Kadry, Seifedine

1995 International Conference on Bond Graph Modeling and Simulation François E. Cellier, José Joaquín Granda, 1995

Diagnostics and Prognostics of Engineering Systems: Methods and Techniques Kadry, Seifedine, 2012-09-30 Industrial Prognostics predicts an industrial system's lifespan using probability measurements to determine the way a machine operates. Prognostics are essential in determining being able to predict and stop failures before they occur. Therefore the development of dependable prognostic procedures for engineering systems is important to increase the system's performance and reliability. *Diagnostics and Prognostics of Engineering Systems: Methods and Techniques* provides widespread coverage and discussions on the methods and techniques of diagnosis and prognosis systems. Including practical examples to display the method's effectiveness in real-world applications as well as the latest trends and research, this reference source aims to introduce fundamental theory and practice for system diagnosis and prognosis.

Fault Detection, Supervision and Safety of Technical Processes 2003 (SAFEPROCESS 2003) Marcel Staroswiecki, Eva Wu, 2004-02-27 A three-volume work bringing together papers presented at 'SAFEPROCESS 2003', including four plenary papers on statistical, physical-model-based and logical-model-based approaches to fault detection and diagnosis, as well as 178 regular papers.
