Indian Muslim(s) after Liberalization Maidul Islam, 2018-12-13 Close to the turn of the century and almost 45 years after Independence, India opened its doors to free-market liberalization. Although meant as the promise to a better economic tomorrow, three decades later, many feel betrayed by the economic changes ushered in by this new financial era. Here is a book that probes whether India's economic reforms have aided the development of Indian Muslims who have historically been denied the fruits of economic development. Maidul Islam points out that in current political discourse, the 'Muslim question' in India is not articulated in terms of demands for equity. Instead, the political leadership camouflages real issues of backwardness, prejudice, and social exclusion with the rhetoric of identity and security. Historically informed, empirically grounded, and with robust analytical rigour, the book tries to explore connections between multiple forms of Muslim marginalization, the socio-economic realities facing the community, and the formation of modern Muslim identity in the country. At a time when post-liberalization economic policies have created economic inequality and joblessness for significant sections of the population including Muslims, the book proposes working towards a radical democratic deepening in India.

A Story of Ambivalent Modernization in Bangladesh and West Bengal Pranab Chatterjee, 2010 This book details the evolution of Bengali culture (in both Bangladesh and West Bengal) since

antiquity and argues for its modernization. Originally peripheral to Hindu civilization based in North India, Bengali culture was subjected to various forms of Sanskritization. Centuries of invasions (1204-1757) resulted most notably in the Islamization of Bengal. Often there were conflicts between Sanskritization and Islamization. Later colonization of Bengal by Britain (1757) led to a process of Anglicization, which created a new middle class in Bengal that, in turn, created a form of elitism among the Bengali Hindu upper caste. After British rule ended (1947), Bengali culture lost its elitist status in South Asia and has undergone severe marginalization. Political instability and economic insufficiency, as reflected by many quantitative and qualitative indicators, are common and contribute to pervasive unemployment, alienation, vigilantism, and instability in the entire region. A Story of Ambivalent Modernization in Bangladesh and West Bengal is appropriate not only for Bengali intellectuals and scholars but for sociologists, political scientists, cultural anthropologists, historians, and others interested in a case study of how and why a given culture becomes derailed from its path toward modernization.

Print and the Urdu Public Megan Eaton

Robb, 2020-10-19 In early twentieth century British India, prior to the arrival of digital medias and after the rise of nationalist political movements, a small-town paper from the margins of society became a key player in Urdu journalism. Published in the isolated market town of Bijnor, Madinah

grew to hold influence across North India and the Punjab while navigating complex issues of religious and political identity. In *Print and the Urdu Public*, Megan Robb uses the previously unexamined perspective of the Madinah to consider Urdu print publics and urban life in South Asia. Through a discursive and material analysis of Madinah, the book explores how Muslims who had settled in ancestral qasbahs, or small towns, used newspapers to facilitate a new public consciousness. The book demonstrates how Madinah connected the Urdu newspaper conversation both explicitly and implicitly with Muslim identity and delineated the boundaries of a Muslim public conversation in a way that emphasized rootedness to local politics and small urban spaces. The case study of this influential but understudied newspaper reveals how a network of journalists with substantial ties to qasbahs produced a discourse self-consciously alternative to the Western-influenced, secularized cities. Megan Robb augments the analysis with evidence from contemporary Urdu, English, and Hindi papers, government records, private diaries, private library holdings, ethnographic interviews, and training materials for newspaper printers. This thoroughly researched volume recovers the erasure of qasbah voices and proclaims the importance of space and time in definitions of the public sphere in South Asia. *Print and the Urdu Public* demonstrates how an Urdu newspaper published from the margins became central to the Muslim public constituted in the first half of the twentieth century.

Private Law, Public Law, Metalaw and Public Policy in Space Patricia Margaret Sterns, Leslie I. Tennen, 2016-05-10 The law of outer space is rapidly evolving to adapt to changes in the economic drivers as well as advancements in technological capabilities. The contents of this book are a reflection of this changing environment as evidenced in the writings of the second and third generations of space lawyers. Theoretical aspects of space law are explored by chapters relating to fundamental concepts central to the corpus juris spatialis. Practical aspects of space law are probed by examinations into international and domestic regulation of commercial activities, with particular emphasis on African, Asian, and European perspectives. International policy considerations are scrutinized in relation to military uses of outer space. The scientific Search for Extraterrestrial Intelligence (SETI) is the subject of a concise history of the discipline vis-a-vis the role of the SETI Permanent Committee of the International Academy of Astronautics

(IAA), and also of a study of the policy and other ramifications of social media in the event of the discovery of intelligent extraterrestrial beings. The book concludes with the republication of the seminal and highly influential Relations With Alien Intelligences The Scientific Basis of Metalaw by Dr. Ernst Fasan, first published in 1970. Scholar, author, and attorney Ernst Fasan was among the original space lawyers, a small, pioneering group of visionaries who recognized that the movement of man into space must be accomplished without the shackles of history and in an environment free from the threat of the use of space as an instrument of armed aggression. The influence of Dr. Fasan has extended beyond the international legal community to the broader scientific community, especially to the field of astrobiology, as he pursued groundbreaking investigations into what could be the ultimate in legal relationships - metalaw - the interaction of sentient beings from different planets. The contributors to this Liber Amicorum are among those who can trace their own work to the foundations of space law placed in part by Ernst Fasan.

The Rise of the Indian Navy Harsh V.

Pant, 2016-03-03 The Indian Navy has gradually emerged as an indispensable tool of Indian diplomacy in recent years, making it imperative for Indian policy-makers and naval thinkers to think anew the role of the nation's naval forces in Indian strategy. There is a long tradition in India of viewing the maritime dimension of security as central to the nation's strategic

priorities. With India's economic rise, India is trying to bring that focus back, making its navy integral to national grand strategy. This volume is the first full-length examination of the myriad issues that have emerged out of the recent rise of Indian naval power.

The Eternal Revolution Hamad Albloshi, 2016-04-27
More than three decades have passed since the establishment of the Islamic Republic of Iran in 1979. In that time, theories of modern revolution would suggest a retreat from ideological goals, heralding a phase of institutional development. However, Hamad Albloshi argues that Iran is unique: the current rhetoric of conservative Iranian leaders implies the regime has not left its revolutionary stage. Through an examination of the hardline conservative ideology in Iran-personified by the former president, Mahmoud Ahmadinejad-this book explores how the usual development seen in revolutions from radical discourse to pragmatic rhetoric has not been the case in Iran. Albloshi explores the evolution of the hardline conservatives and their main ideas about the nature of the Iranian regime, their position toward other groups within the system, and their approach to the international community. By doing so, he sheds new light on the group's position in the country and the ideological roots of major shifts that occurred in Iran's internal and external policies in the period between 2005 and 2013.

Amnesty, Human Rights and Political Transitions
Louise Mallinder, 2008-09-10 Amnesty laws are

political tools used since ancient times by states wishing to quell dissent, introduce reforms, or achieve peaceful relationships with their enemies. In recent years, they have become contentious due to a perception that they violate international law, particularly the rights of victims, and contribute to further violence. This view is disputed by political negotiators who often argue that amnesty is a necessary price to pay in order to achieve a stable, peaceful, and equitable system of government. This book aims to investigate whether an amnesty necessarily entails a violation of a state's international obligations, or whether an amnesty, accompanied by alternative justice mechanisms, can in fact contribute positively to both peace and justice. This study began by constructing an extensive Amnesty Law Database that contains information on 506 amnesty processes in 130 countries introduced since the Second World War. The database and chapter structure were designed to correspond with the key aspects of an amnesty: why it was introduced, who benefited from its protection, which crimes it covered, and whether it was conditional. In assessing conditional amnesties, related transitional justice processes such as selective prosecutions, truth commissions, community-based justice mechanisms, lustration, and reparations programmes were considered. Subsequently, the jurisprudence relating to amnesty from national courts, international tribunals, and courts in third states was addressed. The information gathered revealed considerable disparity in state practice relating

to amnesties, with some aiming to provide victims with a remedy, and others seeking to create complete impunity for perpetrators. To date, few legal trends relating to amnesty laws are emerging, although it appears that amnesties offering blanket, unconditional immunity for state agents have declined. Overall, amnesties have increased in popularity since the 1990s and consequently, rather than trying to dissuade states from using this tool of transitional justice, this book argues that international actors should instead work to limit the more negative forms of amnesty by encouraging states to make them conditional and to introduce complementary programmes to repair the harm and prevent a repetition of the crimes. David Dyzenhaus This is one of the best accounts in the truth and reconciliation literature I've read and certainly the best piece of work on amnesty I've seen. Diane Orentlicher Ms Mallinder's ambitious project provides the kind of empirical treatment that those of us who have worked on the issue of amnesties in international law have long awaited. I have no doubt that her book will be a much-valued and widely-cited resource.

False Prophets Richard Bonney, 2008 After 9/11, the US response to Al-Qaeda - the Global War on Terror - was heavily influenced by the 'clash of civilizations' theory. This book identifies the twenty-first century proponents of the thesis, such as Bernard Lewis and Daniel Pipes, their links to the Bush government and their roles in exploiting hostility between the West and Islam.

Muslim Attitudes Towards the European Union

Bernd Schlipphak, Mujtaba Ali Isani, 2018-10-10 How do Muslim citizens across the globe perceive the European Union? And what factors influence their EU attitudes? This book offers the first systematic theoretical and empirical analysis of Muslim citizens' EU attitudes in and outside the European Union. Using the best empirical data available, the book demonstrates that Muslim citizens' attitudes are not shaped by their denomination and religious beliefs, but by material and political considerations. It finds that Muslims are most favourable toward the EU due to their positive experiences in European contexts, whereas in contrast, Muslim citizens outside the EU are more skeptical toward the European Union due to sovereignty concerns and the lack of support from the EU and its member states. Such findings not only contribute to the research on social legitimacy of international organizations and international public opinion more generally, but also provide important suggestions for (European) policy makers regarding external and domestic policies. This book will be of key interest to scholars, students and practitioners of European Union politics, Middle East studies, public opinion and International Relations.

An Aesthetic Education in the Era of Globalization Gayatri Chakravorty

Spivak, 2013-05-06 During the past twenty years, the world's most renowned critical theorist—the scholar who defined the field of postcolonial studies—has experienced a radical reorientation in her thinking. Finding the neat polarities of

tradition and modernity, colonial and postcolonial, no longer sufficient for interpreting the globalized present, she turns elsewhere to make her central argument: that aesthetic education is the last available instrument for implementing global justice and democracy. Spivak's unwillingness to sacrifice the ethical in the name of the aesthetic, or to sacrifice the aesthetic in grappling with the political, makes her task formidable. As she wrestles with these fraught relationships, she rewrites Friedrich Schiller's concept of play as double bind, reading Gregory Bateson with Gramsci as she negotiates Immanuel Kant, while in dialogue with her teacher Paul de Man. Among the concerns Spivak addresses is this: Are we ready to forfeit the wealth of the world's languages in the name of global communication? "Even a good globalization (the failed dream of socialism) requires the uniformity which the diversity of mother-tongues must challenge," Spivak writes. "The tower of Babel is our refuge." In essays on theory, translation, Marxism, gender, and world literature, and on writers such as Assia Djebar, J. M. Coetzee, and Rabindranath Tagore, Spivak argues for the social urgency of the humanities and renews the case for literary studies, imprisoned in the corporate university. "Perhaps," she writes, "the literary can still do something."

Explaining Pakistan's Foreign Policy Aparna Pande,2011-03-16 Pakistan has over the decades become a hotbed for the terrorist ideology often referred to as Jihadism. This book investigates the underlying principles of Pakistan's foreign policy from 1947 until the present day, and explains the rise of Jihadism as an offshoot of Pakistan's security concerns. The book goes on to discuss that from its inception as a separate state, Pakistan's foreign policy focused on 'seeking parity' with India and 'escaping' from an Indian South Asian identity. The desire to achieve parity with its much larger neighbour led Pakistan to seek the assistance and support of allies. The author analyses the relationship Pakistan has with Afghanistan, United States, China and the Muslim world, and looks at how these relationships are based on the desire that military, economic and diplomatic aid from these countries would bolster Pakistan's meagre resources in countering Indian economic and military strength. The book presents an interesting contribution to South Asian Studies, as well as studies on International Relations and Foreign Policy.

Evolving Iran: An Introduction to Politics and Problems in the Islamic Republic Barbara Ann Rieffer-Flanagan,2013-03-22 Evolving Iran presents an overview of how the politics and policy decisions in the Islamic Republic of Iran have developed since the 1979 revolution and how they are likely to evolve in the near future. Despite

the fact that the revolution ushered in a theocracy, its political system has largely tended to prioritize self-interest and pragmatism over theology and religious values, while continuing to reinvent itself in the face of internal and international threats. The author also examines the prospects for democratization in Iran. Since the early years of the twentieth century, Iranians have attempted to make their political system more democratic, yet various attempts to produce a system where citizens have a meaningful voice in political decisions have failed. This book argues that greater democratization is unlikely to occur in the short term, especially in light of increased threats from the international community. This accessible overview of Iran's political system covers a broad array of subjects, including foreign policy, human rights, women's struggle for equality, the development and evolution of elections, and the institutions of the political system including the Revolutionary Guards and Assembly of Experts. It will appeal to undergraduates and the general public who seek to understand a country and regime that has mystified Westerners for decades.

Nanotechnology Ahmed S. Khan, 2012-05-17 Advances in nanotechnology are transforming the ways of creating materials and products, leading society to the threshold of a second industrial revolution. However, future opportunities will depend significantly on how nanotechnology stakeholders deal with the short-term and long-term benefits, limitations, uncertainties and risks of nanotechnology. They will be tasked with

navigating a variety of new social and ethical challenges associated with areas such as privacy, the environment, energy, population, genetics, agriculture, food, and security. Unique in its depth, breadth, and variety of viewpoints, *Nanotechnology: Ethical and Social Implications* stimulates, inspires, and builds awareness of nanotechnology's impact on society. Spanning the immense range of disciplines at work in nanotechnology, the book's selection of chapters focuses on how advances in science, and the convergence of multiple technologies, will impact society at individual, community, national, and international levels. The book focuses on raising the awareness of nanotechnology stakeholders, which includes undergraduate and graduate students; educators in sciences, engineering, business, and public policy; engineers; business and finance professionals; and policymakers. It also addresses the demands on the future workforce to learn new skill sets. The book uses an interactive format—which includes case studies, scenarios, and Web exercises—to promote critical thinking and problem solving skills. Content includes numerous tables, statistics, and figures to supplement and enhance the topics covered in each chapter. The result is a must-read for anyone seeking either a technical or nontechnical understanding of the societal impact of nanotechnology.

India's North-Eastern Region Nishchal N.

Pandey, 2008 The seven north-eastern states of India during the last six decades of isolation have braved enormous difficulties. Beginning with the impact of partition, liberation of Bangladesh, influx of people from outside and continuing conflicts based on caste, tribe, language, race and religion, there is also a flip-side to the bad governance and economic woes of the people of this region. Their geographical and cultural proximity with the South-East Asian countries make the area to be of enormous economic importance in the future. This book argues how the regions trade with various neighbouring countries if facilitated and encouraged, and if efforts are made for greater convenience in international trade through the simplification of economic activities such as movement of goods, people and services across

borders, the region can blossom to its full potential. But for this, the Centre has first to realize the urgent need to 'open-up' than to 'lock up' the area in order to provide 'security' to the people. One of the first studies of its kind, this volume highlights in detail the north-east's central position vis-á-vis Bangladesh, Myanmar, and the rest of South-East Asia.
