The New Akashic Records Cheryl Trine, 2010 Trine presents an in-depth, yet easily understood history of the Akashic Records and uncovers the ancient connection to divine memory, judgment, and destiny as the Book of Life. She reaches into Hinduism, Buddhism, and Tibetan Bn to understand the Akasha.

Imagining the East Erik Sand, 2020-01-29 The Theosophical Society (est. 1875 in New York by H. P. Blavatsky, H. S. Olcott and others) is increasingly becoming recognized for its influential role in shaping the alternative new religious and cultural landscape of the late nineteenth and the twentieth century, especially as an early promoter of interest in Indian and Tibetan religions and philosophies. Despite this increasing awareness, many of the central questions relating to the early Theosophical Society and the East remain largely unexplored. This book is the first scholarly anthology dedicated to this topic. It offers many new details about the study of Theosophy in the history of modern religions and Western esotericism. The essays in *Imagining the East* explore how Theosophists during the formative period understood the East and those of its people with whom they came into contact. The authors examine the relationship of the theosophical approach with orientalism and aspects of the history of ideas, politics, and culture at large and discuss how these esoteric or theosophical representations mirrored conditions and values current in nineteenth-century mainstream intellectual culture. The essays also look at how the early Theosophical Society's imagining of the East differed from mainstream 'orientalism' and how the Theosophical Society's mission in India was distinct from that of British colonialism and Christian missionaries.

Phoenix Rising Donald G. Lett, 2008-02 In an age when the supply of gasoline to feed this modern American society has become both more expensive and more scarce questions are being pondered. Inquires like, 'How can a modern society scale back its dependence on gasoline as a motive source?' 'Are there genuine alternative power sources?' 'Are they the answer to a growing crisis?' Recent announcements of hybrids like those from Honda, Toyota, and Ford have really brought attention to this issue. Hybrids that use both gasoline engines and electric motors. Really, though, alternative power sources have been around for as long as the automobile has been. The battle between and among the steam car, the electric and the gas car was fought out in the first couple of decades of the twentieth century. This book explores the ins and outs of that battle. A struggle from which the gasoline car emerged completely victorious. To such an extent that steam cars and electric cars virtually disappeared from the scene for many decades. We will look over all three alternatives, exploring their advantages and disadvantages. We will also look over the obstacles to the steamers and the electrics. Barriers that still exist to a certain extent. Handicaps that caused their disappearance in the first place.

Groundwater Contamination, Volume I Chester D. Rail, 2000-04-14 Fully updated and expanded into two volumes, the new edition of *Groundwater Contamination* explains in a comprehensive way the sources for groundwater contamination, the regulations governing it, and the technologies for abating it. Volume 1 covers all major contaminants and explains the hydrology and data used to determine the extent of pollution. Volume 2 discusses aquifer management, including technologies to control and stabilize multiple influxes into the water table. Among the many new features of this edition are a full

discussion of risk assessment, the preparation of groundwater protection plans, and references linking the text to over 2,300 water-related Web sites.

Counter Electrodes for Dye-Sensitized and Perovskite Solar Cells (2 Vols.)

Sining Yun, Anders Hagfeldt, 2019-01-04 A guide to one of the most important aspects for affordable and highly efficient dye-sensitized solar cells Dye-sensitized solar cells have the potential to be one of the most promising photovoltaic technologies for production of renewable and clean energy. Counter Electrodes for Dye-Sensitized and Perovskite Solar Cells offers an introduction to the various types of counter electrode catalysts for dye-sensitized solar cells and perovskite solar cells, including metal and metal compounds, carbon materials, polymers, and composites. With contributions from an international panel of experts, the book contains a discussion of the design and synthesis of the catalysts, characterization and stability of the devices, as well as calculations on properties. The contributors cover a wide range of topics including information on: carbon nanotubes electrocatalysts for I-mediated dye-sensitized solar cells; Pt-loaded composite electrocatalysts for I-mediated dye-sensitized solar cells; metal contact electrodes for perovskite solar cells; and much more. The book also includes insight into the future developments in the field. This important resource Covers the various types of counter electrode catalysts and presents design strategies, synthesis methods, theoretical calculation and stability evaluation Includes information on low-cost counter electrode catalysts and commercial applications of dye-sensitized sensitized solar cells Discusses how electrode catalysts can be applied in a range of fields, such as solar cells, fuel cells, hydrogen production, and photocatalysis Offers contributions from leading experts in the

field including Anders Hagfeldt, one of the world's leading researchers in this field Written for materials scientists, solid state chemists, electrochemists, catalytic chemists, solid state physicists, and chemical industry professionals, Counter Electrodes for Dye-Sensitized and Perovskite Solar Cells is a comprehensive and authoritative guide to dye-sensitized solar cells.

Contemporary Cases in U.S. Foreign Policy Ralph G. Carter, 2013-07-24 Many actors—from the president and members of Congress to interest groups, NGOs, and the media—compete to shape U.S. foreign policy. Contemporary Cases in U.S. Foreign Policy: From Terrorism to Trade, Fifth Edition, edited by Ralph G. Carter, captures this strategic interplay using 15 real-world cases, of which four are brand new: the death of Osama bin Laden and the use of targeted assassinations, nonproliferation policy and the U.S.-India nuclear agreement, the U.S. reaction to Egypt's collision with the Arab Spring, and the surprise asylum request of blind Chinese dissident Chen Guangcheng. Fully updated to cover the Obama administration, all cases have been revised to reflect recent developments. Whether grappling with use-of-force questions, the international financial crisis, legal and human rights, trade issues, multilateral approaches to the nuclear programs of North Korea and Iran, or climate change, Carter's engaging case study approach encourages students to question motives, consider alternatives, and analyze outcomes.

Modern English Structures - Second Edition Bernard O'Dwyer, 2006-06-14 Modern English Structures is a clear and accessible text that follows a structural approach to teaching basic English grammar. The book is divided into three parts: what a sentence

constituent is, what a sentence constituent does, and where a sentence constituent goes—Form, Function, and Position. The objective of the book is to bring students to a better understanding of sentence constituents and sentence structures, providing them with appropriate terminology to discuss these forms and relationships. This second edition has been revised and updated throughout. The accompanying Modern English Structures Workbook parallels the text and provides useful training both in memorization and in higher-order thinking skills.

International Business Information Ruth A. Pagell, Michael Halperin, 1999 Changes in the economy required business professionals and researchers to learn about new sources of information, as well as to expand their understanding of international business subjects. The sources, language, document coding, and definitions are different -- truly foreign. *International Business Information* was written to help business

The Scientification of Religion Kocku von Stuckrad, 2014-05-21 The enigmatic relation between religion and science still presents a challenge to European societies and to ideas about what it means to be 'modern.' This book argues that European secularism, rather than pushing back religious truth claims, in fact has been religiously productive itself. The institutional establishment of new disciplines in the nineteenth century, such as religious studies, anthropology, psychology, classical studies, and the study of various religious traditions, led to a professionalization of knowledge about religion that in turn attributed new meanings to religion. This attribution of meaning resulted in the emergence of new religious identities and practices. In a dynamic that is closely linked to this discursive

change, the natural sciences adopted religious and metaphysical claims and integrated them in their framework of meaning, resulting in a special form of scientific religiosity that has gained much influence in the twentieth century. Applying methods that come from historical discourse analysis, the book demonstrates that religious semantics have been reconfigured in the secular sciences. Ultimately, the scientification of religion perpetuated religious truth claims under conditions of secularism.

Awaken the Power Within Albert Amao, 2018-06-05 The \$12 billion self-help industry is under constant attack for pedaling false miracles to duped believers. But sociologist Albert Amao demonstrates that Americans eagerly support self-help books, seminars, and programs because, under the right conditions, these things work. Sociologist Albert Amao analyzes the accuracy of self-help and positive-thinking claims in this groundbreaking--and wholly unexpected--exploration of what works, what doesn't, and why. Regarding my personal experience, Amao writes, I can testify that positive thinking and positive action have worked wonderfully for me. Born in a poor Latin-American country into a very impoverished family with both parents practically illiterate, I was the oldest of five children. I started working when I was six years old, shining shoes and selling newspapers to help my family. Nobody then would have believed that I would be able to finish high school. Nevertheless, I was able to do it going to night school, which allowed me to be admitted at the San Marcos University in Lima to get my Ph.D. in sociology. All these things were possible because, when I was teenager, I had access to New Thought, or positive-thinking philosophy. Contrary to the critics who blithely dismiss self-help methods, or the New Age gurus who sell it them as miracles, Amao--writing with sobriety,

scholarship, and drawing on deep personal experience--explores the conditions under which self-help is authentic.

Unquenchable Robert Jerome Glennon, 2010-04-19 In the middle of the Mojave Desert, Las Vegas casinos use billions of gallons of water for fountains, pirate lagoons, wave machines, and indoor canals. Meanwhile, the town of Orme, Tennessee, must truck in water from Alabama because it has literally run out. Robert Glennon captures the irony—and tragedy—of America’s water crisis in a book that is both frightening and wickedly comical. From manufactured snow for tourists in Atlanta to trillions of gallons of water flushed down the toilet each year, *Unquenchable* reveals the heady extravagances and everyday inefficiencies that are sucking the nation dry. The looming catastrophe remains hidden as government diverts supplies from one area to another to keep water flowing from the tap. But sooner rather than later, the shell game has to end. And when it does, shortages will threaten not only the environment, but every aspect of American life: we face shuttered power plants and jobless workers, decimated fisheries and contaminated drinking water. We can’t engineer our way out of the problem, either with traditional fixes or zany schemes to tow icebergs from Alaska. In fact, new demands for water, particularly the enormous supply needed for ethanol and energy production, will only worsen the crisis. America must make hard choices—and Glennon’s answers are fittingly provocative. He proposes market-based solutions that value water as both a commodity and a fundamental human right. One truth runs throughout *Unquenchable*: only when we recognize water’s worth will we begin to conserve it.

Navigating Cross-Cultural Ethics Eileen Morgan, 2012-09-10 Through the personal

stories of managers running global business, this book takes an inside look into the dilemmas of managers who are asked to make profits ethically according to the dictates of their company's ethics code. It examines what companies think they are doing to help managers in those situations and how those managers are actually affected. Thanks to the boost from the 1991 Sentencing Guidelines which minimizes penalties for companies with ethics codes caught in ethical wrongdoing, more than 85% of US companies and two thirds of all Canadian companies and half of all European companies now have Codes of Ethics. Yet, over and over, we hear of stories of personal dilemmas and conflicts experienced by individual managers navigating those business waters in other cultures

The Internet for Radiology Practice Amit Mehta, 2007-11-23 The Internet has proven to be a great resource for the medical community. It has specifically had a great impact on the practice of Radiology. It has enabled the proliferation, installation, and acceptance of adjunct technologies such as Picture Archiving (PACS), electronic medical record (EMR) and Voice Recognition (VR). The number of radiology-specific web sites just 5 years ago was about 30. A recent compilation now numbers in the thousands. Computer technology and the Internet have revolutionized the way radiologists work on a daily basis. All aspects of the Internet and related technologies are explained in this book.

Mystic Apprentice Master Volume Ken Ludden,

Strindberg and the Quest for Sacred Theatre Theo Malekin, 2010-01-01 Strindberg and the Quest for Sacred Theatre brings a fresh perspective to the study of Sweden's great playwright. August Strindberg (1849-1912) anticipated most of the major developments in European theatre over the last century. As such he is well-placed to provide perspectives

on the current burgeoning interest in sacred theatre. The religious crises of the 19th Century provoked in Strindberg both sharp scepticism about claims to religious authority and a visionary search for truth. Against the backdrop of a major change in European culture this book traces the emergence in some of Strindberg's late plays of a proto-sacred-theatre. It argues that Strindberg faced the alternatives of a contentless transcendent abyss, threatening the extinction of his ego, or a retreat into conservative theism, reducing him to slavish submission to the commandments and rule of an external father-God. Weaving together theatrical, aesthetic, and theological voices, this book investigates the relationship of the sacred to subjectivity and its implications for Strindberg's dramaturgy. In doing so it always keeps in view the sense both of loss and opportunity engendered by a turning point in the western experience of the sacred.

False Prophets Richard Bonney,2008 After 9/11, the US response to Al-Qaeda - the Global War on Terror - was heavily influenced by the 'clash of civilizations' theory. This book identifies the twenty-first century proponents of the thesis, such as Bernard Lewis and Daniel Pipes, their links to the Bush government and their roles in exploiting hostility between the West and Islam.

Kabbalah and Modernity ,2010-09-15 This volume brings together leading representatives of the recent debate about the persistence of kabbalah in the modern world. It breaks new ground for a better understanding of the role of kabbalah in modern religious, intellectual, and political discourse.

Transhumanism and Posthumanism in Twenty-First Century Narrative Sonia Baelo-Allué,Mónica Calvo-Pascual,2021-05-05 Transhumanism and Posthumanism in

Twenty-First Century Narrative brings together fifteen scholars from five different countries to explore the different ways in which the posthuman has been addressed in contemporary culture and more specifically in key narratives, written in the second decade of the 21st century, by Dave Eggers, William Gibson, John Shirley, Tom McCarthy, Jeff Vandermeer, Don DeLillo, Margaret Atwood, Cixin Liu and Helen Marshall. Some of these works engage in the premises and perils of transhumanism, while others explore the qualities of the (post)human in a variety of dystopian futures marked by the planetary influence of human action. From a critical posthumanist perspective that questions anthropocentrism, human exceptionalism and the centrality of the 'human' subject in the era of the Anthropocene, the scholars in this collection analyse the aesthetic choices these authors make to depict the posthuman and its aftereffects.

Handbook of the Theosophical Current ,2013-01-08 The Brill Handbook of the Theosophical Current represents pioneering research into an important but under-researched current. The three sections in this volume are devoted to the Theosophical Society, Theosophically influenced religious currents, and the interaction between Theosophy and surrounding culture.
