Roman Finds Richard Hingley, Steven
Willis, 2007-04-10 Studies on finds in Roman
Britain and the Western Provinces have come to
greater prominence in the literature of recent
years. The quality of such work has also improved,
and is now theoretically informed, and based on
rich data-sets. Work on finds over the last decade
or two has changed our understanding of the Roman
era in profound ways, and yet despite such
encouraging advances and such clear worth, there
has to date, been little in the way of a dedicated
forum for the presentation and evaluation of
current approaches to the study of material
culture. The conference at which these papers were
initially presented has gone some way to
redressing this, and these papers bring the very
latest studies on Roman finds to a wider audience.
Twenty papers are here presented covering various
themes.

Positive Flying Richard L. Taylor, William M.
Guinther, 1992 Fly an airplane at a set attitude,
airspeed, and power setting, and it does precisely
what it is supposed to—every time. This book tells
why and how “flying by the numbers” works, and
gives the flight-tested numbers for precision
performance in 27 of America's favorite small

aircraft. For aircraft not included in this list, the book provides exact cockpit procedures for nailing down the numbers for any other light airplane.

Those Incomparable Bonanzas Larry A. Ball, 1971

They Called Me "Mr. Bonanza" Larry A. Ball, 1990

Foreign Armed Intervention in Internal Conflict

Antonio Tanca, 2023-09-25 The main aim of this book is to inquire into the system of norms regulating the 'internationalization' of internal conflicts. The traditional distinction between international and internal conflict, which entails different legal consequences, is in practice very difficult to detect due to the presence, in many instances, of elements typical of both situations. Through a careful and extraordinarily useful examination of all relevant cases of 'internationalized' internal conflict since 1956, the validity of the traditional framework of rules concerning foreign intervention in internal conflict is reassessed. At the same time, the applicability to these situations of the rules typical of international conflicts are analyzed with a view to providing the existence of a continuum between the two situations, not only as a matter of fact but also with respect to their legal regulation.

Britons and Romans Simon James, Martin Millett, 2001 This challenging book encourages those with an interest in Roman Britain to think broadly and to engage actively in shaping the future priorities of research into the subject. The volume reconsiders many assumptions about relations between Romans and the indigenous population and the authors explore themes as diverse as: the Iron Age/Roman and Roman/Medieval transitions; Romanisation; material culture and identity; rural society; urbanism; zooarchaeology; and soldiers and civilians. Within these themes

the contributors seek to break down the relative insularity of Romano-British studies, and to open it up to new external perspectives and interdisciplinary approaches.

Form as Revolt Sebastian Zeidler,2016-01-22 The German writer and art critic Carl Einstein (1885-1940) has long been acknowledged as an important figure in the history of modern art, and yet he is often sidelined as an enigma. In *Form as Revolt* Sebastian Zeidler recovers Einstein's multifaceted career, offering the first comprehensive intellectual biography of Einstein in English. Einstein first emerged as a writer of experimental prose through his involvement with

the anarchist journal *Die Aktion*. After a few limited forays into art criticism, he burst onto the art scene in 1915 with his book *Negro Sculpture*, at once a formalist intervention into the contemporary theory and practice of European sculpture and a manifesto for the sophistication of African art. Einstein would go on to publish seminal texts on the cubist paintings of Georges Braque and Pablo Picasso. His contributions to the surrealist magazine *Documents* (which Einstein cofounded with Georges Bataille), including writings on Picasso and Paul Klee, remain unsurpassed in their depth and complexity. In a series of close visual analyses—illustrated with major works by Braque, Picasso, and Klee—Zeidler retrieves the theoretical resources that Einstein brought to bear on their art. *Form as Revolt* shows us that to rediscover Einstein's art criticism is to see the work of great modernist artists anew through the eyes of one of the most gifted left-wing formalists of the twentieth century.

Protecting the Environment Anna-Katharina Wöbse, Patrick Kupper, 2021-07-30 Today, the European environmental regime seems omnipresent. A rare beetle can stop a building project, the local water authorities have to make sure that the European Eel can reach his home waters after having travelled the Atlantic, European standards for air quality cause trouble for the German diesel-driven car industry, and lighting products are subject to EU energy labelling and eco-design requirements. Implementing laws and sticking to environmental norms and standards has become an integral part of the European integration process. To the EU this is self-evident: We share resources like water, air, natural habitats and the species they support, and we also share environmental standards to protect them. The idea of any such 'shared environment', however, has come a long way and is still being contested. Thinking and writing

about the history of protecting the environment requires us to study the long 20th century. In order to understand the peculiar rise of Europe environmental regimes and green values we have to consider the modern concept of Europe as a shared geographical space, linked by habitats, migrating species, rivers, pollutants, climate and risks. Moreover, we have to analyse the 'invention' of conservation as a moral enterprise. That is why environmental history needs a long durée's perspective to understand the evolution of the European Common.

Climate Change Guidelines for Forest Managers

Food and Agriculture Organization of the United Nations, 2013 These guidelines have been prepared to assist forest managers to better assess and respond to climate change challenges and opportunities at the forest management unit level. The actions they propose are relevant to all kinds of forest managers--such as individual forest owners, private forest enterprises, public-sector agencies, indigenous groups and community forest organizations. They are applicable in all forests types and regions and for all management objectives. This document complements a set of guidelines prepared by FAO in 2010 to support policy-makers in integrating climate change concerns into new or existing forest policies and national forests programs.

The Top Books of the Year 4128onderdelen.htm The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. 4128onderdelen.htm : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden

College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
