India's Foreign Policy Discourse and its Conceptions of World Order Thorsten Wojczewski, 2018-06-27 Given India's growing power and aspirations in world politics, there has been increasing interest among practitioners and scholars of international relations (IR) in how India views the world. This book offers the first systematic investigation of the world order models in India's foreign policy discourse. By examining how the signifier 'world order' is endowed with meaning in the discourse, it moves beyond Western-centric IR and sheds light on how a state located outside the Western 'core' conceptualizes world order. Drawing on poststructuralism and discourse theory, the book proposes a novel analytical framework for studying foreign policy discourses and understanding the changes and continuities in India's post-cold war foreign policy. It shows that foreign policy and world order have been crucial sites for the (re)production of India's identity by drawing a political frontier between the Self and a set of Others and placing India into a system of differences that constitutes 'what India is'. This text will be of key interest to scholars and students of Indian foreign policy, foreign policy analysis, South Asian studies, IR and IR theory, international political thought and global order studies.

Artificial Intelligence and Machine Learning-Powered Smart Finance Taneja, Sanjay, Singh, Amandeep, Kumar, Pawan, 2024-02-12 In the field of finance, the pervasive influence of algorithms has transformed the very fabric of the industry. Today, over 75% of trades are orchestrated by algorithms, making them the linchpin for trade automation, predictions, and decision-making. This algorithmic reliance, while propelling financial services into unprecedented efficiency, has also ushered in a host of challenges. As the financial sector becomes increasingly algorithm-driven, concerns about risk assessment, market manipulation, and the ethical implications of automated decision-making have taken center stage. *Artificial Intelligence and Machine Learning-Powered Smart Finance*, meticulously examines the intersection of computational finance and advanced algorithms and the challenges associated with this technology. As algorithms permeate various facets of financial services, the book takes a deep dive into their applications, spanning forecasting, portfolio optimization, market trends analysis, and cryptoanalysis. It sheds light on the role of AI-based algorithms in personnel selection, implementing trusted financial services, developing recommendation systems for financial platforms, and detecting fraud, presenting a compelling case for the integration of innovative solutions in the financial sector. As the book unravels the intricate tapestry of algorithmic applications in finance, it also illuminates the ethical considerations and governance frameworks essential for navigating the delicate balance between technological innovation and responsible financial practices.

Axis of Hope Catherine Z. Sameh, 2019-12-02 Political tensions between Iran and the United States in the post-9/11 period and the Global War on Terror have set the stage for Iranian women's rights activists inside and outside Iran as they seek full legal equality under the Islamic Republic. *Axis of Hope* recounts activists' struggles through critical analysis of their narratives, including the One Million Signatures Campaign to End Discriminatory Law, the memoirs of human rights lawyer and Nobel Prize-winner Shirin Ebadi, and the life story of feminist Mahboubeh Abbasgholizadeh and her activist project ZananTV. Catherine Sameh examines how Iranian women's rights activists have cultivated ways of thinking of and being with each other that rupture the relentless difference-making and violence of coloniality through local and transnational networks along axes of feminist solidarity, friendship, and love. Crucial to countering despair and cynicism about Iran as well as the dangerous interventions by Western powers "on behalf of" Iranians, activists' experiences speak to the possibilities and challenges of transnational alliances in confronting oppressive regimes. These stories are particularly germane in such precarious times, marked by war, isolation, sanctions, and the intense demonization of Iranians and Muslims, as well as authoritarianism, militarism, and patriarchal nationalisms around the world. Situating postreform women's rights activism within the unfolding, decades-long project to democratize Iran from within, *Axis of Hope* makes a timely contribution to studies of feminist movements, women's human rights in Muslim contexts, activism and new media, and the relationship between activism, civil society, and the state.

Cosmopatriots ,2015-06-29 This volume analyzes mediated articulations of "cosmopatriotism" in East and South-East Asian popular cultures and arts. *Cosmopatriots* navigate between a loyalty to the home country and a sense of longing for and belonging to the world. Rather than searching for the truly globalized cosmopolitans, the authors of this collection look for the postcolonial, rooted cosmopolitans who insist on thinking and feeling simultaneously beyond and within the nation. The cultural sites they discuss include Hong Kong, Indonesia, China, Singapore, the United States, South Korea and Australia. They show how media from both sides of the arbitrary divide between high art and popular culture – including film, literature, the fine arts, radio, music, television and mobile phones – function as vehicles for the creation and expression of, or reflection upon, intersections between patriotism and cosmopolitanism.

India's Approach to Border Management Pushpita Das, 2022-12-29 This book attempts to provide a comprehensive understanding of the circumstances which have shaped India's approach towards its international borders and the framework it has developed to better manage its borders. The book argues that persistence of various cross-border threats and challenges and an absence of robust intra-regional trade among its neighbouring countries forced India to employ a security-centric and unilateral approach to border management with emphasis on hardening the borders to cross-border trade and travel and keeping the border areas underdeveloped to act as a buffer against external conventional threats. Besides discussing the threats and challenges that India faces along the borders, the book aims to develop an understanding of India's border management practices by analysing various programmes and initiatives such as the raising of border guarding forces; building of physical and electronic fences; the establishment of modern facilities for smoothening legitimate cross-border travel; the development of the border areas through special programmes; and increasing trade and connectivity as well as other cooperative bilateral mechanisms. Print edition not for sale in South Asia (India,

The Intersectional Approach Michele Tracy Berger, Kathleen Guidroz, 2010-01-01 Intersectionality, or the consideration of race, class, and gender, is one of the prominent contemporary theoretical contributions made by scholars in the field of women's studies that now broadly extends across the humanities, social sciences, and natural sciences. Taking stock of this transformative paradigm, *The Intersectional Approach* guides new and established researchers to engage in a critical reflection about the broad adoption of intersectionality that constitutes what the editors call a new social literacy for scholars. In eighteen essays, contributors examine various topics of interest to students and researchers from a feminist perspective as well as through their respective disciplines, looking specifically at gender inequalities related to globalization, health, motherhood, sexuality, body image, and aging. Together, these essays provide a critical overview of the paradigm, highlight new theoretical and methodological advances, and make a strong case for the continued use of the intersectional approach both within the borders of women's and gender studies and beyond. (En)Gendering the War on Terror Kim Rygiel, 2016-03-03 The war on terror has been raging for many years now, and subsequently

there is a growing body of literature examining the development, motivation and effects of this US-led aggression. Virtually absent from these accounts is an examination of the central role that gender, race, class and sexuality play in the war on terror. This lack of attention reflects a continued resistance by analysts to acknowledge and engage identity-related social issues as central elements within global politics. As this conflict spreads and deepens, it is more important than ever to examine how diverse international actors are using the war on terror as an opportunity to reinforce existing gendered, raced, classed and sexualized inter/national relations. This book examines the official war stories being told to the international community about why and against whom the war on terror is being waged. The book will benefit students, scholars and practitioners in the areas of international relations, women's studies and cultural studies.

The United Nations, Indo-Pacific and Korean Peninsula Shin-wha Lee, Jagannath P. Panda, 2023-08-18 The United Nations, Indo-Pacific and Korean Peninsula focuses on the United Nations (UN) and its frameworks to examine the power politics on the two of the world's more politically sensitive and geo-strategically crucial regions of the Korean Peninsula and the Indo-Pacific. This book provides answers to broader questions that are relevant to the global emerging peace architecture. The book is divided into three parts: global, Indo-Pacific and the Korean Peninsula. The first part analyses the competing world views of the U.S, China, Japan, and Korea and the evolution of UN debates on global and regional security, with special emphasis on the Indo-Pacific and the Korean Peninsula. The second part concerns major bilateral or multilateral security issues facing Indo-Pacific countries and their UN debates in this regard. In particular, with new developments in the Indo-Pacific, such as the Quad process involving the Australia-India-Japan-United States and an anticipated expansion of the Group of Seven (G-7), chapters analyse how these mechanisms expand their focus within the scope of Indo-Pacific power politics. Part three focuses on the UN centered debates on two Koreas and their strategic fallouts at regional and global levels. Examining the security order evolving around the politics of the Indo-Pacific regions and Korean Peninsula and analysing the relevance of the UN and its mechanisms, this book will be of interest to researchers studying International Relations, Security Studies, Asian Studies, in particular Korean Studies and the Indo-Pacific.

Diaspora and Hybridity Virinder Kalra, Raminder Kaur, John Hutnyk, 2005-09-20 'Diaspora & Hybridity deals with those theoretical issues which concern social theory and social change in the new millennium. The volume provides a refreshing, critical and illuminating analysis of concepts of diaspora and hybridity and their impact on multi-ethnic and multi-cultural societies' - Dr Rohit Barot, Department of Archaeology and Anthropology, University of Bristol What do we mean by 'diaspora' and 'hybridity'? Why are they pivotal concepts in contemporary debates on race, culture and society? This book is an exhaustive, politically inflected, assessment of the key debates on diaspora and hybridity. It relates the topics to contemporary social struggles and cultural contexts, providing the reader with a framework to evaluate and displace the key ideological arguments, theories and narratives deployed in culturalist academic circles today. The authors demonstrate how diaspora and hybridity serve as problematic tools, cutting across traditional boundaries of nations and groups, where trans-national spaces for a range of contested cultural, political and economic outcomes might arise. Wide ranging, richly illustrated and challenging, it will be of interest to students of cultural studies, sociology, ethnicity and nationalism.

Reframing the Buffer State in Contemporary International Relations Bibek Chand, 2023-05-17 This book explores buffer states' agency beyond being highly interactive spaces for the competing strategic and security interests of larger powers. Analyzing

21 political events, the author offers a new conceptual framework for the buffer state, which emphasizes strategic utility and agency. Applying this to the case study of Nepal as a buffer state between India and China, he offers a systematic analysis of Sino-Indian interests in the wider region, and Nepal's interactions with and reactions to them, and argues that the buffer state in contemporary international relations is characterized by intense competitive overtures from its contending neighboring states. However, the buffer state is not just a spectator but an active participant that consistently assesses and reassesses its geopolitical position in between much larger competing powers. This reading offers a new understanding of the buffer state as a highly dynamic political space wherein the levels of influence and strategies of bigger powers can be examined. Aimed at a multidisciplinary audience, this book will be of particular interest to scholars, practitioners and students of international relations, security studies, strategic studies, and Asian Studies.
