**The World as a Global Agora** Soumia Boutkhal,Larbi Touaf,2009-03-26 In the current postmodern reality where society is no longer viewed as a totality but as a collection of individual interests, public space both as a physical and symbolic space, has no determined contours and the public sphere is likely to take new forms. Yet as a crucial principle of democracy, public space will continue to feed discussions as long as models of participatory democracy represent the guarantor of good governance and the preservation of the public good. Ranging from architecture, sociology, to literary criticism and women and gender studies, the essays that compose this collection have as a common denominator the idea of public space as a vital aspect of public life in modern as well as in developing and traditional societies. Placing themselves beyond the relentless theoretical debates around the concept of public space, the authors agree that no matter what forms it takes, public space remains a fundamental aspect of even those societies that until recently were viewed as hermetically sealed. What emerges from the different perspectives included in this book is a general consensus that the symbolic value of the physical public space is grounded in the collective socio-political consciousness as the basis for a general sense of civic action.

**The Agora Bone Well** Maria A. Liston,Susan I. Rotroff,Lynn M. Snyder,2018-12-31 Even though Dorothy Thompson excavated the Agora Bone Well in 1938, the well and its remarkable finds have never been fully studied until now. Located outside the northwest corner of the Athenian Agora and dating to the second quarter of the 2nd century B.C., the well contained the remains of roughly 460 newborn infants, as well as a few older individuals. Also found in the well were the bones of over 150 dogs and an assortment of other animals, plus various artifacts, including an intriguing herm (treated here by Andrew Stewart) and an ivory chape. In addition to a thorough examination of the contents of the well, the authors provide a thoughtful analysis of the neighborhood in which the well was located and carefully compare the deposit with similar accumulations found elsewhere in the Mediterranean. The product of close cooperation between archaeological, palaeoanthropological, and faunal scholars, this interdisciplinary work will be of interest to a large audience across a variety of fields.

**Agora VIII** European Centre for the Development of Vocational Training,Agora Thessalonikis (Program),2002 The term Jobrotation has a specific meaning: it designates a measure, a technique and a sophisticated tool for investing in human capital. Jobrotation initiates transference between work and training. The idea is, firstly, to make it possible for employees to leave their jobs temporarily in order to be trained, without this causing any major break in production. Secondly, somebody from outside the firm replaces the employee who is receiving training, in such a way that the number of employees in the firm remains unchanged and the replacement workers are operational immediately. Thirdly, when employees return from their training, their enterprise benefits from their increased efficiency; at the same time, their replacements have acquired a new skill. Finally, the latter may have acquired an established position in the enterprise, or alternatively can replace another employee who is in turn going away for training, and so on.

**A Sanctuary in the Hora of Illyrian Apollonia** Jack L. Davis,Iris Pojani,Sharon R. Stocker,2022-06-01 In the years 2004-2006, a joint team from the International Centre for Albanian Archaeology in Tirana, Albania, the Institute of Archaeology in Tirana, and the University of Cincinnati conducted excavations in the plain west of the walls of the ancient Greek colony of Apollonia, a short distance to the southwest of the modern village of Pojan. The site lies almost entirely within a complex of farm buildings known locally as Bonjaket. This volume represents the full publication of the results of three campaigns of excavation at the site. The new excavations discovered and documented a previously unknown monumental temple and have made it possible to describe for the first time the material remains of Greek rituals as practiced at the time of, or not long after, the foundation of Apollonia. **Agora V** European Centre for the Development of Vocational Training,2002 This Agora allowed us to advance the notion of recognising learning. One of its main conclusions is that we need to lift the processes and practices linked to the identification, assessment and recognition of non-formal learning out of the usual school-based mould. Only then will these practices be able effectively to stimulate and promote general and vocational training at any age, serving both individuals and society at large.

**The Business Of Media: Change And Challenges** Mónica Herrero,Steve Wildman,2021-05-30 Advancement of the state of scholarship on media management is a three-pronged process. The body of knowledge on which media executives and managers can draw grows as: (1) core concepts and analytical frameworks are refined, augmented and occasionally supplemented or replaced by new ideas that better explain the roles of media in their larger economic and societal contexts; (2) Rigorous empirical analysis probes the limitations of current understanding and raises new questions; and (3) Grounded case studies extract knowledge through theoretically informed observation of situations and processes that are too complex and multi-faceted for more tightly controlled statistical analyses but still are too rich in their potential to contribute to knowledge to ignore. All three prongs are represented in this edited volume, which draws on the best of the new research and thinking showcased at the Annual Conference of the International Media Management Academic Association held during October 24-25, 2014 in Pamplona, Spain. The book's 10 chapters are organized into three main sections that move, respectively, from a high level focus on core principals and fundamental challenges to effective management, to more narrowly focused research (but with generalizable findings) on solutions to concrete and specific problems faced by media firms trying to improve their results from the services and products they offer, to case studies of market-level change in three very different political and economic environments. The remainder of this brief introduction was written as a guide to the research and findings presented in these sections.

**New Tools and New Tests in Comparative Political Economy** ,2000 Some say that democracy is more likely to survive under parliamentary governments. That result is not robust to the use of different variables from the Database of Political Institutions, a large new cross-country database that may illuminate many other issues affecting and affected by political institutions--Cover.

**Training and Practice for Modern Day Archaeologists** John H. Jameson,James Eogan,2012-12-09 In recent years, an important and encouraging development in the practice of archaeology and historical preservation has been the markedly increased number of collaborations among archaeologists, educators, preservation planners, and government managers to explore new approaches to archaeological and heritage education and training to accommodate globalization and the realities of the 21st century worldwide. But what is the collective experience of archaeologists and cultural heritage specialists in these arenas? Should we be encouraged, or discouraged, by national and international trends? In an attempt to answer these questions, this volume examines and gives representational examples of the respective approaches and roles of government, universities, and the private sector in meeting the educational/training needs and challenges of practicing archaeologists today.

**The World Disorder** Luiz Alberto Moniz Bandeira,2019-01-23 This book offers a historical analysis of the geopolitical and geoeconomic competition between the USA and Russia, which has recently heated up again due to the eastward expansion of NATO. The analysis departs from an exploration of the USA's foreign policy and geopolitical ambitions by illustrating the influence of Wall Street and the military-industrial complex on the country's political decision-making. The historical review covers a wide timespan, from the Second World War and the birth of NATO, to the wars against Iraq and Afghanistan, to the rebellions that erupted in Eurasia, Northern Africa and the Middle East in the 2010's, as well as the wars in the Ukraine and in Syria. By doing so, it reveals the influence of US neocons, the US intelligence services and the military complex on the Arab Spring,

the Color Revolutions and the armed conflicts in Ukraine and Syria. Ultimately, the book depicts a new era of worldwide instability and disorder, dominated by violence and arbitrariness.

**Exporting Culture** Raphaëla Henze,Gernot Wolfram,2014-01-03 Is European culture visible enough in the globalized world? Why is culture from this continent often perceived as ‘old-fashioned’ or even worse as ‘out-dated’? Is the export of national cultural products and services – in most European countries subsidized by the taxpayer – no longer relevant, or more relevant than ever before? Is it a huge waste of money, time, and effort or an attempt to create another form of globalization? Culture – in its broadest sense – is often viewed and accepted in ways that differ completely from those of other internationally traded goods. This might be one of the reasons why so many institutions, foundations and cooperations invest time, power, and money in cultural projects. Is this an exaggerated approach or an intelligent recognition of the genuine values of the 21st century – creativity and cultural sensitivity? These and several other questions concerning the export of culture are addressed by authors from different countries in order to initiate a debate about the role European cultural products and services are able to play globally.
