Emerging Perspectives on Teaching Architecture and Urbanism David Leite Viana, Emílio da Cruz Brandão, Franklim Morais, Isabel Cristina

Carvalho, José P. Duarte, Nicolau Brandão, 2023-11-17

This book contains a set of essays on the teaching of Architecture and Urbanism, written by university professors and researchers from several countries. It argues that the teaching of architecture and urbanism is in a state of crisis; architecture seems unable to respond to current problems, and urbanism seems incapable of fulfilling the needs of a more balanced society and its built environment, including the human right to housing. The book comprises historical analyses, systematization of concepts, manifestos, and social evaluations, and, above all, an alignment of new objectives, curricular plans, and pedagogical methodologies.

Metaheuristics for Scheduling in Industrial and Manufacturing Applications

Fatos Xhafa, Ajith Abraham, 2008-06-21 During the past decades scheduling has been among the most studied optimization

problems and it is still an active area of research! Scheduling appears in many areas of science, engineering and industry and takes different forms depending on the restrictions and optimization criteria of the operating environments [8]. For instance, in optimization and computer science, scheduling has been defined as "the allocation of tasks to resources over time in order to achieve optimality in one or more objective criteria in an efficient way" and in production as "production schedule, i. e. , the planning of the production or the sequence of operations according to which jobs pass through machines and is optimal with respect to certain optimization criteria. " Although there is a standardized form of stating any scheduling problem, namely "efficient allocation of n jobs on m machines –which can process no more than one

activity at a time— with the objective to optimize some objective function of the job completion times”, scheduling is in fact a family of problems. Indeed, several parameters intervene in the problem definition: (a) job characteristics (preemptive or not, precedence constraints, release dates, etc.); (b) resource environment (single vs. parallel machines, unrelated machines, identical or uniform machines, etc.); (c) optimization criteria (minimize total tardiness, the number of late jobs, makespan, flowtime, etc. ; maximize resource utilization, etc.); and, (d) scheduling environment (static vs. dynamic, in the former the number of jobs to be considered and their ready times are available while in the latter the number of jobs and their characteristics change over time).

Border Disputes [3 volumes] Emmanuel Brunet-Jailly, 2015-07-28 An ideal resource for anyone studying current events, social studies, geopolitics, conflict resolution, and political science, this three-volume set provides broad coverage of approximately 80 current international border disputes and conflicts. Border disputes are a common source of political instability and military conflict around the globe, both in the present day and throughout history. *Border Disputes: A Global Encyclopedia* will serve as an invaluable resource for students studying social studies, political science, human geography, or related subjects. Each volume of this expansive encyclopedia begins with an accessible introduction to the type of dispute to be discussed, identifying the conflict as territorial

(Volume 1), positional (Volume 2), or functional (Volume 3). Following the background essay in each volume are comprehensive case study entries on specific international conflicts, examining the disputed area, the reasons for the dispute, and cultural, political, historical, and legal issues relating to the dispute. The third volume will also provide primary documents of legal rulings and important resolutions of various disputes, as well as profiles of key organizations relating to border studies and specific border dispute commissions.

Zika Debora Diniz, 2017-09-15 Winner of the 2017 Jabuti Book Prize The Zika virus is devastating lives and communities. Children across the Americas are being born with severe disabilities because of it. Yet during the desolating outbreak, Brazil played host to both the Olympics and the FIFA World Cup, leading many to suspect that the true impact of the virus has been subject to a cover-up of international proportions. Beginning in the northeast, where the devastation has been most felt, professor of bioethics and award-winning documentary filmmaker Debora Diniz travels across Brazil tracing the virus's origin and spread. Along the journey she meets a host of fearless families, doctors and scientists uncovering the virus's impact on local communities. In doing so Diniz paints a vivid picture of the Zika epidemic, exposing the Brazilian government's complicity in allowing the virus to spread while championing the efforts of local doctors and mothers who, working together, are raising awareness of the virus and fighting

for the rights of children affected by Zika.

Lisbon Revisited Rhian Atkin, 2017-07-05
Twentieth-century Portugal saw dramatic political and social change. The monarchy was abolished, and a republic installed (1910), soon giving way to a long-lasting dictatorship (1926); a transition to democracy (1974) led to membership of the European Union (1986). But what do we know of how people lived during these periods? And how did men, in particular, respond to the changes taking place in society? In this illuminating and broad-ranging study, Rhian Atkin uses as case studies the work of Fernando Pessoa (1888-1935), Luis de Sttau Monteiro (1926-93) and Jose Saramago (1922-2010) in order to examine the relationship between socio-political change and the construction and performance of masculinities in the urban environment of Lisbon over the course of the last century.

Gold, Festivals, and Music in Southeast Brazil
Barbara Alge, 2021-07-29 Gold, Festivals, and Music in Southeast Brazil: Sounding Portugueseness is a study of the musical legacy of the eighteenth century Brazilian gold rush that integrates ethnographic research of the main genres of former mining communities in Brazil – from liturgical music in the style of European art music to Afro-Brazilian musical expressions. Its content and structure are informed by Norbert Elias's idea of

the civilizing process, which is explored regarding its relevance in interpreting sociocultural processes and choreo-musical expressions in the small town of Morro Vermelho. The book's innovative feature is its focus on a little-known area to non-Brazilian scholars, and its focus on the colonial and European heritage in Brazil. Morro Vermelho's cultural traditions have received relatively limited attention. The Catholic festival of Our Lady of Nazareth provides a setting for the documentation and analysis of the musical setting and is thus placed at the center of the discussion. It leads through the vast writings on Brazilian identity and challenges the view on Brazilian-ness as constructed in terms of the mixing of races. Norbert Elias's concept of the civilizing process structures the book and is relevant for understanding the cultural sphere of the festival of Our Lady of Nazareth. The book combines discourses of Portugueseness with historical sources and observations from fieldwork and community building in the virtual world. The focus on the music to support social constructions of Portugueseness is supported with evidence from diverse data sources: music (literature and fieldwork recordings), original interviews, marketing materials and historical narratives. The combination of archival, ethnographic, and bibliographic research methods attempts a seamless narrative. Its approach to fieldwork and frank reflections on the process and relevant issues help to contextualize the analyses and serve as useful advice for future researchers.

Sovereignty and Illicit Social Order Christopher

Marc Lilyblad, 2020-07-08 Contesting conventional assumptions of the modern nation-state, this book challenges us to rethink the segmentation of the political realm and its underlying economic and social processes. Cognizant of the historical context of systemic change, Lilyblad reconstructs how illicit social order arises from agonistic competition over territory, authority, and institutions. Immersive empirical investigation traces this bottom-up process in local conflict zones, detailing how spontaneous configurations of violence, socioeconomic resources, and legitimacy transcend the divide between public and private. Ultimately, the analytical vantage of global governance assesses the sobering implications for sovereignty to more accurately reflect the world we have, not the one we may want. By showing how these inherently local illicit social orders develop apart from – not below – the state within a global anarchic society, this book will be of interest to a wide range of scholars, including political scientists, economists, sociologists, geographers, as well as researchers in interdisciplinary fields such as International Development, International Political Economy, and Global Governance.
