Sweet Dreams Are Made of These D.C.S., 2014-07-01 My name is Dora Crystal Solis and I have lived in Superior, AZ with family and friends my whole life. I have always been fascinated with science fiction ever since I've seen Star Wars and I have always been a fan of Anne McCaffrey's books and characters. She has been my inspiration for writing science fiction. On the fantasy side mainly reading and hearing the different versions of fairy tales and reading stories of knights, princesses, princes, all the mythical creatures and the like have been my inspiration for that form of writing as well as dreaming about this kind of stuff. This story officially took off when my cousin Brittney (who I co-wrote this with) both decided that we wanted to turn this into a full fledged book which at first turned into a story she wrote for school, and then the characters and the plot changed and blossomed to what is now about five years later. I currently have another book out: Finding My Way to the Lord this is my first Christian Inspirational book, with some more to come. I even have a journal out entitled Question & Answer Journal with some more journals to come, more like it possibly and some dream ones that I'm almost done with. They are available at the following websites: www2.xlibris.com, amazon.com and barnesandnoble.com

Handbook of Bioplastics and Biocomposites Engineering Applications Srikanth Pilla, 2011-09-15 This Handbook is the first to explore the extensive applications made with bioplastics & biocomposites for the packaging, automotive, biomedical, and construction industries. Bioplastics and biocomposites are becoming increasingly prominent because synthetic plastics and glass fiber composites are neither sustainable nor environmentally friendly. The Handbook of Bioplastics and Biocomposites Engineering Applications brings together scientists from academia and industry to report on current research and applications in the bioplastics and biocomposites arena. This new science is interdisciplinary and integrates pure and applied sciences such as chemistry, engineering and materials science. The Handbook focuses on five main categories of applications: Packaging; Civil Engineering; Biomedical; Automotive; General Engineering. The majority of the chapters review the properties, processing, characterization, synthesis and applications of the bio-based and biodegradable polymers and composites including: Polymers such as polylactic acid (PLA), polyhydroxybutyrate (PHB), guar gum based plastics, cellulose polyesters, starch based bioplastics, vegetable oil derived bioplastics, biopolyethylene, chitosan, etc. Thermoplastic and thermosetting bioplastics and biocomposites with a focus on the automobile industry. The ways how to improve the properties of bioplastics, polymer blends, and biocomposites by combining them with both synthetic and natural fillers and reinforcements such as nanoclays, nanotubes (CNTs), and natural fibers (both wood and plant fibers). Studies that expand the boundaries of bioplastics that will allow for the new materials to be applied to most generic engineering applications. The Handbook will be of central interest to engineers, scientists and researchers who are working in the fields of bioplastics, biocomposites, biomaterials for biomedical engineering, biochemistry, and materials science. The book will also be of great importance to engineers in many industries including automotive, biomedical, construction, and food packaging.

The Future of the Public's Health in the 21st Century Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on Assuring the Health of the Public in the 21st Century, 2003-03-01 The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

An Introduction to Sustainable Transportation Preston L. Schiller, Jeffrey R. Kenworthy, 2010-08-12 Transportation plays a substantial role in the modern world; it provides tremendous benefits to society, but it also imposes significant economic, social and environmental costs. Sustainable transport planning requires integrating environmental, social, and economic factors in order to develop optimal solutions to our many pressing issues, especially carbon emissions and climate change. This essential multi-authored work reflects a new sustainable transportation planning paradigm. It explores the concepts of sustainable development and sustainable transportation, describes practical techniques for comprehensive evaluation, provides tools for multi-modal transport planning, and presents innovative mobility

management solutions to transportation problems. Students of various disciplines, planners, policymakers and concerned citizens will find many of its provocative ideas and approaches of considerable value as they engage in the processes of understanding and changing transportation towards greater sustainability. This text reflects a fundamental change in transportation decision making. It focuses on accessibility rather than mobility, emphasizes the need to expand the range of options and impacts considered in analysis, and provides practical tools to allow planners, policy makers and the general public to determine the best solution to the transportation problems facing a community. The book starts by placing transportation within the broader sustainability discussion, emphasising a comprehensive approach to sustainability planning and introducing the notion of 'regenerative transportation'. In sections on policymaking and planning the book examines how decisions are currently, and how they should be, made - explaining the complex and often misunderstood area of public participation. The authors explain demand management as applied to transportation and present lessons from other public arenas and areas of application, especially in urban-suburban areas. The text takes readers through each and every mode of transport, beginning with human-powered modes and ending in motorized modes, including marine and air transport. The modes are analyzed separately and in comparison with others according to several criteria: Capacity/utility/functionality considerations; infrastructure demands; resource consumption; land use considerations; pollution; and costs. In ways that non-technically trained readers as well as planning students professionals can find useful the book includes guidance on how to optimize transportation systems; balancing economic, social and environmental objectives while creating just, robust, and diverse, rather than one-size-fits-all, solutions. The modes are grouped and compared within their respective contexts, and there is vital discussion and differentiation between passenger and freight-goods transport. The final section develops a comprehensive summary of the previous chapters and develops arguments for sustainable transportation policymaking and integrated planning, providing international examples and case studies and extracting from them general applications for integrated sustainable transportation. Featuring extensive international examples and case-studies, textboxes, graphics, recommended reading and end of chapter questions, the authors draw on considerable teaching and researching experience to present an essential, ground-breaking and authoritative text on sustainable transport.

PrayerStreaming Janet Holm McHenry, 2005-08-16 Pray Your Way Through Your Day. More than two thousand years ago Jesus taught about the importance of prayer and the apostle Paul urged Christians to "pray without ceasing." Yet a rewarding prayer life seems almost impossible for those of us juggling busy schedules, family needs, friendships, home tasks, or a demanding job. We'd love to engage constantly with God: such as when we're working, driving carpool, or folding socks. But how can we, when we spend so much of our days just racing from one thing to another? The author of three other books on prayer, Janet Holm McHenry set out on a personal journey to learn how to draw even closer to God through this crucial spiritual discipline. Her findings led to PrayerStreaming, a life-changing guide to praying through the clutter and clatter of everyday life. Tap into History's Best Spiritual Wisdom Regarding Prayer. Drawing from eight of the most respected and time-tested spiritual classics on the subject of prayer, as well as personal experiences of deepened intimacy with God, Janet Holm McHenry illustrates that incorporating prayer into the rhythms of life is in fact far easier than you think—and more beneficial than you could ever dream

Environmental and Health Regulation in the United States and the European Union M. Smith, 2012-03-12 During the first decade of the twenty-first century, the United States increasingly has relaxed its regulatory posture in the face of critical challenges to public health and the environment. This is true for regulation of

recycling of end-of-life products, including autos and electronic components; potentially hazardous chemicals; and health claims on food labels. Coincidentally, the European Union has gravitated toward more restrictive regulation in these very same areas. How might we explain these diverging regulatory trajectories of the world's two largest market economies in an era of rising public awareness of dangers to the public and the planet? The explanation derives not from cultural differences in willingness to tolerate risk, but rather from distinctive regulatory tradeoffs - between environment and competitiveness in the United States and environment, competitiveness, and integration in the EU.

Marketing Asian Places Philip Kotler, 2002 At the beginning of the 21st century, headlines report how cities are going bankrupt, states are running large deficits and nations are stuck in high debt and stagnation. This text argues that thousands of places are in crisis and can no longer rely on national policies for protection. The authors show how places in Asia can become attractive products by effectively communicating their special qualities and attracting investment.

What Dying People Want Dr. David Kuhl, 2011-07-27 An internationally renowned palliative care physician offers guidance on living with a terminal illness. Based on research funded by the Soros Foundation and extensive interviews with dying people. A profound and practical book about living with a terminal illness over a long period of time. It offers guidance, solace, and helpful strategies for people who are terminally ill, their families and caregivers. Facing death results in more fear and anxiety than any other human experience. Western medicine has accomplished a great deal in addressing physical pain and controlling symptoms for people with a terminal illness, but much slower progress has been made in understanding and alleviating psychological and spiritual distress. In *What Dying People Want*, Dr. David Kuhl begins to bridge that gap. He does so by addressing end-of-life realities - physical, psychological and spiritual - through his own experiences as a doctor and through the words and experiences of people who know that they are dying. He presents ways of addressing the pain, of finding new life in the process of dying and of understanding the inner reality of living with a terminal illness. He acknowledges the despair and recognizes the desire for hope and meaning. Dr. Kuhl also makes the provocative case that insensitive communication by doctors creates more suffering for patients than either the illness or the knowledge of impending death, and offers both the dying and their caregivers guidance on preventing painful interactions. He provides ways of speaking about difficult topics with physicians, family members, friends and those who have a terminal illness. "This book started with a research question: What is the daily experience of living with a terminal illness? How does that experience affect your sense of self, your relationship with others, and your understanding of the spiritual? Many of those I interviewed asked me to share what they had given me with others who would follow - those with a terminal illness as well as their friends and family members who would care for them and about them. They asked specifically that I write a book for a general audience, and not only for my colleagues in the medical profession. This is the book that grew out of that research." - Dr. David Kuhl

All or Nothing Jessica Warner, 2010-01-26 A completely original exploration of the abstinence movement in America - from alcohol to sex to meat. America's long love affair with abstinence goes back to the early nineteenth century, when thousands of men and women suddenly stopped drinking hard liquor. Consistency then demanded that they give up all their other vices - beer and cider, tobacco, coffee, meat, pickles, pies, masturbation, and more. Two centuries later, the ideal of abstinence has lost none of its power to influence how Americans live - and how they want you to live. With her trademark wit and irony, acclaimed author Jessica Warner tells the story of one of America's most enduring and powerful ideals. There are many surprises along the way, starting with the abolitionists, feminists, and other do-gooders who were the first - and most thoroughgoing - of America's abstainers. And always there are the colourful people who brought the idea to life - the visionaries, preachers, college professors, feminists, and cranks who practiced what they preached.

Purity, Power, and Pentecostal Light Christopher Jon Branstetter, 2012-03-01 Around the turn of the twentieth century, revivalist Protestantism in America splintered into multiple pieces. Few persons of that era knew as many of the central figures of the splinter groups as Aaron Merritt Hills. Originally a Congregationalist who studied under Finney at Oberlin, Hills was a dyed-in-the-wool postmillennial revivalist until his death in 1935. While a Congregationalist, he befriended Reuben A. Torrey and made an enemy of Washington Gladden. In 1895 he joined the Holiness Movement after his experience of Spirit baptism. For the next forty years he founded colleges, held holiness revivals in both America and Britain, and wrote voluminously. While Hills himself is a lesser-known figure in the story of American Christianity, because of the many embroilments of his life, his story offers a unique window into the relationship between the Holiness Movement, Fundamentalism, Pentecostalism, American liberalism, and the Social Gospel Movement.
