Death Squads or Self-Defense Forces? Julie Mazzei, 2009-09-01 In an era when the global community is confronted with challenges posed by violent nonstate organizations--from FARC in Colombia to the Taliban in Afghanistan--our understanding of the nature and emergence of these groups takes on heightened importance. Julie Mazzei's timely study offers a comprehensive analysis of the dynamics that facilitate the organization and mobilization of one of the most virulent types of these organizations, paramilitary groups (PMGs). Mazzei reconstructs in rich historical context the organization of PMGs in Colombia, El Salvador, and Mexico, identifying the variables that together create a triad of factors enabling paramilitary emergence: ambivalent state officials, powerful military personnel, and privileged members of the economic elite. Nations embroiled in domestic conflicts often find themselves stuck between a rock and a hard place when global demands for human rights contradict internal expectations and demands for political stability. Mazzei elucidates the importance of such circumstances in the emergence of PMGs, exploring the roles played by interests and policies at both the domestic and international levels. By offering an explanatory model of paramilitary emergence, Mazzei provides a framework to facilitate more effective policy making aimed at mitigating and undermining the political potency of these dangerous forces.

The Geostationary Ring Martha Mejía-Kaiser, 2020-06-29 The Geostationary Ring: Practice and Law by Martha Mejía-Kaiser addresses numerous physical aspects of this highly sought-after orbital region and analyses in unprecedented detail the evolution of its use, coordination and related disputes and efforts to keep it operational by clearing it of space debris.

Phoenix Rising Donald G. Lett, 2008-02 In an age when the supply of gasoline to feed this modern American society has become both more expensive and more scarce questions are being pondered. Inquires like, How can a modern society scale back its dependence on gasoline as a motive source?' Are there genuine alternative power sources?' Are they the answer to a growing crisis?' Recent announcements of hybrids like those from Honda, Toyota, and Ford have really brought attention to this issue. Hybrids that use both gasoline engines and electric motors. Really, though, alternative power sources have been around for as long as the automobile has been. The battle between and among the steam car, the electric and the gas car was fought out in the first couple of decades of the twentieth century. This book explores the ins and outs of that battle. A struggle from which the gasoline car emerged completely victorious. To such an extent that steam cars and electric cars virtually disappeared from the scene for many decades. We will look over all three alternatives, exploring their advantages and disadvantages. We will also look over the obstacles to the steamers and the electrics. Barriers that still exist to a certain extent. Handicaps that caused their disappearance in the first place.

Research Handbook on Torture Malcolm D. Evans, Jens Modvig, 2020-12-25 This Research Handbook is of great importance in an era where torture, whilst universally condemned, remains endemic. It explores the nature of the international prohibition of torture and the various means and mechanisms which have been put in place by the international community in an attempt to make that prohibition a reality.

The United States of America ,

UFOs, Chemtrails, and Aliens Donald R. Prothero, Timothy D.

Callahan,2017-08-02 A wide-ranging survey offers “entertainment as well as wisdom for everyone who’s ever wondered what’s behind so many conspiracy theories and paranormal phenomena” (Publishers Weekly). UFOs. Aliens. Strange crop circles. Giant figures scratched in the desert surface along the coast of Peru. The amazing alignment of the pyramids. Strange lines of clouds in the sky. The paranormal is alive and well in the American cultural landscape. In *UFOs, Chemtrails, and Aliens*, Donald R. Prothero and Tim Callahan explore why such demonstrably false beliefs thrive despite decades of education and scientific debunking. Employing the ground rules of science and the standards of scientific evidence, Prothero and Callahan discuss a wide range of topics including the reliability of eyewitness testimony, psychological research into why people want to believe in aliens and UFOs, and the role conspiratorial thinking plays in UFO culture. They examine a variety of UFO sightings and describe the standards of evidence used to determine whether UFOs are actual alien spacecraft. Finally, they consider our views of aliens and the strong cultural signals that provide the shapes and behaviors of these beings. While their approach is firmly based in science, Prothero and Callahan also share their personal experiences of Area 51, Roswell, and other legendary sites, creating a narrative that is sure to engross both skeptics and believers.

Renewable Energy and the Public Patrick Devine-

Wright,2014-10-14 Throughout the world, the threat of climate change is pressing governments to accelerate the deployment of technologies to generate low carbon electricity or heat. But this is frequently leading to controversy, as energy and planning policies are revised to support new energy sources or technologies (e.g. offshore wind, tidal, bioenergy or hydrogen energy) and communities face the

prospect of unfamiliar, often large-scale energy technologies being sited near to their homes. Policy makers in many countries face tensions between 'streamlining' planning procedures, engaging with diverse publics to address what is commonly conceived as 'NIMBY' (not in my back yard) opposition, and the need to maintain democratic, participatory values in planning systems. This volume provides a timely, international review of research on public engagement, in contexts of diverse, innovative energy technologies. Public engagement is conceived broadly - as the interaction between how developers and other key actors engage with publics about energy technologies (including assumptions held about the methods used, such as the provision of financial benefits or the holding of deliberative events), and how individuals and groups engage with energy policies and projects (including indirectly through the media and directly through emotional and behavioural responses). The book's contributors are leading experts in the UK, Europe, North and South America and Australia drawn from a variety of relevant social science disciplinary perspectives. The book makes a significant contribution to our existing knowledge, as well as providing interested professionals, policymakers and members of the public with a timely overview of the critical issues involved in public engagement with low carbon energy technologies.

Political Encyclopedia of U.S. States and Regions Donald P. Haider-Markel, 2008-11-03 Providing expert analysis of government and politics in all 50 states and the U.S. territories, this innovative two-volume reference fills the critical need for information and analysis of the roles and functions of state government through accessible state-by-state and regional overviews of government and politics.

The Encyclopedia of Moon Mysteries Constance Victoria

Briggs,2019-03-19 Our moon is an enigma. The ancients viewed it as a light to guide them in the darkness, and a god to be worshipped. In modern times, it has been taught that the Moon is simply a dead rock that is caught in Earth's gravity, with no activity. As a researcher of metaphysical, paranormal and cosmic subjects, I have come across stories and information about the Moon that tell us that indeed there is activity there, and there has been for generations. Just who or what is causing the commotion is a mystery. There are stories that suggest that the Moon is home to extraterrestrials, theories that it is not a natural satellite, tales of anomalous lights, and tales that NASA astronauts saw extraterrestrial ships and ruins of an ancient civilization there. There is a rumor that Apollo13 was saved by extraterrestrials. Another story states that there are extraterrestrial bases on the Moon. There is even a tale that states that a part of the kingdom of Atlantis was once located there. Some even believe that there are cities beneath the surface of the Moon. There is an interesting account of a government employee using remote viewing as a means of seeing what is on the Moon. His experience is eye-opening! This is just a sample of the information that will be in *The Encyclopedia of Moon Mysteries: Secrets, Conspiracy Theories, Anomalies, Extraterrestrials and More*. For example, did you know that:

- Aristotle and Plato wrote about a time when there was no Moon? They even gave a name of an ancient tribe of people that lived during that moonless period.
- several of the NASA astronauts reported seeing UFOs while traveling to the Moon?
- the Moon might be hollow?
- Apollo 10 astronauts heard strange "space music" when traveling on the far side of the Moon?
- strange and unexplained lights have been seen on the Moon for centuries?
- there are said to be ruins of structures on the Moon?
- there is an ancient tale that suggests that the first human was

created on the Moon? • that radio signals have been detected coming from the Moon? • that famed astronomer Sir John Herschel saw unidentified lights above the Moon during an eclipse? • that ancient Bolivian symbols tell us that the Moon came into Earth's orbit around 12,000 years ago? • a psychic was used by the government to relay information about the Moon? The book is separated into A to Z sections for easy reference and reading.

Evolution or Creation? Albert J. DeBenedictis, 2011-08-26 Have you ever wondered how the universe originated or whether the universe always existed? Have you ever wondered how life began on earth? Have you ever heard others discuss origins but felt unable to contribute to the conversation? Would you like to defend your views but feel unequipped or inadequate to do so? Are you unsure about what to believe? Would you like to learn more about the subject of origins? If so, this book will be a help to you. The subject of evolution and creation often causes much contention and controversy. The question that may be asked is, Why is there so much tension and animosity between those who hold to opposing views regarding the subject of origins? Others may ask, What do those of opposing views base their beliefs upon? Is there any reconciling of the different views? The differences, I believe, in part are due to ones perceptions regarding science and theology. This book is not about Christians versus atheists. This book is more about creation versus evolution than about Creationism versus Evolutionism. This book is about comparing various views, opinions and evidence related to evolution and creation. Some of the information being presented may be new to you and may take some time to digest. Evolutionists generally view creation in the same way that creationists generally view evolution.

Opposing views are rarely taken seriously, as they are a contradiction to ones own bias. Whatever your current views are regarding the origins of the universe and life or level of knowledge of origins, this book is about considering various sides of the issue of evolution. In this book we will be comparing the evidence and arguments and then weighing the pros and cons in an attempt to determine the validity of each view. You will, however, be left to make your own decisions about each subject that is presented. This book may either strengthen your current views of origins or may cause you to re-think what you currently believe about origins. Whatever your views are regarding the origins of the universe and life, this book is about considering various sides of the issue of evolution. In this book the evidence and arguments will be presented for the reader to determine the validity of each view. Subjects such as: the origin of the universe, the age of the universe, the fossil evidence, the possibilities of a global flood, the origins of life, Stanley Millers Experiment of 1953, the fossils in the strata of the earth, the components of evolution (Natural Selection, Adaptation, Mutations, Speciation, and Genetic Drift), Punctuated Equilibrium, Haeckels Embryos and Recapitulation, Vestiges, Pseudogenes, Biological Complexity and Intelligent Design, Comparing biological similarities and differences between Chimpanzee and human genome, Comparing the Human and Ape Fossil Evidence, will be examined. Multiple top resources of various professions have been included in this book to provide information on the many different subjects discussed. Although this book is an in-depth study of evolution, it was written on the level so that the average teenager or adult will be able to understand what is being presented. Difficult words and terms are explained so that you will not need to consult a dictionary every time an unknown word or term appears. I

attempted to present the subject matter on a level that most people will be able to easily understand. The various views and arguments are presented in a manner similar to having a debate. The aim of this book is to help either strengthen your current views of origins or cause you to re-think what you currently believe. It is hoped that at least you will develop a better appreciation for the opposing views and will better understand why those who believe in the opposing views believe as they do. I sincerely hope that this book will be beneficial to you whether you are se

Peace as Governance C. Sriram, 2008-04-16 A critical study of incentives commonly used to induce non-state armed groups to engage in peace negotiations. Offers a closer analysis of these incentives, which offer such groups a place or a stake in governance, suggesting that not only are they frequently ineffective, but that they can have unintended and dangerous side effects.

Judo and American Culture: Prelude, Acceptance, Embodiment Michael DeMarco, M.A., 2015-09-23 The origins of Asian martial arts in the United States reach back to the Pacific Rim and immigration. This anthology is dedicated to the profoundly significant period—roughly from mid-eighteenth century to the mid-nineteenth century—in which gifted Japanese taught their brand of jujutsu/judo to small groups that gradually disseminated knowledge of combatives into the American mainstream. In the the first chapter, Geoffrey Wingard provides insightful coverage of the “manly arts” in America as they swept the land along with moving populations. Of course early historical influences came from European groups and their varieties of combatives, such as wrestling, boxing, and fencing. Wingard

demonstrates that the martial arts are integral to American society and are not ad hoc additions to contemporary popular culture. This background is a prerequisite for understanding the reception of Asian martial arts into American culture. Matt Hlinak analyzes Japanese-American immigration into the American West through the prism of athletics, specifically by examining a series of contests between judoka and wrestlers from 1900 to 1920 in California. These matches appealed to an interest in Japanese culture, a desire to see stereotypes reinforced, and nationalist tendencies during an age of uncertainty. The next two chapters by Joseph Svinth detail the establishment and functioning of two important dojos in the Seattle, Washington, area. In 1923 farmers donated a barn and arranged for Ryoichi Iwakiri (third dan) to teach judo to community youths. Another dojo opened in 1928 under the tutelage of Kurosaka Hiroshi (third dan judo). A colorful history marks these dojos and their practitioners: exhibitions, intracub tournaments, and war-time influences on practice. Their members helped spread judo throughout the United States. James Webb's chapter focuses on one of the early prime movers for the growth and establishment of judo in America: Vincent Tamura. He was chosen to represent the United States at the First World Championship of Judo (Tokyo, 1956). He is a descendent of the Taira clan, influential during the end of the Heian period (784–1184) in Japan, and his practice has roots in ancient Heike-ryu jujutsu. Putting academic detail aside, James Behrendt offers a personal account of his early years as a judoka devoted to hard training and competition. He writes "I was extremely fit and strong and I used those natural gifts to eventually defeat the purpose of the judo art. I had discipline but was lacking in spirituality and character." Polishing judo skills helped build his character in the fashion that Kodokan judo founder Kano Jigaro intended. In these

chapters you will find the early hotbeds of jujutsu/judo in America and see how these arts tumbled with European-American “manly arts,” making their own way across the country to form and strengthen judo centers in various states. The authors have utilized their scholarly and practical experience to present a rare view of judo as it traversed the Pacific to enrich American culture. Their writings should clarify the early history of judo in America and bring both practitioners and armchair scholars a deeper appreciation for the art.

When I Was Not My Brother's Keeper: When Fear, Hate and Prejudice Administer The Law James Sean Healey, 2007-07 This book traces the dramatic and controversial criminal case histories of the Black-American Scottsboro Boys, the Mexican-American 38th Street Gang (Sleepy Lagoon Murder/Zoot Suit Riots), and the Japanese-American Internment where decisions were made by authorities driven by fear, prejudice and hatred. Celebrated are those heroes - judges and lawyers - whose principles and courage reversed the course of judicial history and the errant results in these cases that victimized those imprisoned. In a culture influenced by its regional socioeconomic values, or where its media of fear and hysteria manipulated its values, harsh and unjust legal results punished those

needing the greatest protections from the U.S. Constitution. Only a few rare and select persons rose to the defense of the damned.

The Gray Lady Winked Ashley Rindsberg, 2021-05-03 Think a newspaper can't be responsible for mass murder? Think again. As flagship of the American news media, the New York Times is the world's most powerful news outlet. With thousands of reporters covering events from all corners of the globe, the Times has the power to influence wars, foment revolution, shape economies and change the very nature of our culture. It doesn't just cover the news: it creates it. *The Gray Lady Winked* pulls back the curtain on this illustrious institution to reveal a quintessentially human organization where ideology, ego, power and politics compete with the more humble need to present the facts. In its 10 gripping chapters, *The Gray Lady Winked* offers readers an eye-opening, often shocking, look at the New York Times's greatest journalistic failures, so devastating they changed the course of history. How its World War II Berlin bureau chief, a known Nazi collaborator, skewed coverage in favor of the Third Reich for over a decade. Its notorious coverup of the Ukraine Famine, a genocide committed by Stalin, showing that it was the newspaper's owners who directed the coverup in order to advance their own financial and ideological interests. The "1619 Project, a cynical, ideologically driven attempt to revise American history by rooting the nation's birth in slavery instead of liberty. The result is an essential look at the tangled relationship between media, power and politics in a post-truth world told with novelistic flair to reveal a uniquely powerful institution's tortured relationship with the truth. Most importantly of all, *The Gray Lady Winked* presents a cautionary tale that shows what happens when the guardians of the truth abandon that sacred value in favor of self-interest and

ideology—and what this means for our future as much as for our past.

EU Induced Institutional Change in Post-Soviet Space Ryhor Nizhnikau, 2018-07-24 This book analyses the role of the European Union in the process of institutional change in its Eastern neighbourhood and explains why EU policies arrive at contradictory outcomes at the sectoral level. Combining EU studies approaches with insights from the fields of new institutionalism, international development studies and transnationalisation, it explains how the EU policies contribute to rule persistence or lead to institutional change. Highlighting the importance of investigating how the policies of external intervention interact with domestic institutions, the book also provides a coherent presentation of the political and economic problems of Ukraine and Moldova and a comparative analysis in key areas at critical junctures of their development. This book will be of key interest to scholars and students of European Union politics and more broadly to International Relations, post-Soviet and Russian studies.
