*Evaluating Participatory Mapping Software* Charla M. Burnett, 2023-04-21 This volume provides a framework for evaluating geospatial software for participatory mapping. The evaluation is based on ten key indicators: ethics, cost, technical level, inclusiveness, data accuracy, data privacy, analytical capacity, visualization capacity, openness, and accessibility (i.e., mobile friendly or offline capabilities). Each application is evaluated by a user and cross analyzed with specific case studies of the software's real-world application. This framework does not discriminate against assessing volunteered geographic information (VGI) applications, as a form of participatory mapping, in circumstances that its application is spearheaded by underrepresented groups with the intent to empower and spark political or behavioral change within formal and informal institutions. Each chapter follows a strict template to ensure that the information within the volume can be updated periodically to match the ever-changing technological environment. The book covers ten different mapping applications with the goal of creating a comparative evaluation framework that can be easily interpreted by convening institutions and novice users. This will also help identify gaps in software for participatory mapping which will help to inform application development in the future and updates to current geospatial software.

*How to Write a Successful Research Grant Application* Willo Pequegnat, Ellen Stover, Cheryl Anne Boyce, 2010-11-02 Over the last fifty years behavioral and medical research has been generously supported by the federal government, private foundations, and other philanthropic organizations contributing to the development of a vibrant public health system both in the United States and worldwide. However, these funds are dwindling and to stay competitive, investigators must understand the funding environment and know how to translate their hypotheses into research grant applications that reviewers evaluate as having scientific merit. The Second Edition of 'How to Write a Successful Research Grant Application' is the only book of its kind written by federal research investigators which provides technical assistance for researchers applying for biobehavioral and psychosocial research funding and can give them an edge in this competitive environment. The book provides invaluable tips on all aspects of the art of grantsmanship, including: how to determine research opportunities and priorities, how to develop the different elements of an application, how to negotiate the electronic submission and review processes, and how to disseminate the findings. Charts, visual aids, Web links, an extensive real-world example of a research proposal with budget, and a So You Were Awarded Your Grant—Now What? chapter show prospective applicants how to: - Formulate a testworthy—and interesting—hypothesis. - Select the appropriate research mechanism. - Avoid common pitfalls in proposal writing. - Develop an adequate control group. - Conduct a rigorous qualitative inquiry. - Develop a budget justification of costs. - Develop a human subjects of animal welfare plan. - Write a data analytic plan. - Design a quality control/assurance program. - Read between the lines of a summary of the review of your application. Although its focus is on Public Health Service funding, 'How to Write a Successful Research Grant' is equally useful for all research proposals, including graduate students preparing a thesis or dissertation proposal. Service providers in community-based organizations and public health agencies will also find this a useful resource in preparing a proposal to compete for grant funds from state and community resources, non-government organizations, and foundations.

There is the supernatural power behind the name of Yeshua Messiah that most of us have yet to discover. The book will teach you how to use your spiritual authority as a child of God against the evil forces of darkness in the cosmic system. The book will show you the seven keys against witchcraft and demon powers, teach you how to break curses and setbacks caused by demonic manipulations in many homes and families. As we all know, our soul's salvation is a gift from the lord, but this does not negate the receiver's free choice. If we must set ourselves permanently liberated

We shall discover some of the basic strategies, spiritual methods, and techniques to achieve this freedom through this series. The same is true for many believers, including the apostle Peter, who once wrote and said these words from his own experience when he said: Who is he that will harm you if you be a follower of that which is good? (1st Peter 3: 13.KJV). You will know the seven keys against witchcraft powers and break generational curses that run through family members. We hope and pray that this unique book will empower you, the believers, to understand your divine authority and privilege as a child of God in a way you never thought possible.
