Peter Watts

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

*The Book of the Damned* Charles Fort,2020-09-28 Time travel, UFOs, mysterious planets, stigmata, rock-throwing poltergeists, huge footprints, bizarre rains of fish and frogs-nearly a century after Charles Fort's *Book of the Damned* was originally published, the strange phenomenon presented in this book remains largely unexplained by modern science. Through painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day it remains the most popular. If you agree that truth is often stranger than fiction, then this book is for you--Taken from Good Reads website.

**Fundamentals of Microfabrication and Nanotechnology, Three-Volume Set** Marc J. Madou,2018-12-14 Now in its third edition, *Fundamentals of Microfabrication and Nanotechnology* continues to provide the most complete MEMS coverage available. **A Coast to Explore** Miles O. Hayes,Jacqueline Michel,2010-12-01 From wave-cut rock cliffs and sea caves to gravel beaches and coastal dunes, California's coastline has enthralled visitors from around the world. *A Coast to Explore* describes the origins of these coastal features and unravels the wonderful mystery of how the birth of the San Andreas Fault system created what we see today. Miles O. Hayes and Jacqueline Michel have been mapping the coast of California since the 1980s as part of a larger initiative to protect coastlines around the world from hazardous oil spills. *A Coast to Explore* is the culmination of their work. Through a delightful narrative, it details the geological evolution of central California's coast from Bodega Bay to Point Conception, including the effects of erosion during El Niños, the impacts of tsunamis, and the formation of spectacular raised marine terraces. Key ecological resources are described for each of the major subdivisions of the coast. Through richly illustrated diagrams, full-color photographs, and satellite images, *A Coast to Explore* takes readers on a fascinating journey of discovery so they can better understand why the Central California coast is so remarkable.

Pedagogical Experiments in Architecture for a Changing Climate Tülay Atak,Luis Callejas,Jonathan A. Scelsa,Jørgen Johan Tandberg,2023-11-17 This book presents a series of pedagogical experiments translating climate science, environmental humanities, material research, ecological practices into the architectural curriculum. Balancing the science and humanities, it exposes recent pedagogical experiments from renown educators, while also interrogating a designer's agency between science and speculation in the face of climate uncertainty. The teaching experiments are presented across four sections: Abstraction, Organization, Building, and Narrative, exposing core parts of an architect's education and how educators can simultaneously provide fundamental skills and constructive literacy while instigating environmental sensibilities. Chapters cover issues such as an unstable hydrosphere, water infrastructure, remediating materials, methods of disassembly and adaptive reuse, as well as constructing new aesthetic categories of climate change, and implementing oral histories of construction, among many others. Written and edited by expert design educators actively engaged in experimenting in new forms of pedagogy, this book will be of great use to architecture instructors at all levels looking to renew their teaching practices to

more directly address the climate emergency. It will also appeal to those academics across the built environment interested in the ways design can affect and adapt to climate change.

*Studies in the History of Russian-Israeli Literature* Roman Katsman, Maxim D. Shrayder, 2023-05-16 This collection of essays covers a hundred-year history of Russian-language literature in Israel, including the pre-state period. Some of the studies are devoted to an overview of the literary process and the activities of its participants, others—to individual genres and movements. As a result, a complex and multifaceted picture emerges of a not quite fully defined, but very lively and dynamic community that develops in the most difficult conditions. The contributors trace the paths of Russian-Israeli prose, poetry and drama, various waves of avant-garde, fantasy, and critical thought. Today, in Russian-Israeli literature, the voices of writers of various generations and waves of repatriation are intertwined: from the seventies to the war aliyah of the recent times. Both the Russian-Israeli authors and their critics often hold different opinions of their respective roles in Israel's historical and literary storms. While disagreeing on the definition of their place on the map of modern culture, Russian-Israeli writers are united by a shared bond with the fate of the Jewish state.

**Anti-american Terrorism: From Eisenhower To Trump - A Chronicle Of The Threat And Response: Volume Ii: The Reagan And George H.w. Bush Administrations** Dennis A Pluchinsky, 2020-06-18 'This is a truly magisterial work of scholarship. By pulling all this material together in one place, and by organizing it so accessibly, Pluchinsky has performed an invaluable service for researchers and counter-terrorism practitioners alike ... the real selling point is the factual content. Pluchinsky has written the definitive contextual history of US counter-terrorism policy and these volumes, and I confidently expect the two companion volumes still to come, deserve a place in every serious library of terrorism.' Critical Studies on Terrorism Volume I examined the policies and actions in the Eisenhower, Kennedy, and Johnson administrations that contributed to the creation of anti-American grievances which in turn fueled the rise of anti-American terrorism overseas and domestically during the Nixon, Ford, and Carter administrations. Volume II chronicles the high-water mark of anti-American terrorism overseas that occurred during the Reagan administration. The litany of terrorist attacks on US targets overseas during this period is well known and unmatched in American history: 1983 suicide attack on US Embassy Beirut, 1983 suicide attack on US Marine Barracks Beirut, 1983 suicide attack on US Embassy Kuwait, 1984 suicide attack on US Embassy Beirut, 1985 assault on the TWA counter at Rome airport, 1985 hijacking of TWA 847, 1986 mid-air bombing of TWA 840, 1988 mid-air bombing of Pan Am 103, and the 1982-1988 kidnappings of 18 Americans in Lebanon. This wave of anti-American terrorist attacks demanded an appropriate response. The Reagan administration proceeded to construct the most ambitious and costly counter-terrorism program in the pre-9/11 era. Although the terrorist threat was perceived to be in decline during the George H W Bush administration, it still had to deal with the potential terrorist threat emanating from the first Gulf War in 1990-1991, two assassination attempts on the president, and the ramifications of the Pan Am 103 bombing.

Traumatic Scar Tissue Management Nancy Keeney Smith, Catherine Ryan, 2016-03-01 The management of scar tissue is a huge and growing problem for massage and other manual therapists. Research has showed that appropriate massage treatment can have significant results both physically and psychologically. Existing books have chapters on the problem but there is no practical manual available on the subject at the present time which tells the therapist what to do (and what not to do). This book fills that gap, explaining the physiologic and pathophysiologic background, and providing practical guidance about how to help patients.

**Teaching & Researching Big History: Exploring a New Scholarly Field** Leonid Grinin, David Baker, Esther Quaedackers, Andrey Korotayev, 2014-06-30 According to the working definition of the International Big History Association, 'Big History seeks to understand the integrated history of the Cosmos, Earth, Life and Humanity, using the best available empirical evidence and scholarly methods.' In recent years Big History has been developing very fast indeed. Big History courses are taught in the schools and universities of several dozen countries. Hundreds of researchers are involved in studying and teaching Big History. The unique approach of Big History, the interdisciplinary genre of history that deals with the grand narrative of 13.8 billion years, has opened up a vast amount of research agendas. Big History brings together constantly updated information from the scientific disciplines and merges it with the contemplative realms of philosophy and the humanities. It also provides a connection between the past, present, and future. Big History is a colossal and extremely heterogeneous field of research encompassing all the forms of existence and all timescales. Unsurprisingly, Big History may be presented in very different aspects and facets. In this volume the Big History is presented and discussed in three different ways. In its first part, Big History is explored in terms of methodology, theories of knowledge, as well as showcasing the personal approach of scholars to Big History. The second section comprises such articles that could clarify Big History's main trends and laws. The third part of this book explores the nature of teaching Big History as well as profiling a number of educational methods. This volume will be useful both for those who study interdisciplinary macroproblems and for specialists working in focused directions, as well as for those who are interested in evolutionary issues of Astrophysics, Geology, Biology, History, Anthropology, Linguistics and other areas of study. More than that, this edition will challenge and excite your vision of your own life and the exciting new discoveries going on around us!
