**Valuing Health for Regulatory Cost-Effectiveness Analysis** Institute of Medicine,Board on Health Care Services,Committee to Evaluate Measures of Health Benefits for Environmental, Health, and Safety Regulation,2006-04-28 Promoting human health and safety by reducing exposures to risks and harms through regulatory interventions is among the most important responsibilities of the government. Such efforts encompass a wide array of activities in many different contexts: improving air and water quality; safeguarding the food supply; reducing the risk of injury on the job, in transportation, and from consumer products; and minimizing exposure to toxic chemicals. Estimating the magnitude of the expected health and longevity benefits and reductions in mortality, morbidity, and injury risks helps policy makers decide whether particular interventions merit the expected costs associated with achieving these benefits and inform their choices among alternative strategies. Valuing Health for Regulatory Cost-Effectiveness Analysis provides useful recommendations for how to measure health-related quality-of-life impacts for diverse public health, safety, and environmental regulations. Public decision makers, regulatory analysts, scholars, and students in the field will find this an essential review text. It will become a standard reference for all government agencies and those consultants and contractors who support the work of regulatory programs.

**Using Cost-Effectiveness Analysis to Improve Health Care** Peter J. Neumann,2004-10-28 As health costs in the U.S. soar past \$1.5 trillion, much evidence indicates that the nation does not get good value for its money. It is widely agreed that we could do better by using cost-effective analysis (CEA) to help determine which health care services are most worthwhile. American policy makers, however, have largely avoided using CEA, and researchers have devoted little attention to understanding why this is so. By considering the economic, social, legal, and ethical factors that contribute to the situation, and how they can be negotiated in the future, this book offers a unique perspective. It traces the roots of EA in health and medicine, describes its promise for rational resource allocation, and discusses the nature of the opposition to it, using Medicare and the Oregon health plans as examples. In exploring the disconnection between the promise of CEA and the persistent failure of rational intentions, the book seeks to find common ground and practical solutions. It analyzes the prospects for change and presents a roadmap for getting there. It offers pragmatic advice for cost-effectiveness analysts, discussing ways in which they can better translate their research findings into the basis for action. The book also offers advice for policy makers and politicians, including lessons from Europe, Canada, and Australia, and underlines the need for leadership to establish the conditions for change.

Destiny in Rome Frances Carfi Matranga,1979

**The Moments We Stand** Ashlee Birk,Kathy Campbell,2014-07-30 My name is Ashlee. I am a victim of murder. Through a series of events and by two shots of a gun, I was made a widow at the age of 28, with my youngest child just six weeks old. I am a victim of infidelity. I have felt unlovable. I have felt rejected. I have had days in my life when I wasn't sure if I would ever take a breath again, let alone be able to raise my five children by myself. I have lived in fear. I have felt much heartache. I have felt truly broken to my core. I have carried some heavy burdens...not only of my own, but burdens put upon my shoulders by the death of my husband. I have felt alone. I have felt humiliated. I have been humbled to my knees. I have searched my soul to find my worth in this world, and in the life that was left for me. My world has been totally shattered. I have faced realities I never knew were possible, and found strength within myself to keep up the fight and live every day as if it was on purpose. I have been carried by Angels...both earthly beings and those unseen. I have found that being a victim doesn't mean we have an excuse to stop living. Being a victim means finding a reason for seeking a higher road. I have picked up the pieces left and carried on. I am a mother. We are survivors. In one way or another, we are all victims. There are times in our lives when we are forced to question who we are at our core. When we are presented with a path...we can go this way or we can choose that way. For some, this moment comes when the one person whom we love the most decides we are not enough. This person leave us-at a most vulnerable moment-alone to search within ourselves for who we really are. We are left trying to find who it is that was left behind. Sometimes the person we love dies. Sometimes it is merely an internal battle we are facing...all alone inside our minds. Whatever the situation and wherever you have been...you have been hurt. You have felt alone. You have been abandoned, either by your parents, your lover, your friends, complete strangers, or even yourself. We have all been at that crossroad where all we have left is ourselves. Sometimes these moments of lows have brought you to your knees and caused you to reflect and ponder your relationship with God...and other times they have made you question if He is even there, or if He knows you are alone. Whatever that moment has been for you, it is personal and real. It has defined and refined who you are, who you think you were, and who you want to become. This is my story...the defining moments that have truly brought me to my knees, the times when I've questioned to my core my very existence, and the experiences I've had that have shown me who I really am and who my Heavenly Father still needs me to become. The night of my husband's death was my darkest hour, but also the very moment when I saw firsthand that my Heavenly Father sent Angels on errands for me. He carried me. It was the hour when all my fears and all the pain of this world collided together and He was there...putting back together all the pieces, one step at a time.

This guide provides a set of tools that have been developed and tested in field projects, with particular reference to disaster-prone areas and vulnerable sectors and population groups.-- Publisher's description.

The Origins of Writing Wayne M. Senner, 1991-01-01 This collection of 12 essays outlines what is now known about the origins and development of writing. The topics discussed include such precursors to writing as the tokens used for record-keeping in the Middle East, as well as cuneiform and Egyptian hieroglyphics. The alphabet is treated from its invention to its use in Arabic, Greek and Latin. Also presented are the writing systems of China and Middle America and two European systems, runes and ogham, that have been superseded by the Latin alphabet. An introduction surveys the subject and explores myths and theories on the invention of writing.
