Applications of Agent Technology in Traffic and Transportation Franziska Klügl, Ana Bazzan, Sascha Ossowski, 2006-03-30 Building effective and user-friendly transportation systems is one of the big challenges for engineers in the 21st century. There is an increasing need to understand, model, and govern such systems at both, the individual and the society level. Traffic and transportation scenarios are extraordinarily appealing for Distributed Artificial Intelligence, and (multi-)agent technology in particular. This book gives an overview of recent advances in agent-based transportation systems.

*Small-Scale Terrorist Attacks Using Chemical and Biological (C/B) Agents* Dana A. Shea, 2011-08 Presents a means of assessing the relative threat from terrorist-use of individual chemical, biological, and toxin agents. It focuses on small-scale, targeted C/B attacks, rather than mass-casualty attacks. The framework considers the elements of access, public health impact, medical treatment, prophylaxis, and dissemination. Other factors that may affect potential use by terrorists include the range of lethality, covert employment of an agent, and the availability of dual-use technol. Contents: Intro.; Background: Definition of C/B Terrorism; Probability of a C/B Weapon Attack; Historical Acquisition and Use of C/B Agents; C/B Assessments; Agent Analysis; Terrorist Motivation-Specific Factors; Policy Issues; Conclusions. Illus. This is a print on demand report.

*The Confidential Agent* Graham Greene, 2010-10-02 WITH A NEW INTRODUCTION BY IAN RANKIN 'In a class by himself...the ultimate chronicler of twentieth-century man's consciousness and anxiety' William Golding In a small continental country civil war is raging. Once a lecturer in medieval French, now a government agent, D is a scarred stranger in England, sent on a mission to buy coal at any price. Initially, this seems to be a matter of straightforward negotiation, but soon, implicated in murder, accused of possessing false documents and theft, held responsible for the death of a young woman, D becomes a hunted man, tormented by allegiances, doubts and love.

**Declarative Agent Languages and Technologies II** João Leite, Andrea Omicini, Paolo Torroni, Pinar Yolum, 2005-06-16 The second edition of the workshop on Declarative Agent Languages and Technologies (DALT 2004) was held July 2004 in New York City, and was a great success. We saw a significant increase in both the number of submitted papers and workshop attendees from the first meeting, held July 2003 in Melbourne. Nearly 40 research groups worldwide were motivated to contribute to this event by submitting their most recent research achievements, covering a wide variety of the topics listed in the call for papers. More than 30 top researchers agreed to join the Program Committee, which then collectively faced the hard task of selecting the one-day event program. The fact that research in multi-agent systems is no longer only a novel and promising research horizon at dawn is, in our opinion, the main reason behind DALT's (still short) success story. On the one hand, agent theories and applications are mature enough to model complex domains and scenarios, and to successfully address a wide range of multifaceted problems, thus creating the urge to make the best use of this expressive and versatile paradigm, and also profit from all the important results achieved so far. On the other hand, building multi-agent systems still calls for models and technologies that could ensure system predictability, accommodate flexibility, heterogeneity and openness, and enable system verification.

**Spatial Information Theory: Foundations of Geographic Information Science** Daniel R. Montello, 2003-06-30 The 5th International Conference on Spatial Information Theory, COSIT 2001, took place at the Inn at Morro Bay, California, USA, September 19-23, 2001. COSIT grew out of a series of workshops/NATO Advanced Study Institutes/NSF Specialist Meetings during the 1990s concerned with theoretical and applied aspects of representing large scale space, particularly geographic or environmental space (this history is elaborated in the prefaces of previous COSIT proceedings). These are spaces in which (and on which) human action takes place, and which are represented and processed in digital geographic information systems. In these early meetings, the need for well founded theories of spatial information representation and processing was identified, particularly theories based on cognition and on computation. This concern for theory provided an early foundation for the newly emerging field of geographic information science. COSIT is not backed by any particular scientific society but is organized as an independent enterprise. The conference series was established in 1993 as an interdisciplinary biennial European conference on the representation and processing of large scale spatial information after a successful international conference on the topic had been organized by Andrew Frank et al. in Pisa in 1992 (frequently referred to as COSIT 0). After two successful European COSIT conferences with strong North American participation (COSIT '93: Island of Elba, Italy; COSIT '95: Semmering, Austria), COSIT '97 moved across the pond to the United States, and was held in the Laurel Highlands, Pennsylvania.

**Iran's Strategic Weapons Programmes** Gary Samore, 2013-08-06 The possibility that Iran will acquire a nuclear weapons capability poses a significant threat to the stability of the Middle East and a potential challenge to the long-term viability of the nuclear non-proliferation regime. Since 2003, diplomatic efforts by the EU-3 (United Kingdom, France and Germany) have succeeded in suspending the sensitive aspects of Iran's nuclear programme, but prospects for reaching a permanent agreement with the Iranian government are uncertain. If the EU-3 effort collapses, a number of policy options will be given more serious consideration, including sanctions, containment, regime change and military action. This IISS 'Strategic Dossier' on Iran's strategic weapons programmes provides an objective technical assessment of Iran's nuclear, chemical, and biological weapons capabilities, as well as its ballistic missile programme. The dossier evaluates what is known and what is not known about these capabilities and projects potential future developments. In addition, the dossier provides a history of democratic efforts over the last three decades, to prevent Iran from acquiring a nuclear weapons capability and examines different options for current diplomatic efforts. Each chapter has been written and reviewed by recognised international experts in their respective fields. The IISS does not advocate any particular policy option for dealing with the Iranian nuclear issue. The objective of Iran's Strategic Weapons Programmes: A Net Assessment is to assess, as accurately and dispassionately as possible, Iran's capabilities and evaluate the pros and cons of different policy options in the order to foster a well-informed policy debate.

**Strategic Terror** Beau Grosscup, 2006-05-05 'Beau Grosscup shows that aerial bombardment, which was used many years ago as a means of terrorizing native populations in Africa and the Middle East, has become the primary form of terrorism in more recent decades. As he indicates, 'strategic terror' is not classed as 'terrorism' in the West, but this reflects political power and a resultant politicization of word usage, and an unwillingness to confront the human costs and immorality of aerial bombardment. Beau Grosscup's Strategic Terror is a major and much needed addition to the literature on terrorism'. - Edward S. Herman (author of The Real Terror Network and co-author of The Terrorism Industry). 'Strategic Terror is a must read for these highly militarized times. Grosscup shows us that the present day use of indiscriminate bombing with its high casualty rates among civilians has a long troubling history. He puts the 'Shock and Awe' strategy of the Iraq war in a context of past colonial and imperial 'othering' and convincingly documents how the present 'war on terror' is really a war of U.S. terrorism.' - Zillah Eisenstein, (author of Hatreds,

Sexualized and Racialized Conflicts of the 21st Century; Global Obscenities; and Against Empire, Feminisms, Racism and the West).
