Game Theory for Networks RAHUL JAIN,Rajgopal Kannan,2012-05-31 This book constitutes the thoroughly refereed post-conference proceedings of the Second International Conference on Game Theory for Networks (GameNets 2011) held in Shanghai, China, April 16-18, 2011. The 45 revised full papers presented were carefully selected from numerous submissions and focus topics such as mechanism design, physical layer games, network mechanisms, stochastic and dynamic games, game-theoretic network models, cooperative games in networks, security games, spectrum sharing games, P2P and social networks and economics of network QoS.

Network-Based Governance in EC Law Maartje de Visser,2009-11-23 To strengthen the credibility of the EU and its policies, the European Community is increasingly concerned to emphasise effective enforcement of EC law. This book engages in the debate on the better application of European law by offering an integrated analysis of a new institutional arrangement - one that relies on networks grouping the Commission and national administrative authorities. Taking the traditional enforcement paradigms of decentralisation, centralisation and agency-based enforcement as starting points, their benefits and downsides are described and critiqued, and the author concludes that there is considerable room for improvement. The book then undertakes a comprehensive analysis of the network model to determine its core characteristics and assess its effectiveness. European competition law and electronic communications law are used as case studies because, inter alia, the networks there have developed an adequate level of sophistication. The book also employs a bottom-up approach, considering how four key Member States (France, Germany, the Netherlands and the United Kingdom) have given effect to the relevant European rules. At the core of the book is a critique of the wider normative attractiveness of the network model. The discussion is kaleidoscopic, engaging with a wide variety of notions including legitimacy, judicial review, subsidiarity, institutional balance and efficiency. The thrust of the book is that network-based governance deserves careful consideration as the model that is able to mediate the competing concerns of coherence for Internal Market reasons, and of diversity and respect for local autonomy. This book is useful for EC competition law and communications law practitioners, and those with a keen interest in institutional and administrative law.

OECD Digital Economy Outlook 2020 OECD,2020-11-27 The OECD Digital Economy Outlook 2020 examines trends and analyses emerging opportunities and challenges in the digital economy. This third edition of the OECD Digital Economy Outlook provides a holistic overview of converging trends, policy developments and data on both the supply and demand sides of the digital economy. It illustrates how the digital transformation is affecting economies and societies. Finally, it provides a special focus on how the COVID-19 pandemic is amplifying opportunities and challenges from the digital transformation.

Future Trends and Challenges for ICT Standardization Ramjee Prasad,2010 Future Trends and Challenges for ICT Standardization identifies the importance of ICT standardization for strengthening the Indian industrial and business sector through Global ICT Standardization Forum for India (GISFI-www.gisfi.org). It outlines the major challenges and trends in the ICT development worldwide while mapping the Indian efforts on the background of the overall progress. The technological areas covered are: - the need, importance, and management of radio spectrum, - the development of future radio access technologies, - the convergence of telecommunications and broadcasting, - the possibilities and challenges brought by the Internet of Things (IoT), - the environment sustainability through the use of Green ICT The motivation behind this book is to provide a more informed context to ensure sustainable scientific and economic growth. It puts forward the best research roadmaps, strategies, and challenges contributed by engineers from the industry, academia, and government, and it addresses the benefits to the entire society resulting from standardization.

Feuille de route environnement et numérique : 50 mesures pour un agenda national et européen sur un numérique responsable Marylou Le Roy,Philippine Régniez,Ménehould Michaud de Brisis,Annie Blandin-Obernesser,Sophie Flak,Hervé Pillaud,Thomas Landrain,Charles-Pierre Astolfi,2020-07-09 Le Conseil national du numérique a été saisi, en partenariat avec le Haut Conseil pour le Climat (HCC), afin d'élaborer une feuille de route déclinant des mesures opérationnelles sur le numérique et l'environnement ainsi qu'un avis sur les données environnementales d'intérêt général. Les travaux qui en sont issus ont été réalisés dans une démarche de co-construction avec une quarantaine d'acteurs des transitions numériques et écologiques, dans une perspective européenne. Publiée le 9 juillet 2020, la feuille de route « Environnement et numérique : 50 mesures pour un agenda national et européen sur un numérique responsable, c'est-à-dire sobre, et au service de la transition écologique et solidaire et des Objectifs de développement durable » est répartie en trois chantiers : Chantier 1 : un numérique sobre qui nécessite d'adopter le concept de sobriété numérique comme principe d'action pour réduire l'empreinte environnementale du numérique, et d'ici à 2030, atteindre zéro émission nette de gaz à effet de serre sans compensation et 100 % de biens et services numériques écoconçus Chantier 2 : un numérique au service de la transition écologique et solidaire pour donner un sens au numérique pour le mettre au service des objectifs de développement durable et, d'ici à 2040, réduire de manière substantielle les émissions de gaz à effet de serre grâce au numérique et réconcilier high-tech et low-tech autour de grands objectifs de la transition écologique et solidaire Chantier 3 : les outils et leviers pour un numérique responsable qui visent à mettre en œuvre un numérique responsable au service des objectifs de développement durable, et d'ici 2022, créer une boîte à outils d'actions transversales pour parvenir à la convergence des transitions écologique et numérique

Net Neutrality in Europe – La neutralité de l'Internet en Europe Alain Strowel,2013-10-28 La neutralité de l'Internet requiert de garantir aux usagers un accès égal à tous les services et contenus en ligne. En pratique, la gestion du trafic oblige les opérateurs à différencier certains paquets d'information circulant sur les réseaux, par exemple pour lutter contre les messages indésirables. Parfois le traitement différencié des contenus engendre des discriminations non justifiées. Ainsi, en est-il si un opérateur en place dégrade un service concurrent de téléphonie sur Internet, tel que Skype. Le droit de la concurrence permet a priori de sanctionner un tel comportement anti-concurrentiel. Mais cela suffit-il à assurer la neutralité des réseaux ? Par ailleurs, l'augmentation rapide du trafic et l'ampleur des investissements à faire dans les infrastructures du futur incitent les opérateurs à limiter les débits de base, tout en garantissant la qualité de services spécialisés, par exemple de vidéoconférence. Cette différenciation des offres a un prix. On s'éloigne du principe originel de l'Internet qui veut que toutes les communications soient traitées de la même manière. Depuis quelques années, des académiques et pionniers de l'Internet dénoncent le risque d'un Internet « à plusieurs vitesses ». Aujourd'hui, les voix des consommateurs se font entendre. Faut-il adopter une législation spécifique ? Le cadre actuel des télécommunications en Europe suffit-il pour garantir la neutralité ? Mais d'abord, comment définir la neutralité de l'Internet ? Telles sont quelques-unes des questions que cet ouvrage examine à un moment où la neutralité de l'Internet revient dans l'actualité. En juin 2013, la Commission européenne a en effet affiché sa volonté de légiférer en la matière. Le présent recueil de contributions vient donc à point nommé. This book summarizes the state of discussions regarding net neutrality in Europe. It comes at the time the European Commission intends to legislate to guarantee the right of all citizens to access the open Internet. Net neutrality is not only about how to ensure the fundamental right to receive and impart online information. The rules on the protection of consumers, by fostering transparency, also contribute to Internet neutrality and openness. Similarly competition law prohibits anti-competitive discrimination, including in Internet communications. Net neutrality thus appears at the juncture of various areas of the law. The contributions of this book compare the merits of various forms of regulation and discuss the policy dimensions of the net neutrality debate.

Look East to Act East Policy Gurudas Das,C. Joshua Thomas,2016-02-12 This volume captures the success of India's Look East Policy (LEP) in promoting economic engagement with neighbouring countries in Asia and simultaneously its limitations in propelling growth in the bordering North Eastern Region — India's bridge head to South East Asia. It analyses the instrumental role of LEP in bringing a tectonic shift in India's foreign trade by redirecting the focus from the West to the East, thus leading to a fundamental change in the nature of India's economic interdependence. Besides discussing foreign trade, it expounds as to how LEP made India play an important role in the emerging Asian security architecture and liberated Indian foreign policy from being centred on South Asia. The essays also enumerate the reasons for LEP's failure in the North Eastern Region and chart out actionable programmes for course correction that might be factored into its latest edition — the Act East Policy. This book will interest scholars and researchers of international relations, international trade and economics, politics, and particularly those concerned with Northeast India.

Broadband Growth and Policies in OECD Countries OECD,2008-06-27 Examines broadband developments and policies, and highlights challenges such as connecting users to fibre-based networks or coverage of rural areas.

The Cambridge History of the Novel in French Adam Watt,2021-02-25 This History is the first in a century to trace the development and impact of the novel in French from its beginnings to the present. Leading specialists explore how novelists writing in French have responded to the diverse personal, economic, socio-political, cultural-artistic and environmental factors that shaped their worlds. From the novel's medieval precursors to the impact of the internet, the History provides fresh accounts of canonical and lesser-known authors, offering a global perspective beyond the national borders of 'the Hexagon' to explore France's colonial past and its legacies. Accessible chapters range widely, including the French novel in Sub-Saharan Africa, data analysis of the novel system in the seventeenth century, social critique in women's writing, Sade's banned works and more. Highlighting continuities and divergence between and within different periods, this lively volume offers routes through a diverse literary landscape while encouraging comparison and connection-making between writers, works and historical periods.

The International Directory of Government 2021 Europa Publications,2021-08-04 The International Directory of Government is the definitive guide to people in power in every part of the world. All the top decision-makers are included in this one-volume publication, which brings together government institutions, agencies and personnel from the largest nations (China, India, Russia, etc.) to the smallest overseas dependencies (Guadeloupe, Guernsey and Christmas Island, etc). Institutional entries contain the names and titles of principal officials, postal, e-mail and internet addresses, telephone and fax numbers, and other relevant details. Key features: - comprehensive lists of government ministers and ministries - coverage of state-related agencies and other institutions arranged by subject heading - details of important state, provincial and regional administrations, including information on US states, Russian republics, and the states and territories of India.

Promoting Productive Cooperation Between Space Lawyers and Engineers Nakarada Pecujlic, Anja,Tugnoli, Matteo,2019-03-29 A major non-technical challenge of space activities is ensuring productive cooperation, communication, and understanding between the engineers who design the mission and the space lawyers who cover its relevant legal aspects. Though both groups usually attain some level of understanding, it is only achieved after many years of experience in the space industry and through repeated contact with topics relevant to their projects. A basic understanding of the most important legal and technical aspects acquired earlier in their careers can facilitate better cooperation and more efficient development of space projects. Promoting Productive Cooperation Between Space Lawyers and Engineers is a pivotal reference source that provides vital insights into basic legal and technical topics and challenges that occur while planning and conducting typical space activities. The book uses high-profile space missions as examples and highlights the major technical aspects of these missions and the legal issues applied to these missions. While highlighting topics such as planetary settlements, policy perspectives, and suborbital spaceflight, this publication is ideally designed for lawyers, engineers, academicians, students, and professionals.

Resolving Disputes in Telecommunications R.U.S Prasad,2010-11-03 The Indian telecommunication sector has seen far-reaching changes in the last two decades due to increasing globalization, rapid pace of technological innovations, and rising consumer demands. Myriad and complex problems have arisen as a result of these developments. Though attempts have been made to tackle these issues at the levels of policymaking, regulation, and dispute settlement, these have not been able to keep pace with the rapidly changing scenario, often leading to paralysing dispute situations. In this important and timely volume, the author focuses on the so far neglected area of dispute resolution. The work delves into the disputes arising from increased competition, heightened consumer expectations, and the need to balance competition and universal service obligation. Beginning with the theoretical underpinnings of dispute resolution, the author analyses various methods such as regulatory-based adjudication, alternative dispute resolution (ADR), and resolution by sector-specific tribunals. He compares the management and disputes resolution practices followed in countries such as the UK, France, Germany, Denmark, the USA, and Canada, to arrive at a framework for a more effective mode of dispute resolution.

The Contradictions of Media Power Des Freedman,2014-09-25 Media power is a crucial, although often taken for granted, concept. We assume, for example, that the media are 'powerful'; if they were not, why would there be so many controversies over the regulation, control and impact of communicative institutions and processes? Further, we assume that this 'power' is somehow problematic; audiences are often treated as highly susceptible to media influence and too much 'power' in the hands of one organization or individual is seen as risky and potentially dangerous. These concerns have been at the heart of recent controversies involving the relationships between media moguls and political elites, the consequences of phone hacking in the UK, and the emerging influence of social media as vital gatekeepers. Yet it is still not clear what we mean by media power or how effective it is. This book evaluates contrasting definitions of media power and looks at the key sites in which power is negotiated, concentrated and resisted - politically, technologically and economically. Combining an evaluation of both previous literature and new research, the book seeks to establish an understanding of media power which does justice to the complexities and contradictions of the contemporary social world. It will be important reading for undergraduates, postgraduates, researchers and activists alike.

Synthèses des États Généraux du numérique Charles-Pierre Astolfi,Vincent Toubiana,Marylou Le Roy,Nathalie Bouarour,Jean-Baptiste Manenti,Leila Amanar,Philippine Régniez,Myriam El Andaloussi,Joséphine Hurstel,Clément Le Ludec,2020-05-12 Le Conseil national du numérique publie la synthèse des consultations publiques des États généraux du numérique, menées autour de 6 thèmes principaux : Régulation des contenus illicites Enjeux de concurrence entre plateformes Modalités d'un observatoire des plateformes Surexposition aux écrans Statut des données d'intérêt général Travailleurs des plateformes Les « états généraux des nouvelles régulations du numérique » (EGNum), avaient été engagés sous l'égide du Premier ministre, avec pour objectif de nourrir un agenda public ambitieux et innovant, à la hauteur des défis numériques auxquels nos sociétés et nos économies sont confrontées. Ces états généraux avaient déjà donné lieu à de premières pistes proposées par l'administration, qui ont servi de base à la consultation publique pour laquelle le Conseil national du numérique a été saisi. Ces consultations ont été menées à la fois en présentiel et en ligne, par le biais notamment d'événements participatifs thématiques et la mise à disposition d'une « boîte à outils » pour faciliter l'organisation d'atelier-relais autour des thématiques suivantes : se protéger des contenus illicites tout en préservant la liberté d'expression ; questionner les limites des règles de concurrence traditionnelles face aux grandes entreprises numériques ; faire évoluer les instances publiques de régulation face à tous ces enjeux ; adapter notre modèle social aux travailleurs des plateformes ; inciter au partage des données qui présentent un intérêt collectif ; et enfin se prémunir de la surexposition aux écrans notamment des plus jeunes.
