Weapon of Choice Charles H. Briscoe, Richard L. Kiper, James A. Schroder, 2010-01 First published in 2003, this is the first unclassified official history authored by the U.S. Army Special Operations Command relating to Operation Enduring Freedom. Contains extensive maps and illustrations. Previously difficult to obtain, this extensive study shows what Army Special Operations Forces (ARSOF) accomplished to drive the Taliban from power and to destroy al-Qaeda and Taliban strongholds as part of the global war on terrorism during Operation Enduring Freedom.

A Different Kind of War Donald P. Wright, Martin E. Dempsey, 2010-07 Based on hundreds of oral interviews and unclassified documents, this study offers a comprehensive chronological narrative of the first four years of Operation Enduring Freedom.

Attitudes Aren't Free James E. Parco, 2010-09 *Attitudes Aren't Free: Thinking Deeply about Diversity in the US Armed Forces* emerged from a vision to collect essays from the brightest voices of experts across the range of contentious social issues to catalyze productive discussions between military members of all ranks and services. Forty-nine experts contributed to the following 29 chapters writing on the primary themes of religious expression, homosexuality, gender, race, and ethics. Chapters appearing in this volume passed the scrutiny of a double-blind peer-review by one or more referees from the board of reviewers. The chapters are largely written in a colloquial, intellectual op-ed fashion and capture a snapshot of the current discussions regarding a particular topic of interest to uniformed personnel, policy makers, and senior leaders. Each section seeks to frame the spectrum of perspectives captured within the current debates and lines of argument. Authors were specifically asked not to address all sides of the issue, but rather to produce a well-reasoned argument explaining why they believe their well-known position on an issue is in the best interests of the military members and make specific recommendations about how best to address the policy issues from their perspective. The volume is arranged in four primary sections by theme: Religious Expression, Homosexuality, Race and Gender, and Social Policy Perspectives. Within each section, readers will find multiple chapters—each embracing a different perspective surrounding the section's theme. Thus, because of the unbalanced nature of many of the individual chapters, it is critically important that readers focus on the entire spectrum of perspectives presented within a section to ensure they have the context necessary to frame any single perspective. Diversity of opinion has been the hallmark of the United States since its dramatic birth in 1776 and has continued unfettered through today where we now have developed the most innovative and effective military the world has ever known. Thus, it is imperative that we continue to reflect upon the diversity of ideas about how best to formulate the right social policy to ensure our service members can most effectively execute their missions.

Understanding War in Afghanistan Joseph J. Collins, 2011 This text aims to provide military leaders, civil servants, diplomats, and students with the intellectual basis that they need to begin to prepare for further study of or an assignment in Afghanistan.

Infidels Andrew Wheatcroft, 2005-05-03 Here is the first panoptic history of the long struggle between the Christian West and Islam. In this dazzlingly written, acutely nuanced account, Andrew Wheatcroft tracks a deep fault line of animosity between civilizations. He begins with a stunning account of the Battle of Lepanto in 1571, then turns to the main zones of conflict: Spain, from which the descendants of the Moors were eventually expelled; the Middle East, where Crusaders and Muslims clashed for years; and the Balkans, where distant memories spurred atrocities even into the twentieth century. Throughout, Wheatcroft delves beneath stereotypes, looking incisively at how images, ideas, language, and technology (from the printing press to the Internet), as well as politics, religion, and conquest, have allowed each side to demonize the other, revive old grievances, and fuel across centuries a seemingly unquenchable enmity. Finally, Wheatcroft tells how this fraught history led to our present maelstrom. We cannot, he argues, come to terms with today's perplexing animosities without confronting this dark past.

Great Commanders Christopher Richard Gabel, James H. Willbanks, 2012-01-01 This volume is not a study of the 'greatest' commanders; rather, it is an examination of commanders who should be considered great. The seven leaders examined, in various domains of ground, sea, and air, each in their own way successfully addressed the challenges of military endeavor in their time and changed the world in which they lived--Foreword.

U S Army in Operation AL FAJR Kendall D. Gott, John McCool, Combat Studies Institute (U.S.), 2006 Eyewitness to war interviews span a wide spectrum of participants, from commanders and senior non-commissioned officers at all levels to the first-hand accounts of combat and combat service support personnel on the battlefield.

The U.S. Army/Marine Corps Counterinsurgency Field Manual John A. United States Army, United States Marine Corps, 2008-09-15 When the U.S. military invaded Iraq, it lacked a common understanding of the problems inherent in counterinsurgency campaigns. It had neither studied them, nor developed doctrine and tactics to deal with them. It is fair to say that in 2003, most Army officers knew more about the U.S. Civil War than they did about counterinsurgency. The U.S. Army / Marine Corps Counterinsurgency Field Manual was written to fill that void. The result of unprecedented collaboration among top U.S. military experts, scholars, and practitioners in the field, the manual espouses an approach to combat that emphasizes constant adaptation and learning, the importance of decentralized decision-making, the need to understand local politics and customs, and the key role of intelligence in winning the support of the population. The manual also emphasizes the paradoxical and often counterintuitive nature of counterinsurgency operations: sometimes the more you protect your forces, the less secure you are; sometimes the more force you use, the less effective it is; sometimes doing nothing is the best reaction. An new introduction by Sarah Sewall, director of the Carr Center for Human Rights Policy at Harvard's Kennedy School of Government, places the manual in critical and historical perspective, explaining the significance and potential impact of this revolutionary challenge to conventional U.S. military doctrine. An attempt by our military to redefine itself in the aftermath of 9/11 and the new world of international terrorism, The U.S. Army / Marine Corps Counterinsurgency Field Manual will play a vital role in American military campaigns for years to come. The University of Chicago Press will donate a portion of the proceeds from this book to the Fisher House Foundation, a private-public partnership that supports the families of America's injured servicemen. Islamic Jurisprudence on the Regulation of Armed Conflict Nesrine Badawi, 2019-10-01 In *Islamic Jurisprudence on the Regulation of Armed Conflict: Text and Context*, Nesrine Badawi argues against the existence of a "true" interpretation of the rules regulating armed conflict in Islamic law. In a survey of formative and modern seminal legal works on the subject, the author sheds light on the role played by the sociopolitical context in shaping this branch of jurisprudence and offers a detailed examination of the internal deductive structures of these works.

Suicide Among the Armed Forces Antoon A. Leenaars, 2016-12-05 Not since the great military suicide epidemic of the American Civil War have we seen so many of our heroes, our soldiers and veterans, die by suicide. Why? War is violence. There is intent to cause death, or serious injury, or threat to the physical and psychological integrity of others. War stress is unforgiving. Suicide is an all too frequent response. Today, one member of the military dies by suicide every day. This is a new epidemic. This book addresses some tough questions: What do we know about suicides in the military? Are rates high? Or low? Is military suicide the same or different in the United States and Canada? Is military culture relevant? Do we know the causes, patterns, and associations? Is suicide among the armed forces similar to or different from suicide among civilians? Can it be altruistic? Through individual case studies and general/population approaches, we attempt to understand the cost of military service. It is especially through the personal stories of the great Civil War hero General Emory Upton, Admiral of the Navy Mike Boorda, and Hospital Corpsman Chris Purcell that we find answers. We learn there is a relative lack of understanding about military suicides, mainly due to the very complexity of suicide. The nature of suicide is not monolithic--it is multi-determined. Military service, we find, is a risk factor for suicide and suicidal behavior. Military veterans are twice as likely as

civilians to die by suicide. Posttraumatic stress disorder (PTSD) and traumatic brain Injury (TBI) are especially noted to be huge risk factors, but so are other physical and psychological injuries. Sadly, the aftershocks of war include not only suicides but also incarceration, motor vehicle accidents, homicides, homicide(s)-suicides, and many more faces of violence. And there are many more, uncounted, wounded and dead. The families of traumatized soldiers and veterans, too, are indirect victims of their traumatic experience and, for some, their suicides; there is secondary traumatization. Yet, as this book shows, we must not forget that despite the unbearable pain of war, soldiers, veterans, and their military families, including children, are typically resilient. They can survive! Without question, our vulnerable heroes and veterans are at risk for suicide. But there is secrecy surrounding this, which may well be the biggest barrier. The government, the Department of Defense, the military, veterans groups, survivors, health providers, and other stakeholders need to develop and support more research, more programs, and more care for suicidal and disabled armed services personnel, veterans, and survivors. This war stress needs to stop.

U.S. Marines in Afghanistan, 2001-2009 U S Marine Corps History Division,2017-02-05 This volume presents a collection of 38 articles, interviews, and speeches describing many aspects of the U.S. Marine Corps' participation in Operation Enduring Freedom from 2001 to 2009. This work is intended to serve as a general overview and provisional reference to inform both Marines and the general public until the History Division completes monographs dealing with major Marine Corps operations during the campaign. The accompanying annotated bibliography provides a detailed look at selected sources that currently exist until new scholarship and archival materials become available. From the Preface - From the outset, some experts doubted that the U.S. Marines Corps would play a major role in Afghanistan given the landlocked nature of the battlefield. Naval expeditionary Task Force 58 (TF-58) commanded by then-Brigadier General James N. Mattis silenced naysayers with the farthest ranging amphibious assault in Marine Corps/Navy history. In late November 2001, Mattis' force seized what became Forward Operating Base Rhino, Afghanistan, from naval shipping some 400 miles away. The historic assault not only blazed a path for follow-on forces, it also cut off fleeing al-Qaeda and Taliban elements and aided in the seizure of Kandahar. While Corps doctrine and culture advocates Marine employment as a fully integrated Marine air-ground task force (MAGTF), deployments to Afghanistan often reflected what former Commandant General Charles C. Krulak coined as the three-block war. Following TF-58's deployment during the initial take down of the Taliban regime, the MAGTF made few appearances in Afghanistan until 2008. Before then, subsequent Marine units often deployed as a single battalion under the command of the U.S. Army Combined Joint Task Force (CJTF) to provide security for provincial reconstruction teams. The Marine Corps also provided embedded training teams to train and mentor the fledgling Afghan National Army and Police. Aviation assets sporadically deployed to support the U.S.-led coalition mostly to conduct a specific mission or to bridge a gap in capability, such as close air support or electronic warfare to counter the improvised explosive device threat. From 2003 to late 2007, the national preoccupation with stabilizing Iraq focused most Marine Corps assets on stemming the insurgency, largely centered in the restive al-Anbar Province. As a result of the North Atlantic Treaty Organization (NATO) taking over command of Afghan operations and Marine Corps' commitments in Iraq, relatively few Marine units operated in Afghanistan from late 2006 to 2007. Although Marines first advocated shifting resources from al-Anbar to southern Afghanistan in early 2007, the George W. Bush administration delayed the Marine proposal for fear of losing the gains made as a result of Army General David H. Petraeus' surge strategy in Iraq. By late 2007, the situation in Afghanistan had deteriorated to the point that it inspired Rolling Stone to later publish the story How We Lost the War We Won. In recognition of the shifting tides in both Iraq and Afghanistan, the Bush administration began to transfer additional resources to Afghanistan in early 2008. The shift prompted senior Marines to again push for a more prominent role in the Afghan campaign, even proposing to take over the Afghan mission from the Army. . . .

Counterinsurgency in Iraq (2003-2006) Bruce R. Pirnie,Edward O'Connell,2008-01-25 Examines the deleterious effects of the U.S. failure to focus on protecting the Iraqi population for most of the military campaign in Iraq and analyzes the failure of a technologically driven counterinsurgency (COIN) approach. It outlines strategic considerations relative to COIN; presents an overview of the conflict in Iraq; describes implications for future operations; and offers recommendations to improve the U.S. capability to conduct COIN.
