Power, Gender and Social Change in Africa Raj Bardouille, Margaret Grieco, 2009-03-26 Gender plays a hugely significant and too often under-considered role in predicting how accessible resources such as education, wage-based employment, physical and mental health care, adequate nutrition and housing will be to an individual or community. According to a 2001 World Bank report titled *Engendering Development—Through Gender Equality in Rights, Resources, and Voice*, enormous disparities exist between men and women in terms of basic rights and the power to determine the future, both in Africa and around the globe. A better understanding of the links between gender, public policy and development outcomes would allow for more effective policy formulation and implementation at many levels. This book, through its discussion of the challenges, achievements and lessons learned in efforts to attain gender equality, sheds light on these important issues. The book contains chapters from an interdisciplinary group of scholars, including sociologists, economists, political scientists, scholars of law, anthropologists, historians and others. The work includes analysis of strategic gender initiatives, case studies, research, and policies as well as conceptual and theoretical pieces. With its format of ideas, resources and recorded experiences as well as theoretical models and best practices, the book is an important contribution to academic and political discourse on the intricate links between gender, power, and social change in Africa and around the world.

VIOLENCE TERRORISME ET RELIGION Papa Cheikh Jimbira Sakho, 2016-09-29 Tome premier d'une trilogie embrassant une séquence de deux mille ans d'histoire, structurée selon une périodisation ternaire (« Pax Romana », « Pax Islamica », « Pax Europæ-Americana »), ce texte de Papa Cheikh Jimbira-Sakho était impatientement attendu de ses lecteurs. En considération de l'enjeu idéologique crucial de ce tournant de siècle qu'est la violence terroriste, sa publication arrive à point nommé. Notamment, au vu de la perplexité grandissante des Enfants d'Adam de plus en plus dubitatifs quant à leur noblesse ontologique et la valeur intrinsèque des valeurs cardinales constitutives du capital éthique de l'humanité Dans ce premier ternaire (« PAX ROMANA »), Papa Cheikh Jimbira-Sakho s'applique à ausculter le triptyque « Violence - Terrorisme - Religion » sur la séquence de l'histoire impériale romaine allant du règne de Jules César jusqu'à celui d'Héraclius Ier, ce qui correspond aux huit siècles de barbarie antique précédant l'épopée islamique initiée par le Prophète Mouhammad (spl) à La Mecque. Naturellement, Papa Cheikh Jimbira-Sakho ne manque pas de s'attarder sur le terrible épisode de Massada, lieu géométrique fondateur de la violence terroriste religieuse incarnée dans la mystique nationaliste des Zélotes qui, du temps de l'empereur Vespasien et son fils Titus, se dressèrent contre l'impérialisme romain au prix de leur vie. Papa Cheikh Jimbira-Sakho le rappelle, en tant qu'héritier de la Grèce antique, l'Empire romain renvoie d'abord et immanquablement à cette funeste doctrine politico-idéologique de l'impérialisme. On le sait, c'est cette weltanschauung qui inspirera le génocide des peuples amérindiens d'Amérique, l'« esclavagisme criminel » et la Traite négrière, le colonialisme et le néo-colonialisme européens, autant de séquences sanglantes et barbares correspondant aux pages les plus sombres de toute l'histoire de l'humanité. De manière incidente, Papa Cheikh Jimbira-Sakho consacre un chapitre au fameux discours de Ratisbonne du pape Benoît XVI (12 septembre 2006) reprenant à son compte des propos prêtés à l'empereur chrétien Manuel II Paléologue (1350-1425) accusant l'Islam de « religion de violence » appelant constamment au « jihâd » qu'on identifie à la « guerre sainte ». Après avoir précisé le sens qu'il donne aux expressions « Pax Romana », « Pax Islamica » et « Pax Europæ-Americana », Papa Cheikh Jimbira-Sakho se pose la question préjudicielle : y a-t-il jamais eu un quelconque assoupissement de la boulimie atavique de violence guerrière des empereurs romains durant ladite séquence ? Et l'auteur de démontrer avec force arguments que la marque distinctive de cette séquence se trouve incontestablement dans la barbarie des oppressions politiques et des persécutions religieuses exercées notamment contre les Juifs et les Chrétiens, voire les adeptes du paganisme antique. Papa Cheikh Jimbira-Sakho montre en effet que durant cette séquence historique tout comme durant celle allant de Marc-Aurèle à Théodose Ier, Rome ne sortit pratiquement jamais des ténèbres de la barbarie de ces oppressions, avec les édits impériaux de persécution promulgués contre les Chrétiens, les hérétiques ou les païens. Ces cruelles tyrannies firent des martyrologes indénombrables parmi ces dénominations religieuses, résultant en des torrents de sang qui ne se tariront jamais dans la mémoire de l'Histoire. Il en fut de même durant la période de l'après Théodose Ier, ère des invasions des « Barbares » (Goths, Vandales et Huns) qui, en matière de férocité sanguinaire, tinrent la dragée haute aux Romains. Papa Cheikh Jimbira-Sakho termine sa revue de l'histoire impériale romaine, faite d'oppressions politiques et de persécutions religieuses, avec le règne du tyrannique usurpateur Phocas, souverain contemporain du Prophète de l'Islam (spl). Rappelons-le, c'est à cette figure hors pair de l'histoire des Enfants d'Adam que Papa Cheikh Jimbira-Sakho a consacré sa dernière publication (« Pour le Prophète Mouhammad (spl). Essai de biographie ») commise comme introduction au dit tome deuxième (« Pax Islamica ») à paraître prochainement.

No Rule of Law, No Democracy Cristina Nicolescu-Waggonner, 2016-11-10 Argues that new democracies face consolidation challenges due to campaign finance corruption and the unwillingness of politicians to reform rule of law enforcement. Mainstream theories assert that democracy cures corruption. In market economies, however, elections are expensive and parties, with ever-thinning memberships, cannot legally acquire the necessary campaign funds. In order to secure electoral funds, a large number of politicians misappropriate public funds. Due to the illicit character of these transactions, high officials with conflicts of interest prefer to leave anticorruption enforcement mechanisms unreformed and reserve the right to intervene in the judicial process, with dire consequences for the rule of law. In *No Rule of Law, No Democracy*, Cristina Nicolescu-Waggonner demonstrates that when corrupt politicians are in power—true of nearly all new democracies—they will protect their office and fail to implement rule of law reforms. Consequently, these polities never reach a point where democracy could and would cure corruption. This dysfunction is tested in one hundred cases over sixteen years with significant results. In the case of the Czech Republic, for example, which is regarded as a consolidated democracy, there is systematic corruption, misappropriation of state funds, an unreformed judiciary, and arbitrary application of law. The only solution is a powerful, independent, well-funded anticorruption agency. Romania, one of the most corrupt countries in Europe, established, at the European Union's request, powerful anticorruption bodies and punished corrupt leaders, which created the predictability of enforcement. It is the certainty of punishment that curtails corruption and establishes true rule of law.

Conservation of Tropical Rainforests Brian Joseph McFarland, 2017-11-14 This book critically engages with how the conservation of tropical rainforests is financed. Beginning with the context of tropical deforestation, alongside an overview of tropical ecology, global environmental policy and finance, the book reviews several conservation financing instruments. These include ecotourism and private reserves, debt-for-nature swaps and government domestic budgetary expenditures for state and national parks. Tropical deforestation and forest degradation are serious global environmental issues, contributing to global climate change, species extinction, and threatening the livelihoods of forest-dependent communities. Yet, many leading companies, individuals and governments are making a positive impact on tropical forest conservation to mitigate greenhouse gas emissions through the use of conservation finance. *Conservation of Tropical Rainforests* tells the history of international conservation finance and provides a variety of options for individuals, businesses, and governments to support conservation financing projects.

Penne for Your Thoughts Simone C. Greene,2022-11-03 *Penne for Your Thoughts* is a cookbook full of information to help one understand the difference between food allergy and food intolerance as well as provoke thoughts on nutrition. Many of the wide array of recipes are typical everyday dishes converted to be free from common allergens--such as wheat gluten, casein (dairy), soy, corn, egg, and nuts--by substituting various ingredients for more natural/organic allergy-safe ingredients. It is designed so one can draw from it what they need. The reality is that there are a lot of people that have food allergies/intolerances. Many have multiple sensitivities and do not realize it. The real challenge is trying to eliminate common allergens because they are everywhere. Based on a person's level of sensitivity, a reaction can be mild to severe, or even life-threatening. For many, it is not possible to buy french fries at the food court, snack on cheeseballs while on a playdate, or sit beside someone else eating peanut butter. This is not just another gluten-free cookbook. It is a map of a mom's journey, where through perseverance she stayed the course and found ways to make life better for her son. At first, the goal was just to make gluten-free pancakes and bread. However, throughout the process, she found grocery shopping frustrating since many gluten-free items were not corn-free. If it were dairy-free, it was not soy-free. If it were nut-free, it was still manufactured in a facility that processed gluten, dairy, soy, nuts, etc. Quickly she found gluten-free flour very different from regular flour and that eliminating dairy and eggs would also be challenging. As a result of her determination and willpower, *Penne for Your Thoughts* is hereby presented to you with Max's favorite shaped pasta, a whole array of information, and recipes to ponder.

Art Platforms and Cultural Production on the Internet Olga Goriunova,2012-05-23 In this book, Goriunova offers a critical analysis of the processes that produce digital culture. Digital cultures thrive on creativity, developing new forces of organization to overcome repetition and reach brilliance. In order to understand the processes that produce culture, the author introduces the concept of the art platform, a specific configuration of creative passions, codes, events, individuals and works that are propelled by cultural currents and maintained through digitally native means. Art platforms can occur in numerous contexts bringing about genuinely new cultural production, that, given enough force, come together to sustain an open mechanism while negotiating social, technical and political modes of power. Software art, digital forms of literature, 8-bit music, 3D art forms, pro-surfers, and networks of geeks are test beds for enquiry into what brings and holds art platforms together. Goriunova provides a new means of understanding the development of cultural forms on the Internet, placing the phenomenon of participatory and social networks in a conceptual and historical perspective, and offering powerful tools for researching cultural phenomena overlooked by other approaches.

Librarians, Literacy and the Promotion of Gender Equity Lesley S.J. Farmer,2014-12-03 Today's youth have available an unprecedented array of information and media, and today's literacy must extend well beyond decoding the printed page. As the keepers of information, how do librarians help boys and girls separate relevant from irrelevant, important from unimportant, helpful from harmful? How can librarians help students become self-sufficient learners? This book addresses today's need for literacies in technology, reading, information, and numbers, as well as visual, aural, and media literacy. With thorough consideration of the latest research, it focuses on how gender affects the way these literacies are learned, experienced, and used. Exercises are recommended to help students of both genders become effective learners and managers of their environment. After delving into issues of gender, such as differences and similarities in the way boys and girls learn, discussion concentrates on how librarians and other educators can design learning activities with gender and technology issues in mind. Individual chapters deal with each type of literacy, and the concluding chapter discusses the interdependence of all. This book demonstrates that the era of "one size fits all" literacy is behind us, and argues for the library as an optimal learning environment for exploring literacies holistically.

Nuclear Energy Safety and International Cooperation Spencer Barrett Meredith, III,2014-07-11 Twenty-five years after the Chernobyl explosion, disaster struck once again after a tsunami overwhelmed the considerable safety measures at the Fukushima nuclear power plant in Japan. However, Fukushima had in place a solid containment structure to reduce the spread of radiation in the event of a worst-case scenario; Chernobyl did not. These two incidents highlight the importance of such safety measures, which were critically lacking in an entire class of Soviet-designed reactors. This book examines why five countries operating these dangerous reactors first signed international agreements to close them within a few years, then instead delayed for almost two decades. It looks at how political decision makers weighed the enormous short-term costs of closing those reactors against the long-term benefits of compliance, and how the political instability that dominated post-Communist transitions impacted their choices. The book questions the efficacy of Western governments' efforts to convince their Eastern counterparts of the dangers they faced, and establishes a causal relationship between political stability and compliance behavior. This model will also enable more effective assistance policies in similar situations of political change where decision makers face considerable short-term costs to gain greater future rewards. This book provides a valuable resource for postgraduate students, academics and policy makers in the fields of nuclear safety, international agreements, and democratization.

Garden Plots Shelley Saguaro,2006 Focusing on a range of twentieth-century texts and including relevant twenty-first century writing, *Garden Plots* explores the ways in which gardens in fiction represent more than just a familiar theme. Bound up with wider aesthetic and ideological issues, gardens, like literary forms, are subject to transformations. The term 'plots' is a keyword in this approach. It refers to garden plots, literary plots, and more generally, the plotting that is political, polemical, and subversive. Each of the six chapters includes four texts that are familiar and representative. Authors include Virginia Woolf, Eudora Welty, Carol Shields, J. M. Coetzee, Toni Morrison, Leslie Marmon Silko, Jamaica Kincaid, and Philip K. Dick.

The author accuses the Chinese state of settler colonialism and argues for East Turkistan's sovereignty on the basis of international law and the Genocide Convention.

The Life List of Adrian Mandrick Chris White,2018-04-17 "With a birder's eye for detail, White takes us on [Adrian Mandrick's] painful, near death descent...[her] life-affirming conclusion reminds us that endangered species aren't the only ones that need to change and adapt in order to survive."—The New York Times Book Review *H Is for Hawk* meets *Grief Is the Thing with Feathers* in this evocative debut novel about a pill-popping anesthesiologist and avid birder who embarks on a quest to find one of the world's rarest species, allowing nothing to get in his way—until he's forced to confront his obsessions and what they've cost him. Adrian Mandrick seems to have his life in perfect order with an excellent job in a Colorado hospital, a wife and two young children he loves deeply, and a serious passion for birding. His life list comprises 863 species correctly identified and cataloged—it is, in fact, the third

longest list in the North American region. But Adrian holds dark secrets about his childhood—secrets that threaten to consume him after he’s contacted by his estranged mother, and subsequently relapses into an addiction to painkillers. In the midst of his downward spiral, the legendary birder with the region’s second-longest life list dies suddenly, and Adrian receives an anonymous tip that could propel him to the very top: the extremely rare Ivory-billed Woodpecker, spotted deep in the swamplands of Florida’s Panhandle. Combining sharp, elegant prose with environmental adventure, The Life List of Adrian Mandrick is a poignant, engaging story that heralds the arrival of a new literary talent.

Adrian Frutiger – Typefaces Heidrun Osterer,Philipp Stamm,Swiss Foundation Type and Typography,2009-01-01 The international creation of typefaces after 1950 was decisively influenced by the Swiss type designer Adrian Frutiger. His Univers typeface and the machine-readable font OCR-B, which was adopted as an ISO standard, are milestones, as is his type for the Paris airports, which set new standards for signage types and evolved into the Frutiger typeface. With his corporate types, he helped to define the public profiles of companies such as the Japanese Shiseido line of cosmetics. In all he created some fifty types, including Ondine, Méridien, Avenir, and Vectora. Based on conversations with Frutiger himself and on extensive research in France, England, Germany, and Switzerland, this publication provides a highly detailed and accurate account of the type designer’s artistic development. For the first time, all of his types – from the design phase to the marketing stage – are illustrated and analyzed with reference to the technology and related types. Hitherto unpublished types that were never realized and more than one hundred logos complete the picture.
