From Disposable Culture to Disposable People Sasha Adkins,2018-12-13 We cannot solve the problem of plastics simply by recycling more. The plastic in the oceans, the soil, and our bodies is a symptom of the broader problem of disposable culture. We are not just treating objects as disposable--we are treating ourselves and each other as disposable, too. The story of plastics parallels the story of my life, from my childhood living aboard a sailboat to graduate work on plastics and endocrine disruption, and ultimately teaching about plastics, not only as a complex set of chemicals, but as a spiritual poison.

Montauk Stewart Swerdlow,1998 Reveals the most amazing story yet to surface in the area of alien abduction. This is an autobiographical and factual account from Swerdlow, a gifted mentalist who was born clairvoyant but haunted by strange time-space scenarios. After suffering alien abductions and government manipulations, Stewart met Nichols and discovered his own role in time travel experiments, known as the Montauk Project. After refusing to break his association with Nichols, Stewart was incarcerated by the authorities but the truth began to reveal itself. Struggling for his life, Stewart used his mental abilities to overcome the negative influences surrounding him and ultimately discovered the highest common denominator in the alien equation -- an interdimensional language which communicates to all conscious beings.

DNA Science David A. Micklos,Greg A. Freyer,2003 This is the second edition of a highly successful textbook (over 50,000 copies sold) in which a highly illustrated, narrative text is combined with easy-to-use thoroughly reliable laboratory protocols. It contains a fully up-to-date collection of 12 rigorously tested and reliable lab experiments in molecular biology, developed at the internationally renowned Dolan DNA Learning Center of Cold Spring Harbor Laboratory, which culminate in the construction and cloning of a recombinant DNA molecule. Proven through more than 10 years of teaching at research and nonresearch colleges and universities, junior colleges, community colleges, and advanced biology programs in high school, this book has been successfully integrated into introductory biology, general biology, genetics, microbiology, cell biology, molecular genetics, and molecular biology courses. The first eight chapters have been completely revised, extensively rewritten, and updated. The new coverage extends to the completion of the draft sequence of the human genome and the enormous impact these and other sequence data are having on medicine, research, and our view of human evolution. All sections on the concepts and techniques of molecular biology have been updated to reflect the current state of laboratory research. The laboratory experiments cover basic techniques of gene isolation and analysis, honed by over 10 years of classroom use to be thoroughly reliable, even in the hands of teachers and students with no prior experience. Extensive prelab notes at the beginning of each experiment explain how to schedule and prepare, while flow charts and icons make the protocols easy to follow. As in the first edition of this book, the laboratory course is completely supported by quality-assured products from the Carolina Biological Supply Company, from bulk reagents, to useable reagent systems, to single-use kits, thus satisfying a broad range of teaching applications.

Globally and Locally Alan G. McQuillan,Ashley L. Preston,1998 Globally and Locally tackles the economic difficulties of succeeding in a world that is increasingly global while surviving on the local level. It brings together the ideas of several scholars on the political and economic strategies to follow in the modern global market. The editors examine the United States, Scotland, and Japan on the corporate, community, and regional levels and make recommendations to improve the present economic structures without completely replacing them. Each concept focuses on the unique goal of charting a middle path that binds theory with practice, culture with nature, economy with ecology, and the global with the local. A strategy is devised for global success without neglecting matters such as culture, the environment, small towns, or rural areas.

Killed Strangely Elaine Forman Crane,2014-04-11 It was Rebecca's son, Thomas, who first realized the victim's identity. His eyes were drawn to the victim's head, and aided by the flickering light of a candle, he 'clapt his hands and cried out, Oh Lord, it ismy mother.' James Moills, a servant of Cornell... described Rebecca 'lying on

the floore, with fire about Her, from her Lower parts neare to the Arme pits.' He recognized her only 'by her shoes.'—from *Killed Strangely* On a winter's evening in 1673, tragedy descended on the respectable Rhode Island household of Thomas Cornell. His 73-year-old mother, Rebecca, was found close to her bedroom's large fireplace, dead and badly burned. The legal owner of the Cornells' hundred acres along Narragansett Bay, Rebecca shared her home with Thomas and his family, a servant, and a lodger. A coroner's panel initially declared her death an Unhappie Accident, but before summer arrived, a dark web of events—rumors of domestic abuse, allusions to witchcraft, even the testimony of Rebecca's ghost through her brother—resulted in Thomas's trial for matricide. Such were the ambiguities of the case that others would be tried for the murder as well. Rebecca is a direct ancestor of Cornell University's founder, Ezra Cornell. Elaine Forman Crane tells the compelling story of Rebecca's death and its aftermath, vividly depicting the world in which she lived. That world included a legal system where jurors were expected to be familiar with the defendant and case before the trial even began. Rebecca's strange death was an event of cataclysmic proportions, affecting not only her own community, but neighboring towns as well. The documents from Thomas's trial provide a rare glimpse into seventeenth-century life. Crane writes, Instead of the harmony and respect that sermon literature, laws, and a hierarchical/patriarchal society attempted to impose, evidence illustrates filial insolence, generational conflict, disrespect toward the elderly, power plays between mother-in-law and daughter-in-law, [and] adult dependence on (and resentment of) aging parents who clung to purse strings. Yet even at a distance of more than three hundred years, Rebecca Cornell's story is poignantly familiar. Her complaints of domestic abuse, Crane says, went largely unheeded by friends and neighbors until, at last, their complacency was shattered by her terrible death.
