Logic Primer Elihu Carranza,2012-08-31 Logic Primer is a classroom and laboratory for students engaged in the study of logic. From the writings of Dr. Gordon H. Clark, logic is defined as the science of necessary inference. The Primer divides into seven chapters. Chapter 1 defines necessary basic terms to enable the reader to begin the investigation. Chapter 2 describes the four standard propositional forms, their formal properties, and methods for translating nonstandard into standard form propositions. Chapter 3 discusses immediate inferences. Chapter 4 examines the syllogism by describing its elements, valid moods and figures, and methods for determining validity. Chapter 5 introduces the student to additional valid argument forms and two important formal fallacies. Chapter 6 covers truth-table analyses of extended arguments. Chapter 7 examines informal fallacies, their classification, and the need for strict definition as a means for avoiding informal fallacies. Each chapter ends with questions for review and exercises to test the student's progress. Exercises/Answers are provided in an Appendix. A glossary of terms with corresponding chapter numbers serves as an index.

The Sociology of Islam Tugrul Keskin,2012-01-06 Sociological scholarship argues that it would be difficult to understand Islam without first understanding the theoretical and practical underpinnings of the social structure of Muslim societies which are embedded in the relationship between religion, the economy, politics and society.

Media, Religion and Culture Jeffrey H. Mahan,2014-06-05 Religion has always been shaped by the media of its time, and today we live in a media culture that informs much of what we think and how we behave. Religious believers, communities and institutions use media as tools to communicate, but also as locations where they construct and express identity, practice religion, and build community. This lively book offers a comprehensive introduction to the contemporary field of religion, media, and culture. It explores: the religious content of media texts and the reception of those texts by religious consumers who appropriate and reuse them in their own religious work; how new forms of media provide fresh locations within which new religious voices emerge, people reimagine the task of religion, and develop and perform religious identity. Jeffrey H. Mahan includes case study examples from both established and new religions and each chapter is followed by insightful reflections from leading scholars in the field. Illustrated throughout, the book also contains a glossary of key terms, discussion questions, and suggestions for further reading.

The Jihadis' Path to Self-destruction Nelly Lahoud,2010 Jihadi ideologues mobilize Muslims, especially young Muslims, through an individualist, centered Islam. Appealing to a classical defense doctrine, they argue that the mandates of jihad are the individual duty of every Muslim and therefore transcend and undermine both the authority of the state and the power of parental control. Yet emphasizing the duty and right of individually initiated jihad is just one side of do-it-yourself Islam. The other involves protecting the purity of doctrinal beliefs against

deviation, even by fellow jihadis. The pursuit of doctrinal purity has led some jihadis to resort to takfir, a pronouncement that declares fellow Muslims unbelievers and makes it legal to shed their blood. Set against the background of the Kharijites, Islam's first counter-establishment movement, this book explores the religious philosophy underlying jihadism. The Kharijites's idealistic and individualistic ideology forces members to deploy takfir against one another, thus hastening their extinction as a group.

Evidence-Based Laryngology David E. Rosow, Chandra M. Ivey, 2021-02-19 This text provides a critical look at the state of the evidence in the most compelling areas of laryngology. Rather than being a comprehensive text covering every single possible area, it focuses on published works in the 9 areas that are of the most interest to laryngologists as well as speech pathologists, general otolaryngologists, and head and neck oncologists managing laryngologic issues. The state of the literature is succinctly summarized and tabulated in each area, allowing the reader to see which areas have high-grade evidence (Levels 1 or 2) to support decision making, and which areas are in need of better quality studies. Each chapter is divided into three main sections: Diagnosis and Pathophysiology, Surgical management, and Non-surgical management. This makes it easier for the reader to browse to the area of interest in each section and to find the evidence basis for a given concept. Evidence-Based Laryngology will be an invaluable resource to otolaryngologists, residents, speech-language pathologists, and other clinicians who manage laryngological problems and would like to know the evidence basis behind different treatment options.
