*Free at Last?* Carl F. Ellis, 2020-06-16 The words of Martin Luther King Jr.'s I Have a Dream speech have become enshrined in US history. But after the end of King's generation of leadership, what happened to the African American struggle for freedom? Like the ancient Israelites, the African American community has survived a four-hundred-year collective trauma. What will it take for them to reach the promised land that King foresaw—to be truly free at last? In this classic historical and cultural study, Carl Ellis offers an in-depth assessment of the state of African American freedom and dignity. Stressing how important it is for African Americans to reflect on their roots, he traces the growth of Black consciousness from the days of slavery to the 1990s, noting especially the contributions of King and Malcolm X. Ellis examines elements of Black culture and offers a distinct perspective on how God is active in culture more broadly. *Free at Last?* concludes with a call for new generations of jazz theologians and cultural prophets to revitalize the African American church and expand its cultural range. The book also includes a helpful glossary of people, events, and terms. Ellis writes, It is my prayer that the principles contained in this book will play a role in building bridges of understanding and facilitating reconciliation where there has been alienation. With a new preface by the author, this groundbreaking book is now available as part of the IVP Signature Collection.

**How Emotions Are Made** Lisa Feldman Barrett, 2017-03-07 Preeminent psychologist Lisa Barrett lays out how the brain constructs emotions in a way that could revolutionize psychology, health care, the legal system, and our understanding of the human mind. "Fascinating . . . A thought-provoking journey into emotion science."—The Wall Street Journal "A singular book, remarkable for the freshness of its ideas and the boldness and clarity with which they are presented."—Scientific American "A brilliant and original book on the science of emotion, by the deepest thinker about this topic since Darwin."—Daniel Gilbert, best-selling author of *Stumbling on Happiness* The science of emotion is in the midst of a revolution on par with the discovery of relativity in physics and natural selection in biology. Leading the charge is psychologist and neuroscientist Lisa Feldman Barrett, whose research overturns the long-standing belief that emotions are automatic, universal, and hardwired in different brain regions. Instead, Barrett shows, we construct each instance of emotion through a unique interplay of brain, body, and culture. A lucid report from the cutting edge of emotion science, *How Emotions Are Made* reveals the profound real-world consequences of this breakthrough for everything from neuroscience and medicine to the legal system and even national security, laying bare the immense implications of our latest and most intimate scientific revolution.

**Metacognition in Language Learning and Teaching** Åsta Haukås, Camilla Bjørke, Magne Dypedahl, 2018-06-14 The Open Access version of this book, available at <https://www.taylorfrancis.com/books/e/9781351049139>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. This volume offers an exhaustive look at the latest research on metacognition in language learning and teaching. While other works have explored certain notions of metacognition in language learning and teaching, this book, divided into theoretical and empirical chapters, looks at metacognition from a variety of perspectives, including metalinguistic and multilingual awareness, and language learning and teaching in L2 and L3 settings, and explores a range of studies from around the world. This allows the volume to highlight a diverse set of methodological approaches, including blogging, screen recording software, automatic translation programs, language corpora, classroom interventions, and interviews, and subsequently, to demonstrate the value of metacognition research and how insights from such findings can contribute to a greater understanding of language learning and language teaching processes more generally. This innovative collection is an essential resource for students and scholars in language teaching pedagogy, and applied linguistics.

*Sociolinguistic Variation and Language Acquisition across the Lifespan* Anna Ghimenton, Aurélie Nardy, Jean-Pierre Chevrot, 2021-08-16 This volume provides a broad coverage of the intersection of sociolinguistic variation and language acquisition. Favoured by the current scientific context where interdisciplinarity is particularly encouraged, the chapters bring to light the complementarity between the social and cognitive approaches to language acquisition. The book integrates sociolinguistic and psycholinguistic issues by bringing together scholars who have been developing conceptions of language acquisition across the lifespan that take into account language-internal and cross-linguistic variation in contexts of both first and second language acquisition as well as of first and second dialect acquisition. The volume brings together theoretical and empirical research and provides an excellent basis for scholars and students wanting to delve into the social and cognitive dimensions of both the production and perception of sociolinguistic variation. The book enables the reader to understand, on the one hand, how variation is acquired in childhood or at a later stage and, on the other, how perception and production feed into one another, thus building up our understanding of the social meanings underpinning language variation.

*Representations of Finnishness in Sweden* Lotta Weckström, 2019-01-16 More than half a million Swedes - one in twenty - is of Finnish descent. This book explores Finnishness, multilingualism and identities of young people with Finnish background in Sweden. What does it mean to grow up in a Finnish family in Sweden? Who are real Finns and what does it take to be(come) one? Is a shared minority language essential for the survival of the minority, or can a minority culture stay viable without it? What is Finnishness and who, in the end, can define ethnicity? How to make sense of, and how to present interviews that are rich with imitations of accents, jokes and laughter? *Representations of Finnishness in Sweden* is an ethnographic interview study in the domain of applied language studies. This book is aimed at readers interested in sociolinguistics, linguistic ethnography, and the study of identities. Interviewees' voices take a central position in this book and interview excerpts are used not only as illustrations, but also serve as starting points for discussing broader theoretical concepts. The author, Dr. Lotta Weckström, grew up bilingual - Finnish and Swedish - in Finland. She studied linguistics and migration studies in Germany and the Netherlands, and in this longitudinal study encompasses her expertise.

*The Hoodie Girl* Yuen Wright, 2021-08-10 My hoodie is freakishly oversized. It covers my body in a way that makes me feel comfortable. Safe. Invisible. Wren Martin isn't what you would call a popular girl. She is remarkably average, gets good grades, and aspires to get a scholarship to her dream college and leave her hometown, as it's filled with impossible memories. Asher Reed—star athlete and heartthrob of Eastview High—is everything wrong with high school in one frustratingly good-looking body. But when an on-field accident leaves him sidelined for the season, he takes an interest in Wren. **Just One Year** Penelope Ward , 2020-02-24 From New York Times bestselling author Penelope Ward, comes a new standalone novel. The beginning of my sophomore year in college was off to a rough start. On the first day of orientation, I had an altercation with an infuriating British dude in a campus bathroom. (The ladies' room was out of order. So, I used the men's room. Don't judge.) I got home later that night and realized that the foreign student we were expecting to rent a room in my parents' house was allergic to our cat. So, the spare room went to someone else: Caleb—the British guy from the men's room. And so it began...my love-hate story with

Caleb Yates. Or was it hate-love in that order? The guy knew how to push every one of my buttons. Sometimes I'd email him to express my aggravation and disdain. He'd actually rewrite my own words and send them back to me. That was the type of infuriating person Caleb was. So frustrating. And... Sometimes incredibly funny and endearingly sweet. And hot. He eventually grew on me, and Caleb soon became one of my best friends that year. Too bad he was headed back to England soon, so nothing could happen between us—for so many reasons. I definitely couldn't fall in love with him, especially since all we had was just one year.

**History of Sullivan County** Thomas J. Ingham, 1899

The Civil War in Kentucky Lowell Harrison, 2010-09-12 The Civil War scene in Kentucky, site of few full-scale battles, was one of crossroad skirmishes and guerrilla terror, of quick incursions against specific targets and equally quick withdrawals. Yet Kentucky was crucial to the military strategy of the war. For either side, a Kentucky held secure against the adversary would have meant easing of supply problems and an immeasurably stronger base of operations. The state, along with many of its institutions and many of its families, was hopelessly divided against itself. The fiercest partisans of the South tended to be doubtful about the wisdom of secession, and the staunchest Union men questioned the legality of many government measures. What this division meant militarily is made clear as Lowell H. Harrison traces the movement of troops and the outbreaks of violence. What it meant to the social and economic fabric of Kentucky and to its postwar political stance is another theme of this book. And not forgotten is the life of the ordinary citizen in the midst of such dissension and uncertainty.

*Mathematics as an Educational Task* Hans Freudenthal, 2012-12-06 Like preludes, prefaces are usually composed last. Putting them in the front of the book is a feeble reflection of what, in the style of mathematics treatises and textbooks, I usually call the didactical inversion: to be fit to print, the way to the result should be the inverse of the order in which it was found; in particular the key definitions, which were the finishing touch to the structure, are put at the front. For many years I have contrasted the didactical inversion with the thought-experiment. It is true that you should not communicate your mathematics to other people in the way it occurred to you, but rather as it could have occurred to you if you had known then what you know now, and as it would occur to the student if his learning process is being guided. This in fact is the gist of the lesson Socrates taught Meno's slave. The thought-experiment tries to find out how a student could re-invent what he is expected to learn. I said about the preface that it is a feeble reflection of the didactical inversion. Indeed, it is not a constituent part of the book. It can even be torn out. Yet it is useful. Firstly, to the reviewer who then need not read the whole work, and secondly to the author himself, who like the composer gets an opportunity to review the Leitmotifs of the book.

*Progress in Basic and Clinical Immunology* Andrzej Mackiewicz, Maciej Kurpisz, Jan Zeromski, 2012-11-05 Progress in Basic and Clinical

Immunology is a result of the 14th European Immunology Meeting - EFIS 2000, held in Poznan, Poland, on 23-27 September 2000. EFIS 2000 gathered over 1400 immunologists from all over the world. It was an exceptionally memorable meeting for a number of reasons: 1) it was held in the last year of the century and the millennium, thus provoking conclusions of past achievements of immunology and projections for the future; 2) it was held in Poland, a country that is a symbol of struggle for freedom for a large number of scientists originating from the 'Eastern Bloc' countries; and 3) EFIS celebrated its 25th anniversary at this occasion. This comprehensive volume contains 62 chapters grouped into 11 sections: T-cells, Immune Receptors, Antigen Presentation/Dendritic Cells, Cytokines, Immunodeficiencies, Autoimmunity, Allergy/Inflammation, Immunotherapy, Vaccines, Tumor Immunology, and Cancer Immunotherapy.

*Mathematics Classrooms in Twelve Countries* David Clarke, Christine Keitel, Yoshinori Shimizu, 2006 The Learner's Perspective Study aims to juxtapose the observable practices of the classroom and the meanings attributed to those practices by classroom participants. The LPS research design documents sequences of at least ten lessons, using three video cameras, supplemented by the reconstructive accounts of classroom participants obtained in post-lesson video-stimulated interviews, and by test and questionnaire data, and copies of student written material. In each participating country, data generation focuses on the classrooms of three teachers, identified by the local mathematics education community as competent, and situated in demographically different school communities within the one major city. The large body of complex data supports both the characterisation of practice in the classrooms of competent teachers and the development of theory.
