▣ *Head First HTML and CSS* Elisabeth Robson,Eric Freeman,2012-08-16 Tired of reading HTML books that only make sense after you're an expert? Then it's about time you picked up Head First HTML and really learned HTML. You want to learn HTML so you can finally create those web pages you've always wanted, so you can communicate more effectively with friends, family, fans, and fanatic customers. You also want to do it right so you can actually maintain and expand your web pages over time so they work in all browsers and mobile devices. Learn the real secrets of creating web pages, and why everything your boss told you about HTML tables is probably wrong (and what to do instead). ▣ **Understanding Hard to Maintain Behaviour Change** Ron Borland,2014-02-03 The book presents an integrative theory of hard-to-maintain behaviours, that includes hard-to-reduce or eliminate behaviours like smoking and other drug use, overconsumption of food or unsafe sex, and hard-to-sustain behaviours like exercise and sun-safe behaviours. Most of the examples come from the author's work on tobacco smoking, but it is relevant to anyone who is concerned to understand why some forms of desirable behaviour are so hard to achieve, and to those trying to help people change. It also has important implications for public health campaigns and for the development of policies to nudge behaviour in desirable ways. The book provides readers with frameworks to: - Determine whether a "hard to maintain" behaviour is a result of the skills needed to perform it, its reinforcement history, the way the person thinks about it, the context, or some combination of these. - Better integrate cognitive and behavioural change strategies, including emergent strategies related to mindfulness and acceptance, plus novel ways of retraining

operational processes. - Understand the different nature of challenges for behaviours where multiple attempts are typically required before the desired behaviour pattern is sustained. - Better understand the role of feelings and emotions as influences on behaviour. - Understand the limits of environmental factors to determine change. - Understand the limits of self-control and will-power.
