implementations. Anybody who needs to manage digital assets in any form with the intent of preserving them for an indefinite period of time will find this book a valuable resource. The PREMIS Data Dictionary provides a data model consisting of basic entities (objects, agents, events and rights) and basic properties (called “semantic units”) that describe them. The key challenge addressed is that of determining which information one needs to keep, together with one’s digital assets, so that they can be understood and used in the long-term – in other words, exactly which metadata one needs. The book will greatly benefit beginners and current practitioners alike. It is equally targeted at digital preservation repository managers and metadata analysts who are responsible for digital preservation metadata, as it is at students in Library, Information and Archival Science degree programs or related fields. Further, it can be used at the conception stage of a digital preservation system or for self-auditing an existing system.

**Remains of the Everyday** Joshua Goldstein, 2020-12-22 *Remains of the Everyday* traces the changing material culture and industrial ecology of China through the lens of recycling. Over the last century, waste recovery and secondhand goods markets have been integral to Beijing’s economic functioning and cultural identity, and acts of recycling have figured centrally in the ideological imagination of modernity and citizenship. On the one hand, the Chinese state has repeatedly promoted acts of voluntary recycling as exemplary of conscientious citizenship. On the other, informal recycling networks—from the night soil carriers of the Republican era to the collectors of plastic and cardboard in Beijing’s neighborhoods today—have been represented as undisciplined, polluting, and technologically primitive due to the municipal government’s failure to control them. The result, Joshua Goldstein argues, is the repeatedly re-inscribed exclusion of waste workers from formations of modern urban citizenship as well as the intrinsic liminality of recycling itself as an economic process.
