### **A Taste of Persia: An Introduction to Persian Cooking** Najmieh

Batmanglij, 2012-02-23 A Taste of Persia is a collection of authentic recipes from one of the world's oldest cuisines, chosen and adapted for today's lifestyle and kitchen. Here are light appetizers and kababs, hearty stews and rich, golden-crustured rices, among many other dishes, all fragrant with the distinctive herbs, spices, or fruits of Iran. Each recipe offers clear, easy-to-follow, step-by-step instructions. Most take less than an hour to prepare; many require only a few moments; many others can be made in advance. Besides its 100 recipes and 60 photographs, the book includes a useful dictionary of Persian cooking techniques and ingredients, a list of specialty stores around the nation that sell hard-to-find items, and a brief history of Persian cookery. Together these make a complete introduction to this wonderful cuisine.

**Empires of Ancient Persia** Michael Burgan, Thomas G. Urban, 2009 For almost 1,200 years, the Persians ruled a territory that stretched from the Black Sea into Central Asia, from India to Egypt and into the fringes of southern Europe. During that period from 550 BCE to 651 CE, the ancient Persians learned to cultivate crops such as wheat and barley and to domesticate animals; they also demonstrated their talents for architecture and art by building enormous palaces, such as at the site of Persepolis, and through intricate art painted on pottery. As their neighbors, particularly the

Macedonian prince Alexander the Great, grew stronger, ancient Persia struggled to maintain its authority. Despite their eventual decline, the Persian empires had significant influence on the ancient world, including the idea of worshipping a single god. As the first monotheistic religion, Zoroastrianism would lay the foundation for the development of Christianity, Islam, and Judaism. Empires of Ancient Persia looks at the rise and fall of the Persian empires, the daily life of the people, and their influence on subsequent civilizations.

Ctesias' 'History of Persia' Lloyd Llewellyn-Jones, James Robson, 2009-12-04  
Towards the end of the fifth century BC Ctesias of Cnidus wrote his 23 book History of Persia. Ctesias is a remarkable figure: he lived and worked in the Persian court and, as a doctor, tended to the world's most powerful kings and queens. His position gave him special insight into the workings of Persian court life and access to the gossip and scandal surrounding Persian history and court politics, past and present. His History of Persia was completed at a time when the Greeks were fascinated by Persia and seems very much to cater to contemporary interest in Persian wealth and opulence, powerful Persian women, the institution of the harem, kings and queens, eunuchs and secret plots. Presented here in English translation for the first time with commentaries, Ctesias offers a fascinating insight into Persia in the fifth

century BC.

**We Visit Kuwait** Kathleen Tracy, 2011 Kuwait is one of the smallest Arabic countries but one of the wealthiest per capita, thanks to huge reserves of oil beneath its sands. It is a country of contradictions. While the capital city is modern and sophisticated, the rest of the country remains mostly undeveloped desert, unchanged for thousands of years. Although an Islamic state, Kuwait is one of the most democratic Muslim countries, even though it has been ruled by the same royal family for two centuries. Nestled between Iraq and Saudi Arabia along the Persian Gulf, the area has been an important trade hub since the time of Alexander the Great. With its rich history, natural (if harsh) beauty, friendly citizens, and intriguing culture, Kuwait is full of surprises. Come take a tour of this fascinating country, where the past coexists with the present to create a unique destination in the Middle East.

**Globalisation, Religion & Development** Mike O'Donnell, Hoshang Noraiee, Dorrie Chetty, Elizabeth Waters, Samane Salimi-Tari, Şevket Alper Koç, Hakkı Cenk, Sermin Sarıca, Alexandra Kelbert, Horacio Gago Priale, Arzu Culhaci, Sibel Fettahoğlu, 2011 Globalisation, religion and development have sparked much interest and debates in the last two decades. The analysis of religion and especially Islam has been presented in a simplistic notion of linear development, and the supposed inability to adapt to modernity and capitalism. This journal will consider such views and assess their validity by focusing

on: Part 1: introducing the theoretical issues and debates surrounding globalisation, religion and development, illustrating the often-contested nature of the concepts, and considering the implications for modernity and development. Part 2: continuing with the same theme but focusing on gender and development, representation of women, the effect of modernisation on the increasing consumption of alcohol in Kazakhstan, women's access to higher education in revolutionary Iran and finally women and domestic violence. Part 3: focusing on case studies to explore the implications of globalisation, regionalisation and development in Iran, Turkey, Sudan, Peru and Senegal.

**Electronic Iran** Niki Akhavan, 2013-12-25 *Electronic Iran* introduces the concept of the Iranian Internet, a framework that captures interlinked, transnational networks of virtual and offline spaces. Taking her cues from early Internet ethnographies that stress the importance of treating the Internet as both a site and product of cultural production, accounts in media studies that highlight the continuities between old and new media, and a range of works that have made critical interventions in the field of Iranian studies, Niki Akhavan traces key developments and confronts conventional wisdom about digital media in general, and contemporary Iranian culture and politics in particular. Akhavan focuses largely on the years between 1998 and 2012 to reveal a diverse and combative virtual landscape where both geographically and ideologically dispersed individuals and groups deployed Internet technologies to variously construct, defend, and challenge

narratives of Iranian national identity, society, and politics. While it tempers celebratory claims that have dominated assessments of the Iranian Internet, *Electronic Iran* is ultimately optimistic in its outlook. As it exposes and assesses overlooked aspects of the Iranian Internet, the book sketches a more complete map of its dynamic landscape, and suggests that the transformative powers of digital media can only be developed and understood if attention is paid to both the specificities of new technologies as well as the local and transnational contexts in which they appear.

*The Nineties* Chuck Klosterman, 2023-01-31 An instant New York Times bestseller! From the bestselling author of *But What if We're Wrong*, a wise and funny reckoning with the decade that gave us slacker/grunge irony about the sin of trying too hard, during the greatest shift in human consciousness of any decade in American history. It was long ago, but not as long as it seems: The Berlin Wall fell and the Twin Towers collapsed. In between, one presidential election was allegedly decided by Ross Perot while another was plausibly decided by Ralph Nader. In the beginning, almost every name and address was listed in a phone book, and everyone answered their landlines because you didn't know who it was. By the end, exposing someone's address was an act of emotional violence, and nobody picked up their new cell phone if they didn't know who it was. The 90s brought about a revolution in the human condition we're still groping to understand. Happily, Chuck Klosterman is more than up to the job. Beyond epiphenomena like Cop Killer and Titanic

and Zima, there were wholesale shifts in how society was perceived: the rise of the internet, pre-9/11 politics, and the paradoxical belief that nothing was more humiliating than trying too hard. Pop culture accelerated without the aid of a machine that remembered everything, generating an odd comfort in never being certain about anything. On a 90's Thursday night, more people watched any random episode of Seinfeld than the finale of Game of Thrones. But nobody thought that was important; if you missed it, you simply missed it. It was the last era that held to the idea of a true, hegemonic mainstream before it all began to fracture, whether you found a home in it or defined yourself against it. In The Nineties, Chuck Klosterman makes a home in all of it: the film, the music, the sports, the TV, the politics, the changes regarding race and class and sexuality, the yin/yang of Oprah and Alan Greenspan. In perhaps no other book ever written would a sentence like, "The video for 'Smells Like Teen Spirit' was not more consequential than the reunification of Germany" make complete sense. Chuck Klosterman has written a multi-dimensional masterpiece, a work of synthesis so smart and delightful that future historians might well refer to this entire period as Klostermanian.

**Covert Relationship** Bryan R. Gibson, 2010-08-19 This modern study of the Iran-Iraq War utilizes newly available primary materials to analyze American policy towards the war and question the veracity of the United States' claims of strict neutrality. The Iran-Iraq War lasted from September 1980 to August

1988, dominating the landscape of the Middle East and polarizing many of the world's nations for nearly a decade. This new work analyzes the United States' policy towards this vicious and extremely costly war, and questions the veracity of America's claims of strict neutrality. The contents of *Covert Relationship: American Foreign Policy, Intelligence, and the Iran-Iraq War, 1980-1988* can be broken down into five sections: the conflict's origins, the Carter administration's response to the war, the Reagan administration's actions, changes to American policy during the Iran-Contra Affair, and the collapse of neutrality in the final two years of the war. The author boldly refutes the arguments of other authors about the war, and provides timely and relevant insights regarding American-Iraqi relations in light of the U.S. invasion of Iraq.

**Screenwriting in a Digital Era** Kathryn Millard, 2014-03-07 *Screenwriting in a Digital Era* examines the practices of writing for the screen from early Hollywood to the new realism. Looking back to prehistories of the form, Kathryn Millard links screenwriting to visual and oral storytelling around the globe, and explores new methods of collaboration and authorship in the digital environment.

**Empire of Alexander the Great** Debra Skelton, Pamela Dell, 2009 This volume looks at what made Alexander a brilliant military tactician and a charismatic leader. It also explores what the Eastern world learned through contact with Alexander, and what Alexander brought to the West from the Persian Empire.

Faithful Education Ali Riaz, 2008-09-03 In the wake of the terrorist attacks on September 11, 2001, discussions on ties between Islamic religious education institutions, namely madrassahs, and transnational terrorist groups have featured prominently in the Western media. In the frenzied coverage of events, however, vital questions have been overlooked: What do we know about the madrassahs? Should Western policymakers be alarmed by the recent increase in the number of these institutions in Muslim countries? Is there any connection between them and the global jihad? Ali Riaz responds to these questions through an in-depth examination of the madraassahs in Pakistan, Bangladesh, and India. In *Faithful Education*, he examines these institutions and their roles in relation to current international politics.

**Advances in Iranian Linguistics** Richard K. Larson, Sedigheh Moradi, Vida Samiian, 2020-07-15 This volume brings together selected papers from the first North American Conference in Iranian Linguistics, which was organized by the linguistics department at Stony Brook University. Papers were selected to illustrate the range of frameworks, diverse areas of research and how the boundaries of linguistic analysis of Iranian languages have expanded over the years. The contributions collected in this volume address advancing research and complex methodological explorations in a broad range of topics in Persian syntax, morphology, phonology, semantics, typology and classification, as well as historical linguistics. Some of the papers also investigate less-studied and endangered Iranian languages such as Tat, Gilaki and Mazandarani,

Sorani and Kurmanji Kurdish, and Zazaki. The volume will be of value to scholars in theoretical frameworks as well as those with typological and diachronic perspectives, and in particular to those working in Iranian linguistics.

**Journalism in Iran** Hossein Shahidi, 2007-05-11 Focusing on newspapers, radio and television, this book provides the first systematic investigation of the development of journalism in Iran following the 1979 Revolution and the establishment of the Islamic Revolution.

The World's Future Crisis: Extractive Resources Depletion Shahla Seifi, 2021-10-01 This book focuses mainly on strategic decision making at a global level, which is rarely considered in approaches to sustainability. This book makes a unique contribution as the work looks at global consequences of mineral exhaustion and steps that can be taken to alleviate the impending problems. This book highlights how sustainability has become one of the most important issues for businesses, governments and society at large. This book explores the topic of sustainability as one that is under much debate as to what it actually is and how it can be achieved, but it is completely evident that the resources of the planet are fixed in quantity, and once used, cannot be reused except through being reused in one form or another. This is particularly true of the mineral resources of the planet. These are finite in quantity, and once fully extracted, extra quantities are

no longer available for future use. This book argues and presents evidence that the remaining mineral resources are diminishing significantly and heading towards exhaustion. Once mined and consumed, they are no longer available for future use other than what can be recycled and reused. This book demonstrates that future scarcity means that best use must be made of what exists, as sustainability depends upon this, and best use is defined as utility rather than economic value, which must be considered at a global level rather than a national level. Moreover, sustainability depends upon both availability in the present and in the future, so the use of resources requires attention to the future as well as to the present. This book investigates the alternative methods of achieving the global distribution of these mineral resources and proposes an optimum solution. This book adds to the discourse through the understanding of the importance of the depletion and finiteness of raw materials and their use for the present and the future, in order to achieve and maintain sustainability.

**How Wars Are Won** Bevin Alexander, 2007-12-18 Even as we head into twenty-first-century warfare, thirteen time-tested rules for waging war remain relevant. Both timely and timeless, *How Wars Are Won* illuminates the thirteen essential rules for success on the battlefield that have evolved from ancient times until the present day. Acclaimed military historian Bevin Alexander's incisive and vivid analyses of famous battles throughout the ages show how the greatest commanders—from Alexander the Great to Douglas MacArthur—have

applied these rules. For example: • Feign retreat: Pretend defeat, fake a retreat, then ambush the enemy while being pursued. Used to devastating effect by the North Vietnamese against U.S. forces during the Vietnam War. • Strike at enemy weakness: Avoid the enemy's strength entirely by refusing to fight pitched battles, a method that has run alongside conventional war from the earliest days of human conflict. Brilliantly applied by Mao Zedong to defeat the Chinese Nationalists. • Defend, then attack: Gain possession of a superior weapon or tactical system, induce the enemy to launch a fruitless attack, then go on the offensive. Employed repeatedly against the Goths by the Eastern Roman general Belisarius to reclaim vast stretches of the Roman Empire. The lessons of history revealed in these pages can be used to shape the strategies needed to win the conflicts of today.

Soup Through the Ages Victoria R. Rumble, 2009-08-11 As cooking advanced from simply placing wild grains, seeds, or meat in or near a fire to following some vague notion of food as a pleasing experience, soup—the world's first prepared dish—became the unpretentious comfort food for all of civilization. This book provides a comprehensive and worldwide culinary history of soup from ancient times. Appendices detail vegetables and herbs used in centuries-old soup traditions and offer dozens of recipes from the medieval era through World War II.

**Is Cpec Economic Corridor Or a Strategic Game Plan?** Dr Shabir Choudhry, 2017-06-16 CPEC is no doubt a big project with many dimensions and

many targets. It is hailed as a game changer. However, debate still goes on in Pakistan and around the globe, about whose favor the game will change. As a weak partner in any game, trade or pact does not dictate terms or win the game.

Persian Historiography to the End of the Twelfth Century Julie Scott Meisami, 1999 This study answers questions and addresses issues relating to the motivation for writing these works; its purpose; the role of the author; patrons and audiences; the choice of language; the place of historical writing in the debate over the suitability of Persian for scholarly writing.
