Nanoparticle Enhanced Radiation Therapy Erno Sajo, Piotr Zygmanski, 2020 Improved targeting of abnormal cells and tissue in the radiotherapy of cancer has been a long-standing goal of researchers. The central purpose in Nanoparticle-Enhanced Radiotherapy (NPRT) is to more precisely control where the radiation dose is delivered, desirably with subcellular precision, provided we can find a method to bring the nanoparticles to target and control their concentration and size distribution. The contents within this book will cover the rationale and fundamental principles of NPRT, optimal nanoparticle sizes, concentrations, design and fabrication, effective nanoparticle delivery methods, emerging clinical applications of NPRT modalities, treatment planning and quality assurance and the potential of NPRT in global health. This volume will serve as a resource for researchers, educators and industry, and as a practical guide or comprehensive reference for students, research trainees and others working in cancer nanomedicine. Part of IOP Series in Global Health and Radiation Oncology.

Hollywood – a Challenge for the Soviet Cinema Franz, Norbert P., 2020 This book features four essays that illuminate the relationship between American and Soviet film cultures in the 20th century. The first essay emphasizes the structural similarities and dissimilarities of the two cultures. Both wanted to reach the masses. However, the goal in Hollywood was to entertain (and

educate a little) and in Moscow to educate (and entertain a little). Some films in the Soviet Union as well as in the United States were conceived as clear competition to one another – as the second essay demonstrates – and the ideological opponent was not shown from its most advantageous side. The third essay shows how, in the 1980s, the different film cultures made it difficult for the Soviet director Andrei Konchalovsky to establish himself in the US, but nevertheless allowed him to succeed. In the 1960s, a genre became popular that tells the story of the Russian Civil War using stylistic features of the Western: *The Eastern*. Its rise and decline are analyzed in the fourth essay.

Nanoparticle-Aided Radiotherapy Erno Prof. Sajo, Piotr Zygmanski, 2020-11-12 Improved targeting of abnormal cells and tissue in the radiotherapy of cancer has been a long-standing goal of researchers. The central purpose of nanoparticle-enhanced radiotherapy (NPRT) is to more precisely control where the radiation dose is delivered, desirably with subcellular precision, provided we can find a method to bring the nanoparticles to target as well as control their concentration and size distribution. The contents within this book will cover the rationale and fundamental principles of NPRT, optimal nanoparticle sizes, concentrations, design and fabrication, effective nanoparticle delivery methods, emerging clinical applications of NRT modalities, treatment planning and quality assurance and the potential of NPRT in global health. Chemical Carcinogenesis Trevor M. Penning, 2011-03-03 This volume will provide a contemporary account of advances in chemical carcinogenesis. It will promote the view that it is chemical alteration of the DNA that is a root cause of many cancers. The multi-stage model of chemical carcinogenesis, exposure to major classes of human carcinogens and their mode-of-action will be a focal point. The balance between metabolic activation to form biological reactive intermediates and their detoxification, ensuing DNA-lesions and their repair will be profiled. It will describe the chemical changes that occur in DNA that result from endogenous insults including epigenetic changes that lead to gene silencing. It will describe major mechanisms of mutagenesis, effects on tumor suppressor genes and proto-oncogenes, and how cell-cycle check points can be by-passed by the stealth-like properties of chemical carcinogens. Environmental agents that can promote tumor formation will be discussed. The monograph will have wide appeal as a knowledge base for graduate students, post-doctoral fellows and faculty interested in this aspect of cancer causation and research.
