The Mars Records Book 2 Stephanie Relfe,2002-09

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Great Demographic Reversal Charles Goodhart,Manoj Pradhan,2020-08-08

This original and panoramic book proposes that the underlying forces of demography and

globalisation will shortly reverse three multi-decade global trends – it will raise inflation and interest rates, but lead to a pullback in inequality. “Whatever the future holds”, the authors argue, “it will be nothing like the past”. Deflationary headwinds over the last three decades have been primarily due to an enormous surge in the world’s available labour supply, owing to very favourable demographic trends and the entry of China and Eastern Europe into the world’s trading system. This book demonstrates how these demographic trends are on the point of reversing sharply, coinciding with a retreat from globalisation. The result? Ageing can be expected to raise inflation and interest rates, bringing a slew of problems for an over-indebted world economy, but is also anticipated to increase the share of labour, so that inequality falls. Covering many social and political factors, as well as those that are more purely macroeconomic, the authors address topics including ageing, dementia, inequality, populism, retirement and debt finance, among others. This book will be of interest and understandable to anyone with an interest on where the world’s economy may be going.

Tackling massive and damaging migrations in the Mediterranean Francisco J. Girao,CN Giancarlo Ciappina,COL Florence Guillaume,LTCOL João da Sousa,BG Rossario Massino,María Muñoz,CN Manuel Rodríguez, African migration to Europe will have in 2050 enough strength to double its negative effects for both continents. In that year, UN forecasts Africa to lead global population growth, doubling its current inhabitants, from 1,200 million to 2,400 million people. Models predict that this spectacular upward trend will also continue in the second half of the 21st century. Massive and uncontrolled migratory phenomena damage both shores of the Mediterranean Sea and only mafias making business with human dreams and hopes get to benefit of it. That is the reason for

the term 'damaging' in our title: in its present form, the tens of thousands of displacements (materialized in almost 140.000 illegal EU exterior border and Schengen area crossings according to Frontex) and the hundreds of deaths they sadly trigger (IOM) , are obviously not freely desired by anyone but for those who make profit of them. What can we do, as civilizations, to order that disorder, to give hope and opportunities to our future? An interdisciplinary civil-military team was gathered by the four main official centres of military studies from SPA, FRA, ITA and POR to analyze the facts and produce solutions. A Brigadier General from the Italian Guardia di Finanza, a French Colonel, two Captains(N) from Spain and Italy, a Portuguese Lieutenant Colonel and two Spanish experts in security and geopolitics, try to give an answer to a problem that can compromise African-European future: How to cope with African migrations in the Mediterranean basin? Spoiler: an intercontinental joint venture may be the key

Massive Open Online Courses Paul Kim, 2014-11-20 Are MOOCs a catalyst for reimagining education, a sign of the increased corporatization of the education sector, or merely a well-publicized but passing trend? Massive Open Online Courses shares insights from multiple stakeholders on what MOOCs are now and could eventually become, providing those in higher education as well as K-12, military, government, and corporate training with an authoritative source on a wide range of key issues surrounding MOOCs. MOOCs, or Massive Open Online Courses, are a disruptive technology currently forcing a serious reconceptualization of accreditation, assessment, motivation and retention, technology-based instruction, and the overall student experience. In this timely volume, Paul Kim brings together experts from higher education, business, law, learning analytics

and other relevant areas to provide an evenhanded, research-based positioning of MOOCs within the existing educational technology landscape and a base for understanding whether they could reshape the future of education.

Italian Neofascism Anna Cento Bull, 2011-12 During the Cold War Italy witnessed the existence of an anomalous version of a civil conflict, defined as a 'creeping' or a 'low-intensity' civil war. Political violence escalated, including bomb attacks against civilians, starting with a massacre in Milan, on 12 December 1969, and culminating with the massacre in Bologna, on 2 August 1980. Making use of the literature on national reconciliation and narrative psychology theory, this book examines the fight over the 'judicial' and the 'historical' truth in Italy today, through a contrasting analysis of judicial findings and the 'narratives of victimhood' prevalent among representatives of both the post- and the neo-fascist right.

Mothers of Massive Resistance Elizabeth Gillespie McRae, 2018 Examining racial segregation from 1920s to the 1970s this book explores the grassroots workers who maintained the system of racial segregation. For decades white women performed duties that upheld white over black: censoring textbooks, deciding on the racial identity of their neighbors, celebrating school choice, and lobbying elected officials. They instilled beliefs in racial hierarchies in their children, built national networks, and experimented with a color-blind political discourse. White women's segregationist politics stretched across the nation, overlapping with and shaping the rise of the New Right.

Posthumanism and the Massive Open Online Course Jeremy Knox, 2016-01-29 Posthumanism and the Massive Open Online Course critiques the problematic reliance on

humanism that pervades online education and the MOOC, and explores theoretical frameworks that look beyond these limitations. While MOOCs (massive open online courses) have attracted significant academic and media attention, critical analyses of their development have been rare. Following an overview of MOOCs and their corporate means of promotion, this book unravels the tendencies in research and theory that continue to adopt normative views of user access, participation, and educational space in order to offer alternatives to the dominant understandings of community and authenticity in education.

User-Centered Design Strategies for Massive Open Online Courses (MOOCs)

Mendoza-Gonzalez, Ricardo, 2016-01-07 In today's society, educational opportunities have evolved beyond the traditional classroom setting. Most universities have implemented virtual learning environments in an effort to provide more opportunities for potential or current students seeking alternative and more affordable learning solutions. *User-Centered Design Strategies for Massive Open Online Courses (MOOCs)* focuses on the best practices and effective design of student interaction within virtual learning environments. Highlighting strategies from human-computer interaction experiences and user-centered models, as well as emergent approaches and implementation techniques, this reference publication is designed for computer science students, academics, researchers, instructional designers, IT professionals, software developers, and educators interested in mobile technologies, social learning, and educational inclusion.

Massive Open Online Courses and Higher Education Rebecca Bennett, Mike Kent, 2017-04-21 Since the first MOOC was launched at the University of Manitoba in

2008, this new form of the massification of higher education has been a rollercoaster ride for the university sector. The New York Times famously declared 2012 to be the year of the MOOC. However, by 2014, the number of academic leaders who believed the model was unsustainable doubled to more than 50%. While the MOOC hype has somewhat subsided, the attitudes and anxieties of this peak time can still be seen influencing universities and their administrations. This is the first volume that addresses Massive Open Online Courses from a post-MOOC perspective. We move beyond the initial hype and revolutionary promises of the peak-MOOC period and take a sober look at what endures in an area that is still rapidly growing, albeit without the headlines. This book explores the future of the MOOC in higher education by examining what went right, what went wrong and where to next for the massification of higher education and online learning and teaching. The chapters in this collection address these questions from a wide variety of different backgrounds, methodologies and regional perspectives. They explore learner experiences, the move towards course for credit, innovative design, transformations and implications of the MOOC in turn. This book is valuable reading for students and academics interested in education, eLearning, globalisation and information services.

More Than They Bargained For Jason Stein, Patrick Marley, 2013-03-22
parliamentary maneuvers, a camel slipping on icy Madison streets as union firefighters rushed to assist, massive nonviolent street protests, and a weeks-long occupation that blocked the marble halls of the Capitol and made its rotunda ring. Jason Stein and Patrick Marley, award-winning journalists for the Milwaukee Journal Sentinel, covered the fight firsthand. They center their account on the frantic efforts of state officials meeting openly

and in the Capitol's elegant backrooms as protesters demonstrated outside. Conducting new in-depth interviews with elected officials, labor leaders, cops, protestors, and other key figures, and drawing on new documents and their own years of experience as statehouse reporters, Stein and Marley have written a gripping account of the wildest sixteen months in Wisconsin politics since the era of Joe McCarthy.

Hydropolitical Vulnerability and Resilience Along International Waters, 2007 Water is a unique and vital source, for which there is no substitute. Sustainable development of this rich resource in the region is complex as the distribution of water to all nations is heterogeneous, which increases the risk of being used or adapted inequitably. In recent years the sustainability discourse has broadened to include human systems. The purpose of this publication on hydropolitical vulnerability and resilience along international is to warrant broader promotion and dissemination of assessed information and data in order to support informed policy-making and provide a model for the regions that face similar water challenges.

Mining of Massive Datasets Jure Leskovec, Anand Rajaraman, Jeffrey David Ullman, 2014-11-13 Now in its second edition, this book focuses on practical algorithms for mining data from even the largest datasets.

Massive/Micro Autoethnography Daniel X. Harris, Mary Elizabeth Luka, Annette N. Markham, 2022-11-25 This book presents the creative, arts-based and educative thinking resulting from a “21 day autoethnography challenge” set of self-guided prompts arising from the large-scale collaborative, creative, and global project to explore Massive and Microscopic Sensemaking during COVID-19 Times. It employs a guiding methodological

framework of critical autoethnography, narrating the macro and micro experiences of COVID-19 from a first-person, and critically, culturally-informed perspective. The book features chapters creatively responding to the 21-day pandemic experiment through digital autoethnographic artworks, writings, and collaborations. It allowed authors to build embodied sensibilities, practice autoethnographic forms of writing and making, and transform personal experiences through the COVID-19 moment into critical understanding of scale, sense-making, and the relationality of humans, nonhumans, and the planet.

Inorganic Massive Batteries Virginie Viallet, Benoit Fleutot, 2018-03-15 Since the 90s, the Li-ion batteries are the most commonly used energy storage systems. The demand for performance and safety is constantly growing, current commercial batteries based liquid electrolytes or gels may not be able to meet the needs of emerging applications such as for electric and hybrid vehicles and renewable energy storage , and it is therefore necessary to develop advanced storage systems with characteristics such that the highest density of energy technology, long life, low cost of production, little or no maintenance and high safety of use. Batteries all solid are a technology of choice to meet these requirements. In this technology, the electrolyte separator between the two electrodes is no longer a liquid medium but a solid.

Massive Change Bruce Mau, Jennifer Leonard, Institute Without Boundaries, 2004-10 Massive Change is a modern illustrated primer on the new inventions, technologies, and events that are affecting the human race worldwide. The book is a part of a broader research project by Bruce Mau Design intended to provoke debate and discussion about the familiar objects and techniques that are transforming our lives. In essays, interviews,

and provocative imagery aimed at a broad audience, Massive Change explores the changing force of design in the contemporary world, and in doing so expands the definition of design to include the built environment, transportation technologies, revolutionary materials, energy and information systems, and living organisms. The book is divided into 11 heavily illustrated sections covering major areas of change in contemporary society - such as urbanism and architecture, the military, health and living, and wealth and politics. introductory essay, extended captions, and interviews with leading thinkers, including engineers, designers, philosophers, scientists, architects, artists, and writers. Concluding the book is a graphic timeline of significant inventions and world events from 10,000 B.C. to the present. Massive Change is the umbrella name for wide-ranging research project initiated by Bruce Mau Design and the Institute Without Boundaries, a new post-graduate design program headquartered at his studio. The project will include not only this book but also a travelling exhibition, public events, an on-line forum, a documentary television project, posters, and a product line. The overall aim of the project is to explore the changing force of design in the contemporary world. The book focuses on the powerful, newly designed technologies and systems (and the failure of outmoded ones) that increasingly influence our daily lives. the debate about genetically modified foods, the race to decode human the human genome, the development and worldwide trafficking of sophisticated military weapons - even the increasingly intrusive security systems at airports: all are examples of massive changes that involve the field of design. The book presents images and text that explore the impact of these subjects, both the seemingly mundane as well as the mind-boggling and microscopic. As the text in

Massive Change explains: No longer associated simply with objects and appearances, design is increasingly understood in a much wider sense as the human capacity to plan and produce desired outcomes. The book is divided into 11 sections, each focusing on a specific economy at work in the world today, both the traditional (such as manufacturing), and the often-invisible (globalization and politics). The pages combine images, extended captions, general essays, and interviews in a clean, simple design. The imagery in Massive Change is irresistible, and stands alone as a compelling reason to own this book. beautiful. For example, a photo of a smoky blue blob, as the caption explains, is really Aerogel, a material developed by NASA to collect fast-moving space dust. And a featherless, naked chicken staring at us from the page is just that: a new, genetically engineered broiler that requires no plucking and yields more meat, a boon to poultry producers yet a frightening harbinger of our future food supply. Massive Change is a well designed, intelligent, visually provocative exploration of the myriad subjects percolating through popular culture: those we read about in magazines and on Web sites but rarely understand in any meaningful way. It poses the question: Now that the human race can do almost anything, what will we do next?

Race, Reason, and Massive Resistance David John Mays, 2008 These private writings by a prominent white southern lawyer offer insight into his state's embrace of massive white resistance following the 1954 Brown v. Board of Education ruling. David J. Mays of Richmond, Virginia, was a highly regarded attorney, a Pulitzer Prize-winning biographer, and a member of his city's political and social elite. He was also a diarist for most of his adult life. This volume comprises diary excerpts from the years 1954 to 1959. For much of this time Mays was counsel to the commission, chaired by state senator Garland Gray, that was charged with formulating Virginia's response to federal mandates concerning the integration of public schools. Later, Mays was involved in litigation triggered by that response. Mays chronicled the state's bitter and divisive shift away from the Gray Commission's proposal that school integration questions be settled at the local level. Instead, Virginia's arch-segregationists, led by U.S. senator Harry F. Byrd, championed a monolithic defiance of integration at the highest state and federal levels. Many leading Virginians of the time appear in Mays's diary, along with details of their roles in the battle against desegregation as it was fought in the media, courts, polls, and government back rooms. Mays's own racial attitudes were hardly progressive; yet his temperament and legal training put a relatively moderate public face on them. As James R. Sweeney notes, Mays's differences with extremists were about means more than ends--about "not the morality of Jim Crow but the best tactics for defending it."
