New Age Spirituality Steven J. Sutcliffe, Ingvild Saelid Gilhus, 2014-09-11 New Age and holistic beliefs and practices – sometimes called the new spirituality – are widely distributed across modern global society. The fluid and popular nature of new age makes these movements a very challenging field to understand using traditional models of religious analysis. Rather than treating new age as an exotic specimen on the margins of 'proper' religion, New Age Spirituality examines these movements as a form of everyday or lived religion. The book brings together an international range of scholars to explore the key issues: insight, healing, divination, meditation, gnosis, extraordinary experiences, and interactions with gods, spirits and superhuman powers. Combining discussion of contemporary beliefs and practices with cutting-edge theoretical analysis, the book repositions new age spirituality at the forefront of the contemporary study of religion.

Apuleius in European Literature Stephen Harrison, Regine May, 2024-01-17 The story of Cupid and Psyche is first known through the Latin novel *Metamorphoses* or *The Golden Ass* by the second-century AD writer Apuleius—one of the few Latin fictions from Roman antiquity to have survived in its entirety. *Apuleius in European Literature: Cupid and Psyche since 1650* examines the reception of the long two-book romantic story of Cupid and Psyche in European literature from 1650 to the present day, with some attention also devoted to fine art and opera across this period. Stephen Harrison and Regine May argue that Cupid and Psyche had a broad and profound influence on certain important and specific areas of European culture; it was appropriated and adapted to suit particular cultural and generic contexts, especially the development of the fairy tale. This constitutes an important strand of the more general reception of the ancient novel, since the tale of Cupid and Psyche is arguably the most famous section of any fiction from Greece or Rome. Apuleius' story has enjoyed an extraordinarily rich reception throughout the five centuries from its rediscovery in the Renaissance to the present day. Previous studies of this reception have focused on the tale's prominence in Renaissance art and literature, or otherwise on its status in the German Romantic period. This book goes further and wider, ranging across literary genres in English, French, German and Dutch, encompassing poetry and drama as well as prose fiction, and covering all the key elements of the tale's reception from 1650 to the present. We hereby rediscover a tale that today remains as relevant and ripe for appropriation as ever.

World Guide to Special Libraries Marlies Janson, Helmut Opitz, 2011-12-22 *The World Guide to Special Libraries* lists about 35,000 libraries world wide categorized by more than 800 key words – including libraries of departments, institutes, hospitals, schools, companies, administrative bodies, foundations, associations and religious communities. It provides complete details of the libraries and their holdings, and alphabetical indexes of subjects and institutions.

The Divine Quest, East and West James L. Ford, 2016-01-28 Looks at the concept of Ultimate Reality in Hinduism, Buddhism, Judaism, and Christianity. Many books have discussed the development of the notion of God in Western monotheistic traditions, but how have non-Western cultures conceptualized what those in the West might identify as 'God'? What might be learned by comparing different visions of the Divine, such as God, gods, Brahman, Nirvana, and Emptiness? James L. Ford engages these fascinating questions, exploring notions of 'the Divine' or 'Ultimate Reality' within Jewish, Christian, Hindu, and Buddhist traditions. Looking at a multiplicity of divine conceptions, even within traditions, Ford discusses the relationship between imagination and revelation in the emergence of visions of ultimacy; consequences and tendencies associated with particular notions of the Ultimate; and how new visions of the Ultimate arise in relation to social, cultural, political, and scientific developments.

Ford reflects on what can be learned through an awareness of the various beliefs about the Ultimate and on how such disparate visions influence the attitudes and behavior of people in different parts of the world.

Catastrophe and Exile in the Modern Palestinian Imagination I. Saloul, 2012-05-17 Catastrophe and Exile in the Modern Palestinian Imagination explores the cultural memory of al-Nakba (1948 Israeli independence, or The Catastrophe as it is known in Palestine) and its significance to the modern Palestinian imagination. Ihab Saloul addresses central concepts to debates over identity such as nostalgia and trauma, notions of home and forced travel, and geopolitical continuity of loss of place. Through an integrated method of close narrative and discursive analysis of diverse literary texts, films, and personal narratives, this study offers an analytical account of the preservation of cultural optimism in the face of the ongoing catastrophe, as well as the ways in which aesthetics and politics intersect in contemporary Palestinian culture.

Biogas from Waste and Renewable Resources Dieter Deublein, Angelika Steinhauser, 2008-04-09 Written as a practical introduction to biogas plant design and operation, this book fills a huge gap by presenting a systematic guide to this emerging technology -- information otherwise only available in poorly intelligible reports by US governmental and other official agencies. The author draws on teaching material from a university course as well as a wide variety of industrial biogas projects he has been involved with, thus combining didactical skill with real-life examples. Alongside biological and technical aspects of biogas generation, this timely work also looks at safety and legal aspects as well as environmental considerations.

Handbook of Interpersonal Communication Gerd Antos, Eija Ventola, 2008-12-10 Interpersonal communication (IC) is a continuous game between the interacting interactants. It is a give and take - a continuous, dynamic flow that is linguistically realized as discourse as an on-going sequence of interactants' moves. Interpersonal communication is produced and interpreted by acting linguistically, and this makes it a fascinating research area. The handbook, *Interpersonal Communication*, examines how interactants manage to exchange facts, ideas, views, opinions, beliefs, emotion, etc. by using the linguistic systems and the resources they offer. In interpersonal communication, the fine-tuning of individuals' use of the linguistic resources is continuously probed. The language used in interpersonal communication enhances social relations between interactants and keeps the interaction on the normal track. When interaction gets off the track, linguistic miscommunication may also destroy social relationships. This volume is essentially concerned with this fine-tuning in discourse, and how it is achieved among various interactant groups. The volume departs from the following fundamental questions: How do interpersonal relations manifest themselves in language? What is the role of language in developing and maintaining relationships in interpersonal communication? What types of problems occur in interpersonal communication and what kind of strategies and means are used to solve them? How does linguistically realized interpersonal communication interact with other semiotic modes? Interpersonal communication is seen and researched from the perspective of what is being said or written, and how it is realized in various generic forms. The current research also gives attention to other semiotic modes which interact with the linguistic modes. It is not just the social roles of interactants in groups, the possible media available, the non-verbal behaviors, the varying contextual frames for communication, but primarily the actual linguistic manifestations that we need to focus upon when we want to have

a full picture of what is going on in human interpersonal communication. It is this linguistic perspective that the volume aims to present to all researchers interested in IC. The volume offers an overview of the theories, methods, tools, and resources of linguistically-oriented approaches, e.g. from the fields of linguistics, social psychology, sociology, and semiotics, for the purpose of integration and further development of the interests in IC., Topics e.g.: Orientation to interaction as primarily linguistically realized processes Expertise on theorizing and analyzing cultural and situational contexts where linguistic processes are realized Expertise on handling language corpora Expertise on theorizing and analyzing interaction types as genres Orientation to an integrated view of linguistic and non-linguistic participant activities and of how interactants generate meanings and interact with space Expertise on researching the management of the linguistic flow in interaction and its successfulness.

Standard C++ IOStreams and Locales Angelika Langer, Klaus Kreft, 2000 Standard C++ provides a foundation for creating new, improved, and more powerful C++ components. IOStreams and locales are two such major components for text internationalization. As critical as these two APIs are, however, there are few resources devoted to explaining them. Standard C++ IOStreams and Locales fills this informational gap. It provides a comprehensive description of, and reference to, the iostreams and locales classes, showing how to put them to use and offering advanced information on customizing and extending their basic operation. Written by two experts involved with the development of the standard, this book reveals the rationale behind the design of the APIs and points out their potential pitfalls. This book serves as both a guide and a reference to C++ components. Part I explains iostreams, what they are, how they are used, their underlying architectural concepts, and the techniques for extending the iostream framework. Part II introduces internationalization and shows you how to adapt your program to local conventions. Readers seeking an initial overview of the problem domain will find an explanation of what internationalization and localization are, how they are related, and how they differ. With examples, the authors show the differences among cultural conventions, how C++ locales can be used to address such differences, and how locale framework can be extended to handle further, nonstandard cultural conventions. Standard C++ IOStreams and Locales Explains formatting and error indication features of iostreams in detail Describes underlying concepts of the iostreams framework Demonstrates implementation of i/o operations for user-defined types Shows techniques for implementing extended stream and stream buffer classes Introduces internationalization Explains how to use standard features for internationalization Demonstrates techniques for implementation of user-defined internationalization services IOStreams and locales serve as a foundation library that provides a number of ready-to-use interfaces, as well as frameworks that can be customized and extended. The class reference to C++ IOStreams and locales completes this comprehensive resource, which belongs in the libraries of all intermediate and advanced C++ programmers. 0201183951B04062001

A Poststructuralist Discourse Theory of Global Politics Dirk Nabers, 2015-10-07 This book develops a discourse theory of crisis and change in global politics. Crisis is conceptualized as structural dislocation, resting on difference and incompleteness. Change is seen as the continuous but ultimately futile effort to gain a full identity. The incompleteness and contingent character of the social represents the most important condition for democratic politics to become possible and for a theory of crisis and change to become conceivable. In this new understanding, crisis loses its everyday meaning of a periodically occurring event. Instead, crisis becomes an omnipresent feature of the social fabric. It represents the absence of ground, of social foundation, and it rests within the subject as well as within the social whole.

Russia and the Right to Self-Determination in the Post-Soviet Space Johannes Socher, 2021 The right to self-determination is renowned for its lack of clear interpretation. Broadly speaking, one can differentiate between a liberal and a nationalist tradition. In modern international law, the balance between these two opposing traditions is sought in an attempt to contain or 'domesticate' the nationalist version by limiting it to 'abnormal' situations, such as colonialism in the sense of 'alien subjugation, domination and exploitation'. This book situates Russia's engagement with the right to self-determination in this debate. It shows that Russia has a distinct approach to self-determination that sets it apart both from Western States and from state practice during Soviet times. Against the background of the Soviet Union's role in the evolution of the right to self-determination, the bulk of the study analyses Russia's relevant state practice in the post-Soviet space through the prisms of sovereignty, secession, and annexation. Drawing on analysis of seven secessionist conflicts and a detailed study of Russian sources and scholarship, it traces how Russian engagement with self-determination has changed over the past three decades. Ultimately, the book argues that Russia's approach to the right of peoples to self-determination may be best understood in terms of Russian power politics disguised as legal rhetoric, as well as being evidence of a regional (re-)fragmentation of international law.

NGOs in Foreign Policy Andreas Werner, 2016 NGOs are seen as important actors of international relations and foreign policy by many scholars. However, such a perspective has rarely been empirically examined. This book therefore takes a look at the access granted to NGOs by the state to the planning and decision-making processes in foreign and security policy. By applying the theoretical concept of security governance, the author takes a look at frameworks such as the German Action Plan Civil Crisis Prevention, the Coordination Committee Humanitarian Aid, the Dutch PSD Network and the National Action Plan 1325. In conclusion, a comparison between Germany and the Netherlands reveals where NGOs can gain more access to foreign security policy. It eventually enables the author to argue how big or small the role of these non-state actors really is and what consequences this implies for both the empirical and theoretical side of foreign policy. Andreas Werner, M.A., studied Political Science, International Relations, Philosophy as well as Peace and Conflict Studies at the University of Marburg and at the Mount Allison University, Canada. He successfully defended his PhD thesis at the University of Münster in 2015. He currently works as a research associate at the German Police University.

From Adam to Omega A.R. Roberts, 2020-09-24 Due to government secrecy, the public never learned of the numerous UFO incursions at strategic nuclear weapons installations where they disabled ICBM missiles and even activated their launch codes. They never heard about UFO encounters reported by police officers, civilian and military pilots and astronauts, and they were never told the real facts of the Roswell event. The volume of evidence suggesting we are not alone, and probably never have been, is overwhelming. It suggests an alien agenda to accelerate the evolution of the human race. To understand what is happening requires knowledge of what is going on today as well as the past, particularly during the biblical era. Much has been learned through the Freedom of Information Act, from whistleblowers, and government and military officials. This book connects the dots suggesting what aliens have been doing for the past several thousand years.

A Europe of Rights Helen Keller, Alec Stone Sweet, 2008 In this book, a team of distinguished scholars trace and evaluate, comparatively, the impact of the ECHR and the European Court of Human Rights on law and politics in eighteen national systems: Ireland-UK; France-Germany, Italy-Spain, Belgium-Netherlands, Norway-Sweden, Greece-Turkey, Russia-Ukraine, Poland-Slovakia, and Austria-Switzerland. Although the Court's jurisprudence has provoked significant structural, procedural, and policy innovation in every State examined, its impact varies widely across

States and legal domains. The book charts this variation and seeks to explain it. Across Europe, national officials – in governments, legislatures, and judiciaries – have chosen to incorporate the ECHR into domestic law, and they have developed a host of mechanisms designed to adapt the national legal system to the ECHR as it evolves. But how and why State actors have done so varies in important ways, and these differences heavily determine the relative status and effectiveness of Convention rights in national systems. Although problems persist, the book shows that national officials are, gradually but inexorably, being socialized into a Europe of rights, a unique transnational legal space now developing its own logics of political and juridical legitimacy.--BOOK JACKET.

Women and Gender in the Qur'an Celene Ibrahim,2020-10-01 Stories about gendered social relations permeate the Qur'an, and nearly three hundred verses involve specific women or girls. The Qur'an features these figures in accounts of human origins, in stories of the founding and destruction of nations, in narratives of conquest, in episodes of romantic attraction, and in incidents of family devotion and strife. Overall, stories involving women and girls weave together theology and ethics to reinforce central Qur'anic ideas regarding submission to God and moral accountability. Celene Ibrahim explores the complex cast of female figures in the Qur'an, probing themes related to biological sex, female sexuality, female speech, and women in sacred history. Ibrahim considers major and minor figures referenced in the Qur'an, including those who appear in narratives of sacred history, in parables, in descriptions of the eternal abode, and in verses that allude to events contemporaneous with the advent of the Qur'an in Arabia. Ibrahim finds that the Qur'an regularly celebrates the aptitudes of women in the realms of spirituality and piety, in political maneuvering, and in safeguarding their own wellbeing; yet, women figures also occasionally falter and use their agency toward nefarious ends. Women and Gender in the Qur'an outlines how women and girls – old, young, barren, fertile, chaste, profligate, reproachable, and saintly –enter Qur'anic sacred history and advance the Qur'an's overarching didactic aims.

Planet India Mira Kamdar,2008-09-04 India is everywhere – Indian studios produce animated features and special effects for Hollywood movies; Indian software manages our health records; and Indian customer service centres answer our calls. A country of English speakers and a free-market democracy, with the youngest population on Earth, India is not only the fastest growing market for the next new thing, but a source for the technological innovation that will drive the global economy. Yet, India is also in a race against time to bring the benefits of the twenty-first century to the 800 million Indians who live on less than £1 per day, and it must do so in a way that is environmentally sustainable and politically viable on a scale never before achieved. If India succeeds, it will not only save itself, it may save us all. If it fails, we will all suffer. As goes India, so goes the world. Like CHINA, INC, published in 2006 by S&S, PLANET INDIA will capture and catalyze the growing interest in this rising power. With in-depth research, interviews and provocative analysis, Mira Kamdar offers a penetrating view of India and its cultural and economic impact on the world. From Bollywood to the Indian diaspora to India's effect on global politics she reports on the people, companies and places shaping the new India. Kamdar examines the challenges India faces while celebrating India's tremendous vitality and the opportunities this Asian

democracy has to shape its own and all of our destinies.

EU Regional Headquarters: Implications for Host Countries and Skills of Domestic Labor Force Angelika

Werth, 2006-05-17 Inhaltsangabe: Abstract: The diploma thesis concentrates on regional headquarters and the effect they have on a host country's labor market and the skill level of its labor force. The first part of the thesis deals with the available literature giving an overview of the evolution of the topic and the most prominent issues and countries researched regarding regional headquarters. Moreover, definitions of transnational corporations, regional headquarters and the region of interest here are given in order to determine the scope of this thesis. The second part is empirical in nature. Based on the results of the literature review, a quantitative survey was conducted in order to examine the current situation of Austrian regional headquarters. Therefore, a questionnaire was sent to all regional headquarters located in Austria. Furthermore, qualitative research appears in the form of two case studies. At the end of the thesis the results are summarized and recommendations are given for policy makers. The key results of the work are: RHQs actually have a positive effect on the domestic labor market, that is on the employment rate as well as on the level of skill. Structure of the Diploma Thesis: Each chapter is opened by a general introduction and closed by a sub-section which includes a summary and further research implications. The reader is introduced to the topic at hand by a literature review in chapter 3. This section contains two main parts: the analysis of studies and articles published in academic journals; and the description of books and other types of publication. All authors quoted in the course of my work are already included in the review which implies that it provides the foundation of the upcoming chapters. Chapter 4 builds the basis for the topic at hand. It defines the object of investigation, namely RHQs by using definitions provided by previous authors. Of course, it takes a closer look at transnational companies which are the superior organization. Finally, sub-section 4.4. determines the scope of the region I chose to examine. Section 5 identifies the most important skills RHQs demand from potential employees. In order to be able to do that, I first took a look at the different responsibilities an Austrian RHQ may assume. For this purpose, sub-section 5.2. deals with the tasks a RHQ undertakes in order to fulfill HQ's requirements and with the services a RHQ provides for its subsidiaries. Chapters 6 and 7 present the empirical [...]
