A Bomber Pilot's Story Robert P. Neilson, 2016-09-15 Flying a B-17 Flying Fortress with the Fifteenth Air Force out of Foggia, Italy, Lt. George H. Neilson describes the harrowing experiences of his twenty-eight combat missions as well as the ups and downs of life in the US Army Air Corps from enlistment to discharge (1943-45). Blending selections of his father's letters to home and memoirs he recorded a half century later with documented background history, the younger Neilson tells the saga of the son of a Boston widow as he confronts the rigors of pilot-officer training and combat service in the Mediterranean Theater of Operations during the final six months of World War II in Europe. George depicts the humorous and mundane sides of army life as well as the terror-filled moments during bomb runs over targets in Austria, Germany, Czechoslovakia, Poland, Yugoslavia, and Austria as anti-aircraft flak bursts battered the aircraft. Neilson's daily chronicles juxtapose moments when life and death hung in the balance, such as when he landed his crippled Fort in the Adriatic Sea, with the unexpected moments of splendor, such as when he dined in luxury on the Isle of Capri at a castle owned by the royal family of Italy. Flying in formation through clouds so thick that the plane thirty feet off his wing was invisible, George received the Distinguished Flying Cross for his ability as a skilled instrument pilot. He recounts youthful escapades on duty-free hours and the tales of life in Foggia's mud-bound tent city in the spur of Italy. It includes the stirring story of his visit to a field hospital where his brother, a captain in the infantry, was recovering from a bullet wound incurred in the fighting in the Apennine Mountain campaign. Finally, the story tells of World War II's fiery end and how he unknowingly worked on the secret research project to develop the atomic bomb in a lab at MIT before enlistment. For the student of history and aviation and its role in the Allied victory over Hitler's nefarious Reich, this microhistory will not disappoint.

*Memristor and Memristive Neural Networks* Alex James, 2018-04-04 This book covers a range of models, circuits and systems built with memristor devices and networks in applications to neural networks. It is divided into three parts: (1) Devices, (2) Models and (3) Applications. The resistive switching property is an important aspect of the memristors, and there are several designs of this discussed in this book, such as in metal oxide/organic semiconductor nonvolatile memories, nanoscale switching and degradation of resistive random access memory and graphene oxide-based memristor. The modelling of the memristors is required to ensure that the devices can be put to use and improve emerging application. In this book, various memristor models are discussed, from a mathematical framework to implementations in SPICE and Verilog, that will be useful for the practitioners and researchers to get a grounding on the topic. The applications of the memristor models in various neuromorphic networks are discussed covering various neural network models, implementations in A/D converter and hierarchical temporal memories.

Kennewick Man Douglas W. Owsley, Richard L. Jantz, 2014-09-10 Almost from the day of its accidental discovery along the banks of the Columbia River in Washington State in July 1996, the ancient skeleton of Kennewick Man has garnered significant attention from scientific and Native American communities as well as public media outlets. This volume represents a collaboration among physical and forensic anthropologists, archaeologists, geologists, and geochemists, among others, and presents the results of the scientific study of this remarkable find. Scholars address a range of topics, from basic aspects of osteological analysis to advanced research focused on Kennewick Man's origins and his relationships to other populations. Interdisciplinary studies, comprehensive data collection and preservation, and applications of technology are all critical to telling Kennewick Man's story. *Kennewick Man: The Scientific Investigation of an Ancient American Skeleton* is written for a discerning professional audience, yet the absorbing story of the remains, their discovery, their curation history, and the extensive amount of detail that skilled scientists have been able to glean from them will appeal to interested and informed general readers. These bones lay silent for nearly nine thousand years, but now, with the aid of dedicated researchers, they can speak about the life of one of the earliest human occupants of North America.

Gender and Sexuality in Indigenous North America, 1400-1850 Sandra Slater, Fay A. Yarbrough, 2022-11-10 Groundbreaking historical scholarship

on the complex attitudes toward gender and sexual roles in Native American culture, with a new preface and supplemental bibliography Prior to the arrival of Europeans in the New World, Native Americans across the continent had developed richly complex attitudes and forms of expression concerning gender and sexual roles. The role of the berdache, a man living as a woman or a woman living as a man in native societies, has received recent scholarly attention but represents just one of many such occurrences of alternative gender identification in these cultures. Editors Sandra Slater and Fay A. Yarbrough have brought together scholars who explore the historical implications of these variations in the meanings of gender, sexuality, and marriage among indigenous communities in North America. Essays that span from the colonial period through the nineteenth century illustrate how these aspects of Native American life were altered through interactions with Europeans. Organized chronologically, *Gender and Sexuality in Indigenous North America, 1400–1850* probes gender identification, labor roles, and political authority within Native American societies. The essays are linked by overarching examinations of how Europeans manipulated native ideas about gender for their own ends and how indigenous people responded to European attempts to impose gendered cultural practices at odds with established traditions. Many of the essays also address how indigenous people made meaning of gender and how these meanings developed over time within their own communities. Several contributors also consider sexual practice as a mode of cultural articulation, as well as a vehicle for the expression of gender roles. Representing groundbreaking scholarship in the field of Native American studies, these insightful discussions of gender, sexuality, and identity advance our understanding of cultural traditions and clashes that continue to resonate in native communities today as well as in the larger societies those communities exist within.

Alex Robert Lee,2017-09 Alex Rhodes' well-planned life was falling apart before his eyes. His relationship was over, and the blame could be placed solely on him. He tried to move on, but how could he? When every thought drifted back to Patrick, the love he couldn't forget. And school? Who could concentrate on classes? And homework assignments. He needed a break. Getting away from CSU for winter break would give him the time and distance he needed to figure everything out. Get his head on straight. And, hopefully, get his mind off Patrick. But like all of Alex's well-thought-out plans, nothing is ever easy for him. His family always threw a curveball into his life. And he was headed right back there. With his head a jumbled mess. Would he be able to survive time at home? Would he be able to move on from the mess he'd made with Patrick? Or would a revelation from his best friend change everything?

*Facing Global Environmental Change* Hans Günter Brauch,Navnita Chadha Behera,Patricia Kameri-Mbote,John Grin,Úrsula Oswald Spring,Béchir Chourou,Czeslaw Mesjasz,Heinz Krummenacher,2009-06-04 The year 2007 could perhaps accurately be described as the year when climate change

finally received the attention that this challenge deserves globally. Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth - sessment Report (AR4) of the Intergovernmental Panel on Climate Change (IPCC), which were disseminated on a large scale and reported extensively by the media. This was the result not only of a heightened interest on the part of the public on various aspects of climate change, but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large. The interest generated on the scientific realities of climate change was further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US, Al Gore. By taking this decision in favour of a leader who has done a great deal to create awareness on c- mate change, and a body that assesses all scientific aspects of climate change and disseminates the result of its findings, the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the world.

**Early Visions and Representations of America** M. Carmen Gomez-Galisteo,2012-11-22 When the Europeans first arrived in America, they had a number of preconceptions, prejudices, expectations and hopes about what life in the New World would be like. This book examines the different visions and representations of America conveyed in the writings of Spanish conquistador Álvaro Núñez Cabeza de Vaca and the Pilgrim leader William Bradford, taking both writers within their respective literary and historical contexts. Anthologies of American literature have consistently ignored Spanish-language achievements on the grounds of a restrictive interpretation of American literature based on linguistic boundaries. Consequently, Spanish-language texts such as Cabeza de Vaca's or the account by the Hidalgo de Elvas, to name but two examples, have been marginalized in the narrative of American literary history. In seeking to redress this neglect, Galisteo contributes to scholarship which seeks to analyze Early America as a whole, including not only Anglo American perspectives but also the Spanish American aspect of the colonization process.

**The Rise And Fall Of Singer Manufacturing In Britain** Alex Askaroff,2019-11-11 In 1851 Isaac Singer brought onto the market the first practical sewing machine in history. He had combined all the ideas that had gone before to make a machine that actually worked. The result was explosive. By the 1870's the humble sewing machine had become the most wanted item on the planet. Why? Because with it, anyone could pop down their local market on Saturday and wear a new dress to church on Sunday! Cheap material from the Northern Powerhouses, and the sewing machine, meant that beautiful clothes were no longer the sole domain of the upper classes. Here is the fascinating story of the rise and fall of Singer manufacturing in Britain, brought to you by world renowned author Alex Askaroff
