Decoding the Mechanisms of Antikythera Astronomical Device Jian-Liang Lin, Hong-Sen Yan, 2015-10-26 This book presents a systematic design methodology for decoding the interior structure of the Antikythera mechanism, an astronomical device from ancient Greece. The historical background, surviving evidence and reconstructions of the mechanism are introduced, and the historical development of astronomical achievements and various astronomical instruments are investigated. Pursuing an approach based on the conceptual design of modern mechanisms and bearing in mind the standards of science and technology at the time, all feasible designs of the six lost/incomplete/unclear subsystems are synthesized as illustrated examples, and 48 feasible designs of the complete interior structure are presented. This approach provides not only a logical tool for applying modern mechanical engineering knowledge to the reconstruction of the Antikythera mechanism, but also an innovative research direction for identifying the original structures of the mechanism in the future. In short, the book offers valuable new insights for all readers who are interested in the Antikythera mechanism.

Medical Sexism Jill B. Delston, 2019-10-31 Doctors routinely deny patients access to hormonal birth control prescription refills, and this issue has broad interest for feminism, biomedical ethics, and applied ethics in general. Medical Sexism argues that such practices violate a variety of legal and moral standards, including medical malpractice, informed consent, and human rights. Jill B. Delston makes the case that medical sexism serves as a major underlying cause of these systemic and persistent violations. Delston also considers other common abuses in the medical field, such as policy on abortion access and treatment in childbirth. Delston argues that sexism is a better explanation for the widespread abuse of patient autonomy in reproductive health and health care generally. Identifying, addressing, and rooting out medical sexism is necessary to successfully protect medical and moral values.

Global Citizenship Nigel Dower, John Williams, 2016-04-22 The idea of global citizenship is that human beings are citizens of the world. Whether or not we are global citizens is a topic of great dispute, however those who take part in the debate agree that a global citizen is a member of the wider community of humanity, the world, or a similar whole which is wider than that of a nation-state or other political community of which we are normally thought to be citizens. Through four main sections, the contributors to Global Citizenship discuss global challenges and attempt to define the ways in which

globalization is changing the world in which we live. Offering a breadth of coverage to the core theme of the individual in a global world, Global Citizenship combines two factors-the idea of global responsibility and the development of institutional structures through which this responsibility can be exercised.

Breastfeeding Janet Dalzell, Elizabeth Rogerson, 2018-10-08 In recent decades, global healthcare professionals and organisations have formed a wide, evidence-based consensus that breastfeeding is usually the best option for both mother and baby. However, women and professionals alike often face a sea of shifting attitudes and values, and complex social, cultural, political and economic factors that may influence women's feeding decisions. This book examines the global evidence, and the factors that affect women's decisions around initiating breastfeeding and maintaining it through the first year of their children's lives. It outlines potential areas for development and policy change at practitioner and strategic levels, and shows how health professionals can effectively communicate and provide information to help women make unpressured but informed decisions. Breastfeeding - Contemporary Issues in Practice and Policy is essential reading for healthcare professionals, policy movers and shapers, and all those with an interest in breastfeeding who wish to influence the development of related policies, practices and healthcare services.

Modern British Playwriting: 2000-2009 Dan Rebellato, 2013-12-16 Essential for students of theatre studies, Methuen Drama's Decades of Modern British Playwriting series provides a comprehensive survey and study of the theatre produced in each decade from the 1950s to 2009 in six volumes. Each volume features a critical analysis and reevaluation of the work of four/five key playwrights from that decade authored by a team of experts, together with an extensive commentary on the period . Edited by Dan Rebellato, *Modern British Playwriting: 2000-2009* provides an authoritative and stimulating reassessment of the theatre of the decade, together with a detailed study of the work of David Greig (Nadine Holdsworth), Simon Stephens (Jacqueline Bolton), Tim Crouch (Dan Rebellato), Roy Williams (Michael Pearce) and Debbie Tucker Green (Lynette Goddard). The volume sets the context by providing a chronological survey of the decade, one marked by the War on Terror, the excesses of economic globalization and the digital revolution. In surveying the theatrical activity and climate, Andrew Haydon explores the response to the political events, the rise of verbatim theatre, the increasing experimentation and the effect of both the Boyden Report and changes in the Arts Council's priorities. Five scholars provide detailed examinations of the playwrights' work during the decade, combining an analysis of their plays with a study of other material such as early play drafts and the critical receptions of the time. Interviews with each playwright further illuminate this stimulating final volume in the Decades of Modern British Playwriting

series.

Legal and Ethical Issues for the IBCLC Elizabeth C. Brooks, 2012-07-25 Legal and Ethical Issues for the IBCLC is the only text that covers the day-to-day legal and ethical challenges faced by the International Board Certified Lactation Consultant (IBCLC) in the workplace--in any work setting or residence. Since lactation management crosses many disciplines in the healthcare arena, most IBCLCs carry other licenses and titles. Consequently, what they can and cannot do while performing their lactation consultant role is of vital importance, information that is often difficult to find. Legal and Ethical Issues for the IBCLC is a practical resource that provides guidance on what is proper, legal, and ethical IBCLC behavior. It reflects the 2011 IBLCE Code of Professional Conduct and discusses how to devise an appropriate, safe, legal, and ethical plan of action in the consultation of a breastfeeding dyad.

Breastfeeding and Media Katherine A. Foss, 2017-06-14 This book centers on the role of media in shaping public perceptions of breastfeeding. Drawing from magazines, doctors' office materials, parenting books, television, websites, and other media outlets, Katherine A. Foss explores how historical and contemporary media often undermine breastfeeding efforts with formula marketing and narrow portrayals of nursing women and their experiences. Foss argues that the media's messages play an integral role in setting the

standard of public knowledge and attitudes toward breastfeeding, as she traces shifting public perceptions of breastfeeding and their corresponding media constructions from the development of commercial formula through contemporary times. This analysis demonstrates how attributions of blame have negatively impacted public health approaches to breastfeeding, thus confronting the misperception that breastfeeding, and the failure to breastfeed, rests solely on the responsibility of an individual mother.
