Contrastive Analysis of Discourse-pragmatic Aspects of Linguistic Genres Karin Aijmer, Diana Lewis, 2017-03-29 This volume will give readers insight into how genres are characterised by the patterns of frequency and distribution of linguistic features across a number of European languages. The material presented in this book will also stimulate further corpus-based contrastive research including more languages, more genres and different types of corpora. This is the first special issue of the Yearbook of Corpus Linguistics and Pragmatics, a publication that addresses the interface between the two disciplines and offers a platform to scholars who combine both methodologies to present rigorous and interdisciplinary findings about language in real use. Corpus linguistics and Pragmatics have traditionally represented two paths of scientific thought, parallel but often mutually exclusive and excluding. Corpus Linguistics can offer a meticulous methodology based on mathematics and statistics, while Pragmatics is characterized by its effort in the interpretation of intended meaning in real language.

**More Than Fluency: the Social, Emotional, and Cognitive Dimensions of Stuttering** Barbara J. Amster, Evelyn R. Klein, 2018-04-27 More Than Fluency: The Social, Emotional, and Cognitive Dimensions of Stuttering provides a thoughtful and contemporary framework for speech-language pathologists and others working with people who stutter. The text focuses on the social, emotional, and cognitive realms of stuttering and offers new insights and applications based on research in the field. It guides the reader through theoretical discussions about the social experiences, emotional complications, and cognitive interpretations that often influence the person who stutters. The text also offers

practical strategies for intervention from contributing authors who are prominent theorists, researchers, and practitioners in the field of fluency and stuttering. In line with the current multifactorial view of stuttering, *More Than Fluency* emphasizes the social, emotional, and cognitive aspects of stuttering, drawing important connections between them. The authors present a variety of therapeutic interventions and techniques along with practical guidelines that have been designed to alleviate distress in those who stutter. Although these interventions differ in approach, each offers their own roadmap to support and empower people who stutter. The idea for this book grew out of the insights gained from listening to both clients and graduate students. Clients wanted to talk about their life experiences as a person who stutters. Graduate students often described their worry and uncertainty when dealing with the emotional and social issues of their clients who stutter. Similarly, many practicing speech-language pathologists also have concerns about treating people who stutter, especially regarding the social, emotional, and cognitive aspects of the disorder, areas not typically taught in traditional coursework. *More Than Fluency* was developed for practicing speech-language pathologists and other professionals who evaluate and treat people who stutter. It is also intended to be an academic textbook used in graduate courses on fluency and stuttering. This text provides a collection of well-thought-out programs and approaches that help treat the whole person, not just his or her stuttering. The authors believe that this is best practice because successfully treating a person who stutters encompasses treating more than fluency.

Personality Assessment Robert P. Archer, Steven R. Smith, 2011-05-20 *Personality Assessment* provides an overview of the most popular self-report and performance-

based personality assessment instruments. Designed with graduate-level clinical and counseling psychology programs in mind, the book serves as an instructional text for courses in objective or projective personality assessment. It provides coverage of eight of the most popular assessment instruments used in the United States—from authors key in creating, or developing the research base for these test instruments. The uniquely informed perspective of these leading researchers, as well as chapters on clinical interviewing, test feedback, and integrating test results into a comprehensive report, will offer students and clinicians a level of depth and complexity not available in other texts.

**Dreaming of Cockaigne** Herman Pleij, 2003-07-02

Imagine a dreamland where roasted pigs wander about with knives in their backs to make carving easy, where grilled geese fly directly into one's mouth, where cooked fish jump out of the water and land at one's feet. The weather is always mild, the wine flows freely, sex is readily available, and all people enjoy eternal youth. Such is Cockaigne. Portrayed in legend, oral history, and art, this imaginary land became the most pervasive collective dream of medieval times—an earthly paradise that served to counter the suffering and frustration of daily existence and to allay anxieties about an increasingly elusive heavenly paradise. Illustrated with extraordinary artwork from the Middle Ages, Herman Pleij's *Dreaming of Cockaigne* is a spirited account of this lost paradise and the world that brought it to life. Pleij takes three important texts as his starting points for an inspired of the panorama of ideas, dreams, popular religion, and literary and artistic creation present in the late Middle Ages. What emerges is a well-defined picture of the era, furnished with a wealth of detail from all of Europe, as well as Asia and America. Pleij draws upon his thorough knowledge of medieval European literature, art, history, and folklore to describe the fantasies that fed the tales of Cockaigne and their connections to the central obsessions of medieval life.

**The Amateur and the Professional** P. J. A.

Levine, 2003-02-13 This book highlights the growing divide in nineteenth-century intellectual circles between amateur and professional interest, and explores the institutional means whereby professional ascendancy was achieved in the broad field of studies of the past. It is concerned with how antiquarian 'gentlemen of leisure', pursuing their interests through local archaeological societies, were, by the end of the century, relegated to the sidelines of the now university-based discipline of history. At the same time it explores the theological as well as technical barriers which arrested the development of archaeology in this period. This is a notable contribution to the intellectual history of Victorian England, attending not simply to the ideas perpetrated by these communities of scholarship but to their social status, relating such social consideration to a more traditional intellectual history to create a new social history of ideas.

*Dutch Racism* Philomena Essed, Isabel

Hoving, 2014-03-01 Dutch Racism is the first comprehensive study of its kind. The approach is unique, not comparative but relational, in unraveling the legacy of racism in the Netherlands and the (former) colonies. Authors contribute to identifying the complex ways in which racism operates in and beyond the national borders, shaped by European and

global influences, and intersecting with other systems of domination. Contrary to common sense beliefs it appears that old-fashioned biological notions of “race” never disappeared. At the same time the Netherlands echoes, if not leads, a wider European trend, where offensive statements about Muslims are an everyday phenomenon. *Dutch Racism* challenges readers to question what happens when the moral rejection of racism loses ground. The volume captures the layered nature of Dutch racism through a plurality of registers, methods, and disciplinary approaches: from sociology and history to literary analysis, art history and psychoanalysis, all different elements competing for relevance, truth value, and explanatory power. This range of voices and visions offers illuminating insights in the two closely related questions that organize this book: what factors contribute to the complexity of Dutch racism? And why is the concept of racism so intensely contested? The volume will speak to audiences across the humanities and social sciences and can be used as textbook in undergraduate as well as graduate courses. Philomena Essed is professor of Critical Race, Gender and Leadership studies, Antioch University (USA), PhD in Leadership and Change Program. Her books and edited volumes include *Everyday Racism; Understanding Everyday Racism, Race Critical Theories; A Companion to Gender Studies* (“outstanding” 2005 CHOICE award); and, *Clones, Fakes and Posthumans: Cultures of Replication*. Isabel Hoving is diversity officer at the Leiden University and affiliated with the Department of Film and Literary Studies of Leiden University. Her books include *In Praise of New Travellers, Veranderingen van het alledaagse*, and several other volumes on migration, Caribbean literatures, African literature and art. In addition to her academic work, she is an awarded youth writer.

## **The Cambridge History of Medicine** Roy

Porter,2006-06-05 Against the backdrop of unprecedented concern for the future of health care, 'The Cambridge History of Medicine' surveys the rise of medicine in the West from classical times to the present. Covering both the social and scientific history of medicine, this volume traces the chronology of key developments and events.

Racism in Medicine Naaz Coker,2001 Racism in Medicine attempts to tackle the harassment and discrimination that some people from minority ethnic groups working in the NHS currently endure. It highlights the issues, raise awareness and includes recommendations for best practice.

Public Sector Integrity A Framework for Assessment OECD,2005-11-18 This assessment framework for public sector integrity provides policy makers and managers with a pioneering roadmap to design and organise sound assessments in specific public organisations and sectors.

**Auditing and Assurance Services** Louwers,2013 This text has been written so that it is current with all issues inherent in accounting and auditing practice, particularly in public accounting firms including coverage of the creation of the Public Companies Accounting Oversight Board, the passage of the Sarbanes-Oxley Act, and all of the major pronouncements issued by the AICPA. The text is also designed to provide flexibility for instructors; the twelve chapters focus on the auditing process while the eight modules provide additional topics that can be taught at the instructors' discretion without interrupting the flow of the text.

The Evidence Base of Clinical Diagnosis J. André Knottnerus,2002 While most books on evidence-based

medicine deal with the interpretation of diagnostic test results, this work addresses methods to construct the design itself. The book presents a framework for choosing an appropriate study design, and for preparing and executing diagnostic studies.
