**Women and Citizenship in Central and Eastern Europe** Joanna Regulska,2017-03-02 The transformations seen in women's active citizenship in Central and Eastern Europe mirror the social political and economic transformations in the region since the fall of communism at the end of the 1980s. This book challenges the universal notion of 'citizenship' by focusing on the diversity of situations women in this region have found themselves in since the end of the 1980s, looking at the challenges and struggles they have faced to assert themselves as citizens and their citizenship rights. Featuring detailed case studies which demonstrate the social and political discrimination between women that still exists,

the book will be of interest to academics and post-graduate students in women's/gender studies, political sociology and European studies.

**Governance in Russian Regions** Sabine Kropp, Aadne Aasland, Mikkel Berg-Nordlie, Jørn Holm-Hansen, Johannes Schuhmann, 2017-09-29 This book investigates the emergence and working of governance networks in contemporary Russia. Drawing on a case study design, it provides a novel comparison of seven policy issues each investigated across various Russian regions or over time. Its authors reveal that governance networks are a ubiquitous phenomenon emerging in different regime types. It sheds light on how and why state authorities interact with non-state actors and unravels various types, functions and

flavours of governance networks in Russia. By precisely tracing how state authorities govern networks under the terms of a hybrid regime, special emphasis is placed on the analysis of 'meta-governance' tools. Moreover, the book allows for theorising on governance in an increasingly authoritarian regime and thus can also be read as a unique contribution to research on governance theory in general. Creating a clear analytical framework it reflects the richness of governance theory and offers fresh perspectives on the nature of hybrid and 'new' authoritarian regimes. This original work will appeal to students and scholars of Russian Studies, public policy, political science, sociology, and public administration.

*Poverty and Regional Development in Eastern Europe and Central Asia* William R.

Dillinger, 2007-01-01 Regional economic development is an interest of policymakers throughout the Europe and Central Asia (ECA) region. One of its principal aims is to reduce poverty in lagging regions by stimulating local economic growth. However, problems exist with this approach. First, it may miss the target. Although geographical concentrations of poverty exist, poor people also live in regions that are - on average - rich. Second, the sources of the problem may be misdiagnosed. Poverty is not only related to where people are, but to who people are. In ECA, poverty is associated with low levels of education and people who are too young or too old to participate in the labor force. Under these circumstances, efforts to bring higher wage employment opportunities to poor regions may have little

immediate benefit for the people who live there. Third, relying on regional economic development to address poverty in lagging regions ignores the potential role of migration. The emigration of labor, rather than the immigration of capital, may be a more effective means of reducing the poverty of individuals in lagging regions, though this is unlikely to eliminate pockets of poverty quickly. Development opportunities may exist in poor regions that markets have overlooked. Interventions must be assessed carefully. Some of the traditional instruments used to stimulate regional economic growth have mixed track records. Comprehensive, custom-tailored approaches appear to be a promising alternative. However, governments should be modest in using regional development as a tool of poverty reduction. Policies aimed at stimulating growth in poor regions should be complemented by more direct anti-poverty measures, including targeted transfers and investments in education, and efforts to remove barriers to emigration.--World Bank website.

*Taming Nationalism? Political Community Building in the Post-Soviet Baltic States* Dovile

Budryte, 2017-05-15 Revisiting the process of political community building in Estonia, Latvia and Lithuania, this book analyzes the roles that international actors have played in these processes and assesses the unintended consequences of this involvement. The study differs from other works on ethnic minorities and nationalism in the former Soviet Union by exploring the use of minority rights discourse and the salience of

historical memory. Case studies examine the transformation of nationalism in Estonia, Latvia and Lithuania - all former Soviet republics - which have experienced Soviet nationalities policy first-hand. Primarily intended for an academic audience and practitioners interested in promoting tolerance in multi-ethnic societies, the book's historical narrative will also appeal to readers with a general interest in the former Soviet Union and post-Communism.

Political Parties of Eastern Europe: A Guide to Politics in the Post-communist Era Janusz Bugajski, 2020-09-10 This comprehensive one-volume guide to politics in Eastern Europe provides a wealth of information on the region. The author outlines the emergent political spectrum of parties and coalitions, which are described in the 20 country chapters that make up the heart of the book. Parties are classified across the political spectrum and discussed individually in terms of programs, leadership, and political activity. Tables at the end of each country chapter present basic political data and electoral results. A concluding essay evaluates democratic development in the region.

**The Palgrave Handbook of Volunteering, Civic Participation, and Nonprofit Associations** David Horton Smith, Robert A. Stebbins, Jurgen Grotz, 2017-01-18 Written by over 200 leading experts from over seventy countries, this handbook provides a comprehensive, state-of-the-art overview of the latest theory and research on volunteering, civic participation and nonprofit membership associations. The first handbook on the

subject to be truly multinational and interdisciplinary in its authorship, it represents a major milestone for the discipline. Each chapter follows a rigorous theoretical structure examining definitions, historical background, key analytical issues, usable knowledge, and future trends and required research. The nine parts of the handbook cover the historical and conceptual background of the discipline; special types of volunteering; the major activity areas of volunteering and associations; influences on volunteering and association participation; the internal structures of associations; the internal processes of associations; the external environments of associations; the scope and impacts of volunteering and associations; and conclusions and future prospects. This handbook provides an essential reference work for third-sector research and practice, including a valuable glossary of terms defining over eighty key concepts. Sponsored by the International Council of Voluntarism, Civil Society, and Social Economy Researcher Associations (ICSERA; [www.icsera.org](http://www.icsera.org)), it will appeal to scholars, policymakers and practitioners, and helps to define the emergent academic discipline of voluntaristics.

The New Northern Dimension of the European Neighbourhood Pami Aalto, Helge Blakkisrud, Hanna Smith, 2008 In the contemporary policy debate on the EU's neighborhood, grand designs are transforming into more pragmatic considerations. This book examines regional cooperation among the countries of northern Europe, emphasizing the pitfalls and successes of engaging Russia. Drawing

from the experiences of northern partnerships, the authors assess prospects for collaborating on energy, transportation, the environment, and public health. They conclude that practical regional cooperation with Russia can prove highly relevant not only for developing the EU's northern policy but also for working with Russia in general.

**Central and Southeast European Politics since 1989** Sabrina P. Ramet, 2010-02-18 The only textbook to provide a complete introduction to post-1989 Central and Southeast European politics, this dynamic volume provides a comprehensive account of the collapse of communism and the massive transformation that the region has witnessed. It brings together 23 leading specialists to trace the course of the dramatic changes accompanying democratization. The text provides country-by-country coverage, identifying common themes and enabling students to see which are shared throughout the area, giving them a sense of its unity and comparability whilst strengthening understanding around its many different trajectories. The dual thematic focus on democratization and Europeanization running through the text also helps to reinforce this learning process. Each chapter contains a factual overview to give the reader context concerning the region which will be useful for specialists and newcomers to the subject alike.

*Managing a Global Workforce* Charles Vance, Yongsun Paik, 2006 This comprehensive text provides balanced and contemporary coverage of human resource management in the international

marketplace. Directed at future general managers and international executives, rather than HR specialists, it is designed to help students as well as professionals recognize the critical human resource issues underlying the cultural and economic challenges they face. The book will enhance their skills in making effective HR decisions to cope with business challenges and opportunities. The book's approach is truly global in nature, not just focused on expatriates from the home country. The authors also recognize contemporary trends in the global business arena, including the growing use of contingent workers, strategic alliances, and offshore outsourcing arrangements, and the need to have an active influence on (if not manage directly) the workforce in these new organizational relationships. The text's practical, real-world emphasis is enhanced by student friendly tools in each chapter, including an opening case scenario to attract interest and emphasize topic importance; two additional end-of-chapter short cases to promote class discussion; Global Workforce Challenge vignettes; a profile of an international professional working in each chapter topic area; and recommended online resources for further reference and details.

**Planning Cities for the Future** Peter Karl Kresl, 2007-01-01 The book delivers an inspiring, first-hand insight into the state of urban competitiveness and how cities may make the best use of it. . . Kresl gives a well-informed insight into urban problems and related strategies, based on a carefully deployed comparative approach.

Markus Hesse, *Growth and Change* This volume delves into issues overlooked in many texts about the EU and will be useful for courses in European and international studies and local government.

Recommended. G.T. Potter, *Choice* Peter Kresl brings unique and invaluable empirical evidence, from the early 1990s through to 2005, to examine the relationship between urban competitiveness and economic-strategic planning for ten internationally networked cities within the EU. *Planning Cities for the Future* links the study of urban economic competitiveness with urban planning and is able to ascertain the crucial factors for success in this area of public policy. These factors include effective governance, leadership and monitoring of performance. The author also reveals how economic turbulence macro-economic stagnation, the emergence of competitors such as China and Central Europe and the introduction of the euro for example all have distinct impacts on the economic development of cities. He also suggests that today's economic strengths may create tomorrow's social pathologies, a fact which city planners must always keep in mind. Peter Kresl's book offers examples of cities that got it right and others that did not. Scholars and researchers interested in public sector economics, urban economic development and planning as well as city planners themselves will find much to interest and stimulate them in this book.

**European Legal Cultures in Transition** Åse B. Grødeland, William L. Miller, 2015-07-24 Provides a novel methodological approach to the study of popular and professional legal culture within the

European context.

The Accommodation of Regional and Ethno-cultural Diversity in Ukraine Aadne Aasland, Sabine Kropp, 2021-09-21 The book offers new insights into how ethnicity, language and regional-local identity interact within the context of Ukrainian political reform, and indicates how these reforms affect social cohesion among ethno-cultural groups. While the individual chapters each focus on one or a few facets of the overall research question, together they draw a nuanced picture of the multifaceted challenges to creating and consolidating social cohesion in a nationalizing state. The concept integrates various disciplines, including political science, international relations, law, and sociology. Correspondingly, the contributions are based on various methodological approaches, ranging from legal analysis over media discourse analysis, individual and focus group interviews to analysis of data from a representative population survey. The findings of the in-depth study are discussed within the broader context of comparative research on diversity management and social cohesion in fragmented societies.

**Russian Minority Politics in Post-Soviet Latvia and Kyrgyzstan** Michele E. Commercio, 2011-06-06 The collapse of the Soviet Union suddenly rendered ethnic Russians living in non-Russian successor states like Latvia and Kyrgyzstan new minorities subject to dramatic political, economic, and social upheaval. As elites in these new states implemented formal policies and condoned informal practices that privileged non-Russians, ethnic

Russians had to react. In *Russian Minority Politics in Post-Soviet Latvia and Kyrgyzstan*, Michele E. Commercio draws on extensive field research, including hundreds of personal interviews, to analyze the responses of minority Russians to such policies and practices. In particular, she focuses on the role played by formal and informal institutions in the crystallization of Russian attitudes, preferences, and behaviors in these states. Commercio asks why there is more out-migration and less political mobilization among Russians in Kyrgyzstan, a state that adopts policies that placate both Kyrgyz and Russians, and less out-migration and more political mobilization among Russians in Latvia, a state that adopts policies that favor Latvians at the expense of Russians. Challenging current thinking, she suggests that the answer to this question lies in the power of informal networks. After the fall of the Soviet Union, the Communist party, Komsomol youth organization, and KGB networks were transformed into informal networks. Russians in Kyrgyzstan were for various reasons isolated from such networks, and this isolation restricted their access to the country's private sector, making it difficult for them to create effective associations capable of representing their interests. This resulted in a high level of Russian exit and the silencing of Russian voices. In contrast, Russians in Latvia were well connected to such networks, which provided them with access to the country's private sector and facilitated the establishment of political parties and nongovernmental organizations that represented

their interests. This led to a low level of Russian exit and high level of Russian voice. Commercio concludes that informal networks have a stronger influence on minority politics than formal institutions.
