**Immunity to Parasitic Infection** Tracey Lamb,2012-08-10 Parasitic infections remain a significant cause of morbidity and mortality in the world today. Often endemic in developing countries many parasitic diseases are neglected in terms of research funding and much remains to be understood about parasites and the interactions they have with the immune system. This book examines current knowledge about immune responses to parasitic infections affecting humans, including interactions that occur during co-infections, and how immune responses may be manipulated to develop therapeutic interventions against parasitic infection. For easy reference, the most commonly studied parasites are examined in individual chapters written by investigators at the forefront of their field. An overview of the immune system, as well as introductions to protozoan and helminth parasites, is included to guide background reading. A historical perspective of the field of immunoparasitology acknowledges the contributions of investigators who have been instrumental in developing this field of research.

**The Vaccine Court** Wayne Rohde,2014-11-11 A hard look at the National Vaccine Injury Compensation Program and the families desperately trying to navigate their way through it. The Vaccine Court looks at the mysterious and often unknown world of the National Vaccine Injury Compensation Program (NVICP), the only recourse for seeking compensation for those who have been injured by a vaccine. The NVICP, better known as the "Vaccine Court," however, is not without controversy. Established by Congress as a direct result of the passage of the National Childhood Vaccine Injury Act of 1986, the NVICP was supposed to offer a no-fault alternative to the traditional injury claims filed in state or federal courts and was to provide quick, efficient, and fair compensation for those who have been injured by vaccines. The reality, however, is that many cases take several years or longer to complete and require tremendous commitment from families already pushed to the brink of bankruptcy caring for the vaccine-injured family member, only to discover that the end result is manipulated by the government in defense of the US vaccine policy. Mr. Rohde looks into the inner workings of the US Federal Claims Court and the NVICP. He interviews families who have filed petitions and won compensation, families who have been denied compensation, and families still waiting for a decision. By highlighting the journeys of these families—their efforts to find attorneys willing to represent them, the filing of their petitions, and the subsequent mountain of paperwork, medical records, and other documents that span years—Mr. Rohde exposes the bitter truth behind the NVICP. Through his thoughtful interviews and fact-finding research, The Vaccine Court sheds light on how the NVICP has evolved into something far more treacherous than what Congress envisioned with the National Childhood Vaccine Injury Act in 1986.

*Growing Up Tobacco Free* Institute of Medicine,Committee on Preventing Nicotine Addiction in Children and Youths,1994-02-01 Tobacco use kills more people than any other addiction and we know that addiction starts in childhood and youth. We all agree that youths should not smoke, but how can this be accomplished? What prevention messages will they find compelling? What effect does tobacco advertisingâ€”more than \$10 million worth every dayâ€”have on youths? Can we responsibly and effectively restrict their access to tobacco products? These questions and more are addressed in *Growing Up Tobacco Free*, prepared by the Institute of Medicine to help everyone understand the troubling issues surrounding youths and tobacco use. *Growing Up Tobacco Free* provides a readable explanation of nicotine's effects and the process of addiction, and documents the search for an effective approach to preventing the use of cigarettes, chewing and spitting tobacco, and snuff by children and youths. It covers the results of recent initiatives to limit young people's access to tobacco and discusses approaches to controls or bans on tobacco sales, price sensitivity among adolescents, and arguments for and against taxation as a prevention strategy for tobacco use. The controversial area of tobacco advertising is thoroughly examined. With clear guidelines for public action, everyone can benefit by reading and acting on the messages in this comprehensive and compelling book.

**Antisense Drug Technology** Stanley T. Crooke,2007-07-25 Extensively revised and updated, *Antisense Drug Technology: Principles, Strategies, and Applications*, Second Edition reflects the logarithmic progress made in the past four years of oligonucleotide-based therapies, and, in particular, antisense therapeutics and research. Interpreting lessons learned from the clinical trials of first generati

**Boss Cox's Cincinnati** Zane L. Miller,2000 Miller carefully explores both the nature and the significance of bossism, showing how it and municipal reform were both essential components of the modern urban political system.

*Soviet Naval Forces and Nuclear Warfare* James J Tritten,Taylor & Francis Group,2020-11-07 Based on formal content analysis of the writings of Admiral Sergei G. Gorshkov and past Soviet ministers of defense and heads of the Politburo, James J. Tritten interprets what the Soviets say they will do in the event of nuclear war. He then constructs a hardware and exercise analysis of the strategic employment of the Soviet Navy in a nuclear war, offering three possible cases-the a bolt from the blue, with existing forces on patrol; full mobilization; and a plausible case of partial mobilization. In addition, Dr. Tritten examines, from a Soviet perspective,

concepts of deterrence, the strategic goals and missions of the fleet, nuclear targeting policy, the Sea Lines of Communication (SLOC) disruption mission, and the potential for tactical nuclear warfare limited to the sea. The author concludes by assessing the implications of Soviet politico-military planning for Western defense strategy and arms control.

*Neuronal Correlates of Empathy* Ksenia Z. Meyza,Ewelina Knapska,2018-03-21 Neuronal Correlates of Empathy: From Rodent to Human explores the neurobiology behind emotional contagion, compassionate behaviors and the similarities in rodents and human and non-human primates. The book provides clear and accessible information that avoids anthropomorphisms, reviews the latest research from the literature, and is essential reading for neuroscientists and others studying behavior, emotion and empathy impairments, both in basic research and preclinical studies. Though empathy is still considered by many to be a uniquely human trait, growing evidence suggests that it is present in other species, and that rodents, non-human primates, and humans share similarities. Examines the continuum of behavioral and neurobiological responses between rodents—including laboratory rodents and monogamic species—and humans Contains coverage of humans, non-human primates, and the emerging area of rodent studies Explores the possibility of an integrated neurocircuitry for empathy
