Routledge Handbook of Regionalism & Federalism John Loughlin,John Kincaid,Wilfried Swenden,2013-07-18 Almost all states are either federal or regionalized in some sense. It is difficult to find a state that is entirely unitary and the Routledge Handbook of Regionalism and Federalism necessarily takes in almost the entire world. Both federalism and regionalism have been subjects of a vast academic literature mainly from political science but sometimes also from history, economics, and geography. This cutting edge examination seeks to evaluate the two types of state organization from the perspective of political science producing a work that is analytical rather than simply descriptive. The Handbook presents some of the latest theoretical reflections on regionalism and federalism and then moves on to discuss cases of both regionalism and federalism in key countries chosen from the world's macro-regions. Assembling this wide range of case studies allows the book to present a general picture of current trends in territorial governance. The final chapters then examine failed federations such as Czechoslovakia and examples of transnational regionalism - the EU, NAFTA and the African Union. Covering evolving forms of federalism and regionalism in all parts of the world and featuring a comprehensive range of case studies by leading international scholars this work will be an essential reference source for all students and scholars of international politics, comparative politics and international relations.

The Max Planck Handbooks in European Public Law Sabino Cassese,Peter M. Huber,Armin von Bogdandy,Peter Huber,2017 The Max Planck Handbooks in European Public Law series describes and analyses the public law of the European legal space, an area that encompasses not only the law of the European Union but also the European Convention on Human Rights and, importantly, the domestic public laws of European states. Recognizing that the ongoing vertical and horizontal processes of European integration make legal comparison the task of our time for both scholars and practitioners, it aims to foster the development of a specifically European legal pluralism and to contribute to the legitimacy and efficiency of European public law. The first volume of the series begins this enterprise with an appraisal of the evolution of the state and its administration, with cross-cutting contributions and also specific country reports. While the former include, among others, treatises on historical antecedents of the concept of European public law, the development of the administrative state as such, the relationship between constitutional and administrative law, and legal conceptions of statehood, the latter focus on states and legal orders as diverse as, e.g., Spain and Hungary or Great Britain and Greece. With this, the book provides access to the systematic foundations, pivotal historic moments, and legal thought of states bound together not only by a common history but also by deep and entrenched normative ties; for the quality of the *ius publicum europaeum* can be no better than the common understanding European scholars and practitioners have of the law of other states. An understanding thus improved will enable them to operate with the shared skills, knowledge, and values that can bring to fruition the different processes of European integration--Provided by the publisher.

A BRIEF HISTORY OF MALAYSIA: TEXTS AND MATERIALS HASBOLLAH BIN MAT SAAD,2020-05-07 *Compilation Series: A Brief History of Malaysia: Texts and Materials* is a solid, application-oriented text for students taking law subjects. Many new features make this edition a richer and stronger learning resource for students. Several factors motivated the authors to write this book. After having the experience in legal field and teaching for more than 17 years, it became clear that there was a definite need for more detail materials in this area. In addition, there was need for a book which would give full recognition to an easier method and the authors felt it was time for a text which would develop the ideas and methods with this in mind. This book covers a thorough discussion of the development of law in Malaysia; beginning from the establishment of the Melaka Empire until the recent issues. A major audience for the book will be students studying the law subjects. The order of topics, however, provides a degree of flexibility, so that the book can be of interest to different readers through basic concepts until the advanced concepts (i.e. the discussion of the cases). The purpose of this book is to take the readers on an introduction to Malaysian legal history journey, by which, the meaning of such subject at basic level is better understood. Hopefully, this book can be benefited by the readers in their journey to success.

Public Administration and Policy in the Middle East Alexander R. Dawoody, 2014-09-22 The various and different Middle Eastern countries are addressing new key reform and governance reform processes but also administration and policy issues of enduring importance; decentralization and local government, non-profit organizations, political culture, and reform of the policy process. This book provides assessment of national strategies for reform in public administration and policy, how these strategies have fared in implementation; and what challenges must be overcome to achieve real and sustainable progress. Seven country case studies will explore the overall policy-making process from a critical perspective and consider how it could be strengthened. Four cases will deal with the controversial issues of decentralization of power and decision-making. Two cases will address the role of civil society in the policymaking and reform process. Introductory and concluding chapters will place these discussions in context and draw the primary lessons for policy-makers. The main objectives of the book are to present different examples of specific public policy and administration, as well as governance issues in the Middle East so that policymakers (both in the region and the world who are interested in the Middle East), as well as practitioners, scholars and graduate students can utilize the book as a study guide to better understand various dynamics in governance in the Middle East. This approach will enable the volume to bridge global perspectives on governance development with regional perspectives and experience, bringing shared expertise, intellectual inquisitiveness, and experience in the professional practice of public policy and administration to bear on these common challenges.

Global Perspectives on E-Learning Alison A. Carr-Chellman, 2004-12-15 Global Perspectives on E-Learning: Rhetoric and Reality presents several cases of international online education and the rhetoric that surrounds this form of teaching and learning. Editor Alison A. Carr-Chellman examines the impact of online distance education throughout the world in an effort to understand more deeply the merits of such initiatives. Written from a critical perspective, the book sheds light on some of the problems faced by international distance educators. It particularly focuses on who benefits, and who does not, by the advance of international e-learning and how we can respond to the needs of the disenfranchised. This book is intended to supplement what has to this point been largely a positive, how-to literature in distance education. It offers a balanced perspective on the problems and possibilities of distance education worldwide.

Tracing the Boundaries Between Hindi and Urdu Christine Everaert, 2010 This book sheds light on the complex relationship between Hindi and Urdu. Through a detailed reading of a representative set of 20th century short stories in both languages, the author leads the reader towards a clear definition of the differences between Hindi and Urdu. The full translations of the stories have been extensively annotated to point out the details in which the Hindi and Urdu versions differ. An overview of early and contemporary Hindi/Urdu and Hindustani grammars and language teaching textbooks demonstrates the problems of correctly naming and identifying the two languages. This book now offers a detailed and systematic database of syntactic, morphological and semantic differences between the selected Hindi and Urdu stories. A useful tool for all scholars of modern Hindi/Urdu fiction, (socio-)linguistics, history or social sciences.

The Palgrave International Handbook of Women and Journalism Carolyn M. Byerly, 2016-01-12 Now in paperback for the first time, the Handbook is an academic adaptation of information contained in the Global Report on the Status of Women in News Media, a study commissioned by the International Women's Media Foundation. The book's editor was the principal investigator of the original study. This text draws together the most robust data from that original study, presenting it in 29 chapters on individual nations and three additional theoretical chapters. The book is the most expansive effort to date to consider women's standing in the journalism profession across the world. Contents organize nations in relation to their progress within newsrooms, with those most advanced in gender equality representing diversity in terms of region and national development. Contributing authors are, in most cases, the original researchers for their respective nations in the Global Report study.
