**Ultimate Price** Howard Steven Friedman, 2021-05-05 How much is a human life worth? Individuals, families, companies, and governments routinely place a price on human life. The calculations that underlie these price tags are often buried in technical language, yet they influence our economy, laws, behaviors, policies, health, and safety. These price tags are often unfair, infused as they are with gender, racial, national, and cultural biases that often result in valuing the lives of the young more than the old, the rich more than the poor, whites more than blacks, Americans more than foreigners, and relatives more than strangers. This is critical since undervalued lives are left less-protected and more exposed to risk. Howard Steven Friedman explains in simple terms how economists and data scientists at corporations, regulatory agencies, and insurance companies develop and use these price tags and points a spotlight at their logical flaws and limitations. He then forcefully argues against the rampant unfairness in the system. Readers will be enlightened, shocked, and, ultimately, empowered to confront the price tags we assign to human lives and understand why such calculations matter.

**The Price of Nice** Angelina E. Castagno, 2019-10-22 How being “nice” in school and university settings works to reinforce racialized, gendered, and (dis)ability-related inequities in education and society Being nice is difficult to critique. Niceness is almost always portrayed and felt as a positive quality. In schools, nice teachers are popular among students, parents, and administrators. And yet Niceness, as a distinct set of practices and discourses, is not actually good for individuals, institutions, or communities because of the way it maintains and reinforces educational inequity. In *The Price of Nice*, an interdisciplinary group of scholars explores Niceness in educational spaces from elementary schools through higher education to highlight how this seemingly benign quality reinforces structural inequalities. Grounded in data, personal narrative, and theory, the chapters show that Niceness, as a raced, gendered, and classed set of behaviors, functions both as a shield to save educators from having to do the hard work of dismantling inequity and as a disciplining agent for those who attempt or even consider disrupting structures and ideologies of dominance. **A Guidebook of Alternative Nows** Amber Hickey, 2012 Imagining other versions of now can be difficult without concrete

examples, and where can they be found when so many signs tell us that the world is spiraling downward: more and more economically unsound, environmentally crisis-ridden, and lacking in obvious avenues for everyday people to make their voices and visions heard. With particular fervor since the global financial crisis erupted in 2007, however, creative movers and shakers, with stars in their eyes and dirt under their fingernails, have been dreaming up projects and ideas in the areas of ecologies, economies, communities, histories, spaces, and resources. These propositions range from witty to earnest, from utopian to pragmatic. Bursting with street-smart optimism, what they share is belief in the possibility of creating versions of now not yet fully manifest. A Guidebook of Alternative Nows is composed of a collection of these projects and ideas; flares of inspiration with clear practical resonance in this time of potential radical transformation. A Guidebook of Alternative Nows is not intended to pinpoint the next big solution. Instead, it seeks to shed light on a cacophony of potentialities and realities, all of which may compose a part of our nows and our futures.

**The Digital Age Detective** Brendan Riley, 2017-06-21 Imagining the figure of the fictional detective as an archetype in the study of modern culture, the author argues that contemporary detective fiction can help us better comprehend fundamental shifts of the Digital Age—in communication, family, entertainment, society, even the way we think as individuals. The nature of the detective story itself models how we build and share knowledge. Drawing on concepts from literature and media studies, the author reveals clues about modern phenomena like conspiracy theory, groupthink and the nature of our digital identities.

*Radigan* Louis L'Amour, 2004-06-01 When beautiful Angelina Foley presents Tom Radigan with a Spanish grant and claims ownership of his land, he realizes he's up against a cunning and deadly opportunist. Foley wants him off Vache Creek immediately, and with three thousand head of cattle, an outfit of hardcase gunfighters, and winter coming on, she is unwilling to take no for an answer. But Radigan has worked four hard years building up his ranch. Fighting for it—and, if he has to, killing for it—is something he is more than willing to do. If Angelina Foley and her men think he is the kind of man to give up without a fight, they are dead wrong.

New Mentalities of Government in China David Bray, Elaine Jeffreys, 2016-01-13 China continues to transform apace, flowing from the forces of deregulation, privatization and globalization unleashed by economic reforms which began in late 1978. The dramatic scope of economic change in China is often counterposed to the apparent lack of political change as demonstrated by continued Chinese Communist Party (CCP) rule. However, the ongoing dominance of the CCP belies the fact that much has also changed in relation to practices of government, including how authorities and citizens interact in the management of daily life. *New Mentalities of Government in China* examines how the privatization and professionalization of 'public' service provision is transforming the nature of government and everyday life in the People's Republic of China (PRC). The book addresses key theoretical questions on the nature of government in China and documents the emergence of a range of 'new mentalities of government' in China. Its chapters focus on areas such as clinical trials, conceptualizing government, consumer activity, elite philanthropy, lifestyle and beauty advice, public health, social work, volunteering; and urban and rural planning. Offering a topical examination of shifting modes of governance in contemporary China, this book will appeal to scholars in the fields of anthropology, history, politics and sociology.

*How I Became a Quant* Richard R. Lindsey, Barry Schachter, 2011-01-11 Praise for *How I Became a Quant* Led by two top-notch quants, Richard R. Lindsey and Barry Schachter, *How I Became a Quant* details the quirky world of quantitative analysis through stories told by some of today's most successful quants. This book tells the story of how academics, physicists, mathematicians, and other scientists became professional investors managing billions. --David A. Krell, President and CEO, International Securities Exchange *How I Became a Quant* should be must reading for all students with a quantitative aptitude. It provides fascinating examples of the dynamic career opportunities potentially open to anyone with the skills and passion for quantitative analysis. --Roy D. Henriksson, Chief Investment Officer, Advanced Portfolio Management Quants--those who design and implement mathematical models for the pricing of derivatives, assessment of risk, or prediction of market movements--are the backbone of today's investment industry. As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk. *How I Became a Quant* reveals the faces behind the quant revolution, offering you the chance to learn firsthand what it's like to be a quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots, roles, and contributions, explaining what they do and how they do it, as well as outlining the sometimes unexpected paths they have followed from the halls of academia to the front lines of an investment revolution.

**Patent Politics** Shobita Parthasarathy, 2017-02-21 Over the past thirty years, the world's patent systems have experienced pressure from civil society like never before. From farmers to patient advocates, new voices are arguing that patents impact public health, economic inequality, morality—and democracy. These challenges, to domains that we usually consider technical and legal, may seem surprising. But in *Patent Politics*, Shobita Parthasarathy argues that patent systems have always been deeply political and social. To demonstrate this, Parthasarathy takes readers through a particularly fierce and prolonged set of controversies over patents on life forms linked to important advances in biology and agriculture and potentially life-saving medicines. Comparing battles over patents on animals, human embryonic stem cells, human genes, and plants in the United States and Europe, she shows how political culture, ideology, and history shape patent system politics. Clashes over whose voices and which values matter in the patent system, as well as what counts as knowledge and whose expertise is important, look quite different in these two places. And through these debates, the United States and Europe are developing very different approaches to patent and innovation governance. Not just the first

comprehensive look at the controversies swirling around biotechnology patents, *Patent Politics* is also the first in-depth analysis of the political underpinnings and implications of modern patent systems, and provides a timely analysis of how we can reform these systems around the world to maximize the public interest.

**Nudge** Richard H. Thaler, Cass R. Sunstein, 2009-02-24 Now available: *Nudge: The Final Edition* The original edition of the multimillion-copy New York Times bestseller by the winner of the Nobel Prize in Economics, Richard H. Thaler, and Cass R. Sunstein: a revelatory look at how we make decisions—for fans of Malcolm Gladwell's *Blink*, Charles Duhigg's *The Power of Habit*, James Clear's *Atomic Habits*, and Daniel Kahneman's *Thinking, Fast and Slow* Named a Best Book of the Year by *The Economist* and the *Financial Times* Every day we make choices—about what to buy or eat, about financial investments or our children's health and education, even about the causes we champion or the planet itself. Unfortunately, we often choose poorly. *Nudge* is about how we make these choices and how we can make better ones. Using dozens of eye-opening examples and drawing on decades of behavioral science research, Nobel Prize winner Richard H. Thaler and Harvard Law School professor Cass R. Sunstein show that no choice is ever presented to us in a neutral way, and that we are all susceptible to biases that can lead us to make bad decisions. But by knowing how people think, we can use sensible “choice architecture” to nudge people toward the best decisions for ourselves, our families, and our society, without restricting our freedom of choice.

*Pimps Up, Ho's Down* T. Denean Sharpley-Whiting, 2008-09 Five essays address feminist issues relating to the women of the hip-hop generation, covering topics ranging from strip clubs and groupie culture to the idealization of white beauty and light skin color.
