Museums of Communism Stephen M. Norris, 2020-11-03 How did communities come to terms with the collapse of communism? In order to guide the wider narrative, many former communist countries constructed museums dedicated to chronicling their experiences. *Museums of Communism* explores the complicated intersection of history, commemoration, and victimization made evident in these museums constructed after 1991. While contributors from a diverse range of fields explore various museums and include nearly 90 photographs, a common denominator emerges: rather than focusing on artifacts and historical documents, these museums often privilege memories and stories. In doing so, the museums shift attention from experiences of guilt or collaboration to narratives of shared victimization under communist rule. As editor Stephen M. Norris demonstrates, these museums are often problematic at best and revisionist at worst. From occupation museums in the Baltic States to memorial museums in Ukraine, former secret police prisons in Romania, and nostalgic museums of everyday life in Russia, the sites considered offer new ways of understanding the challenges of separating memory and myth.

Intermarium Marek Jan Chodakiewicz, 2017-09-08 History and collective memories influence a nation, its culture, and institutions; hence, its domestic politics and foreign policy. That is the case in the Intermarium, the land between the Baltic and Black Seas in Eastern Europe. The area is the last unabashed rampart of Western Civilization in the East, and a point of convergence of disparate cultures. Marek Jan Chodakiewicz focuses on the Intermarium for several reasons. Most importantly because, as the inheritor of the freedom and rights stemming from the legacy of the Polish-Lithuanian/Ruthenian Commonwealth, it is culturally and ideologically

compatible with American national interests. It is also a gateway to both East and West. Since the Intermarium is the most stable part of the post-Soviet area, Chodakiewicz argues that the United States should focus on solidifying its influence there. The ongoing political and economic success of the Intermarium states under American sponsorship undermines the totalitarian enemies of freedom all over the world. As such, the area can act as a springboard to addressing the rest of the successor states, including those in the Caucasus, Central Asia, and the Russian Federation. Intermarium has operated successfully for several centuries. It is the most inclusive political concept within the framework of the Commonwealth. By reintroducing the concept of the Intermarium into intellectual discourse the author highlights the autonomous and independent nature of the area. This is a brilliant and innovative addition to European Studies and World Culture.

Trailblazing Mars Pat Duggins, 2010-09-19 Travel to and from Mars has long been a staple of science fiction. And yet the hurdles--both technological and financial--have kept human exploration of the red planet from becoming a reality. Trailblazing Mars offers an inside look at the current efforts to fulfill this dream. Award-winning journalist Pat Duggins examines the extreme new challenges that will be faced by astronauts on the journey there and back. They'll have to grow their own food, find their own water, and solve their own problems and emergencies without hope of rescue or re-supply. Mars travel will be more challenging and hazardous than settling the Old West--but we were not witness to the fate of the Donner Party on CNN. Can the technological hurdles be cleared? Will the public accept the very real possibility of astronaut death? Should a mission be publicly or privately funded? Is the science worth the cost? These and many other questions are

answered in Duggins's exciting new book.

Politics with a Human Face Arvydas Grišinas, 2018-03-19 Politics with a Human Face presents a holistic understanding of identity formation in post-Soviet Europe, arguing that since politics is fundamentally a human affair. In order to adequately understand it, one needs to understand its human side first. Drawing on the thought of Dilthey, Ricoeur and Plato, the author employs empathy as a method, together with visual and historical analysis, to analyse the role of human experience in post-Soviet politics. As a result,

the book offers a theoretical approach for assessing influence of the non-rationalistic factors, such as associative symbolism, human experience, political images and historical narratives, in both domestic and foreign affairs. A study at the juncture of Social Sciences and Humanities, *Politics with a Human Face* explores a number of cases, including Estonia, Lithuania, Poland and Russia, as well as the ongoing conflict in Ukraine, examining issues of liminal transition, 'far-right' movements, victimhood, ethnic conflict and political paradoxes. Seeking to shed light on the region's agency and perception of both its own political and existential situation, and that of the surrounding world, this book constitutes a timely and original contribution to understanding the post-Soviet Europe.

Gulag Voices J. Gheith, K. Jolluck, 2011-02-10 In this volume, the powerful voices of Gulag survivors become accessible to English-speaking audiences for the first time through oral histories, rather than written memoirs. It brings together interviews with men and women, members of the working class and intelligentsia, people who live in the major cities and those from the provinces, and from an array of corrective hard labor camps and prisons across the former Soviet Union. Its aims are threefold: 1) to give a sense of the range of the Gulag experience and its consequences for Russian society; 2) to make the Gulag relevant to English-speaking readers by offering comparisons to historical catastrophes they are likely to know more about, such as the Holocaust; and 3) to discuss issues of oral history and memory in the cultural context of Soviet and post-Soviet society.

Baseball in Europe Josh Chetwynd, 2019-10-04 With the success of The Netherlands in the World Baseball Classic, baseball in Europe has begun to receive more attention. But few realize just how far back the sport's history

stretches on the continent. Baseball has been played in Europe since the 1870s, and in several countries the players and devoted followers have included royalty, Hall of Famers from the U.S. major leagues, and captains of industry. Featuring approximately 80 new interviews and 70 new photos and images, this second edition builds extensively on the previous edition's country-by-country histories of more than 40 European nations. Also included are two new appendices on European players signed by MLB organizations and European countries' performance in worldwide rankings.

Oppositional Discourses and Democracies Michael Huspek, 2009-09-10 When citizens take to the streets or pack assembly halls or share their ideas through the minority press, they often give voice to truths and logic that have otherwise been given little or no airing through the available institutional channels offered by democratic states. Such discourses offer new rhetorical strategies for the expression of citizen desires, needs and emotions that otherwise go unrecognized and unaddressed. They also offer impetus for new forms of deliberation and informed action that can result in real political change. This collection explores the tensions between democratic states and the dynamics of citizen voice. In so doing, the collection addresses such questions as: What role do oppositional discourses play in increased democratization? Can oppositional discourses be sustained over time? How do states resist pressures to democratize? This volume will be of interest to students and scholars in Politics, Sociology, and Communication.

Biomechanical Microsystems Vytautas Ostasevicius, Giedrius Janusas, Arvydas Palevicius, Rimvydas Gaidys, Vytautas Jurenas, 2017-03-27 This book presents the most important aspects of analysis of dynamical processes taking place on the

human body surface. It provides an overview of the major devices that act as a prevention measure to boost a person's motivation for physical activity. A short overview of the most popular MEMS sensors for biomedical applications is given. The development and validation of a multi-level computational model that combines mathematical models of an accelerometer and reduced human body surface tissue is presented. Subsequently, results of finite element analysis are used together with experimental data to evaluate rheological properties of not only human skin but skeletal joints as well. Methodology of development of MOEMS displacement-pressure sensor and adaptation for real-time biological information monitoring, namely "ex vivo" and "in vitro" blood pulse type analysis, is described. Fundamental and conciliatory investigations, achieved knowledge and scientific experience about biologically adaptive multifunctional nanocomposite materials, their properties and synthesis compatibility, periodical microstructures, which may be used in various optical components for modern, productive sensors' formation technologies and their application in medicine, pharmacy industries and environmental monitoring, are presented and analyzed. This book also is aimed at research and development of vibrational energy harvester, which would convert ambient kinetic energy into electrical energy by means of the impact-type piezoelectric transducer. The book proposes possible prototypes of devices for non-invasive real-time artery pulse measurements and micro energy harvesting.

Lietuvybe Down Under Grazina Pranauskas, 2018-08-31 Lietuvybe Down Under is a book about the experiences of Lithuanian migrants to Australia, and specifically about the desire of migrants to 'feel' and 'be' Lithuanian while living away from their homeland. Lietuvybe embraces the desire to be

‘visible’ both within and outside the Lithuanian community through language and their traditions of song, dance, music and the arts. ‘This book should be read far and wide in Australia; it provides an opportunity to understand the hopes and expectations of migrants, as well as the pain, fear, racism, challenges, loss, nostalgia and confusion about “where is my true home?” that migrants experience.’ Catherine Malcolm, Victorian College of the Arts, University of Melbourne

Atmospheric Science at NASA Erik M. Conway, 2008-12-08 Honorable Mention, 2008 ASLI Choice Awards. Atmospheric Science Librarians International This book offers an informed and revealing account of NASA’s involvement in the scientific understanding of the Earth’s atmosphere. Since the nineteenth century, scientists have attempted to understand the complex processes of the Earth’s atmosphere and the weather created within it. This effort has evolved with the development of new technologies—from the first instrument-equipped weather balloons to multibillion-dollar meteorological satellite and planetary science programs. Erik M. Conway chronicles the history of atmospheric science at NASA, tracing the story from its beginnings in 1958, the International Geophysical Year, through to the present, focusing on NASA’s programs and research in meteorology, stratospheric ozone depletion, and planetary climates and global warming. But the story is not only a scientific one. NASA’s researchers operated within an often politically contentious environment. Although environmental issues garnered strong public and political support in the 1970s, the following decades saw increased opposition to environmentalism as a threat to free market capitalism. *Atmospheric Science at NASA* critically examines this politically controversial science, dissecting the often convoluted roles, motives, and

relationships of the various institutional actors involved—among them NASA, congressional appropriation committees, government weather and climate bureaus, and the military.

The Forest Brotherhood Dan Kaszeta, 2023-08-24 A common view is that the Second World War in Europe ended in May 1945. But fighting continued for over a decade in the Baltic states. Stuck between two totalitarian regimes—Stalin's USSR and Hitler's Reich—the populations of Estonia, Latvia and Lithuania had been subjected to a brutal Soviet occupation in 1940, Nazi invasion in 1941, and Soviet re-occupation in 1944, falsely branded as 'liberation'. Variousy labelled 'freedom fighters' or 'Nazi bandits' by historians, the Baltic partisans who would become known as the Forest Brothers fought a long campaign against occupation that eventually failed under the might of the USSR. Much of this history of armed resistance, which was also a front in the intelligence war between East and West, is little known outside the region. Treachery, betrayal, heroism and lost futures all play a role in this fascinating tale, as Dan Kaszeta explores themes of independence, nationalism, Baltic identity, the fluidity of boundaries in Eastern Europe, and the comparative weight of Nazi and Soviet oppression. Drawing on extensive archival material rarely seen outside the Baltic states, *The Forest Brotherhood* unpacks the forgotten story of this resistance movement, and reveals its continuing impact on today's world.

One Day We Will Live Without Fear Mark Harrison, 2015-12-01 What was life in the Soviet Union really like? Through a series of true stories, *One Day We Will Live Without Fear* describes what people's day-to-day life was like under the regime of the Soviet police state. Drawing on events from the 1930s through the 1970s, Mark Harrison shows how, by accident or design, people

became entangled in the workings of Soviet rule. The author outlines the seven principles on which that police state operated during its history, from the Bolshevik revolution of 1917 to the collapse of the Soviet Union in 1991, and illustrates them throughout the book. Well-known people appear in the stories, but the central characters are those who will have been remembered only within their families: a budding artist, an engineer, a pensioner, a government office worker, a teacher, a group of tourists. Those tales, based on historical records, shine a light on the many tragic, funny, and bizarre aspects of Soviet life.

The Sustainable Role of the Tree in Environmental Protection Technologies

Edita Baltrėnaitė, Pranas Baltrėnas, Arvydas Lietuvninkas, 2016-02-13 This monograph describes ways of using trees and their byproducts in environmental protection technologies and methodologies throughout their lifecycles. The tree, the planet's main source of biomass, is an indispensable tool for sustainable technologies, and the authors present a holistic picture of how and why in this volume. The authors describe the indispensable role of the living tree in phytoremediation and biomonitoring and detail the relationship of the tree with its surrounding ecosystem. The direct and indirect relationships of a tree at its vegetation period with various components of the ecosystem (i.e. atmosphere, hydrosphere, lithosphere and soil) contribute to the role of a tree as the medium for integrating aerogenic and edaphic pollutants. Trees phytostabilize pollutants in their organisms and remove them from the soil. The ability of some species of trees to reflect the quality of the environment makes a basis for the environmental bioindication, while quantitative representation of the chemical composition of the surrounding environment allows for the use of trees in biomonitoring.

Morphological features of trees (e.g. annual tree rings) allow us to observe environmental conditions in the past and retrospectively evaluate them. This monograph also details how wood products (e.g. biochar, chips, bark, etc.) of a tree after it has died are used in environmental technologies. Due to the specific morphological form and physical and chemical composition of wood products, they may be used as active materials in the technologies aimed at reducing pollution in an effective and sustainable manner.

Marija Gimbutas Rasa Navickaitė, 2022-12-23 This book is a biography and reception history of the Lithuanian-American archaeologist Marija Gimbutas (1921-1994). It presents the first transnational account of Gimbutas' life based on historical research, and an original examination of the impact of her ideas in various feminist contexts, both academic and popular. At the core of this book is a success story of an Eastern European woman who survived both Soviet and Nazi occupations of her homeland, lived as a displaced person in postwar Germany, and built her career and scholarly authority within the androcentric American academia. At the same time, it is also a story of a controversy, which followed Gimbutas' theory of Old Europe – a prehistoric civilization, characterized by peacefulness, egalitarianism, women's leadership, and the worship of the Great Goddess. First introduced in 1974, this theory inspired women's movements worldwide, but was harshly criticized by other archaeologists. This book examines the various intellectual contexts (feminist, nationalist, theoretical) in which Gimbutas'

ideas were formed, received, and interpreted, as well as appropriated for different political goals. This timely study will appeal to scholars and students in the following fields: history of archaeology, prehistoric archaeology, gender studies, feminist studies, women's history, Baltic studies, and religion and spirituality.

The Jews in Poland and Russia Antony Polonsky, 2012-02-09 A comprehensive socio-political, economic, and religious history - an important story whose relevance extends beyond the Jewish world or the bounds of east-central Europe.

Securing the Future National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, 2003-06-08 Based on the deliberations of a high-level international conference, this report summarizes the presentations of an exceptional group of experts, convened by Intel's Chairman Emeritus Gordon Moore and SEMATECH's Chairman Emeritus William Spencer. The report documents the critical technological challenges facing this key industry and the rapid growth in government-industry partnerships overseas to support centers of semiconductor research and production in national economies. Importantly, the report provides a series of recommendations designed to strengthen U.S. research in disciplines supporting the continued growth of semiconductor industry, an industry which has made major contributions to the remarkable increases in productivity in the U.S. economy.

Taming Nationalism? Political Community Building in the Post-Soviet Baltic States Dovile Budryte, 2017-05-15 Revisiting the process of political community building in Estonia, Latvia and Lithuania, this book analyzes the roles that international actors have played in these processes and assesses

the unintended consequences of this involvement. The study differs from other works on ethnic minorities and nationalism in the former Soviet Union by exploring the use of minority rights discourse and the salience of historical memory. Case studies examine the transformation of nationalism in Estonia, Latvia and Lithuania – all former Soviet republics – which have experienced Soviet nationalities policy first-hand. Primarily intended for an academic audience and practitioners interested in promoting tolerance in multi-ethnic societies, the book's historical narrative will also appeal to readers with a general interest in the former Soviet Union and post-Communism.
