Handbook of Research on Digital Violence and Discrimination Studies Özsungur, Fahri, 2022-04-08
Digital violence continues to increase, especially during times of crisis. Racism, bullying, ageism, sexism, child pornography, cybercrime, and digital tracking raise critical social and digital security issues that have lasting effects. Digital violence can cause children to be dragged into crime, create social isolation for the elderly, generate inter-communal conflicts, and increase cyber warfare. A closer study of digital violence and its effects is necessary to develop lasting solutions. The Handbook of Research on Digital Violence and Discrimination Studies introduces the current best practices, laboratory methods, policies, and protocols surrounding international digital violence and discrimination. Covering a range of topics such as abuse and harassment, this major reference work is ideal for researchers, academicians, policymakers, practitioners, professionals, instructors, and students.

Constitutional Self-Government Christopher L. Eisgruber, 2001-09-30
Most of us regard the Constitution as the foundation of American democracy. How, then, are we to understand the restrictions that it imposes on legislatures and voters? Why, for example, does the Constitution allow unelected judges to exercise so much power? And why is this centuries-old document so

difficult to amend? In short, how can we call ourselves a democracy when we are bound by an entrenched, and sometimes counter-majoritarian, constitution? In *Constitutional Self-Government*, Christopher Eisgruber focuses directly on the Constitution's seemingly undemocratic features. Whereas other scholars have tried to reconcile these features with majority rule, or simply acknowledged them as necessary limits on democracy, Eisgruber argues that constitutionalism is best regarded not as a constraint upon self-government, but as a crucial ingredient in a complex, non-majoritarian form of democracy. In an original and provocative argument, he contends that legislatures and elections provide only an incomplete representation of the people, and he claims that the Supreme Court should be regarded as another of the institutions able to speak for Americans about justice. At a pivotal moment of worldwide interest in judicial review and renewed national controversy over the Supreme Court's role in politics, *Constitutional Self-Government* ingeniously locates the Constitution's value in its capacity to sustain an array of institutions that render self-government meaningful for a large and diverse people.

An Aqueous Territory Ernesto Bassi, 2016-12-02 In

An Aqueous Territory Ernesto Bassi traces the configuration of a geographic space he calls the transimperial Greater Caribbean between 1760 and 1860. Focusing on the Caribbean coast of New Granada (present-day Colombia), Bassi shows that the region's residents did not live their lives bounded by geopolitical borders. Rather, the cross-border activities of sailors, traders, revolutionaries, indigenous peoples, and others reflected their perceptions of the Caribbean as a transimperial space where trade, information, and people circulated, both conforming to and in defiance of imperial regulations. Bassi demonstrates that the islands, continental coasts, and open waters of the transimperial Greater Caribbean constituted a space that was simultaneously Spanish, British, French, Dutch, Danish, Anglo-American, African, and indigenous. Exploring the lived geographies of the region's dwellers, Bassi challenges preconceived notions of the existence of discrete imperial spheres and the inevitable emergence of independent nation-states while providing insights into how people envision their own futures and make sense of their place in the world.

Education and Social Justice J. Zajda,S. Majhanovich,V. Rust,E. Martín Sabina,2006-09-09
This book explores the problematic relationship between education, social justice and the State, against the background of comparative education research. The book critiques the status quo of stratified school systems, and the unequal distribution of cultural capital and value added schooling. The authors address one of today's most

pressing questions: Are social, economic and cultural divisions between the nations, between school sectors, between schools and between students growing or declining?

Sociology of Sport George Harvey Sage, D. Stanley Eitzen, Becky Beal, Matthew Atencio, 2022-10 Now in its twelfth edition, Sociology of Sport offers a compact yet comprehensive and integrated perspective on sport in North American society. Bringing a unique viewpoint to the subject, George H. Sage, D. Stanley Eitzen, Becky Beal, and Matthew Atencio analyze and, in turn, demythologize sport. This method promotes an understanding of how a sociological perspective differs from commonsense perceptions about sport and society, helping students to understand sport in a new way--

Measuring Gender Equality Josefina Posadas, Pierella Paci, Zurab Sajaia, Michael Lokshin, 2017-04-10 Gender equality is a core development objective in its own right and also smart development policy and business practice. No society can develop sustainably without giving men and women equal power to shape their own lives and contribute to their families, communities, and countries. And yet, critical gender gaps continue to exist in all countries and across multiple dimensions. The gender module of the World Bank's ADePT software platform produces a comprehensive set of tables and graphs using household surveys to help diagnose and analyze the prevailing gender inequalities at the country level and over time. This book provides a step-by-step guide to the use of the ADePT software and an introduction to its

basic economic concepts and econometric methods. The module is organized around the framework proposed by the World Development Report 2012: Gender Equality and Development. It covers gender differences in outcomes in three primary dimensions of gender equality: human capital (or endowments), economic opportunities, and voice and agency. Particular focus is given to the analysis and decomposition techniques that allow for further exploring of gender gaps in economic opportunities.

The Ways of Wisdom Anthony E.

Mansueto, 2016-03-18 The Ways of Wisdom answers the demand for a new kind of theology appropriate for a postsecular, global civilization, showing how to engage questions of meaning and value across as well as within traditions. Arguing that humanity is the desire to be God, The Ways of Wisdom analyzes the diverse ways in which humanity has pursued this aim, and argues for a synthesis that draws on the great spiritual traditions of the Axial Age as well as on the humanistic secular commitment to innerworldly civilizational progress and social justice. At the same time, it rejects both the technocratic god-building that it argues is the hegemonic ideal of the Saeculum in which we live and the radical immanentism that imagined that we could create a collective political subject that would make us the masters of our own destiny, proposing instead what it calls Sanctuary, a way of life centered on seeking wisdom, doing justice, and ripening Being.

War and Social Theory N. Curtis, 2005-11-10 The persistence of war as a feature of modern life is examined through issues of identity and difference, that is, the construction of 'self' and 'other' as individual or community. Key texts relating specifically to identity and war are addressed, including those by Nietzsche, Heidegger, Marcuse, Freud, Lacan, Honneth, Bataille, Simmel, Elshtain, Ruddick, Schmitt, Delanda, Hardt and Negri, Baudrillard, Virilio, Beck and Joas. Its theoretical approach sets this study apart from the traditional political science and IR approaches to the subject and makes a significant contribution within this area of social theory, cultural studies and communication studies.

The Political Junkie Handbook Michael Crane, 2004 This easy-to-use book is designed to inform the American public about the political system that influences much of their lives

Agriculture in Urban Planning Mark Redwood, 2012 This volume, by graduate researchers working in urban agriculture, examines concrete strategies to integrate city farming into the urban landscape. Drawing on original field work in cities across the rapidly urbanizing global south, the book examines the contribution of urban agriculture and city farming to livelihoods and food security. Case studies cover food production diversification

for robust and secure food provision; the socio-economic and agronomic aspects of urban composting; urban agriculture as a viable livelihood strategy; strategies for integrating city farming into urban landscapes; and the complex social-ecological networks of urban agriculture. Other case studies look at public health aspects including the impact of pesticides, micro-biological risks, pollution and water contamination on food production and people. Ultimately the book calls on city farmers, politicians, environmentalists and regulatory bodies to work together to improve the long term sustainability of urban farming as a major, secure source of food and employment for urban populations. Published with IDRC

The Archaeology of Mobility Hans Barnard, Willeke Wendrich, 2008-12-31 There have been edited books on the archaeology of nomadism in various regions, and there have been individual archaeological and anthropological monographs, but nothing with the kind of coverage provided in this volume. Its strength and importance lies in the fact that it brings together a worldwide collection of studies of the archaeology of mobility. This book provides a ready-made reference to this worldwide phenomenon and is unique in that it tries to redefine pastoralism within a larger context by the term mobility. It presents many new ideas and thoughtful approaches, especially in the Central Asian region.

Ecological Wisdom Inspired Restoration Engineering Varenayam Achal, Abhijit Mukherjee, 2018-08-24 This book focuses on

ecological wisdom inspired restoration engineering through theories, hypotheses, policies, practical understanding, and case studies. Understanding nature's processes is a prerequisite for the healthy and sustainable functioning of a habitable Earth. As such, the book provides a guide for readers seeking to understand and build sustainable, urban socio-ecological systems using restoration technologies based on wisdom.

Motivated by recent rapid advances in restoration engineering, such as the role of green building materials in urban infrastructures, and developing sustainable landscapes to benefit the environment, economy and communities, it is an essential reference on the most promising innovative technologies. It discusses engineering methods and practices in the restoration of soil, water, heritage sites, and other ecosystems, as well as the development and applications of green building materials. It presents a holistic and systematic approach that utilizes natural resources and the concept of ecological wisdom to reap sustainable environmental, economic and social benefits to fulfill the concept of living in harmony with nature. This book is a valuable resource for civil- and environmental engineering researchers as well as organizations engaged in eco-restoration practices.

The Guide to Corporate Compliance Andrew M. Levine, Reynaldo Manzanarez Radilla, Valeria Plastino, Fabio Selhorst, 2021

Concentrated Creation Rhona Lewis, 2023-01-26
This book widens the understanding of salvation from a narrow focus on the crucifixion of Jesus Christ to one which is inseparable from creation theology. In this analysis of the Thomist and Irenaean sources of Edward Schillebeeckx's creation faith, God's absolute saving presence to humanity is found to be intrinsic to his creative action. This becomes most explicit in God's humanity in the life, death and resurrection of Jesus Christ. Lewis argues that Jesus is both God's invitation to humanity and is himself the perfect human response to God. Because of this, Jesus' followers are called to be engaged in God's saving action, by working to remove suffering from people and to build a better world in which all may flourish. Schillebeeckx's theology is sometimes thought to divide into two disconnected halves, a pre- and post-Vatican II version. The way in which Schillebeeckx's Christological soteriology has developed over his theological career, before and after Vatican II, is here examined using the Annales model of continuity and change. This book finds that Schillebeeckx both breaks with the language of Chalcedon while remaining adamantly faithful to the truth which it expresses. The final chapters discover how

Schillebeeckx's ideas and methods are crucially relevant in an analysis of contemporary social suffering in Ciudad-Juárez by Nancy Pineda-Madrid, and in the project of the Catholic Dialogue School in Flanders by Lieven Boeve.

Who Is A Jew? Leonard J. Greenspoon, 2015-04-15
Jewish identity is a perennial concern, as Jews seek to define the major features and status of those who “belong,” while at the same time draw distinctions between individuals and groups on the “inside” and those on the “outside.” From a variety of perspectives, scholarly as well as confessional, there is intense interest among non-Jewish and Jewish commentators alike in the basic question, “Who is a Jew?” This collection of articles draws diverse historical, cultural, and religious insights from scholars who represent a wide range of academic and theological disciplines. Some of the authors directly address the issue of Jewish identity as it is being played out today in Israel and Diaspora communities. Others look to earlier time periods or societies as invaluable resources for enhanced and deepened analysis of contemporary matters. All authors in this collection make a concerted effort to present their evidence and their conclusions in a way that is accessible to the general public and valid for other scholars. The result is a richly textured approach to a topic that seems always relevant. If, as is the case, no single answer appeals to all of the authors, this is as it should be. We all gain from the application of a number of approaches and perspectives, which enrich our appreciation of the people whose lives are

affected, for better or worse, by real-life discussions of this issue and the resultant actions toward exclusivity or inclusivity.
